ring, bringing before the judge some powerful animals. Premvictor is a good horse with plenty of substance and goes finely at the walk. The second animal, entered by Lord Rothschild, was purchased by Mr. Burgess to add to his already excellent stud at Wenona. He is a little tall and rough, but has a powerful build, and strength stands out all around. The third horse, with the superfluous name, was picked by many as a winner, being a stallion of outstanding quality, very low set, with a wonderful square build. His action wasn't up to the level of his conformation, but was not by any means poor.

THREE-YEAR-OLD STALLIONS.

First, Burgess & Son on Bank Jack Tar (22961).
Second, Finch Bros. on Black Lad (23322).
The Burgess entry is a little on the tall order, with heavy legs and feet, and not very much feather, and stood above a glossy black with pretty feather and much more of the low-down, business-like colt. Finch Bros. had a good colt in the second prize winner and he might possibly have won first if he had shown the judge he could travel.

TWO-YEAR-OLD STALLIONS.

First, Burgess & Son on Lymm Jumbo II. (23900).
Second, Finch Bros. on Finch's Justice 8425.
Not a little criticism was called forth on the placing of this class, for the second colt had quality, finish and style not found in the first prize winner, but didn't show quite as heavy a middle. He was nearer the ground and had better pasterns. The big brown is, however, a useful sort and is the type to get good geldings.

YEARLING STALLIONS.

First, Burgess & Son on King's Drayman (23907).
Second, Finch Bros. on Finch's Kind 8427.
Third, Soderberg on Noble King 8478.
Fourth, Finch Bros. on Finch's Buster Brown 8322.
Four high-class yearlings constituted a class which compared well with any Shire class shown. A good little bay which had lots of quality and style to back him for first place won over Finch's Kind because of a little lack of style in his make up and his going. A drafty little fellow, black in color, with the finish so often associated with that color, stood third over Finch's Buster Brown which has held a higher position at other fairs.

No aged mares were shown.

THREE-YEAR-OLD MARES.

Only one entry, Mountjoy's Lady Wakefield, a dark bay with a great, strongly-coupled body and depth of muscling in hind quarters, was shown, and was awarded the blue ribbon.

TWO-YEAR-OLD MARES.

First, Soderberg on Osco Sylvia 8206.
Second, Finch Bros. on Ruddington Alberta (46842).
The smaller filly took first away from Finch's colt, because of straighter, stronger action and more spring of rib. A large, somewhat leggy bay with white feet, but strongly built, is Ruddington Alberta, an imported mare.

YEARLING FILLIES.

First, Cochran on Minnehaha 8423.
Second, King Edward VII. on Buscot Vain Maid, Vol. 28.
Third, Finch Bros. on Joliet's Clara 8164.
A very fine actor, with good solid feet, lots of quality and full in the middle, took first, as she has usually been doing this fall. Her nearest competitor was one of King Edward's exhibit, a bit long in the underline, a little rough in appearance and not so heavy on haunch as Minnehaha, but with feet as good as one could wish, and a steady mover.

FOUR ANIMALS GET OF ONE SIRE.

Finch Bros. on get of Dunsmore Justice.
TWO ANIMALS PRODUCE OF ONE DAM.
First, Finch Bros.
Second, Cochran.

CHAMPION STALLION.

Premvictor, owned by Robt. Burgess & Son. Reserve ribbon was awarded King's Drayman, the yearling winner from the same stables.

CHAMPION MARE.

Minnehaha, owned by Cochran, reserve going to Osco Sylvia from the Soderberg barns.
BEST THREE MARES OWNED BY EXHIBITOR.

Finch Bros. on Joliet's Clara, Pearl and Ruddington Alberta.

Marlin

Here is the newest and lightest .22 repeating rifle on the market—the Marlin Baby Feather-Weight.

Think of a 3 pound 10 oz. repeating rifle which is as effective as any .22 of equal length of barrel in the world!

The extra carrier, quickly installed, makes the rifle handle the .22 long-rifle as well as the .22 short cartridge.

No sacrifice of Marlin quality has been made in producing the light Marlin Model No. 18. All the good old Marlin features are there: the solid top and side ejection, the forged steel working parts and the fine steel barrel.

Send six cents for catalogue, which tells in detail about this wonderful little rifle.

The Marlin Firearms Co.,

135 Willow Street,

New Haven, Conn.

BEST IMPORTED STALLION.

Burgess & Son on Premvictor.

BEST IMPORTED MARE.

Finch Bros. on Ruddington Alberta.

BEST AMERICAN-BRED STALLION.

Finch Bros. won first.

BEST AMERICAN-BRED MARE.

Minnehaha won for Cochran.

FRENCH COACH HORSES.

The show of these great actors, coach, hackney, saddlers, whatever they chance to be, may always be depended upon to attract attention. The immense crowds which came Wednesday afternoon were treated to a wonderful exhibit. Competition was sufficiently keen to compel each horse to show his very best paces in order to do himself justice. The French Coach classes did not bring out any Hannibal, for there were none which combined as perfect breed type with extreme action so happily as does the coach king of America, but some would push him very, very hard on action, and others showed marvelous development of coach type. This breed reminds one not a little of some of our standard-bred trotters, but are not quite so rangy and show more attractive conformation. Many American lovers of the heavy harness horse are experimenting with this breed from sunny France, with a view of producing a high-class actor from native mares. From the number of exhibitors and the general high quality of the exhibit one may have sufficient reason to state that they are a deservedly popular breed in America. Their proud, intelligent carriage won many admirers among the spectators and round after round of applause was given several of the best when they were in action. Dunham & Fletcher, of Wayne, Ind., had twelve good entries; E. M. Barton, of Hinsdale, Ill., showed thirteen of no ordinary ones; McLaughlin Bros., of Columbus, Ohio, kept up their reputation as good horsemen with their exhibit of ten head. Judge Harry McNair, a horse commission man of Chicago, placed the awards to the satisfaction of all concerned. In the three-year-old class a beautiful black with a gracefully-flowing tail, stood out in this French Coach show. The long tail looked odd in a ring of docked switches, and he showed a different type from that recognized by the breeders of these horses, reminding one more than a little of the famous saddle stallion, Jack o' Diamonds. His action and beauty took the crowded galleries by storm, and no doubt many of the visitors were disappointed in seeing him go no higher than fourth place, but his type would not allow of it. Then, too, there were three very high-class stallions above him. The winner of the championship and first of the aged stallions is a proud black, possessing splendid action. The winners in the female classes are individuals of exceptional merit and in point of quality, if not of numbers, kept up their share of the exhibit. Awards:

AGED STALLION:

(6 entries.)

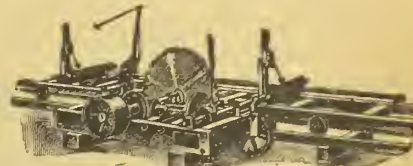

First, McLaughlin Bros. on Chandlerinagor 4140.

Second, Barton on Troarn 849.

Third, Barton on Guillard 2747

Fourth, McLaughlin Bros. on Crassvillee 4055.

The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeders today know that grain should be mixed with "roughness." The cob is the best mixture for calves and steers. "The Dean" Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2 1/2 inch slices and cuts from 30 to 40 bushels an hour. Calves thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

Soon Pays for Itself

Enterprise Wind Mill Co., 24 Main St., Sandwich, Ill.

THREE-YEAR-OLD STALLION.

(9 entries.)

First, McLaughlin Bros. on Distingue 4124.

Second, McLaughlin Bros. on Demi Devil 4150.

Third, McLaughlin Bros. on Dictateur 4154.

Fourth, Barton on Trappy 3817.

TWO-YEAR-OLD STALLIONS.

(4 entries.)

First, McLaughlin Bros. on Ecageul 4133.

Second, Barton on Enchanter 3827.

Third, Barton on Marquette 3834.

MARE FOUR YEARS OR OVER.

(2 entries.)

First, Barton on Esmeralda 1360.

Second, Barton on Ismene 1964.

THREE-YEAR-OLD MARE.

Champion Mare—Barton on Esmeralda.

FOUR ANIMALS GET OF ONE SIRE.

Barton on Vengeur.

TWO ANIMALS OUT OF ONE MARE.

Barton first and second.

CHAMPION GROUP OF FIVE FRENCH COACHES OWNED BY EXHIBITOR.
McLaughlin Bros.

HACKNEYS.

No classes shown at the International gave onlookers a better time than did the Hackneys. Unfortunately some of the entries were withdrawn on account of some disagreement over the personnel of the judging committee, this being the reason why the notable entries of the Truman's Pioneer Stud Farm do not appear in the premium list. Graham Bros., of Claremont, Ont., practically swept the boards, receiving as they did first in the four-year-old stallion class over as well as under fifteen and a quarter hands high, first in the three-year-old stallions and first in the two-year-olds. Messrs. Robert Burgess & Son, of Wenona, Ill., and Alexander Galbraith & Son, of Janesville, Wis., put up some good competition against Graham Bros. in the four-year-old stallion class and in the three-year-olds. Hackney history made last week at the International might have read differently had the Truman horses competed, because it has generally been conceded that this firm owns one of the greatest heavy-harness horses in their four-year-old stallion that has ever been brought to this country.

COILED SPRING FENCE

Closely Woven. Can not Sag. Every wire and every twist is a brace to all other wires and twists full height of the fence. Horse-high, Bull-strong, Pig-tight. Every rod guaranteed. **30 DAYS FREE TRIAL** and sold direct to farmer, freight prepaid, at lowest factory price. Our Catalogue tells how wire is made—how it is salvaged—why some is good and some is bad. Its brimful of fence facts. You should have this information. Write for it today. It's Free. **KITSELMAN BROS.,** Box 290, MUNCIE, INDIANA.

4.50 Buys Best All-Steel Farm Gate

Cheap as wood. Lasts a lifetime. 12 ft. long; 54 in. high. Resists all kinds of stock. Also Farm Fence, Ornamental Wire and Wrought Iron Fences. Catalogue Free. **Ward Fence Co.,** Box 302 Marion, Indiana

Cheap as Wood.

We manufacture Lawn and Farm FENCE. Sell direct shipping to users only, at manufacturers' prices. No agents. Our catalogue is Free. Write for it today. **UP-TO-DATE MFG. CO.,** 927 10th St., Terre Haute, Ind.

Made of High Carbon coiled wire. We have no agents. Sell direct to user at factory prices on 30 days free trial. We pay all freight. Catalogue shows 57 styles and heights of farm and poultry fence. It's free. Buy direct. Write today **COILED SPRING FENCE CO.,** Box 29, WINCHESTER, INDIANA.

One of the oldest and largest concerns in the world dealing in furs and hides, is probably that of Messrs. Andersch Bros., of Minneapolis, Minn. The illustration on this page shows their large warehouse and offices. No doubt many of our readers have little idea of the magnitude of this firm's business. Their operations extend all over the world. They buy direct from trappers and other original producers and sell only to actual manufacturers and are in a position to pay the highest market prices at all times. Therefore, when one is in a position to do

business direct with a firm like Andersch Bros. they should write for price list. This firm has issued a valuable book called "The Hunter's and Trapper's Guide," which tells all about furs and hides, how to handle and prepare them for market. It cost several thousand dollars to prepare the book, but it will be sent free to readers of this paper who write for it. It sums up the practical knowledge and experiences of the past 200 years or more of the American fur trader. Write them today for their hide and fur price list. Address Messrs. Andersch Bros., Dept. 19, Minneapolis, Minn.

while their famous Hackney mare has been a winner at the great horse shows. From the standpoint of the public the disagreement that caused the withdrawal of these horses was a matter to be keenly regretted.

DRAFT GELDINGS.

This exhibit is always a feature of the evening program at the International, and it is a show worth going far to see. The market horse is here seen in a state of perfection, strength, endurance and intelligence being seen here as is possible nowhere else in live stock showman in America. Morris' big Clydesdales surely warm the heart of the Clyde lover, while the Percheron man finds plenty of material to swell him out in the massive fellows shown by Swift and Pabst. Probably no man in America is more of an authority on draft gelding than the man who has officiated as judge of that class at several Internationals, viz., Prof. C. F. Curtiss, of Ames, Iowa. Not only is it worth spending time and money to see the horses themselves, but the magnificent equipments and the skilful handling of the teams by their drivers help to make the exhibit particularly strong. King Edward had a wonderful gelding on exhibition this year. The Clyde people were the only association offering special prizes for draft animals of their breed, and the famous Duncan, of Nelson Morris & Co.'s great six, was best in that class. Those who had entries were: King Edward VII. of England (2 head); Armour & Co., Chicago (12 head); Morris & Co., Chicago (8 head); Oltmanns Bros., Watseka, Ill. (1 head); Schwarzschild & Sulzberger, Chicago (10 head); Swift & Co., Chicago (12 head). Awards: Class 49—Single mare or gelding weighing over 1,750 pounds, to halter: First to Armour & Co., Union Stock Yards, Chicago.

CUTTER BARGAINS

\$4.95 FOR THIS NEW 1907 CUTTER GEAR, complete as shown and all ready to attach to your buggy body. In twenty minutes you can change your buggy into a complete cutter.

\$8.95 FOR THIS NEW 1907 Piano Body CUTTER. Pronounced by everybody who has seen it to be the handsomest square body cutter on the market.

\$15.75 FOR THE FINEST HIGH GRADE 1907 MODEL PORTLAND CUTTER, complete with shafts, ever offered at anywhere near the price, as illustrated.

WE CAN SHIP IN AN HOUR'S NOTICE. We carry a big stock of all styles, all shown in our latest FREE Cutter Catalogue, which is sent FREE, postpaid, on request. This new catalogue, handsomely printed in colors, tells all about our wonderfully low prices and liberal guarantees, describes everything in cutters, sleighs and bobbeds; the most interesting Cutter Catalogue ever printed, the greatest cutter offer ever made. Write at once, ask us for the FREE Cutter Catalogue, and have your cutter in time for the first snow.

Class 52—Pair horses weighing over 3,500 pounds, to wagon: First to Morris & Co.; second to Armour & Co.; third to Swift & Co., Union Stock Yards, Chicago; fourth to Schwarzschild & Sulzberger.

Class 53—Three horses, abreast to wagon: First to Armour & Co.; second to Morris & Co.; third to Swift & Co.; fourth to Schwarzschild & Sulzberger.

SHEPHERD PONIES.

The little beauties are always attractive, but always interest the youngsters, and it is safe to say that not a child saw the International that didn't spend all the time his parents would allow him in the barns where were kept the pigmy horses. For such an audience as is usually present at the evening programs, the Shetlands are not without their merits as drawing attraction. W. J. Sampson, of Youngstown, Ohio, officiated as judge and had plenty to do. Friday some of the ponies were out in the ring going through their tricks for the benefit of the public school for crippled children. It certainly did one's heart a world of good to see big Tom Bell leading the little brown pony around to kiss and shake hands with the happy little unfortunates. The exhibitors were: C. E. Bunn, Peoria, Ill. (7 head); G. H. Simpson, Chicago, Ill. (3 head); T. S. Simpson, Jr., Rogers Park, Ill. (4 head). Awards:

Class 87—Shetland pony, either sex, not exceeding forty-six inches, three years old or over, shown under saddle: First to Squirrel, owned by Theodore S. Simpson; second to Imp. Vordillaide 3d, owned by George H. Simpson; third to Dwarf Oak, owned by C. E. Bunn.

Class 88—Shetland pony, either sex, not exceeding forty-six inches, shown to appropriate vehicle: First to Grandee, owned by Charles E. Bunn; second to General Shafter, owned by Charles E. Bunn; third to Imp. Vordillaide 3d, owned by George H. Simpson.

SWINE.

The swine department of the International as a narrow proposition has apparently come to the jumping off place, as the numbers in most of the classes this year would make a humiliating exhibit at a county fair. This is not equivalent to saying that good stuff could not be found in nearly all the classes, because when such breeders as John Francis & Sons, of New Lenox, Ill., of Poland fame; the Iowa Agricultural College with its numerous breeds; also the Wisconsin and Ohio universities; Whitehall Farm, of Yellow Springs, Ohio, and E. H. Deal & Son, of Elwood, Ill., both well known in Duroc circles; and Thos. H. Canfield, Lake Park, Minn., and J. E. Brethour, of Ontario, the two most extensive breeders of Large Yorkshires on the continent—when men and firms like these turn out they generally bring something good with them. Then the Hampshires were out in numbers from the herds of W. H. Goodwine, of Potomac, Ill., and E. C. Stone, Armstrong, Ill. The numbers in but few classes were too small for keen competition, though there was a good contest between the two noted Yorkshire herds on the grounds. Both Messrs. Goodwine and Stone put up a good fight in the Hampshires and the state institutions were out with some good stuff.

In the lineup for the sweepstakes barrow any age or breed the Ohio University drove out a smooth 275-pound Berkshire; the Iowa Agricultural College a 435-pound Poland China and a 500-pound Duroc; Thomas H. Canfield a 600-pound Yorkshire, and Stone and Goodwine, respectively, a 300 and 250-pound Hampshire. A committee of five placed the awards and to the surprise of almost every onlooker it fell to the Canfield Yorkshire. This pig, from the standpoint of breed type and quality, was faultless, but it was generally believed that his weight would tell against him, taking him into the class of heavy bacon—never a market-topping type. The Poland shown by the Iowa institution stood inspection well, being of the smooth

hog-all-over type—an individual that will not be duplicated in many a day. In downing this kind Mr. Canfield brought great honor to his own renowned herd and fresh laurels to the breed. But the question still remains unanswered, "Where are we at?" when a 600-pound hog of any color, age or breed can win at the Union Stock Yards, Chicago, against a well-made 275-pound Berkshire or a well-high perfect Poland of 435 pounds. Will a car load win and will they top the market ever?

Turning to the champion pen of barrows we find the ribbon going to three April Berkshires just at 200 pounds each, belonging to the Iowa Agricultural College—winning against some 400-pound Polands shown by the same institution and a pen of Mr. Canfield's heavy bacon hogs.

AWARDS ON CARLOAD HOGS.

There were but nine carloads of swine entered at the International this year as compared with twelve last year. C. L. Hess, of Hopedale, Ill., won the grand championship prize with a carload of Poland Chinas. J. McMahon, of Lancaster, Wis., entered the only load in the class ranging in weight from 250 to 350 pounds. In the class under 250 pounds the load second to Mr. Hess, who won first, was owned by Horn Bros., of Valparaiso, Ind., with Chester Whites, while third in this class went to Wineberg & Co., of Rushville, Ill., on Berkshires. Horn Bros. also won first in the under 200 pound class with Berkshires, with A. Wineberg, of Augusta, Ill., second with grade Berkshires, and R. L. Bollman, of Coal Valley, Ill., third on Hampshires.

BREEDING SHEEP.

The most notable improvement over last year's exposition found in any of the departments was in this division. The sheep barns were taxed to the limit with numbers, while the quality ranked fully as high, if

Largest Hide and Fur House in Iowa.

The above illustration shows the large new building of C. L. Percival Co., 1102 Cherry St., Des Moines, Iowa, one of the largest and most reliable hide and fur houses in the West, having been in business since 1886. If interested, write the firm at the above address, and also see their advertisement on page 29.

THE OLD RELIABLE Anti-Friction Four Burr Mills.

Double the Capacity of other Mills. / TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 lbs. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill. Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

HOG WORMS ARE KILLING YOUR HOGS

Dead Shot Worm Killer Kills the Worms and Saves the Hogs.

One hundred seventy-five million dollars worth of hogs died last year from so-called hog cholera. Ninety per cent of all losses originated from hog worms, the certain fore-runner of constipation, fever and hog cholera. "Farmers," don't experiment with uncertainties, but send direct to us for our "DEAD SHOT WORM KILLER." Five cents per head is all it costs to rid your pigs of hog worms. Price, 3 lbs., \$1.50; 7 lbs., \$3.00; 10 lbs., \$4.00. Express charges prepaid to your nearest express office. Send today and you will get the remedy tomorrow. Address,

Farmers Hog and Cattle Powder Company, Shenandoah, Iowa.

STEREOSCOPES FOR NAMES OF FARMERS

The Farm Magazine Co. wants names of farmers likely to be interested in their big, handsomely illustrated farm paper. For 5 names they will allow our readers 25c and a stereoscopic outfit. The subscription price is 50c. Send 5 names and addresses of farmers and 25c. The publishers will enter you as a subscriber fully paid for a year. They will mail you FREE a boy's and girl's stereoscope and 50 views.

Address, **FARM MAGAZINE CO., BOX H OMAHA, NEB.**

not a little higher than at any previous International. In many of the classes the contest was keen between Canadian and American exhibitors, and in this respect the sheep show was really and truly an International affair. In the fat classes, especially, the Canadians were strong in all their exhibits, and western breeders did well to get a peep in occasionally. The following is a list of the awards in the breeding and fat classes:

SHROPSHIRE.

Class 1—Ram, two years or over: First to G. Howard Davison, Millbrook, N. Y.; second to John Campbell, Woodville, Ont.; third to J. G. Hammer, Brantford, Ont.

Class 2—Ram one year and under two: First to F. W. Harding, Waukesha, Wis.; second to G. Howard Davison; third to Lloyd-Jones Bros., Burford, Ont.

Class 3—Ram lamb under one year: First and third to G. Howard Davison; second to Henry L. Wardwell, Springfield Center, N. Y.

Class 4—Ewe one year and under two: First and third to John Campbell; second to Lloyd-Jones Bros.

Class 5—Ewe lamb under one year: First to Chandler Bros., Kellerton, Iowa; second to G. Howard Davison; third to Henry L. Wardwell.

Class 6—Flock consisting of one ram one year or over, two yearling ewes and two ewe lambs: First to G. Howard Davison; second to Lloyd-Jones Bros.; third to John Campbell.

Class 7—Four lambs of either sex, the get of one sire: First to W. S. Carpenter, Simcoe, Ont.; second to Henry L. Wardwell; third to John Campbell.

Class 8—Champion ram: Awarded to G. Howard Davison; highly commended, John Campbell, Woodville, Ont.

Class 9—Champion ewe: Awarded to G. Howard Davison.

Breeding Shropshire special for Wardwell prize: Awarded to Sam Bradburn.

SOUTHDOWNS.

Class 10—Ram two years or over: First to George McKerrrow & Sons, Pewaukee, Wis.

Class 11—Ram one year and under two: First to Telfer Bros., Paris, Ont.

Class 12—Ram lamb under one year: First to Telfer Bros.

Class 13—Ewe one year and under two: First to George McKerrrow & Sons.

Class 14—Ewe lamb under one year: First to Telfer Bros.

Class 15—Flock, consisting of one ram one year old, two yearling ewes and two lambs: First to Telfer Bros.

Class 16—Four lambs of either sex, the get of one sire: First to Telfer Bros.

Class 17—Champion ram: Awarded to Telfer Bros.

Class 18—Champion ewe: Awarded to George McKerrrow & Sons.

OXFORD DOWNS.

Class 19—Ram two years or over: First

(Continued on page 26.)

OUR DAIRY DEPARTMENT

ALL communication relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

THE FLAW IN OUR DAIRYING SYSTEM.

Professor McKay, of the Iowa Agricultural College, discusses the responsibility of dairy producers in this department this week, and we call special attention to what he has to say on the subject. Professor McKay indulges in a little plain talk when he says that American butter has been rapidly declining in quality during the last five or six years, and yet his prominence as a dairy expert must compel every reader to accept this statement as a plain, bald truth.

It is singularly unfortunate that a partial cause of this deterioration is the hand separator, because it has always been our opinion that the hand separator was solving some of the dairyman's most difficult problems. It enables him to utilize his skim milk while it is in ideal condition to feed, and it saves much labor for the womenfolk in the washing of utensils. If it is simply the matter of giving more attention in the future to the washing of the separator bowls, every man who owns a separator should take it to heart that it is his solemn duty, if he sends his cream to creameries, or even if he manufactures butter at home, to wash the separator every time it is used and scald it out thoroughly at least once a day.

It should be borne in mind by every dairyman that we cannot live down a bad reputation that it has required years in building, in a short time, and if American butter is now in ill repute in our best markets there should be unanimity of action on the part of every man from this time forth to change that reputation. We have the feeds in the corn belt; we have the dairy cows, and we believe that we have the necessary apparatus and creamery talent to make the best product in the world. We simply need to be less careless, because the passing of milk through a filthy separator bowl is downright carelessness. We hope that all our readers who are at all interested in dairying will take the time to carefully peruse what Professor McKay has to say.

Those Valuable Strippings.

To the Editor of The Homestead:

The amount of milk that some milkers leave in the udder as strippings would almost pay the cost of the milking. Even the ordinary milker who thinks himself quite careful leaves a considerable amount of the richest part of the milk undrawn.

The remedy is more complete milking. You may suspect now that we are about to recommend the plan of working the udder or manipulating it as some designate the process that scientists advocate. And while these careful students of

milk may often be a bit theoretical, they are commencing at the right end for improvement. It is a splendid idea to give the cows plenty of feed of the right kind, but the feed is wasted if only a part of the milk is secured.

Some form of working the udder is practical. It must be simple and quickly done. As soon as the udder has been reduced to where the milk can be drawn only by stripping the teats, grasp a quarter in one hand and gently squeeze the milk that remains, toward the teat, which is held in the other hand and compressed whenever it fills. Repeat this on each quarter and when done once, make another round if milk still comes. This insures a thorough piece of work. Not over half a minute, or a full one, is required at most. And the amount of milk, or rather cream, it should be called, for stripping commonly tests 10 per cent, will be a surprise. We are not guessing when we say that the cream pitcher could be filled twice a day on this rich after-milk in many a stable. Just figure it as dollars and cents. It is not a hard matter to draw half a cup of milk from a cow after most milkers. This amount twice a day makes a pound of milk which tests 10 per cent. On twelve cows the amount would be as many pounds, or over a pound of butter. Twenty cents is good pay for a half-hour's work spent in manipulating the udders. Besides this, the period of lactation is extended by the stimulation. True, the little savings seem trivial. There are many leaks in the dairy barn. This is one, and one that may be easily prevented. L. E. T.

Responsibility of Dairy Producers.

To the Editor of The Homestead:

When we look over the list of the world's surplus products we find that farmers are nearly all doing the same thing. They are putting their surplus products in the same granaries of the world, and those granaries, or markets, are setting the prices for all. Prices in London, Denmark, Australia and New York are practically the same, less the difference in freight and quality, unless some shortage occurs. Cheap transportation has brought all civilized countries into close competition, particularly is this true in dairying. Butter being a condensed product, it can be transported to the leading markets of the world at very little cost.

It is a deplorable fact that the American butter has been rapidly declining in quality during the last five or six years, or since the date of the introduction of the little farm separator. Today it has practically the poorest reputation of any butter that enters the foreign market. Instead of this, it should stand at the top of the list. This deterioration has become so pronounced that some of the state associations have passed resolutions asking for an amendment of the dairy laws, so that it would be a misdemeanor for anyone to skim milk with an unwashed separator and offer the cream for sale; also for anyone to keep a separator near a pig pen or other sources of contamination that would injure the quality of the milk or cream.

It is a sad fact, yet nevertheless true, that those patrons who get the least returns from their cows are the very ones that cause the most trouble to the creamery man. They are the patrons who do not read dairy literature, or if they read, they do not profit by its teachings. The fact that they are careless with their cows is convincing proof that they would not realize the importance of properly caring for the milk or cream, unless it were brought forcibly to their attention.

No one who has studied agricultural problems will contend that the little farm separator should be done away with. The intelligent farmer realizes the importance of having warm skim milk to feed his young stock.

Now, I believe it is as possible to make good butter under the hand separator system as under the whole milk system, providing the separators are washed and scalded every time they are used, and I would like to have placed over every separator in large letters, "wash and scald." Each lot of cream should be cooled before adding it to the previous lot. It should be unnecessary for me to say that cream should be kept in clean vessels. It would only be a small piece of work to take the parts of the hand separator, that come in direct contact with milk and cream, to the house and there thoroughly wash and scald them. If these precautions

MILK CANS ROB YOU

Look through a microscope at milk set to cream in pans or cans and you'll see how they rob you. You'll see the caseine—the cheese part—forming a spider web all through the milk. You'll see this web growing thicker and thicker until it forms solid curd. How can you expect all the cream to rise through that? It can't. This

caseine web catches a third to half the cream. You stand that loss just as long as you use pans or cans for they haven't enough skimming force to take out all the cream. But, just the minute you commence using Sharples Dairy Tubular Cream Separator, you stop that loss.

Sharples Dairy Tubular Cream Separators have 10,000 times more skimming force than pans or cans, and twice as much as any other separator. They get all the cream—get it quick—get it free from dirt and in the best condition for making Gilt Edge Butter. Caseine don't bother the Tubular. The Tubular is positively certain to greatly increase your dairy profits, so write at once for catalog I-121 and our valuable free book, "Business Dairying."

Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

Iowa Dairy Separator

Write today for catalog 25, and let us send you plenty of proof to back up all we say in this advertisement. Separator made in all sizes from 250 to 750 pounds. Invest one cent in a postal card and learn how to save \$100. Do it today.

THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or
DAIRY QUEEN MFG. CO., FLORA, IND.

are taken, cream can be delivered twice a week during the winter, and three times a week during the summer and be in a sweet condition. When a maker receives such cream he can pasteurize it and by the use of a good starter have it entirely under his control. Old cream, especially when it has been kept at a high temperature, frequently comes to the factory contaminated with molds and yeasts which render it unfit for the making of first class butter. The mold and yeast flavors are quite characteristic of gathered cream butter. Particularly is this true where the cream is produced under the gravity method. This is one of the reasons why an expert butter judge can invariably detect, or classify, butter made from gathered cream. It has been thought by many that this peculiar flavor was the product of bacteria. Investigations conducted at Ames, indicate that molds and yeasts are mainly responsible for this stale, old flavor so commonly found in gathered cream butter. Pasteurization does not seem to remove, or eliminate, flavors of this kind. An ounce of prevention is better than a pound of curing remedies; therefore, low temperatures, frequent delivery, and sanitary methods in handling cream will prevent the flavors referred to.

The flavor of butter is largely a product of fermentation and the kind of flavor that develops will depend on the sanitary methods observed in caring for milk and cream.

The kind of germs that produce good flavors, thrive and grow under sanitary conditions, while those that cause undesirable flavors, thrive best under filthy conditions, and are known as the putrefactive species and cause ordinary decay.

Low temperatures are unfavorable for the development of bacteria of any kind. Consequently, we cool milk and cream to keep them sweet. Frequently, the flavor of farm butter is injured by the cream being kept near foods or vegetables having undesirable odors. These flavors can readily be detected by butter judges and are classified as food flavors. G. L. McKay.

Iowa Experiment Station.

THE YOUTH'S COMPANION CALENDAR FOR 1907.

The new Youth's Companion Calendar for 1907 is both useful and ornamental. The calendar proper is bold, clear type, and is given plenty of space. On its decorative side it is exceptionally beautiful. Each of the four panels presents a masterly reproduction of an original painting. On the first leaf will appear, "A Venetian Scene," by Thomas Moran; on the second, "A Group of Children," by Maud Humphrey; on the third, "A Study in Bird Life," by Giacomelli; on the fourth, "The Blacksmith Shop," by F. Luis Mora. Each is worth separate framing, and for this purpose the panels are loosely tied together, so that each may be exposed in turn, yet all preserved. The panels are twelve inches high by seven and three-quarters inches wide. The calendar is copy-righted and published by the Youth's Companion exclusively for those who send \$1.75 for The Companion for 1907.

THE NE PLUS ULTRA OF ALL PREPARATIONS.

Montezuma, N. Y., Nov. 23, 1905.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

TRESPASS OF CATTLE.

A Subscriber, Iowa City, Iowa.—(1) A's bull broke out of the field into the road and got among B's cows. Is A liable for damages? (2) A's bull was in A's pasture and was not tied, and B's cow broke into the pasture and got with calf by the bull. Is A liable for damages?

Answer.—(1) A is liable for damages because his bull, being upon the public highway, was at large, and that is made unlawful by statute in Iowa. (2) In this case A is not liable for damages. He is not required by law to keep his bull tied. B's cow was trespassing upon A's premises, and if she was injured in any way, B must bear the loss.

LOOKING FOR TROUBLE.

A Subscriber, Monticello, Iowa.—A rented a farm from B for cash rent, and put in a crop of corn on it. A and B lived together on the place. In June they had some trouble and A sold the crop to C for cash, paid the rent to B and moved from the place. (1) Can B prevent C from cutting the corn and hauling it from the place? (2) Can B prevent C from pasturing the stalks after the corn is gathered? (3) C desires to pull the ears of corn from the stalk without removing the husk from the ears. Can B compel him to husk the corn?

Answer.—(1) He cannot. C has just the same right to the crop that A had. (2) When A rented the farm for cash rent, there must have been some understanding between A and B as to the length of time that A was to use the land. Now whatever time that was, belongs by purchase to C, and he has the same right to use the land during such time, as A had. B has no rights against C which he did not have against A. The tenor of these questions indicates that B does not want to act justly with C. B has received his cash rent, and now he apparently wants the crop also, or

some of it, or at least wants to meddle with C's rights. (3) It is none of B's business how C gathers his own corn. He cannot compel C to husk the corn.

PUBLIC LANDS IN WASHINGTON.

Mr. J. M. Armagost, Osceola, Iowa.—(1) Are there any public lands open to homesteads in Washington? (2) If so, under what law can they be entered, and to whom can I write to get information on the subject?

Answer.—(2) There are two or three millions of acres of public lands in Washington subject to homestead entry. (2) The general homestead laws of the United States. There are seven United States land offices in Washington, viz., at North Yakima, Olympia, Seattle, Spokane, Vancouver, Walla Walla and Waterville. You might write to the register of the United States land office at any of these places for information.

EXEMPT PROPERTY—WISCONSIN.

A Subscriber, Grand Rapids, Wis.—I own a house and lot in a city, which I rent to a tenant. Can I hold his household furniture for the rent?

Answer.—By the laws of Wisconsin a debtor can claim exempt from execution, among other things, the following articles, viz.: Beds, bedsteads and bedding necessary for his family; all stoves and appendages and cooking utensils, and other household furniture and goods to the value of \$200. You cannot hold any of these things for the rent which your tenant owes you.

MARITAL TROUBLES.

A Kansas Subscriber.—This correspondent writes a pathetic letter about a wife whose husband owns a good farm of 160 acres and has ample means otherwise, but neglects his wife and children and subjects them to petty annoyances and little meannesses and deprives them of advantages which they ought to enjoy, and behaves in a disgraceful and disrespectful way towards them, generally using coarse and profane language in their presence. The wife wants to know if there is any law in Iowa by which she can obtain her share of the property without getting a divorce.

Answer.—The facts stated in the letter do not constitute grounds sufficient to obtain a divorce in Iowa, neither would they make a cause of action for an order or judgment affording the wife a separate maintenance—certainly she could not compel a division of her husband's property, in her favor, upon such a state of facts. If the parties live in Kansas, and the property is there, an

Iowa court would have no jurisdiction whatever. The letter does not state where the parties live, nor where the property is located. It is very indefinite and unsatisfactory.

OMITTED FROM THE LAW.

Subscribers' Wives, Wiota, Iowa.—A young woman school teacher had an illegitimate child this fall. She was a good teacher. She expects to teach school again just as soon as she is able to do so. She says if she cannot get a certificate where she is known, she will get one where she is not known. Under the circumstances we do not think she is morally qualified to teach our children. Please give us the law on the subject.

Answer.—There is no specific law on the subject. We suppose the law-makers of Iowa never dreamed that such a thing could happen. If the young woman obtains a certificate, and the school board of any district chooses to employ her to teach school, there is no law to prevent it. She evidently has one essential quality for most country district schools—plenty of nerve.

DRAINAGE LAW OF 1904.

A Subscriber, Hedrick, Iowa.—A and B own adjoining farms. A draw or swale starts in A's land and runs down through B's land to a natural watercourse. B has tile drained his land with tile large enough to carry off A's water, and A has offered to pay B a reasonable compensation for using so much larger tile, if B will allow him to turn his drainage water into it, but B refuses. A has an outlet under his circumstances. Has A a right to turn his drainage water on B's land?

Answer.—The drainage law passed in 1904 and now in force, seems to apply perfectly to this case. It is as follows: "Owners of land may drain the same in the general course of natural drainage, by constructing open or covered drains discharging the same into any natural water course, or into any natural depression whereby the water will be carried into some natural water course, and when such drainage is wholly upon the owner's land, he shall not be liable in damages therefor, to any person, persons or corporation."

DENTIST MUST HAVE LICENSE.

A Subscriber, Spring Creek, Mo.—(1) Has a dentist the right to extract and make teeth before he is able to get a diploma? (2) If not, what is the penalty?

Answer.—(1) The law in Missouri provides that it is unlawful for any person to practice dentistry or dental sur-

gery in any of its departments, without obtaining a certificate or license from the state board of dental examiners. This board is appointed by the governor, and will give a certificate or license to any person of good moral character, who holds a diploma from any reputable dental college, without an examination. If a person applies for license, and holds no diploma, he must pass an examination by the board. When a license is issued, the applicant is registered by the board, and must have his license recorded by the clerk of the county court in the county where he practices. (2) The penalty for practicing without a license, is a fine not less than \$50, nor more than \$200, or imprisonment in the county jail not less than twenty nor more than sixty days, or both such fine and imprisonment.

DAMAGE BY CATTLE.

A Subscriber, Earlham, Iowa.—A and B owned adjoining farms. A sold his farm to C, possession to be given in March. Then A sold the crop on the farm to D and moved away from the place. B then turned his cattle in his own field which adjoined the place C bought, knowing that the partition fence which A had kept up was not a lawful fence. (1) Had B a right to do this? (2) Who is liable for the damage done by B's cattle to D's crop?

Answer.—(1) B had a right to turn his cattle into his own field, if his part of the partition fence was a lawful fence. (2) If the cattle broke into D's crop through B's part of the partition fence, then B is liable for damages, but if they broke through the other part of the fence, it not being a lawful fence, then D must bear the loss occasioned by the trespass of B's cattle, because A sold to D the crop as it stood, with no promise or agreement to repair fences, so he is not liable to D for what happened to the crop after the sale, and B is not liable because the cattle did not break through his part of the fence, and he is not responsible for the other fellow's fence.

Beware of Imitators.

The Combination Oil Cure for Cancer and Tumor has its imitators. The Original Oil Cure may be had of the Originator—Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind. Free books upon request.

The Homestead and The Homemaker \$1.25 per year.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

TUMOR.

I have a four year old bay mare that foaled a mule colt last July and just about that time I noticed that there was something wrong with her left eye. The upper lid seemed drawn down and it has been getting worse ever since until now it is a great, hard lump on her lid over an inch long, extending downward and almost covering her eye. It does not seem to hurt her and she is all right otherwise. Have not done anything for it.

A tumor or cyst has formed, and an operation will be the only recourse. Have it attended to by a qualified surgeon.

RICKETY SOWS.

I have bought four sows, intending them for brood sows. I noticed two days after I bought them that one was stiff in the hind legs and walked hump-backed. Now one more is sick and walks stiff. Its stools are not digested, there being whole kernels of corn and oats passed, and they are sort of light colored. They do not seem to be sick. They seem to tremble in the hind legs and stomach. Have been feeding them on oil meal, oats, corn and milk ever since we had them. They are fine looking hogs, large and in good flesh.

The sows are weak in bone, muscle and constitution, partly as an inheritance from their parents and intensified by overfeeding on corn and too little exercise on grass. Each sow should have four ounces of epsom salts in slop and after that be made to live an outdoor life on the lightest of rations and with-

cut corn. Mix lime water freely in food and drink several times a week.

HEAVES.

I have a ten-year-old mare that has the heaves and is run down in flesh. She seems to eat quite heartily and is in heat about half the time. Please advise remedy.

The disease is incurable and mare, being unsound, should not be used for breeding purposes. She apparently has disease of womb or ovaries, and in that case would not conceive if bred. Distress may be somewhat relieved by giving half an ounce of Fowler's solution of arsenic night and morning, feeding oats and straw instead of hay, wetting all food with lime water and never working her soon after a meal.

LAMENESS.

I have a three-year-old mare that became lame in the left shoulder last June. I think she is lame in the point of the shoulder, for it is slightly enlarged on the front side, a little below where the collar comes. After she had been lame about a month I put a rowel in both the side and point of the shoulder, and she got all right, seemingly; but I have noticed lately that she is a little lame again. She became lame in the pasture, so I don't know how it was done. What can I do for her?

We are unable to say where the lameness is located, but if you are sure it is the shoulder, then it would be well to remove the hair and blister thoroughly with cerate of cantharides.

CAPPED KNEE.

I have a mare mule two years old which has a large knot or swelling on her left knee, about the size of a goose egg or larger. This enlargement is soft, but not sore, and does not hinder her in her movements. It has been there about three months and seems to increase in size. The mule has worn a yoke all spring and summer, which was inclined to hit her on the knees occasionally. I should like to know a remedy that would bring the knee down to its natural size.

Remove cause of bruising and after removing hair from knee rub in some iodine ointment daily until skin tends to become sore, at which stage stop treatment for a few days and simply apply a little lard until skin is again sound, when use of ointment can be continued if necessary.

WARTS.

I have a calf about ten months old that has warts all over its head and neck and a few on its body. Some of the warts on its neck are very large, hanging down in big bunches. These warts bleed when the calf scratches itself. It had the very best of care all last winter and is in good condition, but the warts are getting worse. What can I do for it?

The large warts may be removed by ligating their necks tightly with a fine string, but it is best to cut them off and lightly touch the bleeding bases with a red hot iron. Masses of small warts about the head and neck may be removed by rubbing with castor oil once daily. A mixture of one tablespoonful of common soda to a cupful of lard is said to be effective as a remover of warts. We have not tried it, but would like to hear how it "works."

URINARY DIFFICULTY.

I have a spring calf that is urinating more or less all the time. The hide where it urinates is wet all the time and is dropped down two or three inches. This morning it drew itself all up and seemed to be straining to draw water. Its water is clear. Sometimes there is something passes off with the water which looks like pus. It is in small lumps, light colored, and about half the size of a small pea. It has been in this condition for six weeks and is not weaned yet. It eats oats and corn. Has fallen off considerably in flesh. It is running on grass. If you can tell me what to do for it you will oblige a subscriber.

You do not state sex of calf, but we presume it is a male and in that case there may be a collection of sebaceous material in the sheath. Make an examination and if there is matter or a collection of gritty material, remove it by syringing and manipulation, or if absolutely necessary make an incision with a sharp knife. Give the calf a couple of drams of saw palmetto compound twice daily after a preliminary four-ounce dose of castor oil administered in milk.

DRY HOOFS.

I have been a reader of your paper for some time and am much pleased with it. I now have a case in which I should be very much pleased with your aid. I have a three-year-old gray mare that is lame and has clumsy use of her legs—mostly in front legs. Her hoofs do not grow. I had her shod a month ago but this did not help her any. Her hoofs are hard and dry; the frog is as hard as the hoof and is now commencing to crack. Have used her on road some. She is high lifted and runs down in flesh very easily; has been troubled with pimples breaking out over her body all summer. She has wind puffs which appear at times and disappear again. What can I do to prevent them? What can I do to fix her hoofs out all right?

Get her off board floor. Soak feet in cold water for an hour twice daily; continue for two weeks. At end of that time clip hair from hoofheads and blister with cerate of cantharides; repeat in a month. It should have been said that each time feet are taken from water,

grease should be smeared on hoofs to prevent drying out. She has indigestion, possibly associated with cutting of teeth. Lessen grain ration and increase exercise. Give her a few ears of old, hard corn to chew on daily, as they will help the tooth-cutting process. Allow free access to rock salt. Carrots fed carefully will benefit the skin.

HEAVES.

I have a mare twelve years old that has had the heaves since the first of June. Any information in regard to treatment will be appreciated.

The disease is incurable, but the distress may be relieved by giving half an ounce of Fowler's solution of arsenic night and morning, wetting all food with lime water, allowing double the usual rest time after meals, feeding oat straw in preference to hay, and grass as the only fodder in summer. The disease is caused by continued distention of digestive organs with coarse food and working animal while so distended. The tendency to the disease is hereditary so that affected animals should not be used for breeding purposes.

INDIGESTION.

I have a sorrel mare, four years old, that since last winter has had a habit of putting down her head and gulping up the gases which should rightly be expelled through the rectum. It seems she cannot always expel them except through the mouth. Sometimes she does not do this and then she becomes bloated and is sick, but recovers in a few hours. She is with foal at present. I wash her almost every day and feed her about five quarts of oats containing a little ground barley to half a bushel cut feed consisting of oats, straw and hay, three times a day; also hay, good timothy. Please tell me through the columns of your paper what the trouble is, the cause of it and the remedy.

See that she is worked or well exercised every day and that she has a roomy box stall in stable. Stop feeding barley and cutfeed and substitute oats and hay with a bran mash twice a week; but for a time she would be better without grain. Medicine should not be given, as she is in foal.

CARPITIS.

I have a black colt seven months old that got out on barbed wire about six or seven weeks ago. It was a small cut, on the inside of front leg two or three inches above knee. The colt was in pasture when I found the knee was quite badly swollen. Pus and a jelly-like substance came from the cut. I syringed out the wound twice daily with soap suds and a little carbolic acid and injected a little turpentine and corrosive sublimate several times. The wound healed, but the knee keeps badly swollen and is hard on outside of leg near back of joint. I also used caustic balsam, which did no good. For about a week I have kept cow manure poultices on the knee. Have tried to find pus by inserting a small trocar and attaching a hypodermic syringe. Could get nothing but a little blood. Sometimes I think the knee feels a little softer at lower part. Please advise me what to do.

The cutting and probing should not have been done and have aggravated the case, and that abomination—the cowdung poultice—should be left on the dung hill. Poultice with antiphlogistine for a week; then remove hair and blister thoroughly with cerate of cantharides, if enlargement persists.

LAMENESS.

Can you tell me what to do for my bay mare, six years old? About three weeks ago I pulled the shoes off front feet and drove her six miles and back the next day. She could hardly go. Her feet seemed to be sore. I got her shod again the third day after pulling shoes off and now when I take her out of the barn she walks as if she were stiff for a short time and then she goes all right. When she stands in barn and moves her legs there seems to be a cracking noise in her knees and hock joints. Can you tell me what that cracking is and what to do for it, as I have a four-year-old gray gelding that is beginning to get that way? Feed corn and good hay. Have dirt floor.

Cracking noise described often indicates rheumatism and this may be present if stable is damp and badly ventilated. Stable should be light, sunny, dry and clean. Give her two drams of salicylate of soda three times daily. Stop feeding corn and substitute bran mash, carrots and hay. If she flinches when you strike soles of feet with a hammer lightly just in front of points of frogs she is foundered, and after removing hair from coronets (hoof heads) cerate of cantharides should be rubbed in as a blister twice a month until she goes sound.

CORN STALK DISEASE.

We have for several years had sickness among our cattle after they run in the stalk field. Sometimes they get sick and stiff in their legs and cannot use their legs well. Some of them cannot get up any more and die after a few days. Some farmers think the gray corn causes the sickness if it is left in the field; others think the sickness comes from the corn stalks. Can you tell me what causes the it and how it can be prevented? What is the best remedy in the first stage of sickness?

As often explained here, the cause is in the stalks, which some seasons and in some fields are affected by a fungus (some say a germ) which causes stag-

The Iowa Gate

-FOR THE FARM-

By sliding this ring back the largest hogs may pass under

AND have the run of two lots. Or raise your gate to drive hogs in or out, then your larger stock cannot get out while you are busy. The IOWA gate works fine this way. Raising the Gate by the sliding ring is simple enough but very handy when your gate swings on uneven ground or when the outer end drags. Rolled Steel Tubing is used in the frame instead of iron or gas pipe. This makes a frame that will not bend and is guaranteed to stand any farm use.

IOWA gates will raise up for winter use—are not bothered by wind, rot, or fire. Are light and easy for women to handle but strong enough for any stock.

Cheaper Than Wooden Gates and will outlast a dozen. Write today for our circular.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA.

gers, delirium, paralysis and death. In some instances there is merely fatal impaction of the third stomach, or even of the paunch, together with brain trouble, due to the disturbance of the digestive organs. On general principles the cows should be kept out of corn stalk fields. The disease does not occur from feeding corn fodder, so that corn should be shocked and cut. Castor oil is the best remedy, if given in time. The dose should be from one to two pounds in milk. Follow with large drinks of warm flaxseed tea, in which mix stimulants and fluid extract of nuxvomica. See answer under head of "Staggers."

LAMENESS.

Will you kindly tell me what to do for a three-year-old sorrel gelding that is lame in his left hind leg? I broke him last spring and after corn plowing turned him out on pasture. He was all right up to this time, but went lame while in the pasture. After he had been lame for some time I noticed a small bunch on the inside of the left hind leg about half way between his ankle and hock joint. I did not do anything for him and the lameness disappeared after a while, but the bunch remained. About a month ago he began to go lame again and the bunch is getting larger. At the present time he is very lame and when standing in the stable rests only a little on this foot. A few days ago I tied a blister on the bunch, but do not know whether this is the right treatment or not. What treatment would you prescribe for this lameness? Do you think he can be cured?

The bone may have been injured from a kick and, in such case, the enlargement often opens, and fractured bone shell may be removed, after which the wound heals promptly. Under the circumstances we think you were right in blistering the part and would advise you to repeat the blister, but we are unable to say whether you have hit upon the true cause of lameness, and so cannot tell how long the trouble will persist. Better have the horse examined by an expert.

DISFIGURED WITH ECZEMA.

Brushed Scales from Face Like Powder—Under Physicians Grew Worse—Cuticura Works Wonders.

"I suffered with eczema six months. I had tried three doctors, but did not get any better. It was on my body and on my feet so thick that I could hardly put a pin on me without touching eczema. My face was covered, my eyebrows came out, and then it got in my eye. I then went to another doctor. He asked me what I was taking for it, and I told him Cuticura. He said that was a very good thing, but that he thought that my face would be marked for life. But Cuticura did its work, and my face is now just as clear as it ever was. I told all my friends about my remarkable cure. I feel so thankful I want everybody far and wide to know what Cuticura can do. It is a sure cure for eczema. Mrs. Emma V. Vite, 641 Cherrier Place, Camden, N. J., April 25, 1905."

Record number 67080: Case of poll evil of seven years' duration; pipes and diseased tissue been dissected out three different times; owner cured the horse with one bottle of Fleming's Fistula and Poll Evil Cure, and claims that the animal is now worth \$150. Write Fleming Bros., 210 Union Stock Yards, Chicago, for free copy of Fleming's Vest Pocket Veterinary Adviser.

Ring-Bone

There is no case so old or bad that we will not guarantee

Fleming's Spavin and Ringbone Paste

to remove the lameness and make the horse sound. Money refunded if it ever fails. Easy to use and one to three 45-minute applications cure. Works just as well on Sidebone and Bone Spavin. Before ordering or buying any kind of a remedy for any kind of a blemish, write for a free copy of

Fleming's Vest-Pocket

Echoes From a Kansas Farm

By Henry Hatch

Several want to know what has become of that "successful machine husker," the machine that will husk corn from the standing stalk. It seems to be hiding somewhere, until corn husking is over.

A good many here have fallen into the practice of putting their corn on the ground or in open cribs, then shelling about the holidays and putting in bins. Room is saved in this way. Where one aims to sell, this way is all right, but for feeding to hogs on the farm, we would rather have it left on the ear.

This seems to be growing into a hard pine world. About everything sold nowadays has hard pine about it somewhere, where once something more durable was used. It is said that some of the cheaper grades of buggies handled by a dealer not out of the state of Kansas has every other spoke made of hard pine. We are not prepared to say that this is wholly true, but we would not be surprised if it was. A few years ago we bought

DON'T BUY GASOLINE ENGINES

alcohol engine, superior to any one-cylinder engine; revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome. Cheaply mounted on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mfrs., Meagher and 15th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

some slat cribbing, the kind that comes in rolls, and every slat was of oak. Some bought the other day was nothing but hard pine.

It doesn't take a man long to find out why some renters are renters. Just look around the farm they are on a few minutes—that tells the whole story. Of course we refer to the man who has been renting for years, not the man who is just starting in. Nine cases in ten it is neglect, pure and simple, of the many small things that, combined, make a big showing at the end of the year.

Rubber boots have come back into use again, after a rest of several weeks. The writer of this lived for fourteen years on a sandy farm. In all that time we saw not to exceed five pairs of rubber boots. They were not needed. Here hardly a month passes when they are not absolutely necessary. In some ways a sandy soil is an advantage, and in others a great disadvantage.

Since it has become generally known that farm machinery will be from \$2 to \$8 higher in the spring, on each of the ordinary spring-needed tools, we have heard several farmers say they simply will not buy what they had expected to. They look upon the increase in price as an imposition. There are a lot of old tools that can still be made to do good work, and some almost new ones it would pay to lay aside.

The old canner and the thin heifer sell for so little money now that when a person gets rid of them he does not know, from the size of the bank account, whether he has sold some cattle or just a case of eggs. The hides are worth more than all the meat they are stretched over. The business of butchering this poor stuff, and peddling it out among the neighbors, is being overdone. The farmers are getting so they want a little something that is good to eat, as well as the merchants, bankers and lawyers in town.

Last week the snow was five inches deep. This week it is mud of that thickness that covers "the landscape o'er." We fancy if there was such a thing as a corn husking machine, it would stay at the end of the field as long as this mud lasts.

This is the weather that is hard on corn piled on the ground or in open

cribs. There is lots of it in this shape, too. It will be almost impossible to shell it for some time. Corn from the ground shells much harder than from a crib, anyway. It will take a good sheller to get all from the cobs, until drying weather comes again.

Nothing but hard pine is now used in the tongues of all ordinary farm machines. A neighbor bought a \$125 manure spreader, and found the tongue to be of hard pine, when it broke, a few weeks after coming from the dealer. It kept under cover, straight, solid, hard pine will last a long time, but where it is left outside, where most western farmers still leave their machinery, it soon goes. It will season-crack, water runs in the crack, then the end of that tongue's usefulness is soon reached.

Mild Home Treatment for Cancer—Time Tried and Successful is the Record of Cancerol.

Anyone who really wants to know if he can be cured can readily determine this by a little investigation. A valuable book, full of interesting information and containing records of unmistakable cures of cancer in most every situation on the body, sent free to those interested. Address Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

GOOD TEXAS LAND.

Over a year ago the United States & Mexican Trust Co. purchased 25,600 acres of land in one body in Howard and Borden counties, Texas. These lands were selected by the company and are considered the finest body of unimproved farm lands in the Southwest. Those who are familiar with the purchase and know these lands will be glad to know that they are to be subdivided and sold off in small tracts. We are informed that every acre of this land will produce from three-fourths to one bale of cotton to the acre. The land is also good for wheat, oats, corn, kafir corn, milo maize, garden truck, etc. Fine water can be had anywhere at a depth of from ten to thirty feet. This one item alone is worth many dollars to the homeseeker. We call attention to the trust company's advertisement on page 19.

AN ORGAN FOR EVERY HOME.

Those contemplating the purchase of an organ, piano or sewing machine will find it no easy task to make a satisfactory selection. Among the many firms and dealers that handle this kind of goods there are always a few who offer a superior quality for the money. By the adoption of careful business methods and the latest ideas in the manufacture of these household adornments and even necessities, the Century Manufacturing Company, of East St. Louis, Ill., have developed a large trade. Their plan of selling is recognized as one of the most satisfactory and economical. Selling direct from the factory as they do eliminates an enormous expense in the line of illegitimate profits and slow returns. They offer all the advantages of this system to you in low prices and high quality. Every-

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

COMPLEX HEN TROUBLES.

A correspondent writes:

Can you tell me what is the matter with my young chickens? The trouble seems to be in the head or neck. The head is drawn over the back and is nearly in constant motion. They seem to be unable to bring the head down, so they cannot eat or drink and soon die. It comes on them suddenly.

The above clear, concise description of symptoms is unusually good as far as it goes, but is not sufficient for a definite diagnosis. The age of the affected birds is not given, nor the kind of food or amount fed. The surroundings would also need to be taken into consideration. Unsanitary or crowded conditions are apt to make serious trouble.

There are four causes which produce symptoms something like those given by our friend. Chickens die in convulsions when suffering from some kinds of poisoning, bowel trouble, cholera and apoplexy. The trouble may also have come from eating decomposed or moldy food. Indigestion will sometimes bring about queer manifestations.

Irritant poisons are many. There is great carelessness along this line in many poultry yards. A paint pail, perhaps, is thrown into some fence corner, where rain water will run into it, and if found by the fowls, trouble is very apt to result. The same is true in regard to Paris green. Vessels which have contained this poison should never be left carelessly about. Even if seemingly quite empty, when filled by a chance shower, there is likely to be enough poison in it to work mischief. Chickens running in a potato patch recently sprayed with Paris green, have been seriously poisoned by the drops of moisture hanging from the leaves. It is scarcely possible to be too careful along these lines.

If bowel trouble or cholera are the cause of convulsive symptoms they are easily detected. Convulsions cannot occur unless the brain is affected, and those who have had experience with the diseases of children know that the digestive organism is closely connected with the nerves of the brain.

If these chickens were mature birds, we should say the symptoms pointed strongly toward apoplexy. This term refers to the condition resulting from a break in a blood vessel of the brain. This most frequently occurs in over-fat hens. In over-fat birds, the little muscles of the arteries suffer from fatty degeneration, and undue excitement, fright, such as comes from violent chasing by boys or dogs, causes them to give way, and the fowl dies. Long continued hot weather also brings on similar symptoms.

Since these chickens under consideration were apparently small and immature, it seems that the difficulty must have arisen either from poisoning or indigestion arising from overfeeding. Look the premises over for anything that may be poisonous. Rough on rats spread on bread must be kept carefully out of the way of the feathered family, as bread is especially attractive. Even some lice killers might work harm if taken internally.

It will be well to reduce the amount of food in this case, giving light, unstimulating diet, plenty of fresh water, and striving for good, sanitary conditions. With the data given, this is the best

advice it is possible to give in the case before us.

COLD VS. WARM HOUSES.

In the past four or five years opinion has been gradually drifting from warm houses to cold houses for the best results in the poultry yard. The Ontario Agricultural College has just issued a bulletin giving the results of an experiment along this line.

According to the results obtained by experiments carried on by that station it was found that good returns were obtained from different styles of houses. The tendency is towards cheaper houses and better ventilation. The hot-house style of housing poultry during winter has not been satisfactory, many of the houses being damp and the air in them being anything but pure. In such houses disease has been common and the results disappointing.

The manager of the poultry department of the Ontario Agricultural College says that every poultry house should be light; at least one-third of the south side should be glass, or otherwise open to the sun. The manager says: "During a number of years we have been trying different styles of houses. The first houses constructed some ten years ago were built very warm and tight, and were so arranged that they could be heated artificially. After a few years' trial the stoves were removed and later the double windows. Gradually we began to open the doors and windows daily, and not closing them in the fall of the year until the water would freeze in the drinking tin. The fresh air treatment gave us healthier and more vigorous birds, and as far as I can tell from the records, equally as many eggs, which were better eggs for incubation purposes. We tried a colony house, constructed of single-ply boards, the cracks of which were battened. This house gave fairly good results as regards egg production and hatchable eggs."

Some of the results of the experiment are noted in the bulletin as follows: The warm house gave the poorest results each year. The cold house gave better results during the months of January and February, but did not do as well in March, which was thought to be due to the fact that more hens were broody.

Houses built of matched stuff and lined with paper with a dead air space between the outer and inner walls were moist on the inside. To do away with this difficulty a load of straw was placed in the loft. It was placed on boards put six or eight inches apart. The straw absorbed the moisture and kept the house dry. A curtain has been found useful in zero weather in keeping the combs from freezing.

EARLY MATURITY INDICATIVE OF GOOD LAYING.

A bulletin recently issued by the Maine Experiment station shows excellent reasons for the generally approved method of selecting pullets for layers, not only the pullets that hatch earliest, but also those that are earliest to mature, in the record of some chickens that were selected two years ago. The value of early maturity as a guide in selecting laying stock is indicated by the following statement: "Two years ago last August and September, twenty-nine pullets were selected on the range that were laying in the brooder houses, or about commencing to do so, as shown by

Why So Sure?

It's made on the right plan, it works right. It brings best results to the beginner as well as the experienced poultry raiser.

C. H. DRAKE, Stockport, Iowa

THOROUGHBRED fox, wolf and coon hounds. Puppies to trained dogs for sale at all times. Low prices and guaranteed. S. A. Smith, Keosauqua, Ia.

RATS! MY Scottish terriers will make them git. Very fine pups from recorded parents for sale. S. W. Harr, Riverside, Iowa.

their red combs, and their prating and following the care taker about the premises, talking about the things they were going to do in real hen language, which is easily understood and not to be mistaken by anyone who knows chickens. These young birds were carried into the laying house, banded and given a regular treatment for laying hens. Records were kept for each hen for 365 days from that time on when each should lay her first egg.

Four birds died during the year and

Let Me Quote You a Price on a CHATHAM Before You Buy an Incubator

It will take one penny for a postal, and a minute of your

time, to write for Special Prices on 1907 Chatham Incubators and Brooders. No matter what kind of a machine you have in mind—no matter where you intended buying, or when—TODAY you should send me a postal and get my catalog and prices.

My book will tell you how good Incubators are made—will tell you what you ought to know about poultry business—will tell you about brooders—will post you on the best way to make money out of poultry—and my prices on Chatham Incubators and Brooders will show you how to start in the poultry business for a small amount of money.

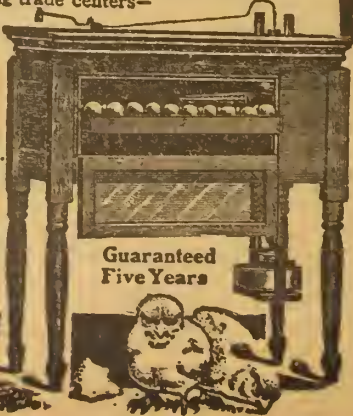

Chatham Incubators Sold on 84 Days FREE Trial

freight prepaid—guaranteed 5 years. That's the story of the celebrated Chatham Incubator. We sell them on trial, pay the freight, and guarantee them for 5 years. With proper care, they last a lifetime. I am going after the incubator business of the country this season, and I intend to get it on great, big value in the machine and a very low price. Chatham Incubators are the best possible to make. They are tested, and known to produce the largest percentage of strong, healthy chickens. We have two immense factories—one in Canada and one in the United States—and run our own experimental station where a battery of Chatham machines are in operation every day in the year, under the care of expert poultry men.

If you are, get ready to buy a machine now, put it off for a day or two, until you can get my prices and catalog—then decide on what to buy. We have warehouses in all the leading trade centers—where Chatham Incubators and Brooders are kept in stock—insuring prompt delivery. Depend on this: With the immense amount of money—\$500,000—that we have invested in the incubator manufacturing business, we are sure to give our customers every improvement worth having in the Chatham Incubator. We can afford it, because that is what brings us the largest business in the world. That is all I can say in an advertisement. I invite you to write for my prices and book. Address me personally.

MANSON CAMPBELL

President Manson Campbell Co., Ltd. 241 Wesson Avenue, DETROIT, MICH. If you live west of the Mississippi River, address me Box 241, Topeka, Kan.

the twenty-five remaining averaged 180 eggs each. Two of the four that died had done good work, one having laid 148 eggs up to July 30th and the other 150 up to April 7th. Eight of the twenty-nine birds laid over two hundred eggs each. The only poor layers in the lot were two of those that died.

The average production of all the pullets kept in the regular work last year was 144 eggs per bird. The average of 180 made by this lot, and the small number of poor yielders in it, show the advantages of selecting the early layers for breeding purposes. Those selected were of the most forward pullets.

To the farmers and poultrymen who do not use trap nests this plan of selecting the breeding females has much to recommend it. The method is simple. There is no secret about it. It is just common sense. Such birds bred to males purchased from some reliable breeder who practices trap nest selection of his breeding stock ought to improve the egg-yielding capacities of the flock."

A COLONY HOUSE.

There are many kinds of colony houses. The one that is most common,

where the colony system is pursued, will be seen in the illustration. The colony

house should be built so as to keep the chicks dry and comfortable. The size will depend on the number of chicks to be cared for, but it is very important that there is not too much crowding. Colony houses that are only used for summer should be placed up off the ground so the air can circulate underneath, which prevents dampness. These houses will be found most excellent for rearing large broods where brooders are not used.

POINTERS.

—Mr. P. H. Thiel, of Renwick, Iowa, is offering Rhode Island Reds and high-scoring Single Comb Brown Leghorn chickens for sale in his advertisement on this page. Write him for prices.

—Eighty White Holland turkeys, choice, large-boned birds, are offered for sale by Mrs. T. H. Schuknecht, of Tripoli, Iowa, in her advertisement appearing on this page of The Homestead.

—Mr. J. P. Eskildsen, of Laurel, Iowa, can supply Homestead readers with Single Comb Brown Leghorn cockerels, Mammoth Bronze turkeys and Barred Plymouth Rocks. His advertisement appears on this page.

—Mr. Henry White, of Tripoli, Ill., has some choice Single Comb White Leghorn cockerels which he is offering for sale in his advertisement on this page. He will have eggs for sale after February 1st.

—Fine, large Black Langshan cockerels are offered for sale by Mrs. Joseph Yustin, of Prescott, Iowa, in her advertisement which appears on this page. They have plenty of bone and beautiful plumage. See advertisement.

—Mr. George F. Blake, of Maquoketa, Iowa, can furnish Homestead readers with Single Comb Brown Leghorn, Single Comb White Leghorn and Silver Laced Wyandotte cockerels at prices named in his advertisement appearing on this page of The Homestead.

—Messrs. Henry Schlatter & Sons, of Lawler, Iowa, have Mammoth Bronze turkeys for sale as announced in their advertisement on this page of The Homestead. They also have Barred Plymouth Rocks, large-sized birds, good in shape and color. First orders get first choice.

—Mr. W. R. Warwick, of Montezuma, Iowa, breeder of Barred Plymouth Rock chickens, is offering cockerels for sale in his advertisement on this page. He writes: "The cockerels are from prize winners and are the best I have ever raised. At the Deep River show, November 20th to 22d, I took two firsts, two seconds, one third and two specials. At the Montezuma show, November 4th to 7th, I took two firsts, three seconds and two specials. I have some extra fine cockerels for sale."

—Mrs. L. M. Estes, of Audubon, Iowa, in sending in change for her advertisement, which appears on this page, writes: "I have just a few scored cockerels and have seventy-five unscored ones that I will sell for \$1.25 each where one is taken, two or more at \$1 each. I have one dozen June hatched pullets unscored, at \$1 each. Out of 140 pullets scored, I had eighty-six score from 95 to 96½ points. I have one cockerel scoring 96. He is fine, I assure you. These birds are of stock scoring from 94 to 95."

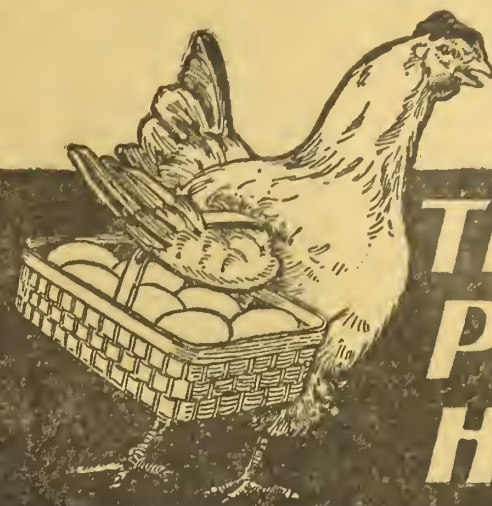

—Mrs. S. E. Newell, proprietor of the Maple Grove Poultry Farm, of Audubon, Iowa, is offering Black and White Langshans, Light Brahmas and Mammoth Bronze turkeys, for sale on this page. Mrs. Newell in furnishing copy writes: "The judge who scored my poultry lately said, 'Your birds are better than ever this season.' They are large, well marked, strong and vigorous, and scored as high as 97 points. I have been raising Black Langshans, Light Brahmas and Mammoth Bronze turkeys for twelve years and can furnish either farm or show birds at reasonable prices."

—The Madison County Poultry Breeders' Association will hold their first annual show at Winterset, Iowa, December 27, 28, 29, 1906, with Mr. U. J. Shanklin as judge. These fanciers are very enthusiastic over this coming show, as their premium list is larger and more valuable than is usually found outside of a state show and the entries promise to be large. Cash and specials are hung up on every variety and large sweepstakes prizes are offered. It will be worth while to exhibit at this show. Premium list on request. For information write Mr. Robt. S. Cooper, secretary, Winterset, Iowa.

—Mr. S. M. Compton, of Newton, Iowa, whose advertisement will be found on this page of The Homestead, is offering White Plymouth Rock chickens and White Holland turkeys and Pekin ducks for sale. Mr. Compton writes: "This is the eighth year we have used The Homestead to sell our surplus stock and we have a fine lot to offer this season. We won first on White Rock hens, second on cocks and first on Pekin ducks in strong competition at the Jasper County Fair this last fall. The cockerels we used last season scored as high as 94½, ducks as high as 97 and old White Holland tom at 96. We will offer White Rock pullets at \$9 per dozen until January 1st." Those of our readers wanting stock of this kind write Mr. Compton, as he will do his best to please his customers.

—Mr. G. W. Stout, breeder of Barred Plymouth Rocks, of Rose Hill, Iowa, writes: "I have about 125 Barred Plymouth Rock cockerels and pullets for sale. I have never been defeated on my Barred Plymouth Rocks in my seventeen years' breeding. I have been in the show ring for seventeen winters, to say nothing about the fall fairs. I have shown at Davenport, Cedar Rapids, Waterloo, Des Moines, Humeson, Ottumwa, Oskaloosa, besides a number of other places, including Lincoln, Neb. My Barred Plymouth Rocks are better than ever. It has cost me lots of money to get my stock where it is today. A man pays \$20 for thirty eggs; he surely has good stock, and \$30 for three birds. That is what it cost me to get good stock, which is none too good for me." See Mr. Stout's advertisement on this page.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for 25 years. The T. C. Prouty Co. Ltd., Albion, Mich.

is the one which contributes 150 eggs or more in a year, toward the family grocery bill. The sure way to have such hens, eggs in abundance, and a lot of ready cash, is to give a little of

DR. HESS POULTRY PAN-A-CE-A

with the morning feed every day in the year. Dr. Hess Poultry Pan-a-ce-a is a tonic, the sole purpose and action of which, is to assist nature in the performance of necessary functions. It aids digestion, prevents disease, and sends the proper proportion of each food element to the organ most in need. It also contains germicides which destroy bacteria, the usual cause of poultry disease. Poultry Pan-a-ce-a is the prescription of Dr. Hess (M. D., D.V.S.), and is a guaranteed egg-producer. Endorsed by leading poultry associations in United States and Canada. Sold on a written guarantee, and costs but a penny a day for 30 fowls.

ADVERTISING NOTES.

Mr. C. F. Wirth, of Carthage, Ill., desires to sell his 160-acre farm, located in Neosha township, Allen county, Kansas. Write him for prices and description. His advertisement appears on page 19.

The St. Louis Fur Company, of St. Louis, Mo., ask Homestead readers to send them their 'coon, mink, 'possum and other furs, hides, roots, etc. They charge no commission, stand the express charges on shipments of furs amounting to \$10 or more. Write them for tags, price list, etc. The advertisement appears on page 29 of this issue.

A good, desirable farm of moderate size within easy reach of Des Moines, at any place near a reasonable price is a very hard thing to find. Mr. Geo. C. Hunter, 407 Iowa Loan & Trust Bldg., Des Moines, Iowa, has one such farm advertised on page 19 of this issue of The Homestead. Eighty-five dollars per acre is what he asks for it, while it is worth \$100.

We wish to call the attention of our readers to the advertisement of Dr. J. M. Auld, of Chicago, Ill., that appears on page 14 of this issue. The doctor has been very successful in curing the diseases mentioned in the advertisement to which we refer, and he gives in his advertisement the address of a few of the patients which he has cured in this state.

Ten million acres of what is considered the most fertile soil in the world, located on the Texas gulf coast, are offered for sale by the Pickert-Hammond Land Company, of Houston, Texas, in an advertisement which appears on page 19 of this issue of The Homestead. This land is close to railroad, school, churches, rural mail delivery, and will be sold on easy terms. Write or call on the company at once.

Mr. D. G. Porter, of Weldon, Iowa, has an eighty-acre farm for sale. It is a choice one and he offers it at the low price of \$70 per acre. This farm is located in the southeast part of Clarke county, Iowa, and is near three railroad towns. It has good improvements and will be disposed of on easy terms. Write Mr. Porter or go and see the farm if wishing to purchase something choice. His advertisement appears on page 19 of this issue.

A fine Florida farm of forty acres in the delightful Indian river region, adapted for all sub-tropical fruits, such as oranges, pineapples and bananas, as well as vegetables, and already having six acres in pineapples, two in oranges and grape fruit and two in garden, also four-room house, is offered for sale in our classified department by Mr. Stewart Ankeney, of 1942 Arlington Ave., Des Moines, Iowa. Mr. Ankeney is thoroughly reliable and this farm, offered for \$6,000, is a bargain for someone.

There is offered for sale on page 19 of this issue of The Homestead by Messrs. Willis & Co., of Emporia, Kan., a 240-acre farm which they say is a bargain at the price asked for it. This farm is located three miles from Emporia. Two hundred acres of it is bottom land, sixty-five of which is under cultivation, forty-five in meadow, ten in alfalfa, the balance timber and pasture. There is a good nine-room house, cellar, with fine water and two good barns. See advertisement for further particulars and write Messrs. Willis & Co.

Eastern farmers who are farming under the disadvantage of crowded country, severe climate changes, will find in eastern Washington not only lands the growing quality of which is unequalled, but where no such thing as crop failures, wind storms, severe winters and late springs are known. No scorching summers in eastern Washington—no experiment on your part in coming to Washington. If you are farming under difficulties—trying hard to improve an unproductive farm—if you are looking for all the things that go to make successful farming—write to the Big Bend Land Company, Dept. 1, Wilbur, Wash.

An advertisement which will be of especial interest to farmer readers of The Homestead will be found on page 8 of this issue. We refer to the Hawkeye Grain Grader and Cleaner, manufactured by the Parson Hawkeye Manufacturing Company, of Newton, Iowa. This grader and cleaner is made especially for farmers. It is both a grain grader and a fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time. It cleans and grades seed corn. It will clean and grade seed wheat; it will separate oats from wheat; it will separate timothy from clover; in short, it will do any work required of a fanning mill, and grade seed grain besides. If your dealer does not handle this grader and cleaner, write the Parsons Hawkeye Manufacturing Company, of Newton, Iowa, for their illustrated circular and prices.

THE TWENTIETH CENTURY FARMER.

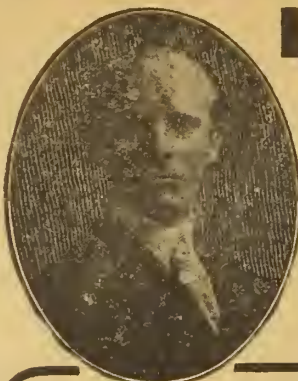

We desire to direct the attention of Homestead readers to the advertisement on page 11 of this issue of The Twentieth Century Farmer, of 1726 Farnam St., Omaha, Neb. This publication is making a special one-half rate combination offer for different publications and those of our readers who want to get their next year's supply of reading at one-half price should look up the advertisement before sending in their subscriptions for the different papers. The Twentieth Century Farmer is making three different propositions, all of them including The Twentieth Century Farmer and other publications at very low prices.

FARMING IN A MILD CLIMATE.

A card addressed to J. W. White, general industrial agent, Portsmouth, Va., will bring to any of our readers "The Seaboard Magazine." This magazine is devoted to the agricultural and industrial development of the South. Its pages are alive with matter relating to agriculture where conditions make life agreeable the year round. Every man

CUT ICE

With the Dorsch Double Row Ice Plow. We guarantee it will cut more than 20 man sawing by hand. Cakes are cut uniform, of any size and thickness. One man and a horse will cut more ice in a day than the ordinary farmer and dairy men can use. You can cut for others and make the price of our plow in two days use. Ask for catalogue and introductory prices. JOHN DORSCH & SONS 216 WELLS ST., MILWAUKEE, WIS

H. C. GUMBEL,
The Man Who Stands Back of
the "Knodig" Pitless Scale

Let Me Send You a "Knodig"

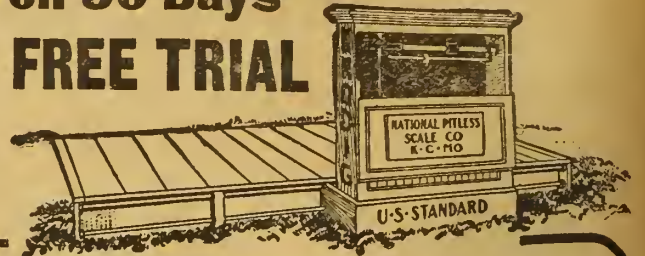

Pitless Scale on 30 Days'

FREE TRIAL

No Money Down

No Notes to Sign

Nothing to Pay

My Scale—the Knodig Pitless—is used by the
U. S. Government, Which Proves its Quality.

You can't afford to buy one of those inaccurate, poorly constructed Pitless Scales, which will do poor work and last only a year or two, nor a high priced, old style Pit Scale which makes big repair bills and cannot be moved about on your place.

What you need is a KNODIG PITLESS, which costs you a little more at the start than the "cheap" scales sold by the mail-order houses, but is the best investment in the long run because it lasts a lifetime.

The "KNODIG" costs from \$30 to \$50 less than a Pit Scale, and is as good as any scale made at any price. It is the only scale backed by an unlimited iron-clad 10-year guarantee. I make the "KNODIG." I know just how good it is, and I can afford to stand back of it.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "KNODIG" PITLESS with Protected Bearings. Ready for instant use when you want them.

No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "KNODIG" PROTECTED BEARINGS.

Fully covered by patents. Sold only direct from factory at lowest factory prices. Costs about half the price of a Pit Scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be. It is personal property. Should

H. C. Gumbel, Genl. Mgr. National Pitless Scale Company,
2011 Wyandotte Street, Kansas City, Missouri.

you sell your farm, the "KNODIG," unlike the Pit Scale, does not go with the land. Absolutely accurate, because tested according to U. S. Standard of weights. The U. S. Government has selected the "KNODIG" for use in the Kansas City Post Office.

My plan saves you all the middlemen's profits. Deal direct with me. No Agents, Salesmen, Jobbers or Dealers stand between you and my factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer? Does it make the scale you buy any better? Does it add one single penny to its value? Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the "KNODIG" Pitless is the scale you need. I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you're satisfied, no deposit, no notes to sign, nothing to do but give the "KNODIG" a fair, honest trial at MY risk. If it doesn't please you, send it back, and I will pay freight BOTH ways. And I will also pay the expense of setting the "KNODIG" upon your premises.

Write to me personally for the new Knodig Pitless Scale Catalog. It contains over 40 fine half-tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover. The book is Free. You will want to see it. Write for it today, to

who is in any way dissatisfied with his present conditions or who would like to take to fruit, truck or grain farming in an equitable climate, such as is found in Virginia, the Carolinas, Georgia, Alabama or Florida, should write for a free copy of this magazine. Special low rates are now being made for homeseekers, prospectors and investors. The advertisement of General Industrial Agent White is found on page 18 of this issue. The thing to do is to make application for the magazine and there read the facts yourself. Mention The Homestead when you write.

CAUSTIC BALSAM BEATS THEM ALL.

Mr. H. A. Hewitt, of Siloam Springs, Ark., writes under date of Dec. 8, 1904: "The Lawrence Williams Co., Cleveland, O.—I have used Gombault's Caustic Balsam for years with the best results. It is the best remedy I ever used by a great deal. There is no comparison between it and other remedies. There is no ailment of the leg or foot that I am afraid of. Gombault's Caustic Balsam will cure them all. I can cure ring-bone, spavin, curb, splint or any of these diseases with it. It is a sure cure." Read the advertisement on page 26 of this issue.

SOUTHEASTERN KANSAS FARMS.

Among the announcements in the Lands and Homes department in this issue is that of Messrs. Drennon & Co., Bryant Bldg., Kansas City, Mo. This firm offers for sale several splendid southeastern Kansas farms at prices that are extremely cheap, considering the quality of land offered. There is no more prosperous class of farmers anywhere than in this locality, and the reason for this is the fact that the land produces the crops. Messrs. Drennon & Co. are a very reliable concern, having done business in Kansas City for years and will give any buyer a square deal on any of these properties. Write them for full particulars.

HIGHLAND PARK COLLEGE.

The readers of this paper have undoubtedly noticed the large illustrated advertisement that has been running in it of Highland Park College, Des Moines, Iowa. This institution is, indeed, one of the great schools of the West, and any of our patrons that wish to send their children away to a first-class school will make no mistake if they choose Highland Park College. It will be noticed that Highland Park has not only the regular college courses, but that it has some special courses in engineering, pharmacy, business, shorthand, typewriting, oratory, music and penmanship, and in normal work, that are more complete than can be found in almost any of the larger institutions of the country. The attendance at this school has always been large and the work is universally regarded the best. A special winter term opens January 2d.

TRAINING FOR SUCCESS.

Young men who are looking for permanent employment, where pay is certain and where there is an opportunity for advancement, should read the advertisement of the Wichita Telegraph College which appears on page 18 in this paper. This school prepares students for the railway and commercial telegraph service. It is not a new school, but one that has proven that it can successfully train young men for the telegraph service and is placing its graduates in positions, who complete the course, or refund their money. A course of training at this school should be looked upon as an investment rather than an expense. It opens the door for advancement

and any ambitious young man or young woman should think twice before dismissing such an opportunity. This is a changing world; no place, from the highest to the lowest, is filled permanently, and those elected to do the world's work are those who are willing and are prepared. Young man, begin today and do something looking toward advancement and that something may be simply writing for further particulars regarding the Wichita Telegraph College, located at Wichita, Kan.

TELEPHONE LIGHTNING INSURANCE.

"Telephone Lightning Insurance Policy" is one of the latest features of protection for the user of rural party line service. Such a policy is offered by the Chicago Telephone Supply Company, of 149 Beardsley Ave., Elkhart, Ind. The lightning insurance policy guarantees the users of the instruments against all damage by lightning. Another feature of this company's protection is its guarantee bond which guarantees that the instrument shall be free from all defects of material or workmanship. This bond is worthy of special consideration, in view of the high standing of the company which backs it. The Chicago Telephone Supply Company have long made a specialty of telephones for rural service. They are now offering a series of books, handsomely illustrated, one on "Telephone Lines: How to Build Them," another on "How Telephones are Made," and another on "Magnet Telephone." Each or all of these books may be obtained free by dropping a postal card to the company at their offices in Elkhart, Ind. The books are well worth having—far superior to ordinary booklets, as they clearly explain, by the aid of pictures, the construction of telephones and telephone lines in such a way that a man who never gave any attention to a telephone can understand the working of the instrument. Readers will do well to take advantage of this free offer as early as possible.

BIGGER CORN YIELD.

The question of seed corn, its care and the sorting of it properly, is one that is most prominently before the farmers of the middle West at present. It is conceded that a larger corn yield depends upon the quality of seed corn and the sorting of it in some way so as to make a uniform stand. The corn planter is a great boon to the increase in corn crops, but even this is not perfection unless the corn is sorted properly before being placed in the planter. Many times kernels of corn are either too thick or too thin to fit into the cells of the planter. Where this is the case, of course there is an irregular dropping of the corn, resulting in only two, and in some cases one, stalk of corn where there should be three. Many machines have been invented for accomplishing this sorting of the corn, but they have not been entirely satisfactory. The machine reaching most nearly the stage of perfection when viewed from the standpoint of both simplicity of construction and thoroughness of work, is manufactured by the Monarch Self Feeder Company, of Cedar Falls, Iowa. This firm are making a machine that will sort the corn into five grades, and has been tested by such eminent corn experts as Mr. L. C. Brown, of LaGrange, and others, to sort corn to such a point of perfection that an edge-drop planter will drop it 99 per cent perfect. When you stop to think what a difference a percentage like this will make in a single row, then consider the field acre by acre, you will be greatly surprised. When you convert this increase of corn into

cash, the nominal price asked for this "More-corn" sorter seems but a trifle. A representative of The Homestead has visited the home of the "Morecorn" sorter and tested the machine carefully and found that it would do all and more than is claimed for it. It is simple in construction so that any child can operate it. Write the Monarch Self Feeder Company for particulars and price, addressing them at Main street, Cedar Falls, Iowa. Please mention The Homestead when writing.

POOR MAN'S OPPORTUNITIES IN THE FALFURRIAS COUNTRY.

Below we give the experience of Mr. Peel, who is a resident of the Falfurrias district of the gulf coast country of south Texas. There is unquestionably the finest opportunities for poor men in this district of anywhere in the United States. The example given below is nothing at all unusual. The man who is willing to work in this country cannot fail to make a success because the business men of Falfurrias do everything in their power to see that he does succeed. The following was written on July 10, 1906, at Falfurrias, by Mr. R. W. Peel, to the editor of the local paper: "I was the first one to move to the Copita Prairie, going there December 15, 1905, with household goods and building material. Being a man of small means I had to build my own house and do my own fencing. It being late in the season I had to employ labor for grubbing, for which I paid \$3 for the grubbing of fifty acres. My land was ready for planting March 10th. I planted the following crops: Fifty acres in cotton, three acres in garden truck and feed crops. The cotton seed cost me \$30, which is all the money I spent on the crop, as my son and I have done the cultivation ourselves. This has been an abnormal spring over the entire state of Texas, the season being unusually dry. In spite of this I can now be absolutely sure of a half bale to the acre, and under favorable conditions I expect to make three-fourths of a bale. One-half bale to the acre, at ten cents, is \$25, and three-fourths of a bale would mean \$37.50 an acre. The soil conditions here explain why I have been able to make such a good crop under such unfavorable conditions. Being a sandy loam it holds the moisture remarkably well. During my farming experience in Grayson, Bee, Goliad, Victoria and Uvalde counties (in some instances on as rich, black soil as there is anywhere in Texas) I have never found a soil that holds the moisture so well as this. In the second place, this soil being so rich, the growth of the plant was very rapid from the start. Another important fact about this soil is the ease and cheapness with which it can be cultivated. The sod land that I broke in March now looks like the soil of an old garden." This was Mr. Peel's first year in the coast country, and he had very little money to begin with. Out of the first crop he made sufficient to put him on a cash basis. Since the above letter was written Mr. Peel has realized all his hopes, in regard to crops, etc. He has since built a substantial farm house, paid off all his indebtedness for land and living expenses of his family and has several hundred dollars deposited in the Falfurrias State Bank. This certainly ought to be sufficient evidence to the northern farmers that the gulf coast country is a poor man's country. For further information write the Falfurrias Immigration Company, Kansas City. Read their advertisement on page 19 of this paper.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

Among my happiest memories of Europe are those of Christmas in Germany where Christmas is the great festival of the year. However poor a German family may be, and sometimes this poverty is pathetic, it always has a Christmas tree. A few pfenig (a pfenig is a fourth of one cent) will buy a tiny tree, the decorations for which are carefully treasured from year to year, a few more will purchase a wax taper or two, and so keen is the German's joy in this symbol of Christmas time that though there may be little in the larder there will be a tree in the window on Christmas Eve.

A fortnight before Christmas, in Berlin last year, the platz, or open squares which dot the city, took on the appearance of little forests of evergreen. Load after load of trees, great and small, were deposited, dressed, fitted upon wooden bases, and then fastened by ropes to form avenues. Up and down these avenues, day after day, men and women passed in steady streams examining and bargaining, buying trees, large or small, according to the size of their families or their pocket books. It mattered not how rich or how poor one was, one could be satisfied.

While father and mother were looking after the tree the children might be seen eagerly scanning the windows of the shops which border the platz. These windows glittered even by day light. They were festooned with tinsel and crowded with the paraphernalia which makes the German Christmas tree a dazzling, scintillating, shimmering glory to childish eyes. Every year manufacturers bring out some novelty in the way of Christmas tree decoration, and while the old trimmings are always preserved, in the homes of the well-to-do some additional decoration is usually purchased each year.

Flower shops which are always attractive in Berlin were irresistibly so at Christmas time. Not only are flowers used much more generally and lavishly in Germany than with us, but growing things of all kinds are utilized for decorative purposes. Sprays of autumn leaves, acorn bearing boughs, the hips of haws and wild roses, and the crimson berries of various shrubs and vines, all are sold to florists, who make of them a background for tulips and crocuses in tissue paper covered pots and for cut flowers in baskets and jars. There are flower shops on every block and flower women at every corner all the time, but in December the very pavements were bordered by flower vendors and their wares were so reasonable it was not necessary to resist the temptation to buy. We had so many gifts of flowers on Christmas day that our rooms looked like a conservatory—great bunches of violets and lillies of the valley, clusters of roses

and branches of a gay yellow shrub filled every stem and vase and bowl available, while tables were crowded with pots of blooming bulbs of various kinds.

Early in December the little shops, of which there are an extraordinary number in Berlin, begin preparations for Christmas. The conditori shops display cakes of all kinds from different parts of the empire. Unlike Americans the Germans have no special Christmas cake. Each of at least half a dozen cities have their own cakes, cakes so good that their fame has gone abroad throughout the land. Many of these cakes come under the general description of "Honikuchen," that is, they are sweetened with honey. Many of them are flat, rolled out, in thick oblongs or squares, which are ornamented with designs of almonds, fruit peel or figures in relief made of marzipan. Just what marzipan is I was not able to find out. It seems to be a sort of sweet dough or fondant which lends itself in a surprising manner to modeling and coloring. Passing a shop window you are not imposed upon by a drove of little pigs with their herder all in costume, or a basket of miniature turkeys all skewered and ready for the oven, but you are very likely to be deceived by a heap of oranges half hidden among their leaves, a luscious-looking cluster of transparent grapes, a platter of lamb chops nestling in a bed of parsley or a string of nice, fresh-looking sausages. They are all made from marzipan, and while they are shams, they are greatly relished by persons who have learned to eat the wonderful paste.

Attractive as are the cake and candy shops, the stores which handle small wares, toys, books and cards are even more so. So much is made of the Christmas festival in Germany, toys, etc., are manufactured so cheaply (more's the pity) that dealers lay in a large stock and dress their windows so alluringly that one of the delights of the season is to stroll about, studying shop windows and the crowds which hover about them.

We celebrate Christmas day; the German also says "Froliche Weihnachten" (Merry Christmas) and celebrates not only the 25th of December, but at least one day, and sometimes two days following, but it is "Heilige Nacht" (Christmas Eve) which is the climax—the heart of all the festival for him. On that night the German family assembles and the tree is lighted. Next day there may be guests, but that night is sacred to the family; together it exchanges good wishes and gifts and standing about the shining tree, sings of the Christ Child whose birth the festival celebrates.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

That man may last, but never lives,
Who much receives, but nothing gives,
Whom none can love, whom none can thank—
Creation's blot, creation's blank.

—Thomas Gibbons.

We starve each other for love's caress;
We take, but we do not give.
It seems so easy some soul to bless,
But we dole the love out grudgingly, less and less.

Thill 'tis bitter and hard to live.

—Selected.

Loving words will cost but little,
Journeying up the hill of life;
But they make the weak and weary
Stronger, braver for the strife.
Do you count them only trifles?
What to earth are sun and rain?
Never was a kind word wasted,
Never was one said in vain.

CHRISTMAS.

Where is the star in the East? We find many symbols and decorations displayed at Christmas time, the holly and mistletoe, the bells, the tree and, above all, Santa Claus, but what has become of the star? Do I mistake or are we saying less and less to the children of the first Christmas day and the Babe in the manger? Is it strange that the little boy in Sunday school, when he was asked who was born on Christmas day, replied, Santa Claus? It seems to me that we are missing a blessed opportunity with the children if we do not make them think of the merry day as the birthday of the Christ child, of the presents as memorials of his gifts. The Santa Claus question may be thus easily settled; they can appreciate him as a pleasant fiction if they keep the reality of the Babe to whom the wise men came. So, amid our wreaths and holly, let us this year hang the star.—Good Housekeeping.

HOLIDAY DAINTIES.

Rich German Waffles—Take two cups of sifted flour, one-half pound of butter heated to a cream, one pint of sweet milk, ten eggs, the yolks and whites well beaten separately; one teaspoonful of salt, two tablespoonfuls of brewer's yeast. Make the batter rather thick. Butter the waffle irons with sweet butter. Bake and serve hot with maple sirup, cream and sugar or powdered sugar and cinnamon.

Raspberry Biscuits—Take one-half pound of sifted flour, three-fourths pound of pulverized sugar and one-half pound of sweet almonds skinned and crushed in a mortar.

Mayer

"Saved 20 Times Its Cost"

"I am writing this," says E.C. Parmelee, Highland, N.J., "by the light of one of your Angle Lamps. In fact, I would not think of using any other light. They are THE lamps. Why, I have saved at least 20 times their cost in oil, kerosene, chimneys and 'cuss words'!"

THE Angle Lamp

is not a mere improvement on the old style lamp, but an entirely new principle of oil lighting which has made kerosene (or coal oil) the most satisfactory of all lighting methods. Safer and more reliable than gasoline or acetylene, yet as convenient to operate as gas or electricity.

The Angle Lamp is lighted and extinguished like gas. May be turned high or without odor. No smoke, no danger. Filled while lighted and without moving. Requires filling but once or twice a week. It floods a room with its beautiful, soft, mellow light that has no equal. **WRITE FOR OUR CATALOGUE "33" and our proposition for a**

30 DAYS FREE TRIAL

Write for our Catalog "33" listing 33 varieties of the Angle Lamp from \$1.80 up, now—before you forget it—before you turn this leaf—for it gives you the benefit of our ten years experience with all lighting methods.

THE ANGLE MFG. CO., 78-80 Murray St., N. Y.

Beat the yolks of six eggs and the whites of four, flavor with some grated lemon rind, and work the whole together into a smooth and stiff paste. Roll the half very thin and cover it with a layer of raspberry jam. Put the balance of the paste on the top; place the whole on a baking sheet in a moderate oven until done. Remove, cover the top with a flavored icing, and cut up into strips about three inches long and one inch wide; then put back in the oven for a few minutes to stiffen the icing. Serve cold. The same recipe holds good with strawberry jam or fine pineapple jam.

For icing or glazing the top of cakes before decorating, dissolve one cupful of granulated sugar in one-fourth cupful of hot water; flavor with essence of vanilla or some orange juice and cook until it threads. Then pour it slowly over the whipped white of an egg, heating the mixture all the time until cool. Spread it evenly on the top of the cake, and when dry, form any fancy design with the candied fruits.

Small Cakes and Decorated Cup Cakes—Use some very light cake paste flavored with vanilla and grated nutmeg. Bake in gem pans, the shape of little cups, well greased around with butter. When done, invert them and cover them with icing. Place on top of each one candied cherry, two pieces of angelica, cut in diamond shape, to imitate the leaves, and a thin strip of angelica to imitate the stem. For variety, the cakes may be decorated with candied violets or candied rose leaves.

Fondant for Candies—Add one cupful of hot water to two cupfuls of granulated, or one pound of loaf sugar, and one-third of a teaspoonful of cream of tartar; place over slow fire and stir until sugar is dissolved; remove spoon, put over quick fire and boil—without stirring or moving dish until a little dropped into ice water makes a soft ball when rolled between the thumb and finger; remove from fire instantly, set in cool, dry place and leave undisturbed until the finger can be held in it comfortably. With a wooden spoon stir until it becomes a thick, creamy mass, and when this becomes difficult, knead with the hands until soft and

smooth. If fondant grains after being stirred, put more water in it; dissolve and cook as before, being very careful not to jar the vessel after sugar is dissolved. Flavor, add nuts, fruits, coloring matter, shape and lay upon oiled paper to dry before packing.

I was passing a "sweet shop" in New York where some beautiful red candy apples on a long stick stem caught my attention. Investigation proved them to be deliciously ripe apples, rather small, stuck on a stick like the lollypops that give the street gamin so much lasting comfort. These apples were then treated to a bath of hot candy colored a brilliant red. The result was a delicious, crispy sweet candy with lusciousness of the natural fruit. It was a happy and surprising combination and exceedingly cheap.

Almonds should always be blanched before using. Shell, then cover with cold water and let them come just to the boiling point, when the skins can be easily slipped off by pressing them between the thumb and forefinger. Throw them in cold water for a few moments to preserve their whiteness. Brown or scorch by putting them into the oven on clean paper spread in a baking pan. Stir them often, to brown evenly.

AMONG OURSELVES.

Never since I assumed the editorship of this Home has there been so great an interest in the young people, either for them or by them, as this fall and winter. I need hardly say that I am highly pleased over the present order of things, that I sincerely trust that this new interest will grow and strengthen. Its doing so rests largely with the young people themselves. If they want the subjects which more nearly concern them to receive attention they must speak out—that is, write to me suggesting topics for discussion or asking questions

which will provoke it. If they do, they may be sure of a hearing. A few weeks ago I told a painful story "With The Editor," impelled thereto by a number of sad letters received latterly. Since then we have heard from several of the friends along the line suggested by the editorial. It or they are responsible for the coming of Mrs. Clare Alexander, who wishes to speak to our girls:

Girls, do not always trust to appearances. Fine feathers do not make fine birds, you know. A young man may be very polite, dress nice, and you will feel honored if he asks you to ride, or to go to places of entertainment with him. But supposing he does not really care for you. He will keep this up until he has won your confidence and trust. Then some evening when you are out with him he will make a proposition which will cause any true and virtuous girl to blush with shame. You then find out he is a wolf in sheep's clothing. Do not under any circumstances allow any liberties. Of course men are not all like this, by any means, but I had just such an experience when a girl about sixteen, which, by the way, is too young for a girl to go in company. He was a young man whom my parents respected and had been my schoolmate. I thank God I had the good sense to repulse his advances, and today am the wife of an honorable man instead of what I might have been.

It will be noticed that Mrs. Alexander agrees with "Bachelor," who addressed us last week in thinking that much evil comes from allowing very young girls to keep company with young men. It is earnestly hoped that if any mother or any young girl in this Home Department is in need of this warning that it will not have been given in vain. It is not pleasant to speak of these things, friends, and as enough has been said to rouse careless parents, to warn innocent girls, and to appeal to the best in young men let us consider the subject closed for the present.

Generally speaking "With the Editor" is something apart from the discussions here. Among Ourselves, but occasionally the things presented there so appeal to our readers that they feel moved to express themselves with regard to them. This happens to be one of the times as will be learned when Mistress Floy takes the floor:

In the issue of November 22d the letter quoted With the Editor brings vivid recollections of by-gone days. The young man I was engaged to would rave if I would talk to or be where any gentlemen were—neighbors or former schoolmates were not to be noticed, only the time of day passed. If we were invited out to spend the evening or a party he would be mad and pout and act ugly and be short with everyone who would speak to him if I would not sit and talk to him the entire evening. It makes one feel miserable and ashamed. When I would leave the city for a few days' visit he would take the opportunity of taking other girls for drives and home from church, and then brag about it. Perhaps if the young man searched himself and cast out all the flaws in himself, that he can see in the girl, and all forms of jealousy—the real foundation of all his trouble—he would see things in quite a different light and be far happier than he ever dreamed one could be. I have been married five years (but not to my jealous friend) and have two bright babies and a true, kind, loving husband without the least spark of jealousy.

By this time the forehanded have their Christmas gifts all planned, if not all prepared. Unfortunately we are not all forehanded. Some of us are still waiting for inspiration, for hints, for experiences from those who are wiser or cleverer than we. These will welcome the advent of Lora Leonard, and Matilda Mohr, and Mrs. F. J. Edwards:

First let me mention books—they are ap-

preciated by nearly everyone. They are not necessarily expensive. I purchase my books by mail at a great saving. Books in white cloth bindings decorated in dainty colors, make beautiful gifts and cost only twenty-six cents postpaid. Many are issued at a smaller price that are just as good, though not so pretty. Give the musician a music cabinet, at a dollar or two, or music, which can be bought for ten cents a copy. A good music roll costs about fifty cents. Lamps, rugs, table linen, silverware and dishes are appreciated by the proud housekeeper. The Perry pictures, at one, two and five cents, make fine gifts, especially if mounted on mat-board, under glass, and bound with passe-partout paper binding. Anyone can "passe-partout" who follows the directions which come with the binding. The cost of pictures, 6x8 inches, will not exceed ten cents; the larger pictures are proportionately more expensive. Those popular yard pictures can be had for ten cents. Booklets and calendars are as cheap as five cents, and the calendars are of use to everyone.

Perhaps there are others far from town who have friends to remember at Christmas time and have some natural resources, too. For friends whom I simply care to remember I tie two prairie chicken or quail wings together with a bright ribbon on which is fastened my calling card with a little rhyme something like this:

"On wings of love to you I fly,
Accept this simple token;
May Bountiful your wants supply,
And love remain unbroken."
For a gentleman friend I have the scalp and ears of a jack rabbit and with them I send a card like this:
"May your joys be as long as these ears,
Your sorrows as light as the down."
To a jolly uncle I send one of the large feet of said rabbit for "good luck," and say this:

"Here's 'Good Luck' to you always,
May health be yours still many days."
A friend in Michigan sent me a roll of birch bark and I have made many things from it. Pin cushions made by pasting birch on thin pasteboard cut as large round as your ink bottle, with sheet baton scented and placed between, then buttonholed long and short stitch together with coarse fancy silk thread and a narrow ribbon bow attached for a hanger are pretty. Write some simple rhyme with ink on the bark and stick in a few pins. Another trifle can be made by pasting the bark on the pasteboard from the back of a tablet—always press dry when you paste the bark on by placing under something heavy—and paint some daisies, or red clover, or brown-eyed Susans at the bottom and write a quotation from Hiawatha's Sailing at the top. This would also be a nice background for a calendar. For your reading friend make a book mark. From your stationer get a large sheet of paper about the weight of a calling card, cut out carefully in small designs stars, diamonds, hearts, palettes, etc., about two inches in diameter, and on each side of each write a quotation from some noted author, giving author's name. Now take a piece of the paper about a half inch wide and four inches long, and write on it: "This is to be placed between the back and the binding," and with a leather punch cut a hole in this piece and on each of the other pieces to be fastened to it—no more than three for one mark—and fasten all together with narrow bright baby ribbon. When the long strip is in place the other marks can be placed at will where they are desired. Never make a bulky present to anyone unless you know they are permanently located and really want it. Remember that a simple token tastefully wrapped in fancy paper and tied with narrow ribbon will show more love and respect than something more costly, bunglingly given. If one has money, a piece of jewelry, a silver thimble to a woman, a field glass for papa or big brother, or a fancy spur and rosettes for little brother's pony would be nice.—Matilda Mohr.

Not quite two weeks and a half till Christmas, and I expect you are all just as busy as I am. Would some of you like to peep into my Christmas box this afternoon? I perhaps will not be able to give you any hints that will be of any use this Christmas tide, but then useful articles are always acceptable and I always try to choose something that will be of use to the recipient. Being a great lover of fancy work I love to make a number of my presents. It not only enhances the value of the gift in that it shows the loving thought the giver bestows along with the gift, but it is easier on the purse and I am one of those fortunate (?) ones who are not burdened with many shekels. First here is a sofa pillow cover

Hey! Santa, where's that

SPECIAL FARM ENGINES

KANSAS CITY HAY PRESS CO., 126 Mill St., Kansas City, Mo.

made from a fancy handkerchief, the handkerchief being cut in fourths and joined through the center with lace heading, blue baby ribbon is run in the heading to match the color in the handkerchief, it being a flowered handkerchief. The back and ruffle are made of Indian linen, ruffle edged with narrow lace; cost of the whole, twenty cents, as the linen was some I already had on hand, but the pillow is dainty enough for any drawing room. This is a lap pad crocheted of the softest white Shetland flax in shell stitch lined with pink outing flannel, edged with a row of shells edged with pink silks. Between the lining and the outside is placed a piece of table oilcloth; one end is left open, or rather just basted together, so the oilcloth can be slipped out when it needs washing. Fifteen by twenty inches makes a nice size. This will delight the heart of the mother with a lap or put in the bottom of the cab and prevent the pillow or dress from being soiled. Cost of pad, thirty cents. These are slumber slippers. I did not make these, as I found that I could buy them cheaper and better than I could make them, but to those friends who suffer with cold feet at night they are truly a boon and so cheap—two pair for twenty-five cents. I would like to tell you where I got them, but that would savor of free advertising, but will just say they are advertised in a number of the leading household papers. For one who loves to do fancy work this apron will make an acceptable gift. It is made like the little round aprons worn so much, but a pocket as large as the whole apron extending over half way from the bottom up is added. The outer edge of the apron and edge of pocket are edged with a lace with a heading in the center. Blue baby ribbon is run in the heading and a band of inch wide blue ribbon with a bow and loops at side completes this dainty affair. One and one-fourth yards of Indian linen was used to make it, together with three yards lace, three yards baby ribbon, one yard wide ribbon; cost of whole, thirty-five cents. When one is called from some dainty fancy work in a hurry it is easy to drop the work in the pocket and lay aside the apron, and it keeps the work clean. This

other apron is made from the same pattern, but without the pocket; is finished with a ruffle edged with narrow lace; cost about twenty-five cents and will be useful to the mother whose numerous little brood keeps her hands so occupied that she has no time for fancy work, much as she admires dainty things. Handkerchiefs? Yes. No Christmas box would be complete without an assortment of handkerchiefs, both dainty and useful. One has a heading of lace joining a ruffle of footing to the linen center. The footing is edged with fine tatting. This one has a border of drawn work and a tatting edge. Two more have lace and heading for an edge. The cost of all was not over fifteen cents, as much of the material was scraps on hand. These doilies are for the busy housekeeper who has no time to fashion dainty things. This one embroidered in a bold design will always be a reminder of the "Yule tide." This little round one with a wide border of tatting will last, almost, "for aye," and this little square one has a border of drawn work and a narrow tatting edge. These protection collars, while they may not protect from either dirt or cold, will help make an otherwise plain waist look quite dressy. One is made of tatting, one of honiton lace and another of cream colored silk Battenburg. These and the doilies cost simply nothing only time and patience, as the scraps of lace were some left at some other time, and is so little one can hardly compute the cost. A hanging pocket having a center pocket and eight small pockets around it is useful to hang near the sewing table or sewing machine. This one is made from cretonne lined with pink cambric. Cut four circles fourteen inches in diameter, two of cretonne and two of cambric, sew them together so the cambric shall be as a lining for each one. Now cut a small circle of cardboard about three inches in diameter. Place this exactly in the center of the two larger circles, placing the pink sides of the machine stitch close around the small circle, divide the outer part of the larger circles into eight equal parts and stitch from the center circle to the outside. To each little pocket of the topmost circle sew small brass

Williams' Shaving Soap

Laundry soap is made to take dirt out of clothes. It is coarse and harsh. For shaving you need a soap made just for shaving, mild, healing and softening. The only real shaving soap is Williams' Shaving Soap. It makes shaving a luxury.

Send 2c. stamp for trial sample (enough for 50 shaves).

Williams' Barbers' Bar, Yankee, Mug, Quick & Easy Shaving Soaps, and Williams' Shaving Sticks.—Sold everywhere. Address,

THE J. B. WILLIAMS COMPANY,
Dept. A, Glastonbury, Conn.

rings. Through each two rings put pink baby ribbon and fasten all the ends together with a bow to hang it up by. It will fall into shape as one large pocket and eight small ones, and will be very useful to put thread, thimbles, etc., in. This costs less than ten cents. By using nice material it can be made so it will cost more, but be no more useful. And these are Christmas stockings. Christmas would not be Christmas to the little folks without the hanging of the stockings, and these Santa will be sure to see. They are made of outing flannel, pink on one side, white on the other. The pink side has the bottom of the foot white and a white cap at the top, while the white side has pink. They are feather stitched with pink and white silks and trimmed with bows of pink baby ribbon with ribbons to hang it up by at the top. There should be little bells on the bottom. Altogether they are a very elaborate stocking and sure to delight the little ones when on Christmas eve the time for the hanging of the stockings comes. If one is going to send them away be sure to send them so the children will have them for Christmas eve. The cost of these are about five cents each.—No Name.

Dressmaking and Millinery—No. 547.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] Just now when everybody's thoughts are turning to Christmas things I think we will have to follow the fashion and let our column for this week at least become a veritable "toyland." For this purpose I have selected three designs that illustrate things that may be made at home, ready to be placed among the Christmas gifts, or patterns for these may be ordered and put among these things so that the recipient may use them in making for herself, according to the time that may be at the disposal of the busy mother who has at heart and upon her hands the planning and providing for the pleasure of the family.

No. 5508 pictures a kimono such as should be in every up-to-date doll's wardrobe, and by studying the illustration you will see that the pattern provides for making this garment

[5508 Doll's Long or Short Kimono, 18, 22 and 26 Inches in Length.]

in either of the two lengths, as it is marked for short length, although cut in full length. There are so many scraps of pretty materials in almost any piece of rag, and these may be used in making such doll garments. Pieces of lawns, flowered or plain, in white or in some of the dainty colors, work up nicely, giving practice in fashioning such things to the wee fingers, that will serve them to good purpose later on when larger wardrobes are to be looked after. Help from the older ones in selecting and combining materials and colors will aid in cultivating taste and judgment. The kimono is made with yoke, fronts and back, and the full portions may be shirred and arranged to cover the yoke foundation, or to make the matter simpler the top may be cut off on the shirring lines, and be simply gathered and joined to the plain yoke. If the latter mode is adopted a fancy yoke of lace or other material may be used, or banding of some sort may be used about the edge of the yoke as we often use in making kimono for ourselves. The banding used about the neck and fronts of the garment, as well as on the sleeves, is usually of plain material matching the color seen in the flower of the garment fabric when such is used, or it may be of white on a colored garment, or of a color on a white

garment. In fact the "mama" must help the "girlie" plan for all this as she would for herself. Now you will note that No. 5508 is cut in sizes for dolls that measure 18, 22 and 26 inches in height. Be sure to give the size of the doll when ordering the pattern.

A toy that is finding much favor among the Christmas preparations is the "Teddy

[5519 "Teddy" Bear, 12, 16 and 20 Inches High.]

Bear" that is so simple and yet so real that it is worth while trying one. The pattern is No. 5519, and consists of a body portion, to which the legs, arms and head are attached, all being stuffed with cotton batting. Materials for making the little animal are found in plush of the long silky nap kind, or the "bear skin" cloaking is preferable. White is a favorite, but brown or black will bear more usage without showing soil, and therefore to be recommended for hard usage. Instructions for making are on the pattern envelope, and they are very sim-

ple. Patterns are cut in sizes for bears 12, 16 and 20 inches high. Give the size wanted when ordering.

Brum, or as he is called "Teddy Bear," looks just too cute when dressed in a costume that has been invented for his special adornment, and the pattern for this suit is No. 5531 shown herewith. It consists of a blouse shirt and overalls, these being cut in sizes for the bear in either of the sizes in which the pattern for him is cut. The overalls look most like the real thing when fashioned of materials in the colors in which

[5531 Blouse Shirt and Overalls for "Teddy" Bear, 12, 16 and 20 Inches Long.]

such garments are usually made, although a lighter weight cloth may be used. The shirt may be of white or any other color liked, or at hand. Pattern No. 5531 is cut in sizes for bears that measure 12, 16 and 20 inches in height. Give size desired when ordering the pattern.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range
Among the pleasant fields of Holy Writ
I might despair. —Tennyson.

The International Sunday-School Lesson.

Fourth Quarter. Lesson XI. Matt. XXVIII, 1-15, December 16, 1906.

Jesus Risen From the Dead.

When the facile pen of Charles Dickens dropped from his hand in the midst of the writing of his "Mystery of Edwin Drood," a sensation of regret was felt by his admirers that he had left a story half told. Had the evangelists laid down their pens before narrating the resurrection, it would not have been a passing sensation of regret, but the universal human heart would have been torn asunder between faith and doubt. There is so much upon the sacred page to indicate Divinity, but the glorious seal to it would be lacking. The unfinished Mystery of Jesus Christ would have plunged each succeeding generation of readers into grief and despair. The lament of the disciples on the way to Emmaus would have been the world's refrain: "We thought it had been He who should have redeemed us. But how can an unrisen Savior save?"

With joy and confidence we turn then to the fourfold narrative of the resurrection. No unfinished mystery is here. That last event essential to the symmetry of the Divine Person is told with incontestable truth. Each evangelist, from his own point of view, narrates the sublime event independently of the rest. What one lacks, the others supply. Each gives some minor touch caught upon the sensitive plate of his own individuality. So from the four pencils groweth the ever-living picture of the soul—the rising Christ! From the four Gospels the circumstantial evidences of the resurrection of Jesus may be gleaned and arranged as follows:

I. Reality of Jesus' Death. Insured by (1) Discipline of Roman soldiers. (2) Malice of enemies. (3) Centurion's report. Hence the reappearance of Jesus not the result of recovery from swoon.

II. Jesus' Tomb Empty on Third Day. Fact admitted by friend and foe. Mistake impossible; one body only in tomb.

(1) Body not taken by enemies. No object in removing it, or could have refuted story of resurrection by reproducing body. (2) Body not taken by friends. Proved by their transparent ingenuousness. (3) Body could not have been taken by anyone. (a) Because of discipline of Roman soldiers. (b) Because of position of grave cloths. Q. E. D.—Christ arose of His own will and power. No event of human history is more completely verified, more incontestably authenticated, than the resurrection of Jesus from the tomb of Joseph of Arimathea, in the garden near to Calvary. If that circumstance, as related by the evangelists, can be impeached, then any page of history can be impeached by the same methods.

In this circumstantial narrative—full

of incidents that at first glance seem trivial, but soon appear each in its proper place—an irrefragable link in the mightiest chain of evidence ever forged, it is as if one hears the Master's voice to His doubting disciples in each generation: "Reach hither thy finger, and behold My hands; and reach hither thy hand, and thrust it into My side, and be not faithless, but believing."

Analysis and Key.

1. If Christ had not risen, seal to His Divinity would be lacking. His story would have been unfinished. Universal human heart torn between faith and doubt. 2. Christ is Risen! Twofold narrative. 3. The irrefragable chain of evidence. 4. The last event essential to the symmetry of the Divine person historically verified.

The Teacher's Lantern.

The absolute ingenuousness of the apostolic company is manifest in the women's errand. They were no party to the opening of the tomb or removal of the body. What they had in their hands was striking and material testimony of their unfeigned openness. They came to minister to the dead, to complete embalment. Their perplexity and grief at finding the tomb apparently rifled completes the evidence of their candor and truth.

The evidence of the ingenuousness of the apostles themselves is equally strong. The women's report seemed idle talk. They are not inclined to receive it; rather the contrary. In the Iliad of woes attendant upon the crucifixion they had forgotten Jesus' assurance that He would rise the third day. If remembered, a spiritual significance was attached to it. Here was no hasty and credulous acceptance of an agreeable hypothesis. It required repeated assurances, under the greatest possible variety of conditions, to establish the fact of the resurrection in the apostles' minds.

The testimony of such witnesses, given under conditions like these, and of record in form, the authenticity and genuineness, which is unimpeachable, has had overwhelming weight in each generation, and as widely as published.

The resurrection of Jesus is the confessed corner-stone of the Christian system. If He be not risen, it is built upon a lie; faith is vain; apostles are false witnesses; spiritual resurrection of the soul from the deadness of sin is an illusion; the resurrection of the body a mockery, those who died in the false hope are annihilated.

"But!"—thank God for that strong and inspired adversative of the master logician!—"He is risen!" The fact re-

mains! That, too, after two millenniums of criticism.

On the diamond pivot of that blessed conjunction "but" the whole case swings the other way. Preaching is the power of God; faith is effectual; apostles are true witnesses; the spiritual resurrection of the soul from sin is assured. Christ is the first sheaf of the universal resurrection harvest.

There was nothing preternatural in the personal appearance of Jesus in the forty days after His resurrection. His countenance was not like lightning nor His raiment white as snow. He was mistaken for a gardener, and later as a common traveler. There was a sweet "humanness" in His words as well. He uttered Mary's name with a familiar accent. He called the disciples "My brethren." He appointed free-and-easy Galilee as the place of rendezvous. Even the salutation "All hail!" which in our version seems so majestic, is really just the common and happy greeting of friends.

Faith in the resurrection of Jesus is inseparable from the Scriptures. Cut off from them it withers as the branch severed from the vine. No amount of watering serves to keep it alive. Neglect of the Bible, indifference to it, or contempt of it, is the fruitful cause of unbelief.

We still need the double opening of the Scriptures to our understanding, and of our understanding to the Scriptures; to find the event corresponded to the prediction, as the tenon to the mortise, "Thus it is written" that Christ should rise.

Only the resurrection adequately accounts for Christianity. It has been said that it is more rational to believe the system founded upon a miracle than upon a lie. Farrar affirms, a conscious falsehood could never have had the power to convince the disbelief and regenerate the morality of the world.

Dogmatism and categorical statements concerning the nature of the resurrection body of Jesus, and of believers in general, had better be avoided. Exact description, minute definition, are unnecessary, dangerous, and entangling. Paul affirms in general terms that the resurrection body shall be incorruptible, glorious, powerful, spiritual. That suffices.

A TOOL CABINET FOR THE HOME.

The reason ordinary home tools become nicked and battered sooner than shop tools of equal quality is because they are not properly kept.

The best tools will be ruined in a short time if they are thrown in with others. Each tool should have a place of its own so that it will not come in contact with another.

Keen Kutter Tool Cabinets have been designed containing just the tools that are needed in every home, each in a place of its own, carefully separated from every other tool.

The cabinet itself is made of natural oak, beautifully finished and polished, and the tools are the very best that are made.

The Keen Kutter Tool Cabinet is the only one made which contains a set of trade-marked and guaranteed tools, the only one that can be bought without risk. If anything goes wrong with any tool, it will either be replaced or money refunded.

Keen Kutter Tool Cabinets and Tool Boxes come in different sizes and contain various assortments of tools, ranging in price from \$7.50 to \$100.00.

These Cabinets contain in different numbers and varieties, Saws, Brace, Bits, Chisels, Drills, Gimlets, Brad Awls, Scratch Awls, Planes, Hammers, Hatchet, Files, Pliers, Drawing-knife, Screwdrivers, Wrenches, Nail-set, Reamer, Rules, Squares, Tape, Measure, Level, and many accessories, such as Vise, Clamps, Gilstone, etc.

Besides the racks for tools, there is ample drawer room, so that not only the tools but the entire working outfit may be kept together.

The Keen Kutter Tool Cabinet Booklet will be sent free to any one by the Simmons Hardware Company, St. Louis and New York, U. S. A.

HOLIDAY EXCURSION RATES.

On December 20th, 21st, 22d, 23d, 24th, 25th, 30th, 31st and January 1st, the Iowa Central will sell round trip excursion tickets at rate of one and one-third fare, limited for return to and including January 7, 1907. For particulars and folders call on agents.

MORE CORN MONEY

INCREASE YOUR CORN PROFIT
By Planting Sorted Corn.

No idle ground; no missing hills; big yield sure when you sort your seed with the "MORECORN."

It all depends upon the stand

The use of this machine will make you more money next season than any machine on your farm.

All you have to do is to make sure of a perfect stand—get a uniform number of kernels in every hill. We manufacture the ONLY machine that will sort your seed corn so evenly that your planter must drop a given number of kernels every time. The "Morecorn" is a rotary motion. No flat sieves in it; no choking; nothing to be adjusted by you. It is ready to operate the minute you receive it. A child can operate it. The "Morecorn" does the work. Thousands of corn growers have sorted seed corn so perfectly that an edge drop planter dropped 99% perfect three kernels at each drop. Get your corn fields planted like that next year and you will get the biggest crop of corn you ever raised. You can do it if you sort your seed corn with the "Morecorn" Sorter.

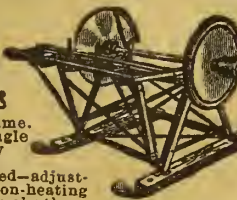

Farmers who used the "Morecorn" this year have the biggest crop of corn they ever raised. You can get the biggest crop you ever raised by using the "Morecorn" next year. No planter ever has or ever will be made that can drop an even number of kernels at a drop without the kernels being uniform in size. You cannot get uniform kernels without sorting your corn.

All the corn growers are now ordering the "Morecorn." We are shipping daily. Don't wait till spring. Get your order to us now.

THE MONARCH SELF-FEEDER CO.,
95 MAIN ST., CEDAR FALLS, IOWA

You never saw a
saw which saws
like this saw saws

and lasts so long a time.
Frame of heavy angle
steel, 4 by 4 by 1/2
braced—absolutely
no shake. Patented—adjust-
able, dust-proof, non-heating
oil boxes, etc. We make these

Appleton Wood Saws

in 6 styles—strong, simple, safe and successful—and we make a 4-wheel, mounting for wood saws and gasoline engines which is unequalled for convenience and durability. Saw your own wood and save time, coal and money—then saw your neighbors' wood and make \$5 to \$15 a day. We make the celebrated

39 Fargo Street Batavia, Ill., U. S. A.

BIG FARM PAPER A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsomely printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published on its own \$20,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people, its circulation reaching every state in the Union. Address with stamp Valley Farmer, 675 Jackson street, Topeka, Kan.

THE POWERS

Well Boring Machine

Bores 100 ft. in 10 hrs. Goes easily through frozen ground. A team of horses pulls it from place to place, and also furnishes power to operate. One man runs the machine alone, the auger drops through center of platform. 18 years use have proven this the lightest draft, the fastest and most economical to operate of any machine sold. Easy terms. Write for catalog.

TONIC STOCK FOOD CO., Box 4, ELGIN, ILL.

The Week in Kansas.

To the Editor of The Homestead:

Since Thanksgiving the weather has given us more to be thankful for than that day of feasting. It has been a return to the old Kansas brand of sunshiney days, moonlight nights and drying, southwest winds. This is again Kansas, and we're glad to be here.

All day Thanksgiving the rain came tumbling down. It kept many from assembling in the usual family reunions of that day, but, all the worse, it kept the belated corn huskers out of the fields. Until today, there has been little done in the corn fields since a week ago. A few tried it yesterday, but the mud was still too deep to pull out much of a load. Today, with the southwest wind blowing all night, it is some better, and about all with corn yet to husk are in the fields husking it. All we ask now is a continuance of this weather for a few days, when the work of the season will be well along. Another storm soon might mean an all-winter's job of a little left to do.

On account of the roads, there has been little hauling done, yet the usual number hurried out with their four horses and cut the grades into ruts, close by the towns. It does beat all how some seem determined to haul over roads when the best of grades are cut into ruts, making it disagreeable traveling for days after the road not abused is smooth and fine. There ought to be a law compelling people to keep off the roads with anything more than a thousand-pound load while the grades are in shape to be cut into ruts.

Grain prices continue about the same at the shipping points, but some of the heavier cattle feeders have been compelled to spring the price a little, mostly because of the difficulty of getting enough during the bad weather to keep their stock up to the full feed. Stock, too, has been doing poorly during the rainy, nasty weather of the past two weeks. We fail to realize what dry yards and weather means to us, until there comes a time when everything is mud or water-soaked.

This evening everything bids fair to remain fair for some days. There is scarcely a cloud in sight, with warm, spring-like breeze blowing from the southwest. However, how soon all will be changed cannot be told at this season of the year. It is the season when the weather cannot be depended upon one day ahead. We can, though, enjoy the fine weather that does come, without worrying about the storm that may not come. Henry Hatch.

FROST-PROOF GASOLINE ENGINES.
At last an engine that will not freeze up in cold weather. It is something of a marvel where all the thousands of gasoline engines are going that are being manufactured. It is but a short time since gasoline engines were practically unknown. Now, there are scores of manufacturers at work, and the entire output is being sold. This proves conclusively that there was an urgent need for a convenient, safe and reliable small power, and particularly such a one as would be suited to farmers' needs. The mention of powers for farm use naturally calls to mind the excellent line of gasoline engines that is being manufactured by the Fuller & Johnson Manufacturing Co., of Madison, Wis. For half a century these people have been manufacturers of high-grade farm implements. Their line is well known to our readers. Five years ago they began the manufacture of a gasoline engine. They went at it with the determination that their engine, like the celebrated Fuller & Johnson implements, should have no superior. The result is the famous "Frost-Proof" engines for farm use with which every farmer and user of

Every roll guaranteed. Send for samples. Cash with order. If not satisfactory, it can be returned or money will be refunded. Reference, Citizens Bank.

FARMERS SUPPLY COMPANY, - - WEST BRANCH, IOWA.

small powers should be familiar. The matter of an engine's being frost proof is all important. Many a farmer and other out-door user of power in cold weather has found this out to his sorrow. Originally Messrs. Fuller & Johnson cooled their engines by use of a mineral oil instead of water. This gives a perfect guarantee against freezing, is economical and convenient. But the engine is expensive to build and heavy to move about. Later, they added their open jacket, water-cooled, frost-proof cylinder, which has now become the approved type

practically everywhere. It is absolutely secure from frost in zero weather, is light and costs but little if any more to build than the ordinary cooling systems which give so much annoyance. We are showing herewith an illustration of this firm's portable engine. It is mounted on best steel trucks, equipped with nicely-finished seat box containing tools, battery, etc., and the open jacket. Prospective buyers will find this frost-proof engine the ideal type for portable work because there is no heavy water tank to be hauled about, no pipes to freeze and none to drain to prevent freezing. We do not think we make too much of these matters of cooling and of frost-proof engines. They are all important. But they are only two of the many excellent features of Messrs. Fuller & Johnson's engines. For the whole truth in convincing form, any one interested should write direct to the manufacturers for catalog.

Tornado Insurance.

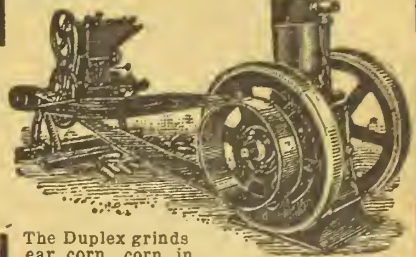

This is a good time of year to think about your insurance and see that your policies are all right, and not have to look after it during the busy season. The farmers' mutuals will take care of your fire and lightning insurance, but a county is too small a territory in which to carry tornado insurance; therefore, the Iowa Mutual Tornado Insurance Association was organized to co-operate with the county mutuals and has proven a wonderful success.

We called our readers' attention to this association in an article two weeks ago. The same agents who write for the farmers' mutuals write for this association. Now is a good time to attend to it. You cannot afford to be without either fire or tornado insurance for the small amount it costs you in a co-operative association.

In this issue on page 5 the Litchfield Manufacturing Company discuss the question of the rapid popularity of their machine, giving the reasons why this condition exists, and this article is certainly worth reading.

THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

DEPT. B, IOWA CITY, IOWA.

FOURTEEN FOR ONE FOR X-MAS!

To introduce in American homes our splendid pictures of the scenery in the Rockies—the snow-clad peaks under the blue skies of Colorado, we make a most extraordinary offer for this X-Mas.

We will send, postpaid, on receipt of only one dollar, six large, fine pictures—ready for framing, of the most beautiful scenery in the states, and as a premium a splendid, guaranteed fountain-pen, the like of which you cannot buy anywhere else for less than \$2.50. This is \$4.00 worth for one.

But this is not all. To the first 100 customers, who mention our ads, we will further give FREE a splendid stickpin set with a pure gold nugget, right out from the treasure chests of the Rockies, with a gold value of \$10. Thus you can get \$14 for one.

Our pictures should be in every home, our pens in every pocket and if you order promptly, you will own that splendid stickpin of pure gold.

Old and young will think it the greatest X-Mas present of the year. Address,

FIELD NOTES.

Mr. Grant White, of Afton, Iowa, has a few good Duroc hogs for sale.

If you want a Crimson Wonder boar write Mr. H. L. Cantine, of Quimby, Iowa.

Mr. Aug. Sonnenland, of Harlan, Iowa, offers some good Tip Top Notcher hogs for sale.

Mr. Harry Sexsmith, of Greenfield, Iowa, is offering a few Ohio Chief hogs for sale.

Messrs. Manley & Co., of Lyons, Neb., are offering a few well-bred Orion hogs for sale.

Mr. John Weighton, of Audubon, Iowa, is offering a few herd heading Duroc hogs for sale.

Junior Jim and Arion hogs are offered for sale by Mr. R. C. Poston, of Corydon, Iowa.

A few good Duroc Jersey hogs are offered for sale by Mr. J. E. Wehr, of Portsmouth, Iowa.

Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, offer forty head of young Hereford bulls for sale.

If you want Duroc Jersey hogs sired by old Dandelion, write to Mr. W. A. Peterson, of Lyons, Neb.

The old reliable Smith Brown, of Waterloo, Neb., offers a few very top Duroc Jersey hogs for sale.

Forty Duroc hogs at the popular prices are offered for sale by Mr. Albert Bell, of Lake City, Iowa.

Mr. Gus A. Pederson, of Okeyedon, Iowa, is offering a cracking good bunch of Duroc Jersey hogs for sale.

Eight fall hogs sired by the great Lord Roberts, are offered for sale by Mr. A. T. Sundell, of Paton, Iowa.

A few Duroc hogs sired by Proud Advance and old Orion are offered for sale by Mr. F. E. Garrett, of Lohrville, Iowa.

If you want a Duroc Jersey boar sired by the \$5,000 boar, Junior Jim, then write Mr. Austin Renshaw, of Blair, Neb.

Mr. M. A. McWilliams, of Wall Lake, Iowa, writes that he has a few choice Duroc Jersey hogs that he can ship at any time.

If you want a few choice Duroc hogs you can get them at a very reasonable price by writing Mr. Delmar McCann, of Kennard, Neb.

Read the advertisement on page 37 of Messrs. Rood Bros., of Lake Park, Iowa, if you want Duroc Jersey hogs or sows and gilts.

Mr. Z. T. Kinsell, of Mt. Ayr, Iowa, is offering some splendid young Hereford hogs for sale, also a few choice Duroc Jersey hogs.

Short-horn cattle and Duroc Jersey hogs is what Mr. Jas. T. Dollison, of Sac City, Iowa, is offering for sale in Homestead columns.

Mr. F. A. Edwards, of Webster City, Iowa, claims January 29th as a date to sell a good lot of Short-horn cattle, in which are several imported cows.

One of the best daughters of Imp. Scotland's Crown, the Ames Agricultural hull, will be sold in the G. W. Harrison sale at Washta, Iowa, December 18th.

Messrs. Wm. Ray & Son, of Defiance, Iowa, is offering a good bunch of Poland China hogs at from \$20 to \$30. You can get one of these if you go after one at once.

For the next thirty days Mr. Harmon Gruver, of Brewster, Minn., is making a great cut in Duroc hogs. It will pay you to write him if you have not bought your boar.

If in need of White Holland turkeys or Duroc Jersey swine read the advertisement of Mr. J. S. Teale, of Lamoni, Iowa, that appears on page 21 of this issue of The Homestead.

Mr. W. J. Wendt, of Marcus, Iowa, breeder of Duroc Jersey swine, writes that his herd is in good, healthy condition and that he has a few good hogs left. His bred sow sale will take place in February.

Mr. George W. Medlock, of Benson, Neb., the proprietor of the Hillside herd of Duroc Jersey swine, makes the announcement on page 37 of this issue of The Homestead that he has spring hogs and gilts for sale.

Messrs. Norrish & Bevington, of Kingsley, Iowa, can sell you a Duroc Jersey boar that is fit to head any herd and at a price that any breeder can afford. Write them at once before all the good ones are gone.

Messrs. Stow & Gingrich, of Hamburg, Iowa, have a few good hogs left that are fit to head herds. They own one of the best Duroc Jersey herds in the state and they can please you if you go and see them or send them an order.

A few choice Duroc hogs, excellently bred and good individuals, are offered for sale by Mr. A. W. Lamb, of Monroe, Neb. These are sired by the great boar, Glenwood Critic, a son of the noted Glendale Critic, and considered his best son. Write Mr. Lamb about these at once.

Mr. S. J. Butts, proprietor of the Midland herd of Duroc Jersey swine, of Mason City, Iowa, in remitting for advertising, writes: "I have a few hogs left sired by a son of Top Notcher Again. They are big, growthy fellows, weighing from 200 to 225 pounds. I also have a few gilts. I am breeding and selling them at \$20 each for a short time to close out."

Mr. J. H. Barker, of Mazon, Ill., breeder of Poland China hogs, starts an advertisement in this issue of The Homestead on page 31. Mr. Barker has an unusually good herd, both in point of breeding and individuality. He is now offering for sale some good fall yearling and spring gilts sired by such noted hogs as Keep On 2d, Contractor, Come On, Monnier's Perfection and others of equal note bred to a Chief Perfection 2d boar out of a Keep On dam. Mr. Barker will be pleased to furnish prices and de-

scriptions to all who write as per the advertisement on page 31 of this issue.

Mr. E. Fugler, of Creston, Iowa, is offering Shire and Percerbon stallions and mares for sale in his advertisement on page 39 of this issue.

Messrs. E. M. Castle & Son, of Joy, Ill., the well-known breeders of Duroc Jersey swine, have found it necessary to change the date of their brood sow sale from January 25th to January 18th. Readers of The Homestead should make note of this change and plan to be present sale day if in search of good brood sows. If you are not on Messrs. Castle's mailing list write at once for copy of catalog, kindly mentioning The Homestead.

Messrs. Obandler Bros., of Kellerton, Iowa, the well-known Shropshire sheep breeders and importers, won first on their ewe lamb in a class of thirty-three at the International last week. This is the same ewe that they won first on at all the leading state fairs this fall. They now have a very choice lot of imported and home-bred Shropshire rams and ewes for sale and they certainly are good ones. Write them for prices or go and see them.

Mr. E. B. Conkling, of Medapolis, Iowa, writes as follows: "In The Homestead of November 15th you give me credit for topping the sale of Messrs. E. M. Castle & Son, of Joy, Ill., on the males, but fail to give me credit for topping the female portion of the sale. I topped the female portion of the sale, securing a daughter of Oom Paul and Tip Top Notcher at \$51, instead of \$31 as per your report." We regret very much having made this mistake and take pleasure in calling the attention of our readers to the correction.

What has been pronounced one of the best Thickset Poland China hogs in the West, and now offered for sale by Messrs. Ruchel Bros., of Rockwell City, Iowa, is their herd boar, Iowa Chief, sired by Ed Klever's Thickset and out of Lady Hart, an Ideal Perfection sow. These gentlemen announce that they are all sold out of hogs, but they are now offering five Short-horn bulls, old enough for service, at very reasonable prices. Their brood sow sale is to take place February 12th. Send to them for catalog after February 1st. The advertisement appears on page 37 of this issue.

We start the advertisement this week of Mr. F. H. Jackson, live stock auctioneer, of Rutland, Ill. Before readers of The Homestead make arrangements for their public sales they should write Mr. Jackson in regard to his prices. He has recently sold \$48,000 worth of property in three days. He has called sales in Illinois, Iowa and South Dakota, and has always given satisfaction. He has been selling home-bred fancy stock for seventeen years. Mr. Jackson comes well recommended to The Homestead and we trust that our readers will hear him in mind when making arrangements for their public sales.

Mr. W. N. Booth, of Danbury, Iowa, breeder of Poland China swine, in a recent letter writes: "My hogs are doing well. I have fifteen good, strong, vigorous hogs of spring farrow yet for sale and will make bargain prices on them to quick purchasers in order to close out. My sow sale will be February 20th and I expect to put up a splendid offering. The hogs I have left are by Uneeda Thickset, Keep On Jr. and Stand Up 3d. These are three outstanding good sires and are out of good sows and from good litters. They are very strong, healthful and vigorous and will prove profitable to the purchaser." See Mr. Booth's advertisement on page 36.

Mr. H. S. Allen, breeder of Duroc Jersey swine, of Russell, Iowa, in remitting for advertising already done, writes as follows in regard to his Durocs: "I am entirely sold out of hogs, having enjoyed a very good boar trade, due principally to my advertisement in The Homestead. We are getting lots of inquiries for bred gilts. Please say to the boys that we will offer no gilts until our brood sow sale, February 4th. At this time we have twenty-eight sows and gilts mated to the grand champion, Crinon Wonder Again, and ten to the old hog, Top Notcher Again. We will put forty head in our sale, about thirty of which will be bred to Crinon Wonder Again."

Mr. Samuel Locke, of Selma, Van Buren county, Iowa, has twenty-five pedigreed Poland China pigs of both sexes which he is offering for sale and on which he will quote reasonable prices. He writes: "Mr. Theo. Fellows, of Keosauqua, Iowa, came in person recently and bought five gilts and a boar to start a herd from. I have never had a dissatisfied customer. I have shipped Poland Chinas to three states besides Iowa and have shipped turkeys to ten different states. I have been a regular breeder for ten years." If Homestead readers are looking for good Poland Chinas or Mammoth Bronze turkeys we would advise them to write Mr. Locke for prices and description of stock.

Mr. M. M. Elmendorf, breeder of Duroc Jersey swine, of Lacona, Iowa, writes: "I have had splendid success in selling Duroc Jerseys this fall. I have sold over seventy head during and since the Iowa State Fair. The Homestead has brought me more than its share of buyers. I find that The Homestead reaches the proper men to do business with. My mail order trade has been very strong. I have Duke of Ohio 29529 yet and he is for sale, and I will sell George Hur 40851, as I can spare him now. I also have two spring male pigs left, one a grandson of Crinon Wonder I Am 34687, and four spring gilts that will be bred this month, for sale." See his advertisement which appears on page 37 of this issue.

To those of our readers who are looking for some good Berkshires or Short-horns, the advertisement of Mr. C. S. Buckley, of Holstein, Iowa, will be particularly interesting. Mr. Buckley is at the present time offering for sale one extra choice boar pig, farrowed April 15th, weighing 200 pounds. He is sired by Conquest 2d 75301, dam Dolly Varden 77202, a daughter of Pretty Face 63103, the first prize aged sow at the Interstate fair in 1906. He also has five choice June hogs that will weigh from 150 to 175 pounds that was sired by Benjafield Faithful, an imported herd boar. All of the early spring gilts he cares to spare have been sold. He has a few good open June gilts yet for sale. In Short-horn cattle, he has one yearling Scotch bull sired by Gondolier 131273, and out of a Victoria dam. Write him, telephone or go

and see his stock. His advertisement appears on page 35 of this issue.

Mr. Chas. Sobotka, of Calinsville, Mo., offers big growthy Duroc Jersey boars ready for service.

Messrs. Wheatley & Ward, of King City, Mo., can furnish Angus bulls that have for their sires such bulls as Maplehurst Proteros, Hae Lad 2d and Gardner's Pearl Rosegay, three bulls of much individual merit and bulls that sire stock that carry a great amount of the high-priced meat. These bulls are being priced right and bull buyers will do well to investigate.

Messrs. O'Brien Bros., of Waukon, Iowa, have some big-boned Poland Chinas sired by a boar with a ten and one-half inch bone, out of mature sows, they are offering for sale in an advertisement that appears on page 31 of this issue. They state that these pigs are an extra good lot and will be priced right. They also have one yearling that is hard to beat. He is a big-boned, showy hog, and good enough to head a good herd.

Mr. B. M. Boyer, breeder of Chester White swine, of Farmington, Iowa, in remitting for advertising, writes: "My hogs are going like hot cakes on a cold day. I shipped eight head this week and received orders for seven more in today's mail. I have some choice ones left of both sexes and can fill orders promptly. I am booking orders for bred gilts. I can breed them any time desired and keep them until I can guarantee them safe in pig. I sell at farmers' prices. I will breed them to as good a boar as there is in the state. I can furnish them not akin or breed them to boars not akin. I will pay the express charges, or ship c. o. d. on approval." See Mr. Boyer's advertisement which appears on page 35.

Mr. Fred Ebendorf, of Strawberry Point, Iowa, breeder of Poland China swine, writes: "I have the best boars I have ever had for sale. They are by Hustle On, Correct I Know Jr. and L's Tecumseh 2d, and other good ones. I have one good fat boar that will go at a bargain. The boars that I am offering for sale in my advertisement weigh from 200 to 240 pounds. They are not stuffed and have had lots of range. I recently sold a pig to Mr. James McKittrick, of Zwingle, Iowa, who, after receiving the pig, wrote: 'I received letter and pedigree the same evening I got home with the pig. He arrived safe and sound. The pig suits me all right and I am well pleased with him. Thank you for your good judgment.' See Mr. Ebendorf's advertisement on page 36.

Mr. W. W. Wheeler, of Harlan, Iowa, writing under date of December 6th, says: "My Duroc Jerseys are coming fine. You don't know how I hate to say it, but I shall sell every Duroc Jersey I own on January 16th. My Durocs have done well for me, but one man can't do everything. I will have a great offering; three full sisters to Crimson Wonder; one litter sister to Crimson Wonder, Lady Wonder; one daughter of Duroc Challenger, one daughter of Orton, one daughter of Onward, three daughters of Majestic; thirty-four gilts sired by Carmine Wonder, a half brother to Crimson Wonder; Scarlet Wonder sired by Pericles 4499 and out of a full sister to Crimson Wonder and Belle's Perfect King, a son of Nebraska Belle, bred to grandsons of Ohio Chief and Improver 2d."

Mr. T. A. Stevenson, proprietor of the Grand View Stock Farm, Shannon City, Iowa, breeds Chester White hogs, Aberdeen Angus cattle and English Shire horses. He offers at this time some fine specimens in the way of Chesters, sired by one of the greatest sons of the twice champion, Prescott Boy 14239. In Aberdeen Angus bulls and heifers he is offering calves and yearlings, sons and daughters of the two great breeding bulls, Blackbird's Eclipse 33879 (a Blackbird son of old Moon Eclipse) and Elidure 73161, a Blackbird-topped Erica. He writes: "From this time on until January 1, 1907, I will cut the price in two to make room for the coming crop of calves. Now is the time to buy. I can sell a bull now much cheaper than I can next spring. You can buy a bull calf or yearling and keep it much cheaper than I can—in fact, you would hardly miss what he would eat. If you can use a good bull, write me for prices. I guarantee everything to be as represented. In Shire stallions I have two fine ones, a three-year-old coming four next May, and an aged stallion, a prize winner, one of the best horses of the breed individually and in his blood lines a great horse and a great breeder. Write for prices on anything in my line. Please mention The Homestead, the greatest advertising medium in the West, chock full of good things. Its columns are clean, wholesome and to the point. It is as full of meat as an egg." See advertisement on page 35.

Col. C. A. Ewing, of Lathrop, Mo., is one of the men behind the Missouri Auction School, of Trenton, Mo.; second term opens January 1, 1907. Colonel Ewing has served

sales have passed to his credit. Colonel Ewing instructs in general farm sales.

THE AMERICAN AUCTION SCHOOL OPENS NEXT MONDAY.

The American Auction School, at Chillicothe, Mo., opens next Monday, December 17th. Col. Harry W. Graham, its president, writes that prospects are bright for this term; that he thinks students will find the December term one that they cannot afford to miss. Students from all parts of the country are enrolling and preparing to take advantage of the special rate for this term. If you contemplate taking the course got ready and be on hand the opening day.

CHOICE DUROC JERSEY BOARS.

Those of our readers who want a good Duroc Jersey boar should write Mr. Grant Summers, of Malvern, Iowa. He has a few choice boars sired by Crimson Wonder Again, the Iowa State Fair sweepstakes boar, and out of a daughter of Top Notcher Again. Mr. Summers is pricing these low, considering their breeding, and the man who wants a herd head should go after them at once. He also has a splendid litter sired by Lottie's Top Notcher out of a granddaughter of the sweepstakes World's Fair boar, Tip Top Notcher. We urge those of our readers who want boars to write Mr. Summers about these at once. He is pricing them within the reach of anyone who wants a good Duroc Jersey boar.

A WHOLE HERD OF RED POLLED CATTLE FOR SALE CHEAP.

In order to change his business plans, Mr. W. D. McTavish, of Coggon, Iowa, will price his entire herd of Red Polled cattle, or any portion of them, to prospective purchasers at prices that will make them move. There is a great bargain in this bunch of cattle at the present time at the price asked. This famous dual-purpose breed created great interest at the International live stock show at Chicago last week; more interest centered around the contest when the Red Polls were being judged than has been before witnessed in many years. Mr. McTavish has the same sort and the same lines of blood as the prize winners of Chicago. Write him at Coggon, Iowa, for particulars and prices.

PETER HOPLEY & SON'S STALLIONS.

Readers of this paper should read the advertisement of Messrs. Peter Hopley & Son, of Lewis, Iowa, on page 39 of this issue. This is one of the pioneer importing firms and no institution can boast of having a better lot of Belgian, Percheron, Shire, Suffolk and German coach stallions than will be found in their barns. They now have on hand and for sale about twenty head of choice Suffolk fillies and they are as good as we have ever seen. When a buyer buys of this firm they buy right, because the price is always right. The elder Mr. Hopley is one of the best judges in this country and he always selects his own horses. Inasmuch as they do both their buying and selling, their customers get the benefit. If you want a Belgian or a Suffolk there is no better place in America to buy and the same can also be said of their Percherons and Shires. Write them at once or go and see their horses. Please mention this paper when writing.

THE LAST CALL FOR THE MILLS & SON PERCHERON SALE.

Those of our readers who want Percheron and French Draft stallions and mares should not fail to attend the closing out sale of Messrs. J. R. Mills & Son, of Perry, Iowa, on December 19th. Included in this sale will be some splendid stallions and some grand good mares. The latter will range in age from yearlings up, and ten of them will be safe in foal to their prize-winning stallion, Narcisse. There will be a few well-matched teams of mares in this sale, and those who are thinking of buying mares will find them here. There will be eight head of stallions in this offering and we can say to our readers that they will not be disappointed in these horses. Some of the best young stallions we have seen this year will be sold in this sale. They also sell two head of registered Short-horn cows and two head of bulls. They will also sell a bunch of good registered Aberdeen Angus bulls, eighteen head of grade steers, yearlings and two-year-olds and twenty grade cows and heifers. The horse end of it, however, is the important part of the sale, and anyone that wants Percheron or French Draft stallions or mares will find them in this sale. Write for catalog at once and don't forget to be present on that occasion.

DISPERSION SALE OF HEREFORD CATTLE.

On December 28th will occur the dispersion sale of thirty-five registered Hereford cattle, six miles southeast of Muscatine, Iowa, across the river in Illinois. These cattle are the property of Mr. Martin Liebeg, of Muscatine. There will be eighteen bred cows, six with calves at foot, eleven yearling heifers and six bulls, including the herd bull, Sir Jack 14404. This bull was sired by Wild Jack 94697 and out of Lucy Love 2d 31232. Wild Jack is an intensely inbred Anxiety bull, and all the females in the sale of sufficient age are bred to him, and a portion of the younger things are by him. Five of the heifers in this sale are sired by Patrol 71765. He also is an intensely-bred bull in Anxiety lines. Mr. Liebeg is making this dispersion sale in the afternoon of December 28th. During the forenoon he will sell eighteen splendid high-grade yearling steers and thirty high-grade cows and heifers. The popular auctioneer of eastern Iowa, Col. Griff Johnson, will conduct this sale. Mr. S. L. Johnson, of the German-American Savings Bank of Muscatine, Iowa, will clerk this sale. There is perhaps no two men in eastern Iowa that have had more experience in this line than the two Mr. Johnsons. This will be a splendid opportunity for farmers of northeast Missouri, western Illinois and eastern Iowa to secure some well-bred Hereford cattle and good individuals of the practical, useful kind. All parties attending this sale should go to Muscatine, Iowa, as this is the only railroad point near the place at which the sale will be held. Muscatine can be reached over the Chicago, Milwaukee & St. Paul, the Muscatine & Wilton branch of the Rock Island, also the Muscatine & Western branch of the Rock Island, and the main line of the Rock Island from Chicago to Kansas City. Also the Muscatine north and south which connects Muscatine with the Iowa Central railway system. Free convey-

ance from Muscatine to the farm and back on sale day.

CHOICE DUROC JERSEY BOARS.

If any of our readers want a good boar they should read the Duroc Jersey advertisement of Mr. Jno. Weighton, of Audubon, Iowa, which appears on page 37. He offers a son of the noted sow, S. E. Model, that cost him \$1,075 at the Ebelson sale last winter. He is a son of the noted boar, Proud Advance, and he should head some good herd. Mr. Weighton also has others by Proud Advance, the sire of the first-prize gilt and the second-prize litter at the Iowa State Fair this fall. Just write him for his prices, or go and see him if you possibly can. He can certainly suit you, both in price and in quality of boars offered for sale.

A CARLOAD OF SHORT-HORNS FOR SALE.

Last week we called attention to the sale of a carload of Short-horn cattle at Humphrey, Neb., on Tuesday, December 18th, the property of Mr. F. E. Terrell, of Montezuma, Iowa. It is our understanding that this is the first public sale of pure-bred cattle ever held at that place, and this sale should not be missed. Mr. Terrell in writing in regard to the offering says: "One of the best in the cow stuff is the young cow, Ophelia. She is sired by the grand old breeding bull, Prince Victor 170394, and her dam is Lady Challenger, of the Daisy family, by Challenger 118377, she by Lady 3d by Baron Victor 90443. Individually she is a grand, good, level-backed, deep-bodied cow, of good scale and her breeding is all one could ask for in a good pedigree. There are some good yearlings in the cow line besides the fancy young cow, Keep Sake 3d, also by Prince Victor. This cow is a Rosemary and you will find few of her equal passing through the sale ring this fall. The bulls run from nine to eighteen months old and are a sappy lot of good, thick-fleshed fellows, probably one of the best of them being Gold Finder, a fifteen-months-old bull. He has a Bright Eyes mother and is sired by Prince Victor. He is a prize winner and deserves to go to the head of some good herd. He is bred on dam's side the same as the bull that stood at the head of Mr. A. W. Lamb's herd at Monroe, Neb., as long as he could use him. There are other prize winners in this sale, but space will not permit mention of all the good things we have to offer." See advertisement on page 34.

BERKSHIRE BOARS FOR SALE.

Only a few more of those heavy-boned, long-bodied, deep-sided, short, dish-faced Berkshire boars are left at \$25 each. This is the good and encouraging words from Mr. W. D. McTavish, of Coggon, Iowa. Mr. McTavish started in the season with some fifty or sixty head of this character, depending on his advertisement in this paper to sell them out. It has done the good work down to the limited number above referred to. We have seen these pigs within the past six weeks, but meeting Mr. McTavish at Chicago at the International last week he informs one of our representatives that they have grown out amazingly since our last visit, and now are better than many of the pigs that were shipped out earlier in the season. There is probably no better pork bog on earth than the large English Berkshire, when bred in right lines, with sufficient bone, length and great arched backs. These are the only kind that find a welcome at the Chapel Hill breeding farm. Mr. J. R. Elliott, of Woodward, Iowa, has purchased Mr. McTavish's old herd boar at a long price. We refer to Royal Premier 67448. This boar goes to head Mr. Elliott's famous herd of Berkshires. Mr. McTavish will continue to sell these boars above referred to at \$25 each while they last, and will also take this price for the sisters to these boars as open gilts, but when bred, the price is \$35 each. These pigs are all rich in the blood of the world's champions. Write for prices and particulars to Mr. W. D. McTavish, Coggon, Iowa.

MORE CONCERNING C. S. BARCLAY'S DISPERSION SALE OF SHORT-HORN CATTLE.

Since concluding our last notice relative to the dispersion sale of the Orchard Farm herd of Short-horn cattle, owned by Mr. C. S. Barclay, of West Liberty, Iowa, we have received a catalog of the sale, which reveals such a rich line of Scotch breeding that we cannot refrain from impressing upon the minds of all our readers that this will be a good sale to attend. As has been before stated, Mr. Barclay has borne the burden of the fight in the heat of the day for the past thirty-five years in the Short-horn warfare against the scrub cattle of the country, and now, that the time has come when he lays down his chosen life work, which this virtually means in the dispersion of the fifty-five head of Orchard Farm Short-horns, it will be a grand opportunity for breeders from all over the land to strengthen their herds in some good Scotch blood. Mr. Barclay has been an enthusiast in breeding good cattle and in using good bulls. There may have been times when Mr. Barclay allowed his zeal for the good of the breed to carry him beyond the skirmish line to near the danger point. However this may be, he has been the loser thereby, and the good results of his expensive ventures can be secured on December 18th, when this beautiful herd of Short-horns, the last that Mr. Barclay has on earth of the breed, will be dispersed. Concerning the good Scotch bulls that Mr. Barclay sells, in addition to Imp. Favorite, previously mentioned at some length, we would now call attention to Orange Champion 3d, a red bull calved Sept. 30, 1905, sired by Iowa Champion and out of Orange Blossom B. 18th, and she by Secret Bampton. This is a straight Scotch Orange Blossom with no out crosses, and is a bull sufficiently well bred to head any herd in America, or in the world, so far as that is concerned. Individually this is a splendid prospect for a herd head. Some may take issue as to the comparative worth of this bull and his stable companion, Mysie's Champion. The last named bull was sired by Iowa Champion, but belongs to Cruickshank's famous Mysie family, tracing to Imp. Mysie 36th by Scotland's Pride, and she out of Mysie 33d by Champion of England. Be this as it may, they are both grand good bulls of the same age and color and worthy to find homes where good bulls are needed. Lot 48 is another red bull calved April 19, 1905, called English Champion 2d. He is also by Iowa Champion and traces to Imp. English Lady by Heir of Englishman. They are sometimes

called Roan Ladies, and have furnished some very high-priced cattle as well as numerous prize winners. The yearling heifers of last year, shown by Messrs. J. & W. B. Watt, of Ontario, at the International show in Chicago, were of this family. We regret to see this old Orchard Farm herd scattered to the four winds, as it were, as it represents more than one-third of a century of time diligently devoted to its upbuilding by Mr. C. S. Barclay, who has been one of the most enthusiastic, energetic breeders of Short-horns in America, and was for a time one of the directors in the American Short-horn Breeders' Association; also prominently identified with Iowa's Improved Fine Stock Association, for many years, and a member of the board of regents of the Iowa Agricultural College at a time when his counsel and judgment aided and assisted Professor Curtiss in getting appropriations for the betterment of the beef cattle at Ames, which has redounded to the credit of the state many times since. The catalogs of this dispersion sale will be

as president of the International Auctioneers' Association, president of the Missouri Auctioneers' Association and 2,500 successful

mailed free to all readers of this paper who apply to Mr. C. S. Barclay, West Liberty, Iowa.

THE MAPLE LEAF DUROC JERSEYS.

Mr. S. R. Murphy, of Savannah, Mo., proprietor of the Maple Leaf herd of Duroc Jerseys, reports sale of three boars from the great young sow, Savannah Belle. Savannah Belle was bought last winter at the R. J. Harding bred sow sale for \$750. She was bred to the great Ohio Chief and raised five pigs, four boars and one sow. Mr. Murphy reserved one boar for service in the Maple Leaf herd and now reports the sale of the other three. One goes to Messrs. Maupin & Applegate, of Shelby, Mo., at \$300. One to Mr. J. Coy Roach, of Girard, Ill., at \$300, and one to Mr. A. E. Poush, of Chariton, Iowa, at \$250. The gilt of this litter is now at Mr. H. S. Allen's to be bred to Crimson Wonder Again, the champion Duroc Jersey boar at the Iowa State Fair this year. She will go in Mr. Murphy's bred sow sale February 23, 1907. Here will be an opportunity for Duroc Jersey breeders to get the blood of several of the greatest families of the Duroc Jersey concentrated in one animal. The gentlemen who bought the boars in this litter should have heard boars of great merit, as they are backed up for generations by sires and dams that have no superiors, either as show hogs or breeding hogs. Mr. Murphy further states that he will select forty of his best sows and gilts for the bred sow sale. They are being bred to such boars as Ohio Chief Again, the son of Savannah Belle that he reserved; Crimson Wonder I Am, Buddy K. 4th, Perfection Chief and to Gold Cloud, all boars of great reputation throughout the corn belt. Mr. Murphy is known as one of those men who never does things by halves and when sale day rolls around Duroc Jersey breeders who are out for bred sows and gilts will do well to be on hand.

SAUNDERS' ANNIVERSARY SALE.

The anniversary sale of Mr. C. A. Saunders, at Manilla, Iowa, on December 19th, commemorative of his ten years as a breeder of Short-horn cattle, promises to be one of the most important sales of the year. The preparations and plans for this sale were formulated in the mind of Mr. Saunders several years ago, and every animal that is to be sold, every detail in the arrangement of the sale, both as to the number of cattle, the printing of the catalog, the advertising, the hiring of the auctioneers, and the many other necessary preliminaries, were worked out and thoroughly gone over long before the sale was announced. In many respects the sale is out of the ordinary. The cattle are a grand lot, there being thirty head of straight Scotch of the very best and most popular families. Besides these, however, will be found a most excellent lot of Scotch-topped cattle, and when it is remembered that there will be seventy-one head in the sale it will be understood that there will be enough for everybody. The farmer and the ranchman can attend the Saunders sale, feeling that he can get just what he wants, and at prices that he can afford to pay. The breeder of high-class Short-horns can look to the Scotch cattle for what he wants, and he will find them there in goodly numbers, both imported and home bred. Every arrangement has been made to take care of the visitors. Col. F. M. Woods has evolved a new speech for the occasion and every lover of oratory should come out to hear him. Geo. P. Bellows and Carey M. Jones will furnish the music and a grand program will be furnished for those present. The converts are expected from the several states adjoining and we believe those who come out will conclude that it is the accepted time to begin a new herd or add a few choice ones to the one already started.

Send for that 100-page catalog and you will be able to see the light.

HEALY'S MARYSVILLE SALE.

One of the best combination sales of Short-horn cattle that will be held in Kansas this year will be disposed of at Marysville, Kan., on December 18th. The veteran breeder and manager, Mr. F. P. Healy, of Bedford, Iowa, will have charge of the sale and he has succeeded in collecting some of the best cattle that he has ever had the opportunity of offering the people of that state. There will be a liberal number of Scotch cattle in the sale and there will be a number of unusually good Scotch bulls in the offering. Mr. Healy himself contributes ten head, and eight of these are straight Scotch, some of which are as good as has ever come from his well-known herd. One of the best bulls that he will sell is Gloster's Baron 2d 262635, a March calf, sired by the noted bull, Baron Pride, out of a daughter of Scottish King. He is a strictly pure Cruickshank bull and a Royal-bred Duchess of Gloster at that, and he is good enough to head any herd in the West. Count Gloster 262633 is a yearling Duchess of Gloster, bred along identical lines and a good young bull. He also puts in three good young Secret bulls, all sired by the pure Scotch bull, Royal Cherub. These are good bulls and should be eagerly sought after by Kansas breeders. He also sells Scottish Rose, a six-year-old daughter of Scottish King, out of a daughter of Imp. Ducal Crown, then comes the great show and breeding bull, Imp. Cupbearer. She is a splendid milker and has always raised a red calf every year since she was two years old. Mr. Healy sells Birdie Gloster 2d, a two-year-old Duchess of Gloster heifer, and a very choice individual. Mr. D. G. Sutherland, of Clarinda, Iowa, is consigning some of his choicest cattle to this sale. Mr. Sutherland laid the foundation for one of the best Short-horn herds in southern Iowa, but is now leaving for the state of Washington, and therefore must close out.

THE LAST CALL FOR THE G. W. HARRISON SALE.

On Tuesday, December 18th, Mr. G. W. Harrison, of Washta, Iowa, will make a public sale of sixty-six head of Short-horn cattle. This is Mr. Harrison's second annual sale and he is putting in some choice cattle, good enough that our very best breeders can well afford to attend. When looking over Mr. Harrison's cattle a field representative was impressed with the class of big, broad-backed cows that will be offered and the uniform lot of heifers that will be in the sale. The cows in this herd have been exceptionally heavy milkers and it never was necessary to keep nurse cows in order to raise a calf in this herd. The greater part of the young things offered for sale will be sired by the noted Scotch bulls, Scottish Knight and Victoria's Valentine, and another bull used with much success in the herd is Prince of Wales, and many of the best things in the sale will be sired by the latter bull. Many of the cows will have calf at foot and others will be safe in calf to Scottish Knight and Young Scottish Knight. About ten of these will have calf at foot. As a special attraction to breeders to attend his sale he has concluded to put in the great young heifer, Victoria Crown, a daughter of the noted Scotland's Crown, that formerly headed the Ames Agricultural College herd and was considered one of the best bulls in the United States. Her dam is a daughter of the Cruickshank bull, Gallahad, that has been such an important factor in the improvement of our present day Short-horns. She is one of the very best bred Cruickshank Victoria heifers ever offered in the state of Iowa and the breeder who gets her is going to get a heifer that will make a great foundation for his future herd. She is bred to and is well along in calf to Scottish Knight, a son of Imp. Northern Light, and a bull that has sired some of our very best Scotch cattle. He also puts in some Canadian-bred cows and these will all be in calf to Scottish Knight. The heifers that he sells in this sale are a very uniform lot, of the blocky and well-developed type. All of these that are old enough will be bred. There will be twenty of these yearling heifers in the sale. Most of these will have four and five Scotch tops on them and they are good enough to go anywhere. There will be five good young bulls in the sale and also a carload of good young range bulls. Among these young bulls will be two Orange Blossoms, one a son of Scottish Knight, the other a son of the \$1,000 bull, Robin Adair, that formerly headed the E. C. Sage herd at Denison, Iowa. Some of these are bred along the very best Scotch lines and are right for the farmer and breeder. The ranchman is looked after in this sale and there will be a carload of young bulls that will be offered in the bunch, and they are good ones. In fact some of these are as good as he has, but they must be sold, and he decided to offer them in carload lot. Mr. Harrison is selling some good cattle and they certainly are the money-making

Simpson - Eddystone Black & Whites

sorts. There will not be a cow in the sale that is not a regular breeder and all right, so buyers will know just what they are getting when they buy in this sale. Kindly write Mr. Harrison for catalog and mention The Homestead when doing so.

BREEDERS' SALE OF 200 HORSES.

As announced heretofore, the sale of breeders' horses to take place at Bloomington, Ill., on January 9th, 10th and 11th, is an event of no little importance to the horse breeding fraternity. Mr. C. W. Hurt, the manager of this sale, of Arrowsmith, Ill., writes as follows in regard to the prospects of the sale: "The breeders' sales at Bloomington, Ill., are becoming more and more the largest sales of registered draft and road horses ever held in the United States. We have now over 200 head, sixty-six of them being Percheron stallions, sixty-eight Percheron mares, twenty Shire stallions and mares, thirty head of trotter and coach horses and thirty grade draft mares and stallions. In this bunch there is a number of imported animals. Among the consignors are Messrs. D. Augustin, selling the fine large black stallion, Absalom, first prize winner and reserve champion at St. Louis, and second prize at Illinois State Fair this year. He is also selling eleven head of the very best of his stud; Wm. Crownover, with eighteen head, three stallions and fifteen mares, ten Percherons and eight Shires, ranging in age from two to six years, that weigh from 1,600 to 2,000 pounds, right in their prime and as good a bunch as ever went into a ring; A. J. Dodson, with twenty head of Percherons, including his Illinois State Fair winners. Most of his bunch are mares of the very best color and breed. A. M. Storm & Son, with a good consignment of Percherons from the very best families; John C. Baker, with a good consignment of Percherons from Hercules, that have both size and bone; Messrs. Hurt & Reid, with their entire bunch of partnership horses, including the entire bunch of breeding stallions, and Percheron and Shire mares, that weigh from 1,700 to 2,000 pounds, a number of them bred in fashion and black in color; Downs Bros., with eight head of Percherons, most of them being mares of the right color and size; Bloomington Horse Commission Company, with good Shires and grade draft; Wm. Ritter, selling his entire bunch of Percheron mares; Frank McClure, with Clydesdales; Barron & Raboin, with eight Percherons that ought to suit anyone; L. M. Moots, with imported Percheron and coach stallions; Ed Hodgson, with a good all round bunch of Percherons that will please the public; M. G. Murray, with Percherons, mostly mares; S. H. Johnson, Shire and coach stallions; F. G. Brunton, with his trotters, some bred in the purple and with fast marks; Miller Bros., with grade mares; Frank Skaggs, with grade stallions and mares, and a number of other consignors, with a lot of good horses of the very best kinds and breeds. We are selling in one of the nicest large cities of the United States and have the best of hotel accommodations, all within three blocks of

the coliseum, where the sale will be held. It will be heated and will seat 3,000 people comfortably. There are the very best of railroad accommodations for a sale of this kind. You can come to this sale and be just as comfortable as at home, no matter how the weather may be." See advertisement on page 40.

JOHN LISTER'S SIXTH ANNUAL SALE OF SHORT-HORNS.

This will be the last opportunity to direct attention to the sixth annual sale of Short-horn cattle, to take place from Pleasant Ridge Farm, owned by Mr. John Lister, of Conrad, Iowa. It has been Mr. Lister's custom for the past six years to sell a goodly number of cattle, the natural increase of the herd and a few of the best Scotch females, imported and home bred, thrown in to sweeten the offering. This, however, is the first sale in which Mr. Lister has been able to offer a strictly first-class lot of cattle from start to finish. Fully half of the present offering are Scotch cattle, and certainly the eight Scotch bulls listed are by odds the best yet offered from this breeding establishment. In addition to the young Scotch bulls above referred to is the separate great attraction of his aged herd bull, Double Victor. This bull is eight years old and was sired by Victor Lad, a bull bred by Mr. C. B. Dustin. Double Victor's dam was Victoria of Linwood 3d and traces directly to Imp. Victoria 73d, while Victor Lad, his sire, is but a few removes from Imp. Victoria 51st; hence it will be seen that Double Victor gains his name of Double Victor by virtue of being out of a Cruickshank Victoria cow and sired by a Cruickshank Victoria bull. Rare breeding is this and breeding seldom offered at auction. Above all is the evidence on every side that Double Victor is one of the great stock bulls of the present day. His calves are uniformly good, without regard to sex, as is evidenced by the top females, as well as the top bulls in the present offering, all being sired by Double Victor. We question the advisability of Mr. Lister parting with this bull and ventured this remark to him while inspecting the cattle to be sold. However, he feels that with the reduction of the herd, by virtue of this sale, that his other herd bull, Fearless Victor, will answer the purpose as all the herd bull necessary at Pleasant Ridge. Among the younger bulls is Victor Archer, a December yearling sired by Double Victor. His dam is an imported cow, Bell of the Archers. This bull is a fac-simile of his sire, which is about all that is necessary to be said. Another splendid young bull, belonging to the celebrated Dorothy family, is Dora's Victor. This is a January yearling. This family of Dorothys have been regarded among lovers of Scotch cattle as one of the best Cruickshank families of more recent years. In the hands of Messrs. L. Broadsky, N. A. Lind and H. F. Brown they have furnished prize winners and breeding matrons almost without number. It is one of the families that breeds on whenever good bulls have been used upon them. The other bull being retained in the herd and to which a goodly number of the females are bred, particularly all of the females sired by Double Victor, is the bull, Fearless Victor. He belongs to the Cruickshank Victoria family also, tracing to Imp. Victoria 51st, but his sire, by the Duthie-bred bull, Fearless Archer. He was by the great Scottish Archer and out of the Cruickshank Flora cow, Flora 91st, a daughter of William of Orange. Certainly no better breeding from a Scotch standpoint can be found between the lids of the American Short-horn herd books. As to the female contingent, the sale opens with catalog No. 1, Victoria 2d. This is a red cow four years old, sired by Collynie Victor, and also out of a line of Victorias, tracing to Imp. Victoria 51st. Her sire, Collynie Victor, was by Collynie Archer, he out of Victoria Princess by Color Guard. Collynie Archer was bred by Mr. Wm. Duthie and imported and owned by Mr. John Dryden, of Ontario. He was got by Scottish Archer and out of the Marr Missle cow, Missle 135th, by William of Orange, out of Missle 73d by Prince Charlie, she out of Missle 54th by Cherub 4th, a bull that will be found in the pedigrees of some of the very best Scotch cattle ever coming through a Scotch foundation. The great family of Seraphinas all descended from a cow sired by Cherub 4th. This splendid cow, Victoria 2d, is one of the richest bred in America. Lot 2 is a splendid Orange Blossom, six years old, and Lot 3 is a beautifully-bred Dorothy by Royal Baron and he by Imp. Baron Cruickshank. Her dam, Do Not Marr, was by the Dustin-bred bull, Victor Baron. She traces directly to Imp. Dorothy by Shut-

\$8.75 NEW STEEL RANGE

\$8.75 buys this BIG, HANDSOME, NEW 1907 MODEL, FULL SIZE, SIX-HOLE SQUARE STEEL RANGE. (With reservoir and closet, as illustrated, a trifle extra.) For full description of this wonderful steel range bargain, write for our FREE Stove Catalogue.

In our own, the largest stove foundry in the world, in Newark, Ohio, we make every variety of the highest grade stoves and ranges, and sell them direct to the user at about one-half the lowest prices asked by others. Every stove covered by our binding guarantee, guaranteed to reach you safely, free from break or damage, guarantee the freight charges to be very small, every stove offered on thirty days' free trial, and we agree to always furnish any repairs in the years to come. Our FREE Profit Sharing Plan is also explained. Don't buy a stove at home or elsewhere until you get this new Stove Catalogue and all our new offers. Write today. Address, SEARS, ROEBUCK & CO., CHICAGO.

THE HOWE SCALE CO., OF ILL.

50-52 LAKE STREET, CHICAGO, ILL.

The opening of C. A. Wright's Duroc Jersey sale held at his home near Rosendale, Mo., on October 18th. Mr. Wright is best known as the stock feeder man. As a Duroc Jersey breeder he is rapidly forging to the front and Wright's Durocs will in a year or two be as popular as are his stock feeders.

blecock, a bull bred by Mr. Amos Cruickshank. Much has been said in recent years in the live stock press about Mr. Cruickshank's famous Dora or Mary Ann by Silvery tribe of Short-horns. The Dorothys are simply another name for this same family. This beautiful cow will sell with heifer calf at foot by Fearless Victor. Lot 4 is Orange Flora. This is a five-year-old Scotch Flora cow that sells with a heifer calf at foot also by Fearless Victor. All but two bulls in this cow's pedigree were bred by Mr. Amos Cruickshank. Thus it will be seen that there is no richer-bred Cruickshank Flora living, and the two top bulls, Orange Duke 3d and Prince Victoria, are bulls bred from sires and dams that descended from Amos Cruickshank's herd; so to the man that is tenacious of a Cruickshank pedigree we can say that this cow possesses an absolutely straight Cruickshank pedigree as literally as it is possible to find anywhere in the world at the present day. Lot 5 of the catalog furnishes a good specimen of the famous Duchess of Gloster family, choicely bred and will sell with heifer calf at foot. Lot 6 is Silver Queen 3d, sired by Hampton Marshall, a worthy son of Imp. Merry Hampton, while her dam is Imp. Silver Queen by Coral King. Lot 7 is a choicely-bred Orange Blossom heifer, Scotch, and sells with a heifer calf at foot. Lot 8 is a five-year-old cow, red in color and belongs to the famous Scotch family of Matchless, tracing to Imp. Matchless 15th by Champion of England. This grand, good cow will sell with bull calf at foot. Lot 9 is a Cruickshank Athene and Lot 10 is a Gardenia or Gladiolus. This is one of the best pedigrees in the herd book and one of the richest in Cruickshank breeding. Lot 12 is Mina Victoria 2d, a nicely-bred Campbell Mina, being sired by Fearless Victor and out of Imp. Mina Auguston 5th by Maximus. A half sister to Mr. F. O. Loudon's \$7,500 white bull, Cumberland's Last, will be offered for sale in Lot 14, Cumberland Belle. This cow was sired by old Cumberland and bred by Mr. C. A. Saunders, of Manilla, Iowa. Mr. Lister is endeavoring in this offering to place before the Short-horn breeders of America a class of cattle that will attract their attention so that they will feel justified in coming some distance to attend his sale and purchase cattle that will not only show well from a pedigree standpoint, but that are good, practical individuals as well. The catalogs are ready to mail and will be furnished on application to all Homestead readers by addressing Hon. John Lister, Conrad, Grundy county, Iowa.

THE LAST CALL FOR SAUNDERS' ANNI-VERSARY SHORT-HORN SALE.

The tenth anniversary sale of Mr. Chas. A. Saunders will be held at his famous Greeley Stock Farm, near Manilla, Iowa, on December 19th, and a choicer lot of cattle has never come from this farm than he will sell on that occasion. Seventy-one head, and thirty straight Scotch, are listed in the catalog, and a better lot has not been offered at public sale this year. His 100-page catalog is now ready for distribution and it is a beauty. It is one of the finest of the season and is well illustrated and every Short-horn breeder ought to have it. We desire to say to readers of The Homestead that Mr. Saunders has left nothing undone to make this the greatest sale of his life. The Scotch cattle that he will sell in this sale are among the very best he has in his herd, and it is with regret that he parts with many of them. There will be several imported cows in the sale, and the famous old Gladiolus will also be sold. When this cow goes one of the closest ties that has connected Mr. Saunders and the Short-horn business will be severed, but he says that he is selling the good ones and there is none better than old Gladiolus. She is the dam of his present bull, King Champion, and he is proving a good bull in the Greeley herd. Bred to the Cumberland and Merry Marshall females, he is producing some of the choicest things in the herd. Many of the females in the sale will be bred to him or will have calf at foot, and several will have calf at foot by Cumberland's Last, the reserve champion at the International in 1905. There will be a most useful lot of Scotch-topped cattle in the sale, both for the farmer and the ranchman. There will be a lot of good bulls in the sale, the best of which is Lord Charmer 2d. He is a straight Scotch, sired by King Champion and out of a daughter of Lord Banff. He is one of the best-bred young Scotch bulls that will

be sold this fall, and the man that wants a herd bull should go after him. He will also have a lot of Scotch-topped bulls to offer, mostly sired by King Champion, Cumberland and Merry Marshall. The Saunders sale should be one of the greatest of the year, and every breeder should have his catalog. It will be sent for the asking, providing you mention The Homestead.

BREEDERS' COMBINATION HORSE SALE.

Every reader of this paper should plan to be present at the third annual breeders' combination horse sale, which will be held in the coliseum, at Bloomington, Ill., on January 9th, 10th and 11th. On Wednesday and Thursday, January 9th and 10th, 140 head of registered Percheron, French Draft, Shire and Clydesdale horses, stallions, mares and fillies will be sold at auction. The coliseum is well heated and ample accommodations are made to insure every opportunity for those present to secure good stock at their own prices. Bloomington has unexcelled shipping facilities, and hotel accommodations for all who attend. Catalogs can be had by addressing Mr. C. W. Hurt, of Arrowsmith, Ill., as per the advertisement on page 40 of this issue. An illustration of the coliseum appears on page 18 of this issue and is one of the most commodious selling places in the country. The following well-known breeders have consigned stock to this sale: Messrs. Wm. Crownover, Hudson, Iowa, Percherons and Shires; A. J. Dodson, Normal, Ill., Percherons; A. M. Storm & Son, New Lenox, Ill., Percherons; John C. Baker, Manhattan, Ill., Percherons; D. Augustin, Carlock, Ill., Percherons; Hurt & Reid, Arrowsmith, Ill., Percherons, Shires and trotters; Wm. Ritter, Arrowsmith, Ill., Percherons and French Draft; Walter Allen, Dunlap, Ill., Percherons; W. F. McTaggart, Pana, Ill., Percherons and trotters; Bloomington Horse Commission Co., Percherons and Saires; Wm. Westmoreland, Arrowsmith, Ill., Percherons; Frank McClure, Gibson City, Ill., Clydesdales and jacks; O. M. Weishir, Heyworth, Ill., grade draft; H. J. Green, Weston, Ill., roadsters; Baker Percheron Horse Company, Leland, Ill., Percherons; Tisley Bros., Lockport, Ill., Percherons; M. G. Murray, Holder, Ill., Percherons; Joe H. Roth, Eureka, Ill., Clydesdales; Jacob Shad, Hudson, Ill., Percherons; F. A. Metz, Eureka, Ill., Percherons; W. M. Curtis, Arrowsmith, Ill., Morgans; W. M. Lovett, Arrowsmith, Ill., trotters; Walter Severs, Ashland, Ill., Percherons; F. E. Clicker, Hedrick, Iowa, trotters; Kerr & Allen, Oconee, Ill., Percherons; John H. Weaver, Loda, Ill., Percherons; S. H. Johnson, Miner, Ill., Shires and coach; F. G. Brunton, Bloomington, Ill., trotters; Lillie Railsback, Mackinaw, Ill., Percherons; Down Bros., Clifton, Ill., Percherons; W. H. Ryburn, Industry, Ill., Percherons; Elvin & Campbell, Bloomington, Ill., Shires and French Draft; Barron & Raboin, Ashkum, Ill., Percherons; J. F. Baker, Kankakee, Ill., trotters; Clarence Wilson, Minier, Ill., Percherons; Ed Hodgson, El Paso, Ill., Percherons; Geo. D. Enyard, Onward, Ind., Percherons; Miller Bros., Ancona, Ill., Percherons; Frank Skaggs, Danvers, Ill., Percherons; Fred R. Bally, Bonfield, Ill., Percherons; Ed Moots, Normal, Ill., Percherons; R. L. Dunlap, Danvers, Ill., Percherons. Plan to be present at this important sale and secure catalogs at once. Mention this paper when writing.

THE AUDUBON SHORT-HORN BREEDERS' SALE.

On December 20th, at Audubon, Iowa (the day following the C. A. Saunders sale) will occur the combination sale of the Audubon county Short-horn breeders, and they are selling a grand lot of good cattle in their first annual sale. The consignments are from the herds of Messrs. J. A. Harris & Son, of Atlantic, Iowa; J. C. Hardman & Son, of Brayton, Iowa; H. P. Bonneson, of Audubon, Iowa; W. D. Pratt, of Anita, Iowa, and J. T. Jenkins, of Brayton, Iowa. In this sale will be the strongest lot of young Scotch bulls that will be found in any single sale this season. We say this advisedly, and the breeders who will attend the sale will find what we say to be true. Mr. Hardman is selling his Scotch herd bull, Improver, and he is a most excellent breeder. He will sell Roan Victor 2d, one of Improver's sons, out of a daughter of old Canute, and he is one of the choicest, mellowest and most promising young bulls of the year. He is a Cruickshank Victoria and it will certainly pay the man who wants a herd bull to go after this fellow. Mr. Pratt sells two royally-bred Victoria bulls, both sired by Victoria Prince 2d, the bull that sired the calf that sold for \$500 at Anita last fall. One of these is out of Imp. Crabstone Shepherdess, is red in color and is fit to go to the head of any herd. The other is out of the Scotch bull, Count Amaranth, and is also fit to go to the head of some good herd. Messrs. Harris & Son sell a two-year-old Queen of Beauty bull and he will easily make a 2,500-pound animal when matured. They also sell a young bull calf and a choice lot of cows in this sale. Their cows are noted for their great scale and are splendid milkers. Many of them will have calf at foot by their Queen of Beauty bull, Sultan of Sulu, and the rest of them will be in calf to him. One of the best cows in the offering is Mayflower of Pine Grove. She is a five-year-old, a daughter of Imp. Scottish Minstrel and was bred by Messrs. W. C. Edwards & Co., of Rockland, Ontario. Her dam is a daughter of Royal Gloster and her granddam is Imp. Mayflower by Statesman. Besides being a well-bred cow she is a good individual and she is well along in calf to the Scotch bull, Improver. Golden Gem is another good six-year-old cow consigned by Messrs. Hardman & Son. She is practically a Bates cow, a good regular breeder and a good milker. They have had her two years and she has dropped them three calves—two bulls and one heifer. Mr. H. P. Bonneson is one of the largest contributors to the sale and his are mostly females. One of his best is an eight-year-old cow called Gossan, bred by Messrs. Randolph Bros., of Indianola, Iowa. She is a daughter of the Scotch bull, Goldstick Prince, and is a large red cow. She is a regular breeder and Mr. Bonneson is retaining four of her heifers in his herd. She sells with a red heifer calf at foot by Cumberland 2d. Her four-year-old daughter, Lady Whitset, will also be in this sale. She is a daughter of Imp. Fairhaven and she is developing into a grand individual. Mr. Bonneson sells twenty head and he says they are all regular breeders and good milkers. To quote his own language he says: "I am not selling a cow or heifer that is not strictly all right, but I have to reduce my herd. Many of my cows will have calf at foot and

DISPERSION SALE OF HEREFORDS

ON DECEMBER 28, 1906

AT THE JOE HAMPTON FARM, SIX MILES SOUTHEAST OF MUSCATINE, IOWA.

I will sell at one o'clock, 35 Registered Hereford cattle. 18 cows bred, 6 with calves at foot; 11 yearling heifers and 6 bulls, including my herd bull, Sir Jack 144604, an intensely line-bred Anxiety bull. Parties from distance will be met at Muscatine with free conveyance. Stock loaded F. O. B., Muscatine. Sale is in Illinois.

MARTIN LIEBIG, Owner

S. L. JOHNSON, CLERK.

COL. GRIFF JOHNSON, AUCTIONEER.

The Great Wenona Stud

PRIZES WON

at the three great shows of 1906, demonstrating to the public the superior quality of our stud:

Champion Percheron Stallion at the Kansas State Fair; Champion Belgian Stallion at the Kansas State Fair; Champion Shire Stallion at the Illinois State Fair; Champion Shire Stallion at the American Royal, Kansas City, Mo.; Champion American-bred Percheron Stallion at the American Royal; 1st—Best five Percheron Stallions, Kansas State Fair; 1st—Best five Belgian Stallions, Kansas State Fair; 1st—Best five Shire Stallions, Illinois State Fair; 2d—Best five Belgian Stallions, Illinois State Fair; 1st—Best five Shire Stallions, American Royal, Kansas City; 2d—Best five Belgian Stallions, American Royal, Kansas City; 2d—Best five Percheron Stallions, American Royal, Kansas City. We also purchased at the American Royal the great show Shire Stallion PREM VICTOR, of King Edward VII, of England, having been shown through Canada and the United States.

NOTICE: Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper assisting in placing the stallion, who usually is one of your own neighbors (the most influential man of the neighborhood), and the great expense of placing the stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion to the buyers from \$2,500 to \$4,000. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a stallion, form your own company and come to the barn and be convinced that you can save from \$1,000 to \$1,500. We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEYS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any other man in the stallion trade.

GOOD AMERICAN-BRED STALLIONS, \$800 TO \$1,000. FIRST-CLASS IMPORTED STALLIONS, \$1,200 TO \$1,600. CHOICE STALLIONS A LITTLE HIGHER.

Get your guarantees and insurance direct from headquarters. We guarantee to make every deal satisfactory to you. Visit our barns, see our exhibits at the different state fairs and see the class of horses we are selling for the money. The reason that we ask the above of you is that we are the oldest importers, the largest importers, and we have the quality of stock that will suit the people; are perfectly good for our guarantee and will sell you more good horse quality for less money than anyone. Come to the barns and get the most reasonable terms that can be offered.

ROBERT BURGESS & SON, Wenona, Ill., Wichita, Kan.

9 CORDS IN 10 HOURS

BY ONE MAN, with the FOLDING SAWING MACHINE. It cuts down trees. Folds like a pocket knife. Saws any kind of timber on any kind of ground. One man can saw more timber with it than 2 men in any other way, and do it easier. Send for FREE illustrated catalog, showing latest IMPROVEMENTS and testimonials from thousands. First order secured agency. Address FOLDING SAWING MACHINE CO., 168-164 E. Harrison Street, Chicago, Illinois.

TOO LATE TO CLASSIFY.

POLAND CHINA BOARS

OF the big-boned growthy kind, nice head and ears, sired by a boar with a 10½-inch bone and out of mature dams. They are an extra good lot and will be priced right. Also one yearling that is hard to beat. A big-boned showy hog good enough to head a good herd. O'Brien Bros., Waukon, Iowa.

HOMESTEAD HERD OF POLAND CHINAS.

Last Call for the Twenty-Sixth Sale of Short-horns from Orchard Farm Herd.

Orchard Farm and C. S. Barclay are names that must be associated together always; they are synonymous. It is sad to think that the twenty-sixth annual sale from Mr. Barclay's celebrated Orchard Farm herd will be a dispersion sale of the last Short-horns in his possession. To think of such a man who has spent his life in the business retiring entirely brings a thought of sadness. The world has never had a more enthusiastic advocate of Short-horn cattle than Mr. C. S. Barclay. In season and out he has preached the gospel of Short-hornism wherever he went; in fact, it has been his pet theme for nearly forty years. Many a good herd of Short-horns throughout the middle West owe their existence to the foundation stock secured at Orchard Farm. One of the best herds in the entire West today, that of Mr. H. D. Parsons, of Newton, Iowa, was founded on stock purchased from Mr. Barclay many years ago. What is true of Mr. Parsons' herd is equally true of many others. Mr. Barclay has been in the breeding business as well as in the show yards for very many years, and now comes the dispersion of the remnant of his life's work. The principal part of these cattle were bred at Orchard Farm, hence with two or three exceptions, all are young. More than half the offering is of Scotch or Cruickshank breeding, and these from representative families that have been in Mr. Barclay's possession from fifteen to twenty-five years. They are of the Scotch families that he found the most profitable and that bred truest to type. In fact it is the right sort of blood on which to build a herd. There are twelve splendid bulls listed in the sale from fifteen to twenty-four months of age. They are nearly all red and some are exceedingly rich in Scotch blood lines. This sale will be held on the pavilion at the fair ground where all can be made comfortable on sale day. Cols. F. M. Woods, Carey M. Jones and R. W. Barclay will do the selling. They will have fifty-five head to dispense, some fifteen or twenty of which have calves at foot. The calves are practically all by Iowa Champion or Imp. Favorite. There will be twenty-six Scotch lots in the offering and twenty-nine cows of breeding age. The remaining sixteen yearling heifers are mostly open heifers, not being old enough to breed. One of the best Scotch bulls to be sold this year is the beautiful roan bull at the head of the herd, Imp. Favorite. There are four other yearling Scotch bulls, all reds, and sired by Iowa Champion, that to our minds are the best lot of Scotch bulls that Mr. Barclay has ever offered. The bull offering is not as large as on some former occasions, but in quality and individual merit they are par excellence. Inasmuch as the cattle must be sold without any reserve whatever, it certainly will afford buyers a splendid opportunity on December 18th to buy a class of Short-horns that they could not otherwise procure of Mr. Barclay at all. He certainly is entitled at this dispersion sale to a large gathering of breeders from all sections of the country, as it is in all probability the last opportunity that the breeders will have to reciprocate for the many kind turns Mr. Barclay has done at hundreds of Short-horn sales throughout the middle West during the past quarter of a century. Mr. Barclay is entitled to a good attendance and a successful farewell sale. While it is true that some of his business ventures have not been highly successful, yet the Short-horn fraternity in general owes a debt of gratitude to Mr. C. S. Barclay that it can now repay by attending this sale December 18th and rendering a little assistance here and there that will be much appreciated. The Homestead believes that this will be a good place to secure bargains. Write Mr. C. S. Barclay, at West Liberty, Iowa, for catalog, mentioning The Homestead. See advertisement on page 38.

Last Call for A. H. Brett's Sale of Short-horn Cattle, at Mason City, Iowa.

On December 18th, Mr. A. H. Brett, of Mason City, Iowa, will sell fifty head of Short-horn cattle, including a very large supply of Scotch blood. Fully one-third of the offering will be Scotch. Lot 1 of the sale catalog is the beautiful imported cow, Likely, a roan, calved June 28, 1899. This cow was sired by Remus, hence is a half sister to the \$12,000 bull, Imp. Choice Goods, owned by the late G. M. Casey, of Tebo

Lawn. She belongs to the celebrated Cruickshank Luster family. Remus, the sire of Likely and Choice Goods, was bred by Mr. A. Fortescue, of Scotland, and was sired by Star of Morning, also the sire of Pride of Morning, the Highland Society's breed champion at Aberdeen. Also Buttermilk, first prize two-year-old at the same show. Butterscotch, Asterisk and Star of Dawn were all exported to South America. Two calves of this noted cow have already been sold for \$460 and Mr. Brett has three left. She has been safe in calf since March 10th to Prince Victor. Following this noted cow is a nice list of cows, such as Mysie of Ploverdale 5th, belonging to the famous Cruickshank Mysie family. She has been safe in calf since August 12th. Lot 3 is Secepta Lady, a daughter of Nonpareil Prince 2d. She belongs to the Cruickshank family of Secrets, coming through Imp. Sorrell, a daughter of Roan Gauntlet. This cow was bred August 12th to Lord Champion. Lot 4 is a choicely-bred Butterfly by Barmpton Prince. She was one of the group of five heifers that sold in the memorable C. C. Bigler sale, where these five heifers brought an average of more than \$2,000 each. This cow sells with a beautiful cow calf at foot by Hampton's Marshall, a son of Imp. Merry Hampton. Lot 5 is Rose of Ethel. She belongs to the famous Campbell Rosebud family. The imported cow to which she traces was Imp. Rose of Aberdeen 3d. This cow has a nice bull calf at foot dropped September 23d, by Baron Secret. Lot 6 is Miss Buckingham, a daughter of Lord Gloster, and belongs to one of Mr. Cruickshank's most valuable tribes, the Miss Buckingham family. Lot 7 is an Orange Bud 2d, a choicely-bred Orange Blossom, which are always in favor. This beautiful Scotch cow was sired by Victorious. She dropped a beautiful red cow calf April 23d by Golden King and was re-bred May 25th to Gloster Baron. Lot 8 is Gloster of Aberdeen, a dark red heifer not quite three years old. She was sired by Imp. McNaughton and traces to Imp. Vain Maid, she out of Vanity by the Cruickshank bull, Earl Granville. Lot 10 is Mary Jane 2d, sired by Imp. Golden Crest. This is a choice Scotch cow of Campbell's Isabella tribe. She was bred April 13th to Prince Victor. A choicely-bred two-year-old heifer will be found in Lot 11. She was sired by Imp. Fancy's Pride and out of Imp. Likely, the first cow mentioned. She will be just two years old at sale day. In addition to the sale of these choice Scotch cattle and Scotch-topped ones will be some splendid Clydesdale and Percheron brood mares, including two or three stallions. The catalog of this splendid array of blooded live stock can be had by addressing Mr. A. H. Brett, Room 11, Zeller Block, Mason City, Iowa, mentioning The Homestead. See this page for advertisement.

Last Call for James Burke's Dispersion Sale of Short-horns.

As has doubtless been seen in previous issues of The Homestead, the venerable James Burke, Sr., of Stanwood, Iowa, will disperse his entire herd of Short-horn cattle on December 20th at his farm near Stanwood, Iowa. As has been previously stated, Mr. Burke is a very elderly gentleman, who has labored for more than fifty years preaching and practicing advanced methods of farming and stock growing, until he feels that by these methods he has acquired a competency sufficient that he and his life companion may spend the afternoon of life without the farm cares with which they have burdened themselves for the past half century. In a very pleasant visit with Mr. Burke and his son recently, a Homestead representative learned of their methods of rearing good Short-horns, and it soon developed that they have the broad-gage, common-sense idea, that has been publicly advocated by such liberal-minded men as Senator W. A. Harris, the late Martin Flynn, E. B. Mitchell, J. G. Robbins & Son and the late T. S. Moberly, that good Short-horns must be bred without adhering strictly to family lines. In other words, the blending of good Scotch and Bates blood together must be recognized as just as valuable, if not in many cases more so, as cattle bred in either of the so-called straight lines, recognizing that all are Short-horns, and where they have been in good hands, that one Short-horn pedigree ought to be just as good as another, individual merit being the aim, for the very good reason that the final end of all cattle is the block. Such wise buyers as those who purchase cattle for Swift & Co.,

PUBLIC SALE SCOTCH & SCOTCH TOPPED

Short-horn CATTLE

REGISTERED CLYDESDALE AND PERCHERON MARES AT

MASON CITY, IOWA, DECEMBER 18TH

On the above date at the feed barns in Mason City, Iowa, I will offer for sale 48 head of Scotch and Scotch-topped Short-horn cattle, including imported cows, 16 head of the offering being Scotch. Forty-six females and two bulls. I will also sell at the same time and place six registered Clydesdale mares in foal to an imported stallion; four Percheron mares in foal to an imported stallion; one Percheron and one Clydesdale stud colt. Of the Scotch cattle, the following families are represented: Imported Likely, Mysie, Secret, Butterfly, Rose of Aberdeen, Airy Buckingham, Orange Blossom, Vain Maids, Crocus or Isabella, etc. Of Scotch-topped families, Rose of Sharon, Desdamonas, Arabella, Rosebud, Josephine and Pearllette. Send for catalog at once to

A. H. BRETT, MASON CITY, IA.

COL. AL P. MASON, AUCTIONEER.

Mention Homestead when writing for Catalog.

Armour & Co., or any other of the great packers, never ask the question, "Is this a straight Scotch, or a straight Bates, or is it bred crosswise or otherwise?" Individual merit properly developed are the only essentials requisite with these wise buyers when paying the top of the market. Mr. Burke recognized long ago the all-wise practice of having good milk cows in order to secure good breeding cows, and the result is that the major portion of the herd are heavy milkers. Yet, when dried off from milk, they show a quick adaptability to take on thick flesh from the native Iowa blue grass. As evidence that this is pre-eminently a breeding herd, there will be something like fifteen or twenty calves that sell at foot with their dams as one lot. In this offering are nearly thirty females of breeding age, all bred to Baron Taylor or Diamond King. The good judgment of Mr. Burke in securing these two good thick bulls has been amply demonstrated by their get. Few hulls can show better calves than these fellows, and as it is a dispersion sale both will be included in the sale. They are low, thick, Scotch-looking hulls and have a preponderance of Scotch blood in their veins. Nevertheless they are both on a young Mary foundation. This

sale will furnish an opportunity for the farmers of Iowa and Illinois who do not feel that they can afford to pay extravagant prices for Short-horns, to buy common-sense, practical, business, prolific Short-horns at their own prices. The sale is a positive one, from the fact that Mr. Burke has rented the farm and bought property in town and is preparing to move. Hence these cattle must be sold without any reservation whatever. It is only at such dispersion sales as this that the public has an opportunity to buy the worthy matrons of the herd whose very superior breeding qualities are only known to the owner. During the owner's stay in the business this class of cattle is never offered, they being retained because of their well-known superior breeding qualities. But in a time like this where everything must be sold, the public then has a chance to get behind the scenes, as it were, and secure what has hitherto been prohibited from them. There will be five nice red yearling bulls included in this sale, in addition to the two herd bulls previously mentioned. Homestead readers who are contemplating the purchase of some practical business Short-horns will do well to write Mr. Jas. Burke, Stanwood, Iowa, for a catalog at once.

SECOND ANNUAL SALE OF SCOTCH AND SCOTCH TOPPED SHORTHORNS

From the Grand Meadow Brook Herd of
G. W. HARRISON, WASHTA, IOWA.

TUESDAY, DEC. 18, 1906

55 Head Offered For Sale 55

Thirty cows, twenty yearling heifers and five bulls, also a car load of range bulls that will be sold in one lot. The great show heifer, **Victoria Crown**, a daughter of noted bull, Imp. Scotland's Crown, will be one of the great attractions of the sale. The cows are a lot of large table-backed, thick-fleshed kind and are grand, good milkers, with five and six Scotch-tops. Note these pedigrees:

Herd bull, for reference—many of the cows bred to him are the sire of young bulls and heifers in sale.

LIVE STOCK AUCTIONEERS.

MISSOURI AUCTION SCHOOL TRENTON, MISSOURI.

..... NEXT TERM OPENS JANUARY 1, 1907.

The only auction school in the world where students are given actual practice selling in bona fide sales. This school's first term had double the enrolment of any other school's first term. All branches of auctioneering, oratory and live stock judging taught by instructors of from five to thirty years' experience. We only require one-half of tuition down on entering school, the other half to be paid after you have made it out of the business. What could be more fair? Write for our large, 40-page illustrated catalog, which gives testimonials from our students in all parts of the United States.

W. B. CARPENTER, PRESIDENT.
President Missouri Auctioneers' Association.
President for State International
Auctioneers' Association.

COL. C. A. EWING, VICE PRESIDENT.
First President of International Auctioneers' Association. Twice President of Missouri Auctioneers' Association.

The Jones National School of Auctioneering and Oratory

Is the original school, and has had five times as many students as all other auction schools in the world combined. The instructors are practical auctioneers of national reputation. Their reputations have been made by a careful study of the auction work and by conducting all classes of sales throughout the United States and Canada. A special instructor is employed in each department. Students conduct sales every day. The school does not advertise to instruct students in work we do not understand ourselves. When spending your time and money to secure an education the school should be considered, not the price. The eighth term opens December 10, 1906, and following this term the school will practically be open all the year round, with the possible exception of a short summer vacation, and there will be classes opening at short intervals, enabling those who desire to attend to enter at almost any time, the tuition remaining the same, and each class will be given a six weeks' course, with an opportunity to graduate in four weeks if proficient. Write for free catalog, list of graduates, and other information, mentioning this paper, and come when you are ready.

Jones National School of Auctioneering and Oratory, Phone West 1228, 231 Ashland Boulevard, CHICAGO, ILLINOIS.

J. P. SPEARMAN, PAPILLION, NEB. LIVE STOCK AUCTIONEER.

I am posted on pedigrees and want your sales of cattle, hogs or horses.

231 Ashland Blvd., - Chicago, Ill.

ANNUAL SALE OF Short-horn Cattle AT Conrad, Ia., Thurs. Dec. 20, 1906

45 Head of the Best Short-horns Ever Offered.

There will be twelve bulls in the offering, eight of which are Scotch, and decidedly the best lot that I have ever put on the market. Of the Scotch females represented in my offering are two Victorias, two Orange Blossoms, one Dorothy, one Duchess of Gloster and one out of Imp. Bell of the Archers, one Nonpareil, etc. There are fifteen Scotch females in the sale and fifteen calves sell with their dams. In other words there is at this time sixty head of cattle in sight that sell as forty-five catalog lots. I am very fortunate in having at the head of my herd two most excellent herd bulls, and both of the same Cruickshank family, the Victorias. I refer to Double Victor, the eight-year-old red bull that is included in the sale, and to Fearless Victor, the other herd bull that I paid \$1,450 for. Perhaps the top of the sale in the females is the beautiful roan heifer, Pleasant Ridge Athene. She is a thick, massy heifer, wonderfully good in the crops and chine, and is possessed of a very smooth, broad, thick-fleshed back. She was sired by Double Victor and is now bred to Fearless Victor. This is a heifer that would command attention wherever shown. She has a fitting stable companion in Pleasant Ridge Gladness, also a daughter of Double Victor. This is a thick, tidy, red heifer that is attractive throughout, and one of the kind that ought to stay in the breeding herd.

THE HERD IS IN CHARGE OF MR. GEO. PIERCE.

The sale will be held on the Lister farm four miles from Conrad and applications for catalog should be made to

JOHN LISTER, CONRAD, IA.

LIVE STOCK AUCTIONEERS.

AMERICAN AUCTION SCHOOL HARRY W. GRAHAM, President, (Live Stock Auctioneer.) CHILLICOTHE, MISSOURI.

Next Term Opens December 17, 1906.

Special Rate for December Term.

All branches Auctioneering taught, also Voice Culture, Auction Law and Live Stock Judging by Special Instructors. Our graduates now in many states. "Col. J. H. Webb, of Spalding, Neb., who graduated in the July term of this school, writes under date of Oct. 3d that he has 53 sales listed to date and is getting all the work he can do. Col. W. C. Curphey, of Abilene, Kan., is another July graduate who is being booked on some of the best pure-bred sales of that state." For catalog address,

A SELECT DRAFT

**Hereford Bulls
and Heifers**

At Public Sale December 19, 1906

Blue Rapids, Kansas

At Hereford Association Barn

If you want bulls of this breed in carload lots, here is the
chance. Thirty-five are offered. Their breeding is first class and
they have been grown in such a manner as to insure future useful-
ness. They are sired by Baccalaureate 81587, Keep On 26th, Imp.
Roseberry and Kenswick Brick. These are a particularly strong
lot of sires and many are prize winners of note. The sixteen fe-
males are sired by the same bulls. They are bred to Onward 18th
by the undefeated March On 6th. The best of breeding throughout.

Send for Catalog.

E. R. MORGAN, Prop.

FRANK IAMS

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 SAVED AT IAMS \$1,000

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eyeopener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.

THE Lafayette Stock Farm

Lafayette, Ind.

Largest importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International surprised the hundreds of thousands of visitors that attended. We can and do sell our stallions as low as they can be sold at any place in America.

DEPARTMENTS

SEDALIA, MO. NASHVILLE, TENN. SAN JOSE, CAL.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25 Percheron stallions, among which are prize winners in France, coming three and four, weighing 1,900 pounds, all dark colors 25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coachers you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

BELGIAN and
HACKNEY STALLIONS

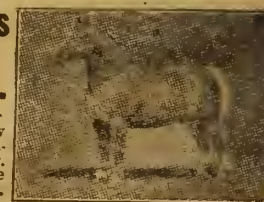

Good American Bred Stallions, \$800 to \$1000.
 First Class Imported Stallions, \$1200 to \$1600. Choicest Stallions a Little Higher.

NOTICE

Having concluded to make a change in placing Stallions before the Public account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stud from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars. The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stables, where we have over 300 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered. Send for catalog.

PERCHERONS AND PERCHERONS ONLY.
L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

IMPORTED Shire, Belgian and Percheron stallions, \$1,000. Home-bred draft stallions, \$250 to \$800. Hurt Bros., Osceola, Iowa.

VOL. LI. NO. 51.

DES MOINES, IOWA, DECEMBER 20, 1906.

WHOLE NO. 2579

THE MOST PROFITABLE KIND OF STOCK.

One of our subscribers calls our attention to the fact that he has been asked to take part in the discussion at a farmers' institute and has been assigned the subject, "The Most Profitable Kind of Stock for a Farmer to Handle." He states that he is anxious to have an opinion on this question in the hope that something will be said that will fit into conditions in his locality and, therefore, assist him in preparing his paper.

This inquiry in the very necessity of the case is somewhat complicated for the reason that the conditions are not specifically known—that is, the conditions under which this man and his neighbors are operating, and in the second place, even if these were known, so much depends upon the taste of the individual that no specific rules can be laid down that will apply in all cases. The subject can only be discussed in a general way. While we will always have men who will make a more pronounced success in specialized farming than they can in general farming, at the same time the average man, if he attains success, is obliged to carry on what is usually termed general farming. This includes the growing of grain and the feeding of two or three classes of live stock, generally horses, cattle and hogs, and sometimes sheep. As an all-round money-maker, year in and year out, we have no hesitation in placing the hog at the top of the list, and we think that no quarter section in the corn belt should be without a few good brood sows, so that pigs may be kept growing into money all the time. Not that we would have more hogs raised than are being raised at present, but rather that we would have a better distribution, more being handled by some farmers and less by others. By the sensible use of mill by-products and those foods that are rich in flesh-forming constituents, like oil meal and tankage, in addition to corn, we believe that the percentage of chance of one losing his hogs is exceedingly small. Of course where nothing is fed but corn, both to breeding and growing hogs, the danger is greater. Then, in addition to this, disinfectants should be freely and constantly used, and where this practice is kept up, as said before, the danger of any kind of disease sweeping away one's herd is really not very great. When it comes to cattle, the choice must be entirely left to the individual. Some men have

the experience and knowledge to handle pure-breds and to make them profitable, and where this is the case we have no hesitation in advising them to take up that line. There is much more satisfaction and generally more profit in handling a good herd of pure-breds than there is in grades, though, of course, there will always be good opportunities for the man who has good grade cows and will use good pure-bred males for the purpose of raising thick heifers and good steers. Animals intended for the block must be of the early-maturing kind, because the day has passed when these can be reared on corn belt land and carried thirty or thirty-six months before they are finished. Generally speaking, one should have them finished around the eighteen months or two-year mark, and they should weigh well up to thirteen or fourteen hundred at that time.

Then we have the horse proposition,

and in this department of animal industry as applied to the corn belt the policy of farmers on the whole is not sound. We have our big horse men and big breeders, while scattered here and there throughout the corn-belt are found comparatively few small farmers who are breeding registered horses. In the European countries it is an absolute fact that 75 per cent of all the pure-bred horses raised come from the farms of those who operate but a small acreage, and generally from those who rent land. One man will keep a pair of mares and aim to raise two colts each year. These grow into the good heavy drafters that come into this country. There is no reason why men in the corn belt could not handle a pair of good mares on every quarter section of land, or even three or four—that is, good, registered mares. At present prices these would be immensely profitable and things look as though the business

would be profitable for years to come.

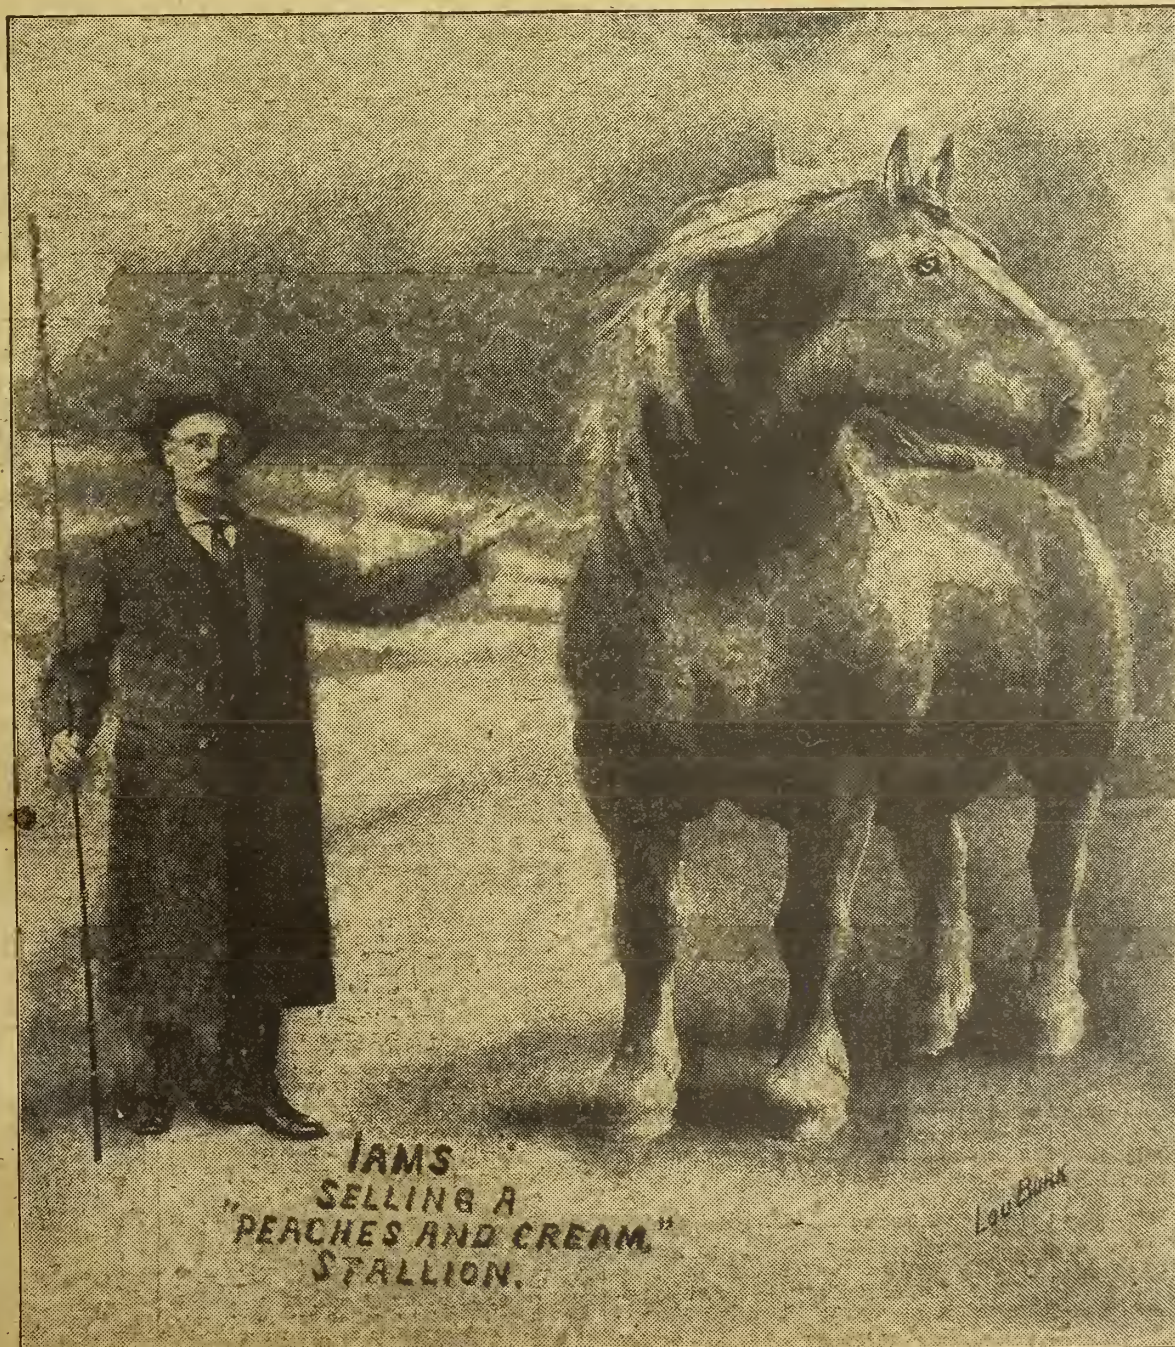

Then we have the sheep and the dairy industries, both profitable if sensibly carried on by men who have a taste for the business; but, as said before, the three main lines are the hogs, cattle and horses, and on the average farm we believe that some good ones of each of these three classes should be kept. In this way one gets away from the policy of putting all his eggs in one basket, and a failure along all lines is hardly ever a possibility anywhere in the corn belt.

CHOKING OUT PERENNIAL WEED ROOTS.

In the very nature of the case our readers are not specially interested in the question of weeds at the present time, though, of course, every man who has any pest on his farm is always anxious to benefit by the suggestions of those who have succeeded in destroying the same-kind of enemies. One of our subscribers, Mr. B. F. Reynolds, of Calhoun county, Iowa, sends the following communication relating to the destruction of morning glories:

Some time ago you asked how to kill morning glory vines and I have been waiting to hear from others. However, as I have seen no answer to the question I thought I would give my experience for the benefit of others. I have been experimenting with morning glories for three years and have finally found a satisfactory way to exterminate them. First I tried plowing the last of May, which thinned them out quite nicely. I then tried a patch that was very bad June 20th and sowed the same to millet, plowing again after the millet was cut, and this killed them entirely. Last year I tried about fifteen acres, plowing June 20th. The morning glories were so bad that they almost took the crop every year. I sowed the millet and had the same result as the year before. Plow as soon as possible after the 20th of June, plowing five or six inches deep. Be careful to cut a good furrow all the time so there will be no ground left unturned. Sow to millet and plow immediately after cutting the same and you will have no morning glories left. The morning glory pest is the worst one can have on his farm.

Experience has taught us that the plan that has been worked out so successfully by Mr. Reynolds is in no sense impractical or theoretical; it simply takes advantage of the fact that a weed like morning glory must be smothered out by preventing the formation of leaf and stem. When this can be done during a few months of growing weather the roots themselves rot, and consequently die. Of course this plan means that some other crop besides corn must be grown, and yet there is no special disadvantage on this score, because even millet is usually a profitable crop and can

IAMS
SELLING A
"PEACHES AND CREAM"
STALLION.

Low-Bunk

See Field Notes.

be used to advantage at all times where live stock is kept on the farm. Of course where morning glories have seeded profusely there might be a little trouble afterwards, and there might be circumstances under which this plan would not be so effective as it was in this case, but as a general thing, either in the case of morning glories or quack grass, if one will plow late and sow crops like millet, buckwheat or rape, these crops will go far toward smothering out the perennial pests.

MARKING HOGS AT A PUBLIC SALE.

A Nebraska subscriber sends the following communication:

In your issue of a late date one of your subscribers from Lake Park, Iowa, asks how best to mark hogs for a public sale. Having had considerable experience along this line, I desire to say that the universal way, and I think the best that has ever been used, is as follows: First make a set of dies from 0 up to 9. These can be made as follows: Saw out nine blocks size 3x4 inches, perfectly smooth on one side. Take an old felt boot and with a sharp knife cut out your figures from 0 up to 9 and tack them on the blocks. Use straight brads and get them as thin as possible. Don't use flat head tacks at all, as these will cause a depression in the felt where nailed and consequently will not permit the paint to show clearly. The next thing is to get a can of the very best white lead and a can of Japan drier and mix fairly thick. Oil or benzine can be used, but it is not nearly so good as Japan drier. When the latter is used it dries on the hog almost immediately and does not rub off. When benzine is used it runs and consequently the numbers are hard to distinguish. The oil does not dry quickly and is not satisfactory. Use Japan drier by all means and you can do a satisfactory piece of work in the marking of your hogs when making a public sale. When you reach two figures, say from ten and up, use two dies. To illustrate: Say you want to mark 15 on your hog. First take die No. 1 and stamp it on the back of your hog. Then take die No. 5 and stamp it just opposite the first number and you have the number 15. If it is a white hog you are selling, then use a little lamp black in the lead. After years of experience in the marking of hogs I believe this to be the best and most satisfactory for sale purposes.

We are pleased, indeed, to give our readers the benefit of this subscriber's experience, though he very modestly requests us to withhold his name. We will say, however, that there are few men in the corn belt who have had a better opportunity to make observations along this line and we believe his suggestions will be valuable not only to the beginner, but to experienced men who have not reduced the matter of marking hogs for a sale to a science. Of course, if anyone has a better plan, taking into consideration the effectiveness and the simplicity as well as cheapness, we shall be pleased to have a word on the subject from them.

HOW HIGH-PRICED CORN WILL AFFECT FEEDING OPERATIONS.

The following communication has been received from a subscriber, Mr. N. P. Peterson:

I was much interested in an article which appeared in your paper recently under the title, "Future Prices of Fuel Alcohol." This seems to me to be something that is of special interest to farmers of the corn belt, because, without doubt, it will increase the selling price of corn. However, I would like to know what effect this will have on feeding operations. At the present time too many of our farmers market their corn directly, and especially renters. Will the increased price that prevails in the future tend to lead to more grain selling? If it does, farmers will find in the very near future that what they gain in price will be more than lost in the decrease in yield, because no man can sell grain year after year from his farm and keep up the fertility supply.

It is a fact that when grain values are high, men are more reluctant about feeding it to steers and hogs, and consequently high prices do, after all, tend to the robbing of the soil. However, it is a question apart from price altogether to men who own land and who expect to hold it and to realize a profit on their investment. To these it is absolutely necessary that most of the grain grown on the farm should be fed. It may be that the prices in many cases on steers and hogs will be such as to afford but little margin of profit over market value for the grain and labor, but if this end is reached that in itself justifies the practice of feeding.

Every man should see that it is utterly folly to take from the land every year a heavy crop and not return to it something in the way of fertility in the form of farm-yard manure. It is a very different proposition to keep land in condition to produce sixty bushels of corn per acre, even if it only sells for forty cents a bushel, than it is to have it produce forty bushels per acre when corn is worth sixty cents per bushel. We have in mind one instance where a farm changed hands five years ago, and at that time it was so

The deposits in the state and savings banks of Iowa have increased \$26,079,587 in the past twelve months and now show the vast total of \$180,793,281. If the deposits in national and private banks were included, the total would be about \$350,000,000 and the year's gain about \$50,000,000. A state of affairs in which the average county in a state adds over half a million dollars to its bank deposits in a year can hardly be described without using the word, "prosperity." In fact, the state of Iowa never enjoyed a more prosperous era than the present; and what is true of Iowa is equally true of all its neighboring states, including Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri and Kansas. Great and varied crops, at remunerative prices, mean heavy deposits in banks and growing wealth for the agricultural states. Farmers never had more money to spend for the necessities and luxuries of life than they have at present. There are exceptions, but they only serve to emphasize the rule.

How quickly the prosperity of the farmers of the corn belt is reflected in The Homestead office is shown by the phenomenally rapid increase in our circulation in the past year. At this time last year it stood at 75,000, that figure being itself a handsome gain over the preceding year; but now it has safely passed the 85,000 mark and is hurrying on to higher levels. The percentage of yearly gain is almost exactly the same as that of the bank deposits, showing how vitally The Homestead is identified with the growth of the magnificent agricultural region which is its field of work. The gain in two years slightly exceeds 41 per cent.

The relative position of The Homestead in its home field is fully as gratifying as this magnificent showing of its absolute growth in circulation. It has greatly increased its long lead over all competitors. No other weekly agricultural paper published in Des Moines has anything like half so many cash-paying subscribers as The Homestead. The Homestead has fully twenty thousand more cash-paying circulation in Iowa alone than any other weekly farm

run down that forty bushels per acre was its maximum productive ability. This year we have learned that over a large acreage on this farm the yield has been sixty-eight bushels per acre. Many of the fields on the farm have been clovered and some of them have been manured and, of course, in addition to this good seed has been used.

While we realize that there is sometimes a little risk to run when one invests in a car load or two of steer and feeds them out, yet at the same time, as said before, if a man can get market price for his grain that is fed to his steers and hogs, pay for his labor and have the farmyard manure in addition, he is on the straight road to increasing his yield of crops, while on the other hand, if it is simply a matter of hauling it to the elevator, the land necessarily grows less productive year by year. We would like to see more steers fed by the small farmer and fewer by the "big man," because that means that the manure shall be put where the crops that are fed to steers have been grown and not wasted, as is usually the case, where large bunches of steers are fed.

INTERNATIONAL LIVE STOCK REPORTING CONTEST.

Many of our readers are aware of the fact that the Chicago Daily Live Stock World offered the sum of \$300, to be divided into twenty cash prizes, these to be awarded to agricultural college students for proficiency in reporting the cattle, horse, sheep and swine display at the recent International.

The result of this contest has recently been received from Mr. A. C. Halliwell, of the Live Stock World, who reports the winners in the cattle department as follows: First, W. A. Eldridge, Iowa; second, J. O. Rankin, Iowa; third,

paper published in Des Moines has in all the states of the Union put together. We are in the agreeable position of being able to prove every statement we make as to The Homestead's circulation by postoffice receipts of postage paid, and by submission of our subscription lists and subscription methods to any advertiser who is interested in knowing just what he gets for the money he pays for advertising. With two cash-paying subscriptions on our lists for every subscription on our lists for every subscription any other weekly agricultural paper in Des Moines can prove, and then many thousands to spare, the Homestead's primacy in circulation is as clear as its superiority as an advertising medium, and rests on the same broad basis—the friendship of the farmers of the corn belt.

"I desire to thank The Homestead for the customers it is bringing me and to wish you the best of success," writes Mr. B. M. Boyer, of Farmington, Iowa, breeder and owner of Plymouth farm herd of Chester Whites. "I enclose draft in payment for my advertisement to date. My hogs are going like hot cakes on a cold day. I have shipped eight head this week and received orders for seven more in today's mail." It is results like this that have placed The Homestead at the head of the list among agricultural weeklies as a live stock advertising medium. It is stating but the simple truth to say that The Homestead carries a larger number of live stock advertisements, representing a larger number of actual advertisers, than any other agricultural weekly in the world.

Our department of classified advertising is proving even more popular and successful this season than it did a year ago. The special arrangement whereby our classified advertisements are inserted without additional charge in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., appeals strongly to those who have anything to buy, sell or exchange. The low price of five cents a word for each insertion is especially attractive to experienced advertisers. The combined circulation of the three papers is over 165,000, covering the states of

C. B. Smith, Missouri; fourth, E. A. Wilson, Michigan; fifth, Howard Gerlaw, Ohio.

In the swine department the awards were made as follows: First, C. V. Gregory, Iowa; second, John L. Martin, Illinois; third, Angus McKenney, Ontario; fourth, Ellis Rail, Iowa; fifth, C. A. Nixon, Ontario.

In the horse report contest the prizes were awarded in the following order: First, W. A. Eldridge, Iowa; second, Ellis Rail, Iowa; third, E. N. Wentworth, Iowa; fourth, E. Stetson, Illinois; fifth, W. S. Jacobs, Ontario.

The awards made in the sheep department are: First, Fred Allen, Illinois; second, Robert M. Wilber, Ohio; third, H. Barton, Ontario; fourth, Ellis Rail, Iowa; fifth, John M. Ewart, Illinois.

MAKING THE YOUNG COLT "TOUGH."

The following communication has been received from a subscriber, Mr. C. L. Hardman:

At this season of the year many farmers who attempt to raise draft horses ruin them by starving them. From the time the colt is weaned in the fall until there is plenty of grass in the spring, he should have the best of care and feed and should be kept growing right along all winter. He will then be ready to make a big growth in the spring and summer after he is one year old. It is a common thing to see colts at one year old that are not as large as they were when six months old. It is too common a practice to take the mare from the colt in the fall before the colt has been taught to eat grain, and have him run on short pasture without grain, and later to give him the run of the stalk field without shelter, the intention being to make him tough, and if his general appearance is a true index he is tough indeed.

I think the better way is to teach the colt to eat oats before he is taken from the mare, and when it is time to wean him give him good care and plenty of oats. I have never seen a colt hurt by eating too many oats. See that he has shelter at night and during storms, with plenty of good water at hand, and allow him to have all the exercise he

Iowa, Illinois, Nebraska, Missouri, Minnesota, Wisconsin, the Dakotas, Kansas and Oklahoma. A minimum charge of \$1.20 is made for each insertion, that is, no insertion, even if less than twenty-four words, is accepted for less than \$1.20. To save the expense of bookkeeping on these small advertisements, cash is required to be sent with the order. No display type or illustrations are used, and a uniform style is maintained. In order to insure insertion, copy for your advertisement should be in our hands on or before Saturday of the preceding week.

The annual rush of Homestead subscriptions is now on, and work almost day and night must be the rule in our subscription department for the next few months. They are coming by thousands and tens of thousands, and every year sees the volume of subscription mail far in excess of any preceding year. Our "Red Letter Combination Offer" made wonderful gains last year, but this year's record shows, week by week, an increase over last year surpassing all expectations. This offer is five news papers and magazines for \$1.25 a year. The combination consists of The Homestead itself, the leading farm paper in the world; the Chicago Weekly Inter Ocean, the strongest family paper in the western metropolis; the Kansas City Weekly Star, noted for its courage and independence and its great qualities as a general newspaper; The Homemaker, the favorite monthly for farmers' wives and daughters—a delightful paper, constantly growing in favor; and The Farm Gazette, a beautiful monthly magazine of profitable agriculture, dealing with the industry from the standpoint of profit. Something good here for every person on the farm—for father, mother, sons, daughters, hired help and all! Farm lore for the farmer; horticulture for the fruit grower; technical information for the stockman, the poultryman; a lawyer's advice for one and all; poems, stories and miscellany in some of the publications for old and young alike. This is certainly a bill of fare for farm folk generally. Is it strange that they are flocking to The Homestead by thousands?

will take in good weather, giving plenty of oats and a little corn during cold weather. If you have been trying the starving method to toughen your colts you will be surprised at the difference in the colt if handled in the above way. He will be larger at one year old than your two-year-old that has been neglected.

It is true that many a colt is not any larger in the spring than he was when weaned in the fall, and the kind of treatment that brings this about is depicted somewhat clearly by Mr. Hardman.

We heartily concur in what he says about feeding oats to young colts, and we also have never known of an instance where a young colt was fed too many oats, providing, of course, that he was given reasonable care in other respects. A horseman of considerable reputation recently stated that it did no harm to let colts the first year have access to a self-feeder where there was kept a constant supply of oats.

The theory that harsh treatment in any way toughens a colt or horse has been exploded long ago, and while we believe in lots of fresh air and everything of that kind for young colts, yet we have found that where one is put in good shape early in life and his flesh is kept there until he is grown, he will be a much harder and tougher horse than if he is allowed to get low in flesh the first winter.

AWAY FOR THE WINTER.

California, Florida, the Gulf and Mexico. For pleasure and relief from "Jack Frost." Special rates and elegant service via The Washburn System. Only one change enroute, and that in Union Station at St. Louis or Kansas City.

36 hours to the Gulf.
48 hours to Florida.
67 hours to California.
84 hours to Mexico City.

Also, especially low round trip and one-way rates to nearly all points, first and third Tuesday.

Farm Furrows

Turned by a Practical Farmer.

What will be the fate of the poor cow that becomes a victim of appendicitis?

Farmers who make money by skinning the farm are like companies who pay dividends by watering their stock.

Two dead and thirty-six violently ill is the result of a company of people eating wild parsnips in a Pennsylvania burg.

Many a farmer is thoroughly posted on all the details of his work such as dates of planting, and ages of domestic animals, but the age of some of the children proves a most perplexing problem.

There is just one trouble about all the scientific systems of training girls to be wives. They would consider themselves far too good for the few men who would be foolish enough to ask such superior persons to marry them.

Dry farming, as they call the method of tilling the land in the West, is nothing more nor less than cultivating the land in a manner so that the greatest amount of moisture will be conserved. The idea is to keep a dry dust mulch on the surface at all times.

Baled straw or cheap hay makes one of the best materials for the sides and ends of a winter shed that we know of. They have the advantage over the ordinary way of making a straw shed by requiring fewer poles and less lumber and are much more stable and lasting.

A man ought to go occasionally to a big city like Chicago so that he can enjoy himself afterwards simply by contrast. There is lots doing there, but the noise, smoke and dirt generally are too strong for the average farmer's stomach. I never was so glad to get home from anywhere as from this year's International.

The International Exposition was a mammoth affair this year, and is unquestionably the greatest fair held in this country or in any other country. However, the American Royal at Kansas City does not suffer much by comparison. The good herds are generally there, and the Royal has always been an exceedingly agreeable fair to attend.

Fifteen minutes spent early on a snowy morning with an old stone boat or drag in making roads will contribute as much to the comfort of the whole family as anything I know. When you are hitched up don't forget to go around the hog yard, so as to make them a good path and thus contribute to their health by making exercise easy.

After all a hen is much like a human; if plenty to live on is obtained with little effort, the tendency is not to take exercise enough. The outcome is indigestion. The hustling, moving hen, like the hustling, working man, is the healthiest. Just now there is an overabundance of corn lying within reach of all poultry at the cribs. This means little or no feeding in the ordinary way, of grain, at least. While many there

are who feed too little, there are some who feed too much, unknowingly—the waste of cribs and granaries.

Experiments are now being made in the entomology department of the Illinois State College with a kind of insect that appears to be a parasite on many of the corn-damaging insects. The corn-root worm, aphids, and white grub are said to die from its attacks. Loss to Illinois corn growers from insects this year will aggregate around \$5,000,000.

Next time that you see the secretary of the farmers' institute, ask him how things are getting along. Show your interest in the plans and arrangements and offer a suggestion or two. His office is a hard one to fill efficiently, and your encouragement may come just at a time when things look blue. The best institutes are those where the whole crowd pulls together.

Each year we see more side crops grown. Pumpkins have been freely fed on many a farm for a month or two this fall. Rape that cost practically nothing for the use of the land made the difference on not a few farms between a thin, lean lot of hogs and a thrifty, growthy bunch. Cane, millet, turnips, peas, etc., have each helped to solve the feeding problem for practical farmers.

In years to come we may be able to buy eggs grass flavor, corn flavor, garden flavor or any other flavor that suits our taste. There seems to be good grounds for the statement, as investigations have determined that onions fed to laying hens impart a very disagreeable flavor. The color of the yolk seems much more easily affected. Yellow corn gave yolk similarly colored, as was also true with white corn.

I have always been advising others to get their corn out in good season, but this year I got bumped myself. My aim was to have it in the cribs by Thanksgiving time, but if it is all in by Christmas I'll be well satisfied. Since the 5th of November we have been in the field every minute of good weather, so that after all I don't know who is to blame. Some of the men thought they could take out an acre and a half a day, but an acre holds them most of the time. My cribs are just a little bit more bulgy than they ever were before.

Sometime ago the Furrows man stated that it was his practice to husk a few rows all around the corn field first, so that the corn afterwards was not tramped down in turning at the end. A subscriber says that he has solved that problem in a better way, his plan being to sow clover and timothy on a strip about a rod wide all around the field. This prevents any tramping down and also answers an important purpose when cattle are turned into the stalks. He says that he has never lost an animal from stalk disease, and attributes this to the fact that they spend a good deal of the time on this pasture around the field when they are turned in.

Patrons of the rural mail delivery routes seldom buy postage stamps. Instead they include two coppers with each letter they put in the mail box. A country paper publishes this admonition: "Before you put your letter with two pennies into the box just think what it means to a man whose fingers are already chilled by several hours' exposure to pull off his gloves and fish out those pennies, repeating this process perhaps forty or fifty times in one day's delivery. It is apparently a small matter, yet it means a great deal to the carrier. Keep a supply of stamps on hand and thus save the already overworked and underpaid carrier much additional hardship."

CORN BELT MEAT PRODUCERS' ANNUAL MEETING.

The annual meeting of the Corn Belt Meat Producers' Association was held in Des Moines on Tuesday and Wednesday of last week. An interesting program was carried out in the presence of a large attendance of members. Unfortunately, the session was held during the same time at the State Farmers' Institute and Board of Agriculture meeting, and consequently the crowd was partially divided as there were many in the city who desired to attend both meetings. In the evening of the first day a joint meeting was addressed by President Stickney of the

How You Can Test Standard Stock Food Entirely At Our Risk.

We want you to use STANDARD Stock Food this season whether we have a dealer in your town or not. If you deal with us direct, we will take every particle of the risk of your being satisfied. If you are not or if the food does not do all we claim, then we will return every cent you have paid for it, and it shall cost you nothing. This paper stands behind this guaranty.

WE believe you will be fair with us. We want you to believe we will be fair with you—because we will.

Now if your dealer does not handle Standard Stock Food, we ask you to tell us and give us the privilege of making you our direct offer. We will ship you the amount of food you need to make a thorough trial, and if it does not do everything we claim, we will refund every cent you have paid. If you are not fully satisfied, it shall cost you nothing.

Can you ask a fairer offer?

Your animals are not like nature intended them to be; not like they would be under natural conditions. They are highly fed, quickly developed, and easy to get out of condition.

They need a little help from day to day—not medicine, or dope, or physic, but a condiment, a seasoning, to give variety to the feed ration, and make it taste better; a tonic to aid digestion and help get more nutrition out of the feed.

Your animals need a condiment, a flavoring, a seasoning just as you need salt and pepper, mustard, and catsup, sauces and gravies, and various flavorings and seasonings to make your food taste better; to aid your digestion.

Standard Stock Food makes the ration taste better so your animals eat with a great relish. It promotes the flow of all the di-

A Condiment-Tonic. It Makes Stock Thrive.

gestive juices so that they digest their feed more quickly, more easily, and more thoroughly.

Its tonic properties put the entire system in that prime condition which means more thrift, better finish, and bigger profits.

We can prove the value and the superiority of Standard Stock Food so fully on every point that all we need is the opportunity.

So we put it straight and plain—take all the risk—don't ask any conditions—nothing but your word that you will use the food fairly, thoroughly and according to directions.

A dollar's worth of Standard Stock Food contains more feeds, will go farther, last longer, and produce more and better results than a dollar's worth of any other stock food made whether it costs 6c or 15c a pound.

We know there is no question about Standard Stock Food paying you, and paying you big too. We have been making and testing it over 20 years. We have over 400,000 customers who have proved that it is the best condiment- tonic to mix with the feed ration that can be had at any price.

You take no risk. We guarantee absolutely, and without conditions, that it shall cost you nothing if you are not satisfied with it. You know that this paper would not print this advertisement unless we always make our word good.

We refer you to your own Bank, or to any Bank or business house in Omaha for information as to our responsibility.

Write Today For Our Direct Offer.

Tell us how much stock you keep, and we will tell you how much Standard Stock Food you need for a fair trial. If you request it, we will send you a copy, free, of our fine stock book, *The Standard Feeder*, regular price 50c, 160 pages, 200 illustrations, chock full of valuable information on the feeding and care of all kinds of live stock.

Standard Stock Food Company, 1516 Howard St., Omaha, Neb.

Great Western road on freight rates, and this meeting was exceedingly well attended. A. L. Ames, president of the association, was not present on account of serious illness, though it is reported that he is on the way to recovery. He was re-elected president of the association. The resolutions adopted by the association are as follows:

Resolved, That we congratulate the meat producers of the state and nation upon the victory which the American people have achieved by the enactment of railroad rate legislation, and we heartily appreciate the masterly efforts put forth by President Theodore Roosevelt, the member of the Iowa delegation in congress, and every patriotic citizen of Iowa who took an active interest in behalf of such legislation; that we unequivocally indorse the meat inspection law enacted at the last session of congress, firmly believing that a thorough inspection of all meats will increase the demand therefor in foreign markets.

Resolved, That we commend the action taken by the Corn Belt Meat Producers' Association and the National Live Stock Association in the organization of the Co-operative Live Stock Commission Company for the sale of live stock at the principal live stock markets, and we especially commend and indorse the efforts put forth in connection therewith by Hon. A. L. Ames, the distinguished president of our state association. We are confident that by taking this means of handling our own stock at market points we can thereby protect ourselves from unreasonable and extortionate charges, and we urge all of our members to avail themselves of the benefits and advantages which have been provided for by consigning their shipments of live stock to our own company.

Resolved, That we appreciate the faithful services that have been rendered to the agricultural interests of this country by Hon. James Wilson, that able and progressive exponent of the chief industry of the United States, who has discharged his duties as secretary of agriculture in a manner so eminently satisfactory that he is recognized as the foremost farmer of the age. His splendid career in the department of agriculture has reflected great credit upon our state.

Whereas, Congress at its last session enacted a meat inspection law in order that the whole world might know that our meat products are absolutely pure and healthful; and

Whereas, The purpose of this inspection law is to not only protect the health of our own people, but to extend our foreign commerce and trade in meat and meat products; and

Whereas, The value of such a law as a trade measure directly depends upon the confidence foreign countries have in the fairness and thoroughness of the inspection; and

Whereas, The confidence of foreign customers can be obtained and held only by the government of the United States having entire charge of all such inspection and bearing all costs connected therewith; therefore be it

Resolved, That we are unalterably opposed to any amendment to said inspection law which would require either the meat packers or live stock producers to pay any part of the fees or expenses connected with said inspection; and be it further

Resolved, That we most earnestly request, not only the congressmen from Iowa, but

from all other western states, to see to it that Secretary Wilson is provided with ample funds to carry out the provisions of said inspection act. We especially urge upon congress the necessity of immediately providing funds for the microscopic inspection of pork products.

Resolved, That a committee of three be appointed by this association to draft a bill and present it to our legislature which, in effect, shall authorize the attorney general of Iowa to bring suit before the interstate commerce commission on matters of freight discrimination on interstate shipments where such discrimination may be shown to operate unjustly to citizens of Iowa.

Resolved, That the slow shipping time for live stock is causing tremendous loss to Iowa Farmers and stockmen. Past experience has shown that a speed of twenty miles an hour is entirely practicable on stock shipments, and our directors are hereby directed to at once investigate and determine the most practical way, by law if necessary, of securing the relief in shipping time which the interests of our people absolutely demand.

Resolved, That the increase of passenger traffic and the discontinuance of free passes now justify the railroads in this state in reducing the passenger rate to two cents a mile, and that we demand the enactment of such a law.

Resolved, That we urge our legislature at its next session to enact a joint rate law.

Resolved, That we are unalterably opposed to the proposed ship subsidy legislation, firmly believing that the annexation of larger markets for our meat products will give sufficient encouragement to the upbuilding of our merchant marine without government aid. We believe that any legislation providing for ship subsidies is vicious, and we urge our representatives in congress to exert the full measure of their strength and influence to insure the defeat of the proposed legislation.

Resolved, That the congressmen from this and other agricultural and live stock states should give their prompt attention to the matter of extending the foreign markets for our live stock and meat products, by trade deal with countries which need and want our surplus. The farmers and stockmen of the West made and have maintained protection for our manufacturing interests, but they are no longer willing to have the great agricultural interests sacrificed for the benefit of a few small factories in the East. We demand that our Iowa congressmen especially give attention to this matter.

The officers and directors for the coming year are: President, A. L. Ames, of Buckingham; vice president, A. Sykes, of Ida Grove; treasurer, Charles Goodenow, of Wall Lake; directors, first district, J. M. Brockway, of Letts; second district, E. D. Baird, of North lish; third district, D. Muir, of Hampton; fourth district, J. P. Sheehan, of Osage; fifth district, J. Swearingen, of Marshalltown; sixth district, Jonathan Goodfellow, of Grinnell; seventh district, T. A. Thornburg, of Linden; eighth district, Jerome Smith, of Corning; ninth district, Hamilton Wilcox, of Griswold; tenth district, Jonathan Thompson, of Jefferson; eleventh district, W. R. Winters Ireton.

DEATH OF A NOTED CORN EXPERT.

The Legal Tender corn which was produced and developed by the Nims brothers, of Mills county, has justly made a place for itself upon many thousand of acres of corn land in southwestern Iowa and over a considerable portion of adjoining states. The Legal Tender is a splendid monument to the late D. B. Nims, whose death occurred November 27, 1906.

Thirty years ago there was but little thought of corn specialists and the Nims brothers scarcely believed that their efforts, which were begun in a modest effort to improve the corn which they had been planting, would bring about a change in the type of corn which

this strain of corn they were awarded a prize upon it at the fat stock show in Chicago and they have been frequent winners ever since at the principal corn contests throughout Iowa and other states.

Mr. Nims will be greatly missed among his fellow workers in agriculture. They had learned to love him. It is worth while for us to pause and measure the value of establishing within ourselves an "ideal" which we are willing to live with and to use as a guiding standard for a lifetime.

Let this standard be intelligently chosen and faithfully observed.

The Legal Tender corn comes down to the younger generation as a splendid tribute of a well-directed, unselfish life, striving toward an ideal.

A REGRETTABLE ERROR.

In our issue of December 13th, in an illustrated article on the popular fur and hide firm of Andersch Bros., of Minneapolis, Minn., we inadvertently stated that the valuable work published by the firm, entitled "The Hunter's and Trapper's Guide," would be sent free to readers of this paper on application. This statement was erroneous and the error was made in this office, and the firm of Andersch Bros. are in no way responsible for any misunderstanding resulting therefrom. The book was prepared at a cost of several thousand dollars and the price they charge for it is very reasonable. We regret the mistake and trust that those inconvenienced by it will not in any way or to any extent hold Messrs. Andersch Bros. responsible for it.

Some Swine Philosophy.

To the Editor of The Homestead:

This article is intended for the benefit of the beginner in the swine business. There are several branches of the swine breeding industry, but at the head

or nothing about hogs until he started to farm for himself at the age of twenty-seven years. He first acquired a fancy for hogs when attending the Illinois State Fair, then being held in Chicago. At that time the breeders of pure-bred swine were few and far apart in the state of Illinois. Even some of the swine exhibitors didn't know there was such a thing as a thoroughbred hog, and they simply brought for exhibition the best shaped and fattest hog or sow with a large litter of pigs.

Mr. A. C. Moore, of Canton, Ill., was at that time a large exhibitor of swine, then named the Moore hogs, but afterwards known as the Poland Chinas. At the time of the above-mentioned state fair I became personally acquainted with Mr. Moore, then the king of all swine breeders in America. I soon afterwards paid him a visit at his farm, at which time he owned 500 head of brood sows. Mr. Moore kept me three days and would have kept me a week or two had I cared to stay. Before I left I purchased six head—five sows and one male—at \$20 per head, to be taken away at eight weeks of age. That was my first start in the Poland China breeding business. Mr. Moore had all the 500 head of brood sows distributed on five different farms. A man would have to be a very dull creature not to have taken a fancy to such a fine breed of hogs. Then, for the first time I learned how young, suckling pigs should be fed and taken care of, which I will relate in another article.

S. Kaufman.
Oregon County, Mo.

A hog seems to live and enjoy life better than any animal on the farm. Eat, grow big and fat in a hurry, he is a very encouraging customer to feed and care for, when free from worms and lice and is otherwise in good condition, which he will be if properly fed. If the hogs are full of lice and worms it seems like all the slop and feed, however good it may be, is wasted and everything about the hog lot is discouraging.

This worm question is something I never had much experience with until last winter, when I had a full dose of it. I had about twenty-nine August pigs, which seemed to be doing reasonably well until I weaned them at the age of about eight weeks, when they began to lose their appetites (which were not good at the time), squeal, run around, hunt for something they could not find, pile up a little on a cold day as if they would not live to see the sun rise on another day, and oftentimes they would not come out of their sleeping quarters if one would call until tears came to his eyes. They seemed to be growing, but very little, and were not much heavier the 1st of February than they were on Thanksgiving day, at which time they weighed about forty or fifty pounds.

We had three spring pigs which I kept back for our meat, and they, too, seemed to be getting lighter in weight instead of heavier, after I sold the rest of the lot, which had been doing none too well all summer. Some time in February we butchered those three pigs, and the cause of all became apparent—worms, until the inside works kept in motion after the hogs were bled to death.

Those pigs were difficult to treat for worms. If such a thing as turpentine was put in their slop they would not come within four or five feet of the trough, as their appetites seemed so easily satisfied and the scent alone did not seem to rid them of the pest. Well, I tried every imaginable worm destroyer, without result. I finally got a worm powder that brought them on, of which I now give the hogs a feed about every six weeks or so.

One of those shoats was weighed in May and gained forty-four pounds in

twenty-one days, when I sold the bunch at an average weight of 198½ pounds. However, they were the most expensive pigs I ever fed. I had never been bothered much with lice until last summer; that is, I had never noticed many, as my hogs are white and the nits are not so easily seen. But lice can be seen when once you know they are there. Kerosene seems to be sure death to them, without the lard, applied directly on the hog, but slightly.

Take an old gunny sack or two, tack up around some posts or runway in the hog house, where the hogs rub and scratch most; dampen twice or three times a week with kerosene as long as the lice last and the hogs will do the rest. Sprinkle the bedding twice a week, or each time you put in clean straw. I have been treating my hogs as above this fall and cannot see that it has taken any of the hair off. I did, however, blister them some about the ears when kerosene was used too freely.

This much I have learned about the business, that when the worms have once established a home within a hog, and the lice have once a home about a hog, if they are to be destroyed and done away with, one has to stay right with it and give them treatment, not only once a month, but every day, summer or winter. The lice, like the worms, seem to hatch out and become a grown member of the family in forty-eight hours.

Henry Roth.
Washington county, Iowa.

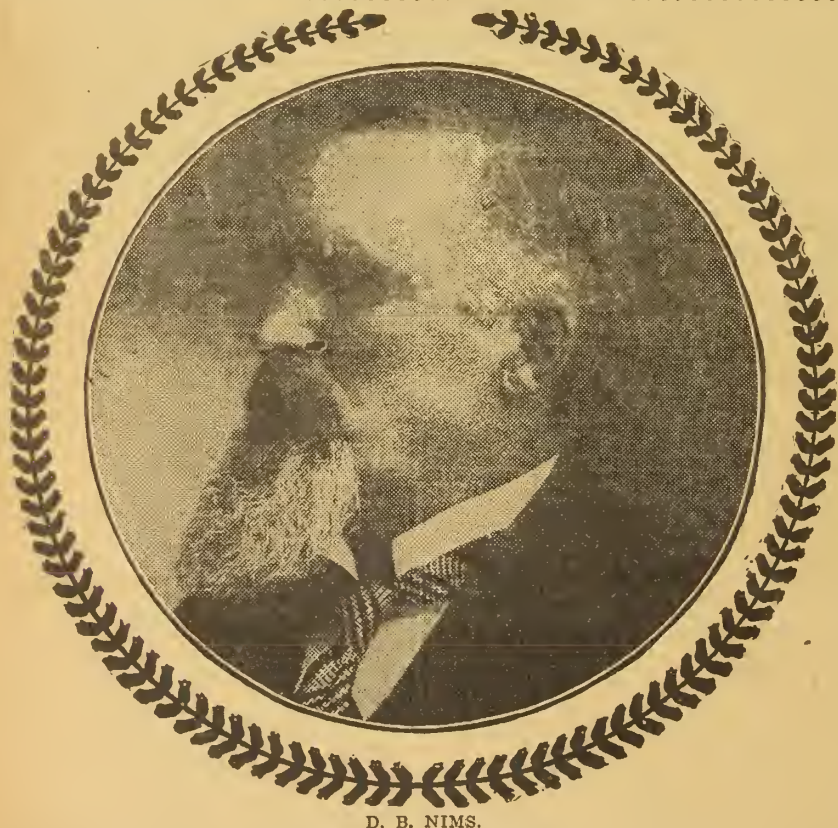

I am an interested reader of this paper and would like to give my experience in spraying hogs for lice in summer or winter. I have sprayed from ten to fifteen years.

Put in fresh bedding and spray in the beds. Spray until the hog looks black—thoroughly. Don't be afraid of getting the liquid in the eyes, because it won't hurt them. I have sprayed from 200 to 400 a year, with no bad results.

If sprayed once a month with clean kerosene (no water) there will be no trouble with lice or mange. Don't leave the hogs shut up in a tight-house after spraying, but, if possible, turn them out to the air. Kerosene will loosen the scurf, but I have never had it take the hair off.

G. C. Thomas.
Madison county, Iowa.

FILES CURED IN 6 TO 14 DAYS.

D. B. NIMS.

they have since named Legal Tender, to warrant them in offering it to the public as a distinct variety which would assert its individuality and with each succeeding season more firmly establish type and breed characteristics.

They sought to produce a type of corn which would mature and give them a large yield. They wanted a pure yellow corn. The Legal Tender today has a rich yellow color. They desired an ear of corn which did not taper sharply to the tip, as did most corn at that time. A medium small cob with small shank attachment and well-filled butt and tip was a part of their ideal. The kernel must be deep, well filled at the tip, giving capacity for a large, strong germ and yet not sacrificing space at the tip of the kernel. When you study the Nims type of Legal Tender corn today, you will be impressed with the fact that their ideal has been followed faithfully and their long, faithful work has been well rewarded. The circumference of the ear equals about three-fourths of the length of the ear.

Ten years after their first work upon

of them all stands the breeder of thoroughbred swine for breeding purposes. This requires the most intelligence, care and perseverance, as well as the best of judgment. To begin with, any kind of false pride must be left behind.

The fundamental principle of a successful swine raiser is that he shall be a lover of a fine, perfect hog. In other words, he must become a hog fancier. Don't start into the business just because you have noticed some of the breeders making good money, for if you do, nine times out of ten you will be apt to make a wrong start, which sooner or later means failure in the breeding of swine for breeding purposes. To become perfectly successful in this business one must be as ardent a lover of the perfect hog as of the almighty dollar that is in the hog business. One may have been born to love hogs, as it were, or one may in after years learn to love them. At any rate, this is a most essential point to possess in order to become a successful fine swine breeder.

The writer of these lines knew little

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper, but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

INVENTION BY EMPLOYEE.

Where an employee in a shop or factory invents tools or machinery while in his employer's service, and such tools or machinery are made of materials belonging to the employer, and used in the shop or factory, the employer does not thereby obtain any interest in the invention, or in a patent issued to the inventor, beyond what is called a license or shop right, which means the right to make and use the invented article in his business. Subject to this right the invention and the patent therefore, belongs to the inventor.

LAW QUESTIONS CONSIDERED.

INHERITANCE IN COLORADO.

M. S. Ames, Iowa.—A widow died leaving valuable property in Colorado. She had no children and her parents are dead. Her surviving relatives are several brothers and sisters, one half-brother and one half-sister, children of one sister and children of two half-brothers. How should the property be divided?

Answer.—As follows: One share to each brother and each sister, one share to the half-brother, and one share to the half-sister, one share to the children of the deceased sister, one share to the children of one half-brother deceased, and one share to the children of the other half-brother deceased.

DOG LAW—NEBRASKA.

A Subscriber, Craig, Neb.—What is the law in Nebraska concerning dogs running at large, and molesting and killing sheep?

Answer.—Owners of dogs are liable for all damage they do by killing, wounding, worrying or chasing sheep or other domestic animals, and any person may kill a dog found doing any of these things, or if the person has good reasons to believe that the dog has been doing such things, and such person is not liable in any way for killing such a dog. Owners of dogs allowed to run out must keep collars on them with name of owner on metallic plate, and any person allowing his dog to run at large without such collar is liable to be fined \$25.

RAILROAD FENCE.

A Reader, Reinbeck, Iowa.—Last winter my horses were pastured in a stalk field adjoining a railroad right of way. The railroad company had a wire fence between the field and its right of way. A wire on this fence had become loose from several of the posts and had broken, each end of it rolling into my stalk field. Part of the kinks of it had frozen in the snow which fell two weeks before the injury happened, which is hereinafter mentioned. One of my valuable mares walked into one end of this broken wire and it nearly severed a limb, and caused her death. I did not know the wire was down until after the accident happened, so I could not have notified the company as to the poor condition of its fence. I sent in a claim, but the company refused to pay it and claims it is not liable for damages. Is the company liable for damages?

Answer.—Under the circumstances stated, we think the railroad company is liable to you for the value of the mare. The law places upon the railroad company the duty not only of building a lawful fence along its right of way, but

also of keeping it in repair. Your mare was injured because the company suffered its fence to get out of repair.

THE CITY LICENSE.

A Subscriber, Monticello, Iowa.—Some time ago I received a car load of apples from Missouri and sold those directly from the car to the townspeople. I did no peddling whatever, but afterwards had to pay a city license for selling these apples. Would there be any better reason for collecting this license than would be the case in the selling of feed, coal, horses or anything of the kind?

Answer.—There is no state law which requires a license nor imposes any tax, but no doubt the town where the correspondent sold the carload of apples has provided by ordinance for a license tax upon persons engaging in such an enterprise as he mentions. If so, he cannot avoid it. The town has power to impose such a license tax.

CHATTEL MORTGAGE.

An Iowa Subscriber.—A bought a thrashing machine. B loaned him the money with which to pay for it, and took a mortgage on the machine to secure the repayment of the loan. Afterwards A shipped the machine out of the state. B knew of this, but saw nothing about it. The mortgage was not signed by A's wife, but by him alone. The loan has not been paid by A. Can B take the machine on the mortgage, wherever he may find it?

Answer.—As between A and B, the latter can lawfully take the machine according to the terms of the mortgage, wherever he may find it in the possession of A, but if he should find it out of the state in possession of a third party, he could not lawfully take it, unless his mortgage was there recorded.

A THRIFTY DOCTOR.

An Iowa Subscriber.—(1) A was sick with appendicitis and it seemed necessary that an operation should be performed upon him. He decided to go to the hospital at Iowa City and have it done there, because it would be cheaper and a better place for it than at home. So he went there. A's home doctor found this out, and believing he was about to lose a surgical fee which was five or six times as much as the hospital charges, he wrote to parties connected with the hospital stating that the man was his patient and able to pay the fee, and that he wanted to do the work. This letter would have prevented the operation at the hospital, had it not been for the fact that the man had friends connected with the hospital. If it can be proven that the home doctor wrote such a letter, and that at the time the condition of the patient was such that a few days' delay in performing the operation would have caused a serious relapse, and might have resulted in death, would it render the home doctor liable for damages? (2) Can a doctor collect a fee for a call which he was not requested to make?

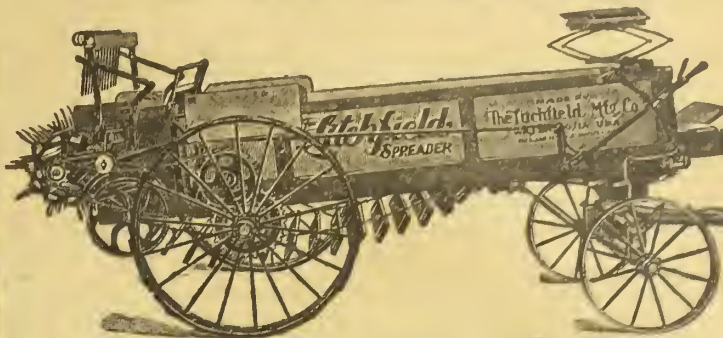

Answer.—(1) We do not think that A could recover substantial damages from the home doctor. It does not appear, from your statement, that the letter written by the home doctor did actually cause any loss or damage to A. In order for a person to recover substantial damages for the wrongful act of another, he must prove in court that such wrongful act not only might have caused him loss or damage, but that it actually did cause him loss or damage, otherwise he could only recover at most nominal damages, that is one cent or one dollar or the like. The act of the doctor in writing such a letter if he did so was a most contemptible one, and proves him unworthy of the respect or confidence of his patients, but there is no adequate legal remedy for such meanness. (2) He cannot, unless by being employed generally, there is an implied duty to make the call, not expressly requested.

ORGANIZING A CORPORATION.

Mr. W. P. Blackford, Hillsboro, Iowa.—We are thinking of forming a co-operative company in this place for the purpose of buying and selling lumber, grain, coal, hay, etc., dividing the capital stock into shares of the par value of \$25 or \$50 each. (1) Is it necessary to incorporate such company? (2) If so, how should we proceed? (3) What is the formula for constitution and by-laws of such a company?

Answer.—(1) While it is not absolutely necessary to incorporate such a company under the laws of Iowa, it would be better to do so—otherwise it would be merely an unwieldy and awkward partnership concern. (2) Persons desiring to incorporate a company must meet together and adopt articles of incorporation, which must be signed and acknowledged, and filed in the office of the recorder of deeds of the county where the business is to be carried on, and by him recorded, and then forwarded to the secretary of state to be recorded. The recording fee of the secretary of state is \$25. (3) For want of sufficient space we cannot give in these columns forms for articles of incorporation, and by-laws of a company. Persons wishing to incorporate a company should engage a competent lawyer in the very beginning to prepare articles of incorporation, draft suitable by-laws, and attend to the first meeting of the board of directors, election of officers, opening of books and

THE IMPORTANCE

OF GETTING WHAT YOU BUY.

CONCERNING the Litchfield Manure Spreader we want to say that we are not offering "a cat in a bag" to our customers by asking them to buy and pay for a manure spreader and afterwards, perhaps, find that they really got something else. We also want to have it emphatically understood that we are not juggling with words in attempting to see how many orders we can get and how little we can actually agree to do. Our advertisements state just what we mean in as plain language as we know how to express our absolute knowledge of this modern machine.

We do not offer to deliver machines, freight paid, and give everybody and anybody who sees fit to order out one of our spreaders, an unconditional opportunity to return the machine or not, just as it may suit them, regardless of whether it will do the work or not. When we begin to do business this way, we have got to allow a big margin for returned machines that will be sent back by unscrupulous parties for various other reasons than an actual defect in the spreader itself.

If we sell machines on such a loose, unbusiness-like basis, those customers who do actually keep and pay for their machines, must pay for the other fellow's returned machines, also. It is just the same proposition as a good cash buyer trading with a loose credit company; the fellow who pays his bills has to foot the bills of the poor accounts also.

What we are giving to our customers now in the 1907 Litchfield Spreader is the very latest, most up-to-date, complete manure spreader that has yet been put on the market by any company. There is not one single point or feature on any other spreader made that is not fully equaled on our machine. In addition to this, we have a great many special and very modern devices that are our own by right of the patent office protection, and we are willing to get behind our spreader and back up what we say. We think our five-year guarantee is the best evidence of this position.

By our method of marketing the Litchfield Spreader, we have no returned machines because we sell only to reliable parties and to those who mean business when they order. The money that other companies spend on paying freights for shipping machines back to factory and repainting and refinishing, we save for the benefit of our trade. What do you think about it?

We want to talk with you next week. Can we do so?

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

other matters, and see that the thing starts off right.

COMPENSATION OF ADMINISTRATOR.

A Subscriber, Prophetstown, Ill.—A made a will in which he named B as executor. After A's death the executor sold the land of the estate to C at public sale, but there was a defect in the title, and the sale was never completed. The executor got possession of some promissory notes which belonged to A in his lifetime, but did not collect them. Before the estate was settled the executor died, and one of A's heirs was appointed administrator of A's estate. Does the percentage or compensation for handling the notes go to the executor or to the administrator, or to both?

Answer.—To the administrator when he collects the notes. He will be entitled to 6 per cent commission on the amount collected, and if he has extra trouble in making collection, the court will allow him reasonable compensation in addition to the 6 per cent for such extra trouble.

UNRELIABLE TENANT.

Mrs. E. J. Bosworth, Webster City, Iowa.—I rented a house to a man for one year by a written lease duly signed. The man claimed to be a prompt payer, and objected to the clause holding his household goods liable for rent. He said in case of sickness it might be hard on him, so I allowed the clause to be erased before the lease was signed. After living in the house three months the tenant objected to odors from a factory in the vicinity, and said that a physician had advised him to move, and he did move without any notice to me or any arrangement about rent, except he paid for the three months. I had paid up insurance for five years and it is rendered void by the house being vacant. The factory was there and in operation when the man rented the house. What can I do about the matter?

Answer.—You can hold the man liable on his contract for the full amount of rent till his lease expires; that is, nine months rent, he having paid for three months; or, you can rent the house as soon as possible for the best you can get, and sue the man for damages and recover whatever amount you lose by reason of his having failed to keep his contract.

ACID-WEAR-WATER-PROOF ROOF.

Hot coals do not set fire to No-Tar Roofing, a wonderful product of which samples are sent free.

No-Tar is the name of a roofing made by the Heppes Company in Chicago. The owners of this concern invented many of the roofings now in use, and the product they are making and selling under the name of No-Tar is in their judgment the most remarkable, the best, the cheapest in the long run, and the most satisfactory of any they have ever had anything to do with.

No-Tar, as its name implies, is made without tar. Hot coals placed upon a piece of No-Tar roofing will die out without setting fire to it. No amount of water will soak through this material. Acids do not affect it. It is so tough that it is practically wear-

proof and will last an ordinary lifetime. It is flexible and easily applied.

While it was originally made as a roofing material, it is used by a great many people for siding.

It never rusts out like iron or steel roofing, and costs a little over half what shingles do. For all outbuildings there is no roofing material on the market today that has so many points of excellence.

The Homestead is authorized to notify every one of its readers to send to the Heppes Company, 2401 Fillmore St., Chicago, Ill., for a generous sample of this No-Tar Roofing, which will be mailed anywhere free. This gives the purchaser an opportunity of thoroughly investigating the product before he invests a penny.

With the free sample of roofing will be sent the most valuable and sensible roofing booklet ever printed. It shows how to lay roofing—how to cut it for the top or sides of any building; how to fix the roofing around chimneys so that there can never be a leak; how to turn corners; how to lap roofing; and generally contains information that every farmer ought to know. Buildings of different shapes have the roofing placed on them in different ways, and this book sent out by the Heppes Company tells the right way to put it on. The Heppes Company desires every reader of The Homestead to write for a sample and the book, with the understanding that there is no obligation to buy. See advertisement on page 12.

HOLIDAY EXCURSION RATES.

Iowa State Institute and Agricultural Convention.

The annual meeting of the Iowa State Farmers' Institute and Agricultural Convention was held in Des Moines last week. An interesting program had been prepared by Secretary Simpson and was carried out in detail, practically every speaker responding when his name was called.

One of the features of the meeting that attracted most favorable comment was the address delivered by H. W. Collingwood, editor of the Rural New Yorker, New York. His subject was "The Development of Eastern Agriculture," and his treatment of the same was full of interest to the western man. He first called attention to the great difference in the value of land in eastern and New England states as compared with the corn belt, and especially to the great difference that exists in the relative productive ability of the lands in the East as compared with those in the West. Much land has been vacated on account of fertility robbery that has been going on for 150 years, but in turn these lands are again being settled by men of small means who are obliged, for one reason or another, to leave the large cities. Men with \$2,000 or \$3,000 cash can settle on a nice farm, according to Mr. Collingwood, and with perseverance and some degree of resourcefulness can make the land profitable. The splendid markets that are available for all kinds of farm products necessarily are of great advantage to those who are obliged to till the somewhat poverty-stricken soil, and yet by the sensible application of commercial fertilizers a great variety of crops can be grown on these lands at a profit. The pains taken to conserve all elements of fertility that this may be returned to the land is a lesson in Mr. Collingwood's opinion that the western farmer should heed, because the day will come when corn belt lands are not so productive as they are at present, and it is therefore much wiser to stop the leakage now than to undertake to restore the supply when it is once exhausted.

The labor question, especially such labor as is applied to the tillage of farms, is even more complex in the East, according to Mr. Collingwood, than it is in the West. In this respect he is no friend of the large city, and states unhesitatingly that these have a blighting effect upon the rising generation. The young men and young women of rural districts too generally ape the rich, and consequently fall into ways that do not contribute to the highest citizenship. Men in New York City are loafing by the thousands, and yet, though starvation is frequently in sight, it is almost an impossibility to induce any of these loafers to leave the city and take up work on the farm. If you are wise in your day and generation, said Mr. Collingwood, you will aim to retain your people on the farms and not make haste too strenuously in the building up of your large cities. The manhood and womanhood that is required to maintain the stamina of the race must come, not from the city, but from the farm.

Prof. W. J. Kennedy of the Iowa Agricultural College, addressed the institute on the draft horse question, dealing especially with the phase of it that has to do with the keeping of draft mares on the farm by the average man. Professor Kennedy first called attention to the fact that good draft horses are selling today for higher prices than have ever before been realized, and he pointed out that there are reasonable prospects that these prices will continue. There were something like 154,000 more horses in Iowa in 1900 than in 1905, and Professor Kennedy's interpretation of this state of affairs would indicate that this is the best evidence that prices will continue to be good for some time to come. The market demand should be closely studied by every man who aims to produce draft horses. There is no sense in going ahead hit-and-miss fashion and producing horses without first thoroughly understanding what is needed in market centers. Weight is as desirable as in the past, and a good drafter must weigh from 1,600 pounds upwards. He should be massively built, deep-bodied, short-coupled, heavily-mus-
tled, and be placed on reasonably short

legs. He must be able to walk straight and to trot with some vim. Animals that are bred from in the production of draft horses for the market should be sound and their conformation should be such as to contribute the soundness to the offspring in the greatest possible degree. Professor Kennedy thought it somewhat amazing that more good registered draft mares were not kept by farmers who are operating small farms. Seventy-five per cent of the good draft horses produced in England, France and Belgium are produced on small farms, and mostly by tenant farmers. The mares do the labor of the farm and in addition raise a colt. This is one of the reasons why farmers abroad are able to pay such exorbitant rents on the land. It is just as practicable to keep registered draft mares on the farms here as it is abroad, if only men can be made to understand what is for their own best interests in the matter of live stock raising. One case was cited where an Illinois man accidentally purchased at a sale a pure-bred Percheron mare for \$300. His bid was simply put in to help things along, but she was knocked off to him. He afterwards offered her for a little less money than he paid, but could not sell. In three years and a half he had sold from this mare \$1,250 worth of colts and has one left for which he has refused \$500. There is but one horse registered or eligible to registry now for every 150 that are not registered in the state, so that you will see that it will take some time to overdo the business of producing our own foundation stock. If we have the mares we can produce just as good stallions as they can anywhere on earth and it is now time that our people were taking up this matter, and thereby lessen the volume of importations that are being brought from the foreign lands.

Prof. C. F. Curtiss, also of the Iowa Agricultural College, discussed what the college is doing for the boys and girls of the state. He stated in the outset that practically 1,000 young men were attending the agricultural college, in the long and short courses, annually, and that most of these were returning to operate farms, many refusing salaried positions in order that they might return to the land and there carry out their higher ambitions in the operation of a farm. Professor Curtiss dwelt on the change that has taken place in the character of education in recent years, and pointed out that our greatest educators are emphasizing more and more what is called practical education. There is just as much culture in the study of grains, grasses and live stock as there is in the study of the dead languages, so that in addition to the culture, there comes to the mind of the young man and the young woman a knowledge of affairs that later contributes to success. This is the line along which the agricultural college is working, and the increasing attendance and the very remarkable tendency of the graduates to return to the farm is the best indication that the institution is working on sound principles.

D. L. Berry, of Indianola, gave an interesting talk dealing with what the farmers' institute is doing to help the farmer. He stated that eighty counties in the ninety-nine in the state are now holding farmers' institutes. Scarcely a farmer in the state has failed to come under the influence of these institutes in one way or another, and the campaign up to date has unquestionably added millions of bushels annually to the crops of Iowa. One effect of the meetings is to check the waste of fertility, and the fertility supply is now being added to instead of being depleted as was formerly the case, by the sensible application of manure and by the growing of more legumes. Live stock is also being improved so that with the least possible amount of food the greatest production of beef, pork, mutton or butter-fat can be realized. The general principles that are dug out by our experiment stations are made applicable, locally, through the teachings of the farmers' institutes, so that after all the institute is really only the extension service of the experiment stations. The

institute is a non-partisan organization and is for mutual self help. The meetings have contributed to the betterment of roads and, indeed, spread every sound doctrine that reaches the state that will in any way benefit farmers. In the conduct of the county experiment station the institute is reaching its highest state of perfection as an organization, and the state is now dotted with these under the general supervision of the station at Ames. It is hoped that the day will soon come when every county in the state runs its own experiment station, so that farmers may look to this center in their efforts to ascertain what are the best varieties adapted to the land and what are the best methods to apply in preparing soil and cultivating crops. The farmers' institute brings a right spirit into a community and drives out small gossips quicker than any other agency.

Poultry on the farm was discussed by Mrs. H. W. Ashton, who stated that four-fifths of the poultry of the United States comes not from the large poultry plant, but from the farm. Last year the United States marketed 20,000,000 eggs, and Secretary Wilson has recently added a department to the animal husbandry division with the idea in mind of swelling this another billion. The hen does not require a scientifically compounded ration, and all the food she consumes may be raised on the farm. As a general proposition, strict accounts are not kept with a flock of hens, otherwise they would be found to be as profitable, if not more so than any other industry found on the farm. The cause of pure-breds as against the scrubs scarcely needs treating, because more and more farmers are finding out that there is more profit in a well-bred fowl than in a scrub. More mistakes, however, are made in the feeding and care of poultry than in the kind kept. Hens need a variety of grain and they should be made to do a good deal of scratching for their living. In the winter they need green food, and nothing is better for them than clover hay, roots and cabbage. They also need animal food in some form if they are expected to lay well. A load of gravel will generally supply grit enough for the average flock in the winter, and fifty cents' worth of time would prepare enough charcoal which may be burned from cobs. Overcrowding is a very common cause of loss in poultry, or at least it contributes to lessening the profits. Small flocks that are kept up to the highest state of productiveness should have about ten square feet of floor space per hen, and the Maine station found that twenty-five hens kept in a house built with room enough for them would lay more eggs than when fifty hens were put in this same house. As a general thing, too many farmers fall down in being poor salesmen. If they will endeavor to find a market for their fresh eggs in towns and cities they can always do it, and receive a premium at all times. Mrs. Ashton stated that by grading and packing the eggs in cartons holding a dozen each she had realized all the way from four to ten cents per dozen more than the regular market price.

Mr. C. G. Meserole, secretary of the Iowa Farmers' Co-operative Association, addressed the institute on the subject, "Farmers' Co-operative Associations." He pointed out, in the first place, that these associations had sprung up as a natural result of unfair business manipulations on the part of old line elevator companies. Farmers were not getting their share of the value of the grain disposed of and there seemed to be no help for the situation unless farmers themselves marketed their own grain. There are now something like 125 co-operative elevators in the state of Iowa, one hundred of which have been erected during the last two years. These are all running on a business basis and most of them are operating under what is known as the penalty clause. According to this clause of the by-laws of an association all parties who sell grain to any other company where a co-operative elevator exists must pay into the co-operative plant one-half cent a bushel. This prevents the old line company from putting up prices and thereby squeezing out the new concern. Only in this way is it possible to compete at all with the large companies. Mr. Meserole condemned the operation of those parties who, through co-operation, proposed to hold grain, such as wheat and corn until it had greatly appreciated in

value. He expressed himself as confidently believing that this was restraining trade and that it was therefore illegal. The opposition formerly raised to the co-operative elevator at terminal points is rapidly breaking down, according to Mr. Meserole, and farmers are finding it much easier to market their grain in the large centers than ever before. The principle of co-operation among farmers is right, and the enthusiasm shown by Mr. Meserole would indicate that this plan of marketing grain had come to stay.

Hon. A. B. Stickney, president of the Chicago Great Western Ry., discussed railway freight rates at the evening session of the farmers' institute, this being held jointly with the Corn Belt Meat Producers' Association. It is our intention to publish, either in part or in full, Mr. Stickney's address in the near future, and we therefore do not make any attempt to summarize at this time.

At the meeting of the state board of agriculture held on Wednesday of last week Mr. C. E. Cameron, of Alta, was elected president of the state department of agriculture to succeed W. W. Morrow, who closes four years of service as president to become treasurer of the state. W. C. Brown, of Clarion, was elected vice-president, his place on the board being taken by Elmer Reeves, of Waverly. Charles W. Phillips, of Maquoketa, was re-elected director for the second district; R. T. St. John for the fourth; T. C. LeGoe, of What Cheer, for the sixth; John Ledgerwood, of Leon, for the eighth; O. A. Olson, of Forest City, for the tenth.

A most interesting corn contest was held in connection with the annual meeting of the state board of agriculture. In quality the samples exhibited were never better, and the number of entries in the northern, southern and central districts were large. J. D. Buser, of Coonville, took first prize for the champion ear of corn, and Asa Turner, of Farrar, was given second. Other prizes awarded were:

NORTHERN DISTRICT.

Large Yellow Dent—First, H. L. Felter, Washta; second, Victor Felter, Washta.

Small Yellow Dent—First, A. J. Doore, Greene; second, F. S. Ross, Elkport.

Large White Dent—First, A. J. Doore, Greene; second, D. McArthur, Mason City.

Small White Dent—First, A. J. Doore, Greene; second, D. McArthur, Mason City.

CENTRAL DISTRICT.

Large Yellow Dent—First, R. F. Bennett, Pocahontas; second, Neal Bros., Mt. Vernon.

Small Yellow Dent—First, G. M. Fox, Dallas Center; second, N. Gormly, Bondurant.

Large White Dent—First, William Danner, Dallas Center; second, M. J. Harris, Des Moines.

Small White Dent—First, C. H. Danner, Yale; second, M. J. Harris, Des Moines.

SOUTHERN DISTRICT.

Large Yellow Dent—First, L. W. Roe, Oskaloosa; second, C. C. Roe, Oskaloosa.

Small Yellow Dent—First, L. W. Roe; second, J. A. Masqon, Carlisle.

Large White Dent—First, T. B. White, Oskaloosa; second, Homer Dye, Oskaloosa.

Small White Dent—First, T. B. White, Oskaloosa; second, Thomas Thompson, Villisca.

TERRIBLE SCALP HUMOR.

Badly Affected with Sores and Crusts—
Extended Down Behind the Ears
—Another Cure by Cuticura.

"About ten years ago my scalp became badly affected with sore and itching humors, crusts, etc., and extended down behind the ears. My hair came out in places, also. I was greatly troubled; understood it was eczema. Tried various remedies, so called, without effect. Saw your Cuticura advertisement and got the Cuticura Remedies at once. Applied them as to directions, etc., and after two weeks, I think, of use, was clear as a whistle. I have to state also that late last fall, October and November, 1904, I was suddenly afflicted with a bad eruption, painful and itching pustules over the lower part of the body. I suffered dreadfully. In two months, under the skilful treatment of my doctor, conjoined with Cuticura Soap and Cuticura Ointment, I found myself cured. H. M. F. Weiss, Rosemund, Christian Co., Ill., August 31, 1905."

LOW RATES TO THE SOUTHEAST

Commencing December 15th and on the first and third Tuesdays of each month thereafter until March, 1907, the Chicago Great Western Railway will sell one-way colonist tickets at nearly half fare to points in Alabama, Louisiana and Mississippi. For further information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Echoes From a Kansas Farm

By Henry Hatch

From "dry farming" to going around the head of the creek to get home—that's the latest change in climatic conditions.

After being caught in a rain ten miles from home, and you must get back in order to do the chores, it does not seem right to have the first article you see in the paper, that evening, tell what crops could be raised if all wasted water could be stored until needed.

It isn't how much we would be benefited if we could do such and such a thing, but how to do what will benefit us—that counts. No one likes to read about the result of an impossibility, but how to better do what is possible, that interests us all.

There are undeveloped fools in this world, and the quickest developer of them we know of is a telephone. On many of the farm lines there are folks who seem to know enough, except when using the telephone, then they think it necessary to use the 'phone all the time to get their money's worth.

Husking corn in the mud is hard on a man, but harder on the team. Usually, here in Kansas, after a man husks for three weeks in the mud he just finishes as the fields are dry, and then there comes six weeks of the best corn husking weather of the whole season.

Geology tells us of the Stone Age. This is the Cement Age. They are talking now of making water tanks out of cement, or, rather, we should say, they are making water tanks out of cement. We will watch the experiment with interest. We hope, also, that it proves wholly successful, for wood or galvanized iron for a water tank can be depended upon for only a short time, then you suddenly realize the leak cannot be mended, as the whole side has either rotted or rusted out.

All the good road laws in Kingdom Come can be enacted, and all the King road drags in Missouri be put to use, but as long as there is no punishment awaiting the man who gets out and hauls four-horse loads over the roads, just at the time when the grade is cut into ruts hub-deep, there is no use in expecting good roads. Some never seem anxious to get stuff to town until the roads are in good condition to be cut all into ruts.

We are reminded, at this season of the year, that each of our counties are supporting twelve or fifteen office holders, together with the usual number of hangers-on, by the taxes we pay. It is right that we all should pay some taxes, for public utilities and records must be kept up, but shouldn't all pay alike, without exemption? We think so.

We have become a convert of fall plowing for potatoes. The ground for our next year's crop was plowed a short time ago, after spreading on it a thin coating of well-rotted manure. Early in the spring another thin spreading of manure will be put on, then the ground plowed again. This is a lot of work, you may think, but we have found it better to go to a little more trouble and raise a full crop of good potatoes than to work in the usual way, then buy at the stores at \$1 a bushel.

If any reader of this paper has tried making cement fence posts, we are sure he will do us all a favor, and interest us all, by telling about it. This cement post business has been talked of for the past two years, but in all this time we have not seen a real cement post. Perhaps this is making a public demonstration of our ignorance, but, just the same, there are a whole lot of us wondering whether or not the cement fence post really is all right.

More than one farmer is now wishing he had started in and fed those steers early in the fall; two years ago, more than one farmer was lambasting the beef trust, and wishing he never had attempted to full-feed a steer. Question—"Has the beef trust really been brought to time, or is the demand for good beef now making the profitable price, and was the price no better two years ago because the demand did not justify it?" Sometimes we almost be-

CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted under this heading. Each number and initial letter or abbreviation counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 165,000, reaching a farm population of at least 825,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

PLYMOUTH ROCKS.

EVERGREEN Lawn Farm, M. Hummel, prop., Monroe, Iowa, breeder of heavy-boned Barred Plymouth Rocks for 22 years, has for sale 450 birds sired by high-scoring Iowa State Fair and Jasper County Fair first prize-winners. We won nine first prizes at the Jasper County Fair in 1905. Nothing but first-class stock shipped.

BARRED Plymouth Rocks, Hawkins, Thompson, Felch and Todd strains. Cockerels \$1.50 to \$2.00 each. Hens and pullets, \$9.00 a dozen. Must close entire stock by January 1st, as we intend to leave. Lou Blattner & Co., Prairie City, Iowa.

BARRED and White Rocks, Buff, Golden and Silver Laced Wyandottes. Eggs in season. Write for prices. A. L. Anderson, successor to Anderson Bros., Indianapolis, Iowa.

300 CHOICE Barred Plymouth Rock cockerels and hens. Large and healthy, narrow barred to skin. \$1.00 each, six for \$5.00. Willis Shearson, Merrill, Iowa.

FOR SALE. Choice thoroughbred Plymouth Rock cockerels, \$1 each, 6 for \$5. Mrs. W. E. Roby, Truro, Iowa.

75 BARRED ROCK Pullets, extra large, 15, \$10. Mrs. C. H. Medberry, Wadena, Iowa.

LEGHORNS.

S. C. R. LEGHORN cockerels from stock scoring up to 93%. Winners wherever shown, at \$1.00 each. Also White Wyandotte cockerels from stock scoring 94 to 96% at \$1.50 each. Orlando Jacobs, R. R. 1, Mediapolis, Iowa.

SINGLE COMB White Leghorns exclusively. Laying machines. Buy of an exclusive breeder and get the best. Osman Poultry Yards, Dept. K., Beaver Dam, Wis.

ROSE Comb Brown Leghorns exclusively. The best lot of cockerels ever raised at Pike Timber Stock Farm, for sale. T. A. Davenport, Belmond, Iowa.

SINGLE Comb Brown Leghorns. Cockerels \$1.00 each; two or more 75c. each; eggs in season, \$3.00 per hundred. Asa Anderson, New London, Iowa.

SCORED and unscored Single Comb Brown Leghorn cockerels. Mrs. Clyde Nelson, Birmingham, Iowa.

LANGSHANS.

FORT LAKE—Black Langshan cockerels and Bronze turkeys of high quality. Cockerels at \$2.00, toms at \$5.00. One cock 94 score; one tom 35 pounds, for sale or exchange. Mrs. S. S. Spangler, Milan, Mo.

100 BLACK Langshan cockerels from pens scoring 93 to 95; four firsts, grand sweepstake, Creston Fair. Philip Stalcup, Lorimor, Iowa.

FOR SALE. 200 Black Langshan cockerels and pullets as fine as ever raised. For prices write E. D. Keasey, R. R. 1, Wiota, Iowa.

BLACK LANGSHAN cockerels, \$1.00 each. Leonard C. Paup, Harlan, Iowa.

WYANDOTTES.

FOR SALE—Silver Laced Wyandottes, Barred Plymouth Rocks, Rose Comb Brown Leghorns. Eggs in season. This will not appear again. Address Julius Runge, Middleton, Wis.

SILVER LACED Wyandotte cockerels exclusively. Price \$1.00. Eggs in season 50c. per 13. Mrs. O. W. Thomas, Route 2, Manchester, Iowa.

WHITE Wyandottes, score to 96. 150 fine cockerels cheap. Mrs. S. E. Alley, Greenfield, Iowa.

BUFF Wyandotte Cockerels for sale. Hugh Sullivan, Prairie City, Iowa.

RHODE ISLAND REDS.

R. C. RHODE ISLAND REDS—Prize winners and high scoring stock for sale. Eggs in season. Address Mrs. J. B. E. Bryan, R. F. D. 4, Chariton, Iowa.

COCHINS.

FOR SALE—A fine lot of Partridge Cochins cockerels and pullets, Geo. Mitchell strain, \$1.00 and up. Mrs. C. O. Brewer, Route 4, Atlantic, Iowa.

INDIAN GAMES.

CORNISH Indian Game prize winners. Scored stock for sale. Mrs. S. A. Hawk, Route 3, Chariton, Iowa.

TURKEYS.

MAMMOTH Bronze turkeys from first prize-winners, cheap. Eight years a breeder and winner. Mrs. E. D. Matthews, R. R. 3, Morning Sun, Iowa.

DUCKS.

MAMMOTH Pekin ducks, 75c. three for \$2.00. White Wyandotte hens, \$1.00; cockerels, \$1.50. M. L. O'Neil, Oswein, Iowa.

MISCELLANEOUS POULTRY.

HIGH Scored Poultry. Barred Rock cockerels, \$1.00 to \$1.50; Pekin ducks, \$3.00 trio; Toulouse geese, \$6.50 trio; Fox Terrier dogs, \$8.00 to \$10.00 each. Stamp for reply. J. O. Walton, Belle Plaine, Iowa.

TWENTY-FIVE Breeds geese, ducks and chickens. Catalog free. Largest poultry farm in the northwest. Great Western Poultry Farm, Rural Route No. 4, Mapleton, Minn.

MAMMOTH Bronze turkeys; fifty from stock scoring 96 to 97. Two hundred choice Barred Plymouth Rock cockerels, \$1 each. J. C. Watts, Berwick, Iowa.

PURE BRED single comb White Leghorn and Barred P. Rock Cockerels at \$1.00 each. Fine birds that will please. Robert Holm, Paton, Iowa, R. R. 1.

CLOSING out all my Mammoth B. turkeys, B. P. Rocks and R. C. Rhode Island Reds. Must sell soon. Mrs. C. L. Moore, Drexel, Mo.

WHITE Holland turkeys, White Wyandottes for sale. Write for prices. W. A. Marsh, Jr., Alledo, Ill.

DOGS.

SCOTCH Collie females for sale, age five months, sired by Imported Glencairn Guard out of working dam. Color sable with white markings, price \$5.00 to \$7.00. Address, Wm. F. Hoppe, Lena, Ill.

RATS. My Scottish Terriers will make them git. Fine pups for sale. S. W. Harr, Riverside, Iowa.

HORSES.

HORSES—For sale, six imported stallions, two Belgians and Percherons, three to six years old, weight from 1,700 to 2,000 lbs., each stallion guaranteed. Address Lee Roy Judd, Dawson, Neb.

SALE OR TRADE—For one same age and quality registered Percheron stallion, coming two, black, extra good. Cannot use him. Haulford & Kuntz, Granger, Mo.

WANTED—To buy four registered Percheron fillies, two years old, solid colors, not fancy priced ones. S. S. Langford, Craig, Neb.

CATTLE.

RED POLLED Cattle. Champion beef and milk producers, choice animals, either sex, priced right. Write for booklet and particulars. O. P. Russ, Ravenwood, Mo.

FOR SALE—44 Angus cattle; 21 young cows, two-year bull, 22 calves. Gentle, sound stuff. \$1,000 for lot. D. Dement, Thayer, Iowa.

PIGS.

POLAND CHINA PIGS sired by State Fair winner, Victor M., Perfect I know and others; mature dams; all ages. Write G. Kirchhoff, Elkhorn, Wis.

FOR SALE—Improved Chester White brood sows and gilts. Bred. Write your wants to A. J. Johnson, R. F. D. No. 2, Brighton, Iowa.

PATENT ATTORNEYS.

ROE & ROE, Des Moines, Iowa. Branch in Washington. Send description of invention for free opinion.

TELEPHONES.

TELEPHONES. Induction coils, switches, cut-outs, transmitters, small switch boards, extension bells, etc., pertaining to telephones. Write to Augusta Electric Co., Augusta, Ill.

FARM IMPLEMENTS.

WE MAKE the largest line of 2-3-4-5-6-8 Horse Farm Equalizers for sulky, gang plows, wagons, disk harrows, harvesters, etc. Write for our catalog and prices. Cedar Rapids Implement Works, Cedar Rapids, Iowa.

REAL ESTATE.

STOP AND THINK! When the central west was new you bought land cheap and while you have been making a living from the land, its increase in value has made you rich. Why not come or send your son to this new growing country to repeat your great success? Write for our list of Texas and Oklahoma lands. Sunny South Land Co., Box 255 Claremore, Okla.

FLORIDA farm, 40 acres on Indian River, suitable for all sub-tropical fruits and vegetables; four-room house, six acres pineapples, two acres oranges and grapefruit, two acres garden. Price, \$6,000. Address, Stewart Ankney, 1912 Arlington Ave., Des Moines, Iowa.

THE EXCHANGE BANK, Menlo, Iowa, offers good, well improved 200-acre farm, valued at \$18,000, close to two good towns. Must be sold by February to liquidate co-partnership. For quick sale, \$15,000, ½ cash, balance time. Write for description.

120-ACRE FARM about 10 miles from Des Moines' limits. Gently rolling, to level; 5000 worth of tillage on it, house, barn, etc. Price \$62.50 per acre. Can leave \$4,000 on it. Packard, 621 Citizens Bank Bldg. Des Moines, Iowa.

QUICK BARGAIN SALE. Well improved 160, strong, clean land; ½ school and church; two stations 2½; well fenced, watered, plenty fruit; 'phone, mail. Address owner, D. Dement, Thayer, Iowa.

WESTERN Kansas Lands. 40,000 acres, Finney, Kearney, Hamilton counties. Wheat and alfalfa lands; \$5.00 and \$12.50 per acre. Write for list. Nicholls & Moyer, Coffeyville, Kan.

560 ACRE RANCH, well improved, in Coffey county, no better in eastern Kansas, at a bargain if taken soon. For description and maps write Lane & Kent, Burlington, Kansas.

GOVERNMENT bonds no better than these farm bargains, being well improved and well located; 640, \$16,000; 160, \$5,200; 80, \$2,100. Buckeye Agency, Williamsburg, Kan.

FREE MAP and price list of land in Greenwood county, in the rain belt. Farms, ranches and pastures at the owners' prices. G. K. Jackson Land Co., Bureka, Kan.

A BARGAIN. 320 acres fine improved farm 3 miles from town, half bottom, choice alfalfa land. Write for full description. K. G. Toukin, Abilene, Kansas.

BAYFIELD County farm lands. I own and have for sale all sorts of lands close to Washburn. Low prices; easy terms. O. P. Swanby, Washburn, Wis.

NOTICE TO HOMESEEKERS—If you want homes in eastern Kansas please write for lists of land. Burger Brothers, Burlington, Kan.

FARM LANDS—Most prosperous section in west, \$15 to \$40 per acre. Will pay to write us. Whitaker & Howe Land Co., Grangeville, Idaho.

OHIO FARM FOR SALE—One hundred acres. Write and I will tell you all about it. A good snap. Edd, McAdam, North Bristol, Ohio.

FOR SALE. A fine lot of farm bargains in east Kansas. Any size; write for free list and map. Iler & Mansfield, Garnett, Kansas.

DO YOU WANT 80 acres, improved, close to railroad town, by February 1st? Write owner, J. K. Christian, Mountain View, Mo.

EDUCATION.

HIGH CLASS home study with best textbook and all supplies. Contract guarantees satisfaction or money back. Any Common Branch or Teachers' one study \$10, two \$16, three \$20; Halfway Mail \$15, Shortland \$25. Lithography \$25. Complete Business, six studies, \$35. Mechanical Drawing \$35. Write today. New Era Correspondence School, Des Moines.

AGENTS WANTED.

FARMER Agents Wanted. Time saver and money saver for farmers. Over one thousand sold in one county. Quick easy seller. Liberal commissions. Write right now. Farm Record Company, Newton, Iowa.

HELP WANTED.

WANTED—MAN and wife to take charge of farm in Shannon County, Missouri. Fine opportunity for man with team and some capital. References required. G. W. Miller, Victoria Hotel, Des Moines, Iowa.

MISCELLANEOUS.

KEEP your hands warm with a pair of Russian Bear fur gloves or mittens. Sold direct to the wearer at wholesale prices. Write today for catalog. Russian Fur Co., Gloversville, N. Y.

MOLES and warts removed with my remedy; no pain, no danger, no scar, use yourself, by mail, prepaid \$5.00. Write me about it. Dr. G. W. McDowell, Rockford, Illinois.

lieve we would growl whether there was anything to growl at or not.

In Germany, so it is reported, the average yearly wages that a working girl gets is less than \$60. A 200-pound hog now costs the German that much money, while a cow sells for from \$90 to \$140, just a common cow. Think of working all year for the price of a 200-pound hog! Yet, there are folks right here in America who are now growing as they never have grown before. They claim the farmers must organize or be rooted completely out by the trusts,

We haven't lived as long as some, but we never have lived when times were as prosperous as right now.

TO CURE A COLD IN ONE DAY
Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

It has seemed that the government, or rather its representatives have not been awake to the importance of the poultry industry. However, there are signs of greater interest. Hitherto, nothing specific has been done in the way of experiment along poultry lines, save

by co-operation with two or three state experimental stations. Now there appears upon the staff of the bureau of animal husbandry the name of R. R. Slocum as poultry assistant. There does not seem to be room at Washington for poultry experiment work, and quarters have been fitted up at the bureau's quarantine station near Baltimore, where feeding experiments are already in progress. If the government takes hold of the matter with the earnestness it has shown in other industrial directions, we may hope to have some perplexing problems solved.

OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

Buttermaking on the Farm.

To the Editor of The Homestead:

Without raising the question whether it is better to make butter at home or sell milk or cream to the creamery, the fact stands that a great deal of butter has been made on the farm. There are 10,317,484 pounds of renovated butter manufactured in the state of Iowa alone. All of this butter was undoubtedly made on the farm, and there is every reason to believe that in the future large quantities of butter will be made at home. It is usually sold to the local grocer.

On account of lack of uniformity in flavor, color or salt the grocer is unable to sell a large part of this butter for direct consumption, but sells it to the renovating factory. Here it is remelted, partly purified, and made into a uniform product before it again is put on the market. The farmer received perhaps not more than twelve or fifteen cents per pound. Even at this low figure he is often obliged to barter it for merchandise. If investment and labor is considered, higher prices per pound must be obtained in order to make butter-making on the farm a paying business. The store keeper in most cases gives a higher price for this butter in bartering, than he receives when he sells it. He buys it only to hold the trade of certain customers. The renovator is the only party who makes a profit on this butter, as he is able to hold it in cold storage either before or after it is remelted, and thus put it on the market when butter is scarce. It then often sells for only a few cents less than creamery butter.

The farm, in many respects, is an ideal place for making butter, because full control can be had of all the essential steps involved, from the milking of the cow until the butter is placed upon the market. It is understood that condition and equipments are often poor, but if it is desired to continue to make butter, it will pay to improve the conditions so they will become more suitable.

The care the milk and cream receives before churning will determine the flavor, which is the most essential quality of butter, as it is used more as a relish than as a food. Faults that butter may have, aside from flavor, are all due to carelessness or lack of skill in the process of making. If the underlying

principles of buttermaking are understood, it is not a difficult problem to make a uniform grade of butter from day to day. As long as the agricultural and dairy papers, dairy schools and experiment stations answer free any inquiry, and can explain the cause of most difficulties, there seems to be no excuse for making so much poor butter on the farm. It takes the same labor to make spoiled cream into butter and do it without paying attention to temperature, overchurning, proper working and salting, as it does to churn well-ripened cream and do it in an intelligent way. The difference is that in the latter case about twice as much per pound of butter will be received, and buttermaking is made a paying business.

There never was a time when so great a premium was paid on intelligence as there is today. Many people have enough money to buy good commodities, and for such there is a strong demand, even at high prices. Especially is this true of farm produce. Near every town invariably there are some people who receive more for their goods than do others. The main reason is that those people deliver a uniform product, an article that is always up to the standard, put up in a neat, attractive way. It is marked by an individuality for which the consumer is willing to pay. There is an unwritten guarantee with such an article. The producer established a reputation by skill, intelligence, and honesty. He knows that to try to put out an inferior article under his special brand would be folly, as the small temporary gain would be insignificant compared with the loss it might bring in the future.

Next in importance to making a uniform grade of butter is to put it up in a neat, attractive way, and bring it to the consumer's attention. This can be done by putting up the butter in one-pound prints, neatly wrapped in parchment papers, upon which is stamped the name of the farm or a special name under which the butter is sold. A great deal can be done to distinguish the product by some attractive feature. It should be something catching, suggestive, easy to remember, so that thinking of butter, a certain name or picture that has been seen once in such connection readily presents itself to the mind.

"Anything worth doing is worth doing well." Butter should be made so that there is no necessity for making it over. The fewer middlemen between the producer and consumer, the greater the profit to the producer. Interurban roads are being produced, and built in all parts of the country. This means increased shipping facilities, which enable the farmer to profit by the demand in the city for uniformly good farm produce. If better methods of making and marketing farm butter are applied, the present amount of renovated butter must decrease. The time will come when renovated butter will be a thing of the past and the money it takes to operate the renovating factories and their profit will go directly into the farmer's pocket.

Fred Rasmussen.

Iowa Experiment Station.

Farm Dairying.

To the Editor of The Homestead:

Success in dairying depends largely upon the proper feeding of the dairy herd. There are two questions that the dairy farmer should ask himself. First, am I feeding as cheaply as I can; and, second, am I feeding the best rations for milk and butter production? Of course, the cows can be kept alive and in fairly good milk flow upon many different kinds of rations, but in feeding, as well as in everything else, there is an ideal to be sought. What, then, is an ideal ration for a dairy cow? It is a ration that, without waste, gives, both in weight and dry matter, a sufficient amount of digestible and nutritious food. It is a ration that is comparatively cheap. It is a ration in which the milk-forming element (protein) is rightly proportioned to the heat and energy and fat-making (carbohydrates) and fat elements.

A badly balanced ration does harm in two ways, namely, by lessening the milk flow and by giving the cow a ration which she cannot profitably use. As the cow is one of the best money-makers on the farm, she should, for this reason if for no other, be comfortably housed, well fed and watered and most kindly treated. In your thoughts for her well-being bear the following directions in mind: If you are feeding a

Good business sense tells you that every cow should return a fair percent of profit over cost of keeping. To pay you a good profit the organs of digestion must convert the largest possible percentage of the food into bone, muscle, milk fat, etc.

If every cow, horse, sheep or pig, receives small doses of Dr. Hess Stock Food twice a day with the grain rations, they will pay a larger profit than is otherwise possible. Such medical authorities as Professors Winslow, Quitman and Finlay Dun endorse the bitter tonics contained in Dr. Hess Stock Food for improving the digestion, also iron as a blood builder and nitrates for eliminating poisonous material from the system.

DR HESS STOCK FOOD

the prescription of Dr. Hess (M.D., D.V.S.) contains the above ingredients and it is

Smaller quantities at a slight } West and South.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the guarantee.

If your dealer cannot supply you, we will.

DR. HESS & CLARK, Ashland, Ohio.

Also Manufacturers of Dr. Hess Poultry Pan-a-cos and Instant Loose Killer.

A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using an

Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co., Waterloo, Iowa.

The Cream of Cream Separators

The Sharples Dairy Tubular is the cream of cream separators—the pick of the whole bunch. Supply can wait, low, you can fill it with one hand. All gears enclosed, dirt free, absolutely self-oiling—no oil holes, no bother—needs only a spoonful of oil once or twice a week—uses same oil over and over. Has twice the skimming force of any other separator—skims twice as clean. Holds world's record for clean skimming.

Bowl so simple you can wash it in 3 minutes—much lighter than others—easier handled. Bowl hung from a single frictionless ball bearing—runs so light you can sit while turning. Only one Tubular—the Sharples. It's modern. Others are old style. Every exclusive Tubular feature an advantage to you, and fully patented. Every Tubular thoroughly tested in factory and sold under unlimited guarantee. Write immediately for catalog J-121 and ask for free copy of our valuable book, "Business Dairying."

It won't take you long to see its good points—and it's worth a whole lot to you in good hard money to find the separator that turns easier, is more simple in construction and does better work than any other. All we ask is that you investigate. Send today for catalog and valuable dairy books.

Empire Cream Separator Co., Bloomfield, N. J. — Chicago, Ill.

as oats, peas and alfalfa. I have tried cow peas and soy beans. I tried these for several years, but location and conditions over which I had no control made these unprofitable crops. Not that the feed was not up to standard, but because the yield was too small to make them profitable.

But we needed the very elements we tried to grow in these crops. Did we give up and go back to the roughing and all-corn feeding system? Not yet. I grow such crops as are best adapted to our locality, and buy in the market such feeds as we cannot grow profitably, but must have for the best success in feeding. I sell enough of what we can grow profitably to buy what I need. I often hear farmers say they feed corn because it is the cheapest feed they have. But is it the cheapest under all circumstances? I will admit that in finishing an animal for market, when putting on fat is the only aim, corn is among our

balanced ration, feed each day several different kinds of food. Feed and milk at regular hours. Brush the udder carefully with a moist cloth before you begin to milk. Always milk in tin pails that have been scalded since last using, as the hot water kills the bacteria that collect in the cracks or dents of the utensils. Never leave the milk pail in the stable. Never scold or strike the cow; she is a nervous animal and rough usage checks the milk flow.

Visit almost any farm and one finds stock of some kind that, to use the general term, is being roughed for lack of time, shelter or feed, or lack of proper feed, and the latter excuse, as a rule, is the one that is given. If it is the cows, they will tell you that they are feeding only corn as a grain ration; bran is so expensive they can't afford to buy it, and the cows don't pay for the corn, let alone paying \$18 or \$20 a ton for bran or \$30 for oil meal. If it is one well informed he will perhaps say that he feeds only corn. He knows they should have some bran, oats or oil meal, but he cannot afford to buy it and he has plenty of corn. He grows it himself and it doesn't cost anything.

The theory that a farmer should raise all that he feeds has been responsible for this condition. That one should grow such crops as are the most profitable under the conditions so as to enable one to have the kind of grain or roughage that it is most valuable, is good advice under any conditions, but my experience is that seasons and locations where and when this can be done are very scarce. As a dairyman, I have made special effort for several years to grow such crops as are best adapted for dairy feed—crops rating high in protein, such

best feeds, but corn alone for the growing calf, the milk cow, the colt, pig or hen is too expensive for any farmer unless he has a good bank account which is supplied from other sources than the farm.

The most important lesson I ever learned was from my father in feeding dairy cows. He had for years fed only what he raised, and at the end of each year found but meager, if any, profit. He was, therefore, forced to change his methods or work for the fun he could get out of raising feed. Instead of continuing to play at a losing game we discarded this method and now raise such crops as are best adapted to our soil, no matter what they are, and then buy the elements lacking in our home-grown feeds. I buy a load of bran, oil meal or cottonseed meal, knowing that when fed to balance a ration with our home-grown grains, etc., it enhances the feeding value of our grain from 50 to 100 per cent.

The only place I find where corn fed exclusively is profitable is in feeding hogs the last five or six weeks before selling. That corn is king is true only when balanced with other feeds.

J. P. Fletcher.

Dairy Barn Gutter too Small.

To the Editor of The Homestead:

If there is any part of a new dairy barn that an owner would generally have changed after a month of usage, it is the gutters. The average carpenter knows little about the proper dimensions of this necessity. Invariably the gutter is too small, which makes it a continual annoyance to keep the floor under and behind the cows clean. Thus the gutter falls short of its purpose and disappoints or disgusts the owner.

Nothing is so conducive to clean cows as a wide, deep gutter. The platform for the cows should ordinarily be four feet and eight to ten inches from edge of gutter to stanchion. But if we should advocate sixteen to twenty inches in width and eight to ten in depth for the gutter, we know some would have doubts. Nevertheless, we have seen many barns where a small gutter had been laid and new ones of this size proved very satisfactory. Where the work is done in cement, of course this remedy is costly. When making a wooden gutter of the width suggested it will require two planks for the bottom. These

Don't Buy Until You Investigate!

We Ask Only the Chance to PROVE Our Claims.

YOU want the cream separator that will give you the best results, in profits and comfort.

It's mighty poor policy to buy until you are sure you are right. That's why we urge you to make a thorough investigation of the Omega—to find out for yourself whether or not it is the separator you want.

We offer to prove to you that it is the better separator—that it does better work and gives less trouble than any other. Surely it is worth your while to find out about it.

We Want To Show You Why

—The Omega turns so easily;

—How it is the only separator with the bowl supported at both top and bottom;
—How it delivers both milk and cream from the bottom of the bowl;
—How the bowl drains itself;

Just Try Omega

—How you can stop the bowl instantly;
—Why you can clean it and have it ready for work again in three minutes;
—Why it lasts so long;
—Why it needs so few repairs.

We ask you to take these statements as facts—which we want to prove to you. We believe a fair investigation will easily convince you that the Omega is, of all separators, the separator you want, because it will give you the best service.

Lansing, Mich.

should be well cleated together on the under side, either with wooden or iron cleats. If the old wooden gutter is small and defective in places, use some of the spare hours now between chore times in putting down a new gutter. Two-inch sound pine plank are none too good. If it is not desirable to floor all the stable, then floor the portion next to the gutter on which the hind feet of the cow stand. A ten or twelve-inch plank nailed to the side of the gutter and parallel with it will prevent muddy and wet places from forming on this part of the platform.

Herefords.

At the International Hereford sale fifty-one cattle sold at \$8,520, making an average of \$167, against \$155 for the Angus and \$304 for the Short-horns. Van Natta's Queen's Lad, calved Feb. 16, 1904, topped the sale, going to Frank A. Nave, Attica, Ind., at \$725. The seven-year-old cow, Leta, bred by L. B. Chappell, Mt. Leonard, Mo., topped the female offerings at \$350, going to Cargill & McMillan, LaCrosse, Wis.

A WONDERFUL OIL HEATER.

It Solves the Problem of Fall and Spring Heating and Supplements the Regular Heating Apparatus in Mid-Winter.

With the passing of the summer months comes autumn, and with it the chilly nights and mornings which force us to turn our thoughts to the problem of heating our houses, and we begin to look over our stoves and furnaces and get them in repair for the cold winter months.

To start stoves and furnaces in the early autumn brings more or less discomfort for the reason that they furnish too great heat during those portions of the day when the heat of the sun is still considerable. For such times the Perfection Oil Heater, equipped with a device which prevents all possibility of smoking, solves this hitherto perplexing problem.

There are also many times during the cold winter months, while the furnace and stoves are in operation when they may not be equal to the task of warming remote rooms, hallways, etc. This is more apt to be true in the early morning before the full efficiency of the regular heating apparatus is developed. In many houses there are rooms not reached by direct heat. At such times and in such places the Perfection Oil Heater will be found a very valuable auxiliary. It will enable the household to eat its breakfast in comfort instead of shivering with the morning chill.

The Perfection Oil Heater produces a surprising amount of heat immediately after lighting and will heat an ordinary room in a remarkably short time. They are strong and well made in a design pleasing to the eye, and they are light enough to be easily carried from room to room as required.

In these days of numerous devices for illumination, there are still many who have not provided themselves with satisfactory lamps. The Rayo Lamp makes it possible for everyone to have adequate light at a small cost. The Rayo Lamp is the best lamp for all-round household use. It is made of brass and beautifully nickel-plated, and is an ornament to any room whether in palace or cottage.

The Perfection Oil Heater and the Rayo Lamp form a combination that makes home bright and comfortable. Their absolute safety and very moderate price make them a valuable and easy acquisition to any home. Both heater and lamp are warranted.

WEEK END RATES VIA M. & ST. L. R. R.
On Saturdays and Sundays the Minneapolis & St. Louis R. R. will sell round-trip excursion tickets, Des Moines to Waterville and Montgomery, Minn., at one fare plus \$2. Return limit seven days, including date of sale. Buy tickets at City Ticket Office, 512 Walnut St., or Union Station.

EXCURSION RATES FOR THE HOLIDAYS.
Via the North-Western Line. Excursion tickets will be sold at reduced rates on nine dates: December 20, 21, 22, 23, 24, 25, 30, 31, 1906, and January 1, 1907, good returning until and including January 7, 1907, to stations on the North-Western Line (including C. St. P. M. & O. R'y), and to points on certain other lines, for full details of which apply to agents Chicago & North-Western R'y.

Page Poultry Fence

Needs no top or bottom boards. Is made of large wire—the smallest being No. 14. All horizontals are high carbon, double strength, spring steel wire, heavily galvanized to prevent rusting. Expansion and contraction are provided for—all the horizontals being coiled and springing wire. It is easily adjustable to hilly surfaces—the coil does it. Stands up stiff, does not sag, bag or buckle. Costs less than other common nettings. Looks better. Lasts much longer. Height, 4, 5 or 6 feet. If you need Poultry Fence, write us.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

A COZY CORNER IN THE HEN HOUSE.

The coziest and most practical device imaginable for furnishing warmth and comfort to the hens during winter nights has recently been suggested. After a thorough cleaning of the floor in the poultry house, a stout hickory post, about two and one-half inches in diameter is driven firmly down, about three feet from the wall. If the house is small so only one is needed, put it in a corner. Sharpen the top of this stake and set thereon a discarded wheel. This makes an ideal roost—one which will accommodate from twenty-five to thirty hens, according to size of wheel. It is remarkable how such a roost delights the hens. The spokes are all on a level. The rim and spokes make a natural foothold, there is no falling off, and the biddies sit in a fluffy bunch, as "comfy" as you please.

But the roost is only part of the plan. If the wheel is placed in a corner, the

two walls will furnish two sides of the proposed "bedroom." Set a post of a 1x2-inch strip four feet from each of the side walls. Nail other strips from the top of this post, (which should be two feet higher than the wheel) to the side walls. From these strips hang a curtain made of either canvas, muslin, coarse burlap or old carpet, according to convenience, which can be rolled or put up in the daytime out of the way. Over the top make either a board covering, or one of the curtain material. In this way the hens are comfortable even in a cold house. In many respects burlap is the best curtain material, as it admits air, yet is draft proof.

The wheel should not be more than thirty inches from the floor. The "hop-up" box will prove a convenience. The wheel is also very easily cleaned. Take it outside and after placing it on a bunch of straw fire it for a brief space. Or, it can be readily sprayed, first on one side and then the other.

The advantages of this scheme are evident. The old way of fastening the roosts makes it difficult to successfully fight lice and mites. It is also a great economizer of room. The floor space thus saved can be kept clean for scratching purposes. By putting straw under the wheel roosts, the droppings can be easily removed at frequent intervals, and the houses thus kept in a sanitary condition at a minimum of labor. These warm quarters so nearly simulate summer conditions, that, if the feeding is done correctly, and fresh water supplied, the hens will almost have to lay.

Almost any blacksmith has a lot of useless wheels lying about, which he will be very glad to get rid of. However, if a call for the wheels becomes general, these present nuisances may become a means of profit to him, by charging a nominal sum. It is a great idea and whoever solved it should make himself (or herself) known, as it cannot fail to become immensely popular.

GETTING THE BETTER OF THE CHICKEN THIEF.

Where can you find a more detestable object than a chicken thief? I mean the two-legged kind that prowls around and prey upon the results of the hard work of others; in many cases, women of small means. If there is a meaner individual on the face of the earth, he should be set up for the public to view. Many methods have been tried to fend off these rascals of the midnight in-

Sure Hatch is the Incubator that Hatches Most Chicks

Used by more poultry raisers and hatches a higher average number of chicks to the hatch than any incubator in existence. Hatches better and cheaper than hens, no matter where you live. Runs itself and pays for itself with one hatch—or we take it back at our expense.

For ten years we have been selling the Sure Hatch this way, and it "makes good" every time.

You can set it any place indoors at any time and have good hatches, even if you never saw an incubator before.

Guaranteed for five years and made to last a lifetime. Just the thing for winter hatching. Send today for our new FREE 100-page book, and learn more about the Sure Hatch and its low prices, freight prepaid. No trouble to answer questions.

Address plainly,

Sure Hatch Incubator Co., Box 16 Fremont, Neb.; or Dept. 16 Indianapolis, Ind.

NO MORE FAILURES

Queen Incubator prove its actual hatching value—in any weather—any time. A hen picks her own time for setting; it's up to her instinct—not to your need of her.

QUEEN INCUBATORS

are always ready—always faithful and are the result of long, practical experience in incubator construction. They are redwood cabinet construction, hot water heating chicks hatches that turn every fertile egg into a chicken. It needs no regulating, no watching and brings sure results. Send for big free catalog. Let us ship you any size Queen freight prepaid on your own terms.

FINE, LARGE MAMMOTH BRONZE TUR-
keys and Rouen Ducks. J. H. Howarth, Moulton, Iowa.

vasion, but their success has not been notable.

But in electricity we may find the protector we have so long been seeking. One man who has been experimenting claims that by an investment of a single dollar a poultry house may be amply protected from raids. In his own experience he expended the dollar as follows: Two dry cells, thirty cents; a bell, twenty-five cents; several little fixtures for doors and windows costing about twenty-five cents more, the rest being put into insulated copper wire. According to this same authority, all that is necessary to install this plant is common sense, a jack-knife, a screw-driver and a gimlet. The story of its working may be best told in his own words:

"The minute a door is opened the bell rings. The minute a window is opened the bell rings. The minute the bell rings the thief skips; that is all there

POULTRY.

BARRED ROCK COCKERELS

WE are offering Barred Rock Cockerels for sale, of the Bradley and W. H. Neibert strains, Pens headed this year by males direct from these strains, mated to hens and pullets of same blood. is to it. The sharp cling-eling of the bell is all that is necessary to drive a thief away. His conscience and fears will do the rest. It is not necessary for you to hear the bell. Let him hear the bell, while you sleep quietly on, undisturbed."

Interesting, isn't it? But this man assures us it has worked perfectly in his case. His neighbors have been robbed time and again, but his stock was always intact in the morning. One feature of the plan that strikes one as especially to be approved is the fact that it is not necessary to have any

bell in the house. This would imply that it was necessary for the owner to wake up and drive the thief away. But by this new plan the thief does his own driving; often with much less loss and damage.

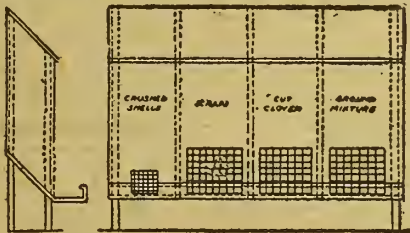

This experimenter took the precaution to have a lot of blind wires strung up about the yard, running to the house. These were not connected with the bell, but were put there to delude anyone prowling about, sizing up the surroundings with a midnight raid in view. These wires might be cut to any extent without interfering with the real plan. The important wires were all out of sight in the poultry house, and the only way the intruder could learn of them was by trying to open a window or door, and then, that bell! "Conscience makes cowards of us all," you know.

SELF FEEDERS.

The self feeder is a time saver where a great number of fowls are kept. In speaking of self feeders Mrs. R. Von Haesler writes of the plan illustrated recently in the Reliable Poultry Journal, as follows: "In winter the compartments

are kept filled with crushed oyster shells, meat scraps, cut clover and ground mixture, and the whole grains are fed in straw to induce exercise. In the summer when fowls are on free range, whole grains may be kept in the feeder in place of clover and ground mixture. Dimensions are: Height, back, thirty-six inches; front, twenty-eight inches; depth, twelve inches; width, forty-eight inches. As illustrated there are four compartments, each twelve inches wide, three having openings 8x10 inches, and one five inches square for oyster shells. The openings for scraps and ground feed are covered with three-eighth-inch mesh netting, and those for shells and clover with one-half-inch mesh. When filled with grain

strips of wood may be tacked over part of the openings if the grain feeds too freely. The cover slants at an angle of 45 degrees, and is hinged at the lower edge. The bottom is also slanting. The trough in front is five inches wide and one and one-half inches deep, with bottom covered with tin, as wood is soon worn away. A narrow wooden strip projects over into the trough about an inch, to prevent the feed from being wasted. By using this device the hen can balance her own ration, which she is better able to do than can be done for her, but above all, it brings care and labor to a minimum."

The outlook is exceedingly bright for next year's poultry business. Several reasons contributed toward a short hatch. Hens positively refused to sit early, and in some localities, scarcely went broody the entire season. Egg fertility ran unusually low, so that incubator hatches fell below the average, therefore the amount of breeding stock

for sale is much less than the probable demand, which fact will tend to boom prices. The moral of this situation—advertise if you have breeding stock to sell.

Success depends largely upon the condition in which hens begin the winter season. Judicious feeding that will make them heavy—not too fat—and the strength that comes from exercise are important factors. After the days of confinement come, those hens will endure the trying conditions best that were properly cared for previously. Neglect never pays, either in summer, winter, fall or spring.

POINTERS.

—White Wyandotte cockerels, at \$1 each, are offered for sale by Mrs. C. Rogers, of Exira, Iowa.

—One hundred White Leghorn cockerels are advertised for sale by Mr. J. H. Pieper, of Leigh, Neb.

—If you want White Holland turkeys write the Forest Home Poultry Farm, Box 253, Audubon, Iowa.

—Barred Plymouth Rock cockerels, good ones, are offered for sale by Mr. J. L. Barber, of Harlan, Iowa.

—Mr. Jno. C. Miller, of Harlan, Iowa, is advertising thirty choice Single Comb White Leghorn cockerels for sale.

—Single Comb Buff Orpingtons, both males and females, are offered for sale by Miss Nettie Crane, of Blencoe, Iowa.

—Mr. H. M. McKeen, of Sac City, Iowa, advertises Black Langshan cockerels for sale at \$1, providing you order at once.

—Choice Single Comb Brown Leghorn cockerels are offered for sale at \$1 each by Mr. E. O. Wolcott, of Gilmore City, Iowa.

—White Wyandotte hens, scoring from 84 to 96 points, at \$1.50 to \$3 each, are offered for sale by Mrs. L. M. Estes, of Audubon, Iowa.

—Four hundred Barred Plymouth Rocks and White Wyandottes are offered for sale at \$1.50 to \$5 by Mr. W. C. Frazier, of Atlantic, Iowa.

—We desire to call the attention of our readers to the advertisement of Mrs. C. F. McLochlin, of Gray, Iowa, on this page of The Homestead in which she is offering for sale Mammoth White Holland turkeys, Imperial Pekin ducks and pure-bred White Wyandotte chickens. Her White Holland turkeys were raised from stock scoring 97 points. Her White Wyandotte chickens score

from 93 to 96½ and her Pekin ducks from 95 to 97½.

—Buff Orpington and Buff Rock cockerels, large, even-colored birds, are offered for sale by Mrs. G. R. Fuller, of Rolfe, Iowa, at \$1 and \$1.50.

—If wanting Rose Comb White Leghorns write Mr. M. T. McEvoy, of Emmetsburg, Iowa, for prices. His advertisement appears on this page.

—The Wayside Farm, of Mt. Vernon, Iowa, have a nice lot of Silver Laced Wyandotte cockerels for sale. Their new advertisement appears on this page.

—Mrs. C. E. Couger, of Bristow, Iowa, has fancy White Holland turkeys from thoroughbred stock which she is offering for sale at very moderate prices in her advertisement on this page.

—Will readers of The Homestead write us the name and address of any breeder of the large black variety of ducks of whom they may know? Please send to J. W., care of The Homestead.

—Mrs. J. J. Rink & Son, of Shelby, Iowa, have some good Buff Plymouth Rock cockerels for sale at very liberal prices as per their advertisement which will be found on page 10 of The Homestead.

—Mr. W. E. Shutt, of St. Charles, Iowa, is offering choice thoroughbred Plymouth Rock cockerels, nicely barred and of good bone, for sale at \$1 each in his advertisement that appears on this page of The Homestead.

—The Iowa Poultry Yards, of Gilmore City, Iowa, are offering Rose Comb Rhode Island Red cockerels for sale from particularly choice stock, as per their advertisement which will be found on this page of The Homestead.

—Mr. Lloyd Peterson, of Corning, Iowa, is offering fifty Buff turkeys of both sexes for sale in his advertisement on this page of The Homestead. He also has White Plymouth Rock cockerels which he will quote at reasonable prices.

—Mr. Geo. Amos Ilten, of Cedar Rapids, Iowa, proprietor of the Gilt Edge Duck farm, is offering big-boned, husky Barred Plymouth Rock cockerels for sale in his advertisement on this page of The Homestead. He also has hens and pullets on which he is quoting a very low price.

—Mr. C. W. Phillips, of New Sharon, Iowa, who has been a breeder of Black Langshan chickens for fourteen years, places an advertisement on this page of this week's Homestead. He announces that he has a fine lot of young stock that he wishes to dispose of at once and will make right prices to those who will write him their wants. These score from 90½ to 95½ and he will dispose of them at \$2 up. He guarantees the quality of his birds, therefore our readers

POULTRY.

LIGHT Brahmas, White Wyandottes, White Holland turkeys, Pekin ducks. Pure bred, large, No. 1 stock. E. S. Dyas, Bellevue, Iowa.

FANCY White Holland Turkeys, best thoroughbred stock at \$3.50 for gobblers and \$2.50 for hens. Mrs. C. E. Couger, Bristow, Iowa.

take no chances in obtaining the very best. He also has unsoured cockerels for sale.

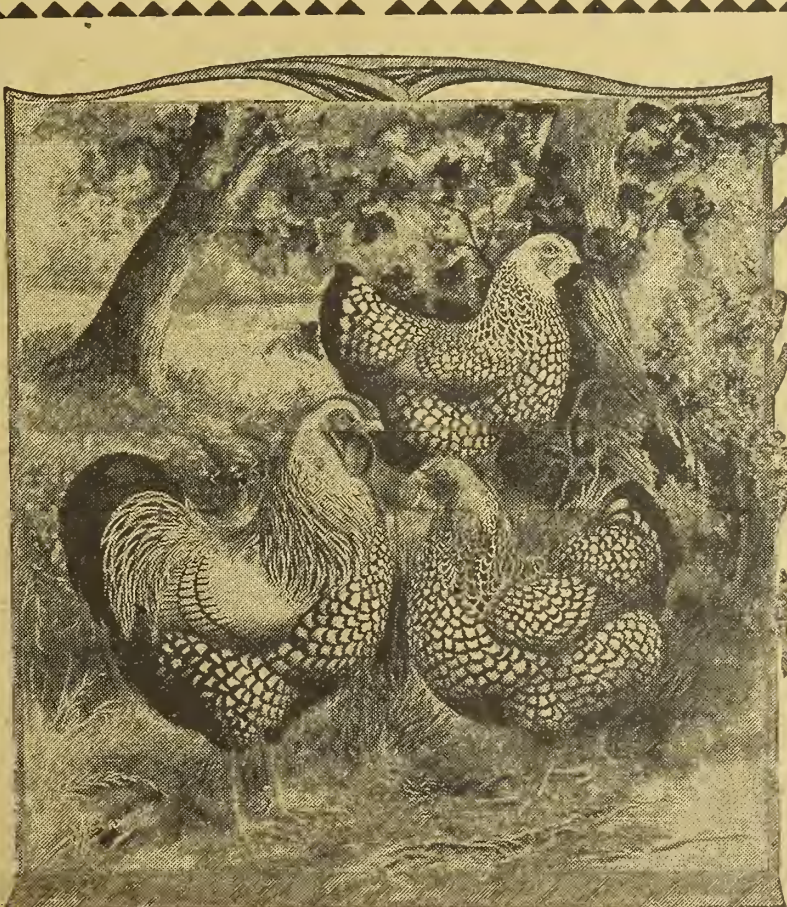

—Mr. H. W. Seitz, of Allison, Iowa, is compelled to close out his thoroughbred Fitchel White Rock chickens at once, as he is going to leave for Washington soon after January 1st. He also has incubators, brooders and colony houses for sale. Write him for prices. See advertisement on this page.

—Mr. E. S. Dyas, of Bellevue, Iowa, in furnishing copy for his advertisement on this page, writes: "We have the best lot of poultry of the varieties we are offering for sale in our advertisement on this page, to be found, and are very careful to give anyone who favors us with an order, a good deal. We guarantee satisfaction every time."

—Mr. Julius Runge, of Middleton, Wis., in furnishing copy for his advertisement appearing elsewhere in this issue, writes that he has an extra fine lot of Single Laced Wyandottes, Barred Plymouth Rocks and Rose Comb Brown Leghorns for sale. They are large, heavy boned and he will sell them cheap and guarantee safe arrival.

—Mr. J. W. Wagner, breeder of Barred Plymouth Rock chickens, of Monroe, Iowa, whose advertisement will be found on this page, says: "I have the best and closest barred Barred Plymouth Rock cockerels this year I have ever raised. I also have the best marked lot of turkeys. They are sired by males and females scoring 95½ to 96½. At the Newton, Iowa, show I won first on old tom, first on old hen, first and second on young toms, first on young pullet, first and second on old Barred Plymouth Rock cockerels and first on hen. At the Monroe show I won first on old tom, third on old hen, first and second on pullets, first on old cock, third on cockerel. I will sell Barred Plymouth Rock cockerels for the next two weeks at a big bargain, quality considered."

—In furnishing copy for his poultry advertisement found on this page of The Homestead, Mr. C. H. Drake, of Stockport, Iowa, writes: "I have bought eggs of Messrs. Bradley Bros. for the past three years and my Barred Plymouth Rocks all have that narrow, deep, handsome barring so much desired, with rich yellow legs. I also have purchased White Plymouth Rock eggs from Mr. Fitchel and I have them that are pure white and very fine shape. I think I can please the most exacting in both varieties. I have not got as many turkeys this year as usual, but the quality was never as good. I can furnish some very fine geese and will make very low prices on all of my poultry to move it for the next thirty days, or until January 15th. I have more quality this year than ever before."

The Above Illustration is a Fair Representation of Crescent Farm Silver Laced Wyandottes.

We wish to call the attention of our readers to the advertisement of Mr. Frank Foy, of Crescent Poultry Farm, Des Moines, Iowa, on page 10. In a recent visit to the farm we saw many fine fowls. The illustration above is a fair representation of same. Mr. Foy has also paid particular attention to line breeding. The points for which he breeds are heavy egg production, utility and standard markings. He is a consistent believer in line breeding and thinks it is the only method in which results can be foretold with any certainty. He has made his reputation on the merits of his birds. A large per cent of his orders come from old patrons or those who have been recommended to send to him by old customers who have bought stock or eggs at Crescent Farm. Mr. Foy is also probably the best posted incubator man in this country, having been engaged in the business for years, before he went into the poultry business. The demand for his incubators continued and he is well equipped to take care of all incubator orders that may come to him. His knowledge is practical, not theoretical. One fact is worth a hundred theories. We would advise any of our readers who are interested in poultry and incubators to send for Mr. Foy's poultry book, which is the finest and most valuable one we have ever seen. It tells the beginner how to start on a small or large scale, and how the largest purebred poultry business in the world has been built up from a small beginning. Tells how to start right; how to make money raising fowls on the farm; how to line breed; how to win at shows; how to prevent and cure diseases; how to run an incubator and manage a brooder. This is the most valuable book for the beginner in poultry raising ever published. Revised and enlarged edition just issued. This book will be mailed for four cents, by addressing Mr. Frank Foy, Box D, Des Moines, Iowa.

Succeed with a Successful

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

A LAW NEEDED TO PREVENT WEED SEED DISTRIBUTION.

Numerous complaints have been made during the past few years of the poor quality of much of the seed sold in the state of Iowa. The very real and growing danger of the introduction of noxious weeds in such seeds has made some regulation for the protection of the purchaser imperative. The state board of agriculture designed a committee, consisting of Governor Packard, Prof. C. R. Curtiss and State Dairy and Food Commissioner Wright to investigate this problem. This committee has prepared and presented to the state board of agriculture a draft of a bill designed to restrict and regulate the sale of impure, adulterated and misbranded seeds.

Prof. L. H. Pammel, of the Iowa State College, and his assistants have been investigating for some months the purity of the seeds offered for sale in this state. They not only found that nearly every sample studied contained impurities, but that among 238 samples in which percentages were definitely determined, in some cases the impurities amounted to 18 per cent. The average for red clover was 19.3 per cent. Alfalfa and timothy were somewhat better and alsike poorer. On an average the farmer pays twenty-six cents for the impurities found in every 100 pounds of red clover seed, twelve cents for impurities in alfalfa, fifty-one cents for impurities in alsike and twenty-three cents for impurities in timothy.

In many cases seed had a very low degree of vitality. In one case only 2 per cent of the clover seed germinated and the average per cent of germination in all samples tested was only 79 for the plump seed and 30 for the shrunken seeds. In Europe, where seed regulation is very strict, many seed merchants sell clover seed that germinates above 90 per cent; in fact, some give a guarantee of 96 per cent purity and 95 per cent vitality.

Last spring the seed was uniformly high in price. The farmer cannot afford to pay such high prices for seed when so much of it does not germinate. It is very evident that in many cases old seed was mixed with the new and this accounts in part for the low vitality. Instances have come to light where seed dealers have purposely bought up old and weedy seed for the purpose of mixing with the new and good seed. A good many of the samples contain Canada thistle and other noxious weeds, some also contain dodder. These weeds the farmer does not care to introduce. That those have in the past been introduced is very evident in many parts of the state. The value of land badly infested with quack grass has been known to depreciate from \$60 to \$15 and \$20 an acre. It costs as much to rid land of such weeds as to clear it of timber.

Several states have passed excellent laws; among these we may mention Ken-

Let Me Quote You A Price ON (We Pay the Freight) On The AMERICAN Manure Spreader

We will send you the famous American Manure Spreader direct from our factory, because we've stopped selling this celebrated machine through jobbers and dealers. You save their profits now. You get the wholesale factory price on the best Spreader-made-not a "cheap" Spreader, but the best one in the market.

I Don't ASK You to Send Cash

As we send you the American and you pay us on easy, liberal terms—letting the Spreader really pay for itself as it earns for you—after you've tried it free. You now get the American, recognized as by far the best Spreader, for no more than you must pay for an ordinary Spreader. It is the

Lightest Draft Spreader Made.

That saves your horses. The machinery works only when you start it in your fields—is at rest as you drive out. That saves wear and tear on the Spreader. And you ought to use a Manure Spreader. An American Manure Spreader will make your manure cover more ground, your ground grow more crops, your crops bring more money, and it will make your land worth more dollars per acre. The American has 40 per cent more exclusive features than any other Spreader. I want to tell you about it.

these practical exclusive features which make the American the only Spreader for you to buy at any price. The American is the Standard of the world. We allow

30 Days' FREE Trial

on every American Spreader made. We want every customer to see and try an American Spreader. We want every customer satisfied and to prove that our spreader is just as represented, therefore we say

Test It in Your Own Fields

American Harrow Co., 145 Hastings St., Detroit, Mich.

tucky, and Maine. A recent report, issued by the Kentucky Agricultural Station shows that the Kentucky law has greatly improved the quality of seeds sold on markets in Kentucky. The seed control act of Canada, 1905, has also increased the quality of the seeds offered for sale in Canada.

WINTER RHUBARB.

A plentiful supply of rhubarb for winter use may be had with very little labor. The roots are dug late in the fall and allowed to freeze solid. About January 1st they are planted in trenches in the cellar or cave and watered freely. The room in which the roots are planted must be kept absolutely dark and at a temperature of 50 to 60 degrees. If growth does not start within ten days the temperature should be raised, but if it is kept too high the growth will be inferior.

In watering, it is best to use water which has been heated to about 80 degrees. This insures against a chill to the plants. The stalks should be kept pretty closely picked off, as growth will soon cease where they are allowed to remain.

In the spring the roots should be taken up. They are of no value to replant, as they will have become exhausted from bearing the winter crop.

In view of the fact that the fruit tree agent will advise planting all kinds of trees, plants and vines too close together for the purpose of getting as large an order as possible, the following suggestion are offered as coming near the proper distances: Apple trees, twenty-five feet each way; plums and cherries, sixteen feet each way; raspberry and blackberry vines, four by eight feet; grape vines, six by eight feet; strawberry vines, twenty-four by forty-two inches.

We cannot too often preach the doctrine: "Plant standard varieties." Fancy trees at fancy prices are not for the common people. Thousands of dollars are thrown away by the farmers every year on trees with high-sounding names. These are almost always disappointing. We have yet to see a new apple, plum, cherry or strawberry that is better than the old standard varieties.

The copious rains of the last week of November and the first week of December will be very beneficial to fruit of all kinds wherever the ground was not frozen too much to allow the water to soak in. Damage to fruit trees from frost usually occurs only where the ground freezes solid in dry condition. This induces cracking of the soil and damage to the roots.

When the snow drifts pile high there is danger of damage to apple trees by being peeled by the rabbits. The best preventive we have used is a shot gun. A tramp through the orchard every few days will locate any offenders and a good aim should put an end to their circulation.

Strawberry beds that were in good condition at the end of the cultivation season give every prospect for a good

Your shipments to this market and orders for the purchase and sale of grain for future delivery solicited.

yield next season. But this is only on condition that the vines are covered as soon as the ground is frozen.

BREEDERS' MEETINGS DURING INTERNATIONAL WEEK.

SHORT-HORNS.

In the absence of H. S. Brown on account of sickness, the vice-president of the Short-horn association, Mr. J. P. Prather, acted as chairman. Mr. Abe Renick, of Kentucky, read President Brown's address in which an excellent showing was made for the Short-horns from the breeding and financial standpoint. The surplus of the association amounts to some \$100,000 invested in United States bonds, their present value being \$103,000. During the year there were 47,631 pedigrees received, bringing to the association the sum of \$56,784. The total annual receipts this year were \$80,169.

The directors elected for the three-year term are T. H. Flynn, of Des Moines, Iowa, to succeed his father, the late Martin Flynn; I. M. Forbes, of Illinois, re-elected; Frank Harding, of Wisconsin, re-elected; E. W. Bowen, of Indiana, to succeed C. E. Leonard, of Missouri; S. F. Lockridge, of Indiana, re-elected. The directors were requested to take steps looking to the issuing of an additional 200 shares. At present the 800 shares are all taken up and there are many applications for more. The matter will be settled at the next annual meeting.

ABERDEEN-ANGUS.

It was well known in advance that the meeting of the Aberdeen Angus Association would be an important one, and so it was, as the session lasted all night. George Stephenson, Jr., was elected president; W. J. Miller, vice-president, and Thos. McFarlane, secretary-treasurer. The directors elected were W. J. Miller, O. E. Bradfute and L. H. Kerwick. The treasurer's books show that during 1906 \$12,800 was appropriated for show purposes, Chicago getting \$4,500, Kansas City \$2,500, St. Joseph \$700, and the smaller shows \$200 to \$300, while Canada received \$400. Receipts during the last year amount to \$29,824 and the disbursement \$26,427. The present cash on hand is \$23,041. There were 2,853 certificates written during the year, exclusive of duplicates. Proofs of 598 pages of Volume 15 were read in the office and corrected; records have been made of the death of 558 animals. During the year Iowa furnished fifty-four new members; Illinois, twenty-three; Missouri, seventeen; Indiana, ten; South Dakota, six; Kansas, Minnesota, Nebraska and Wisconsin, four each; Ohio and Canada, six, and North Dakota, two; Kentucky, Michigan, Pennsylvania, Tennessee, Washington, West Virginia, one each, making a total of 141.

GALLOWAYS.

The large attendance at the annual meeting of the Galloway Breeders' Association indicates that this breed is meeting expectations in the rapid stride for recognition. The members report a most excellent demand for young bulls and it is expected that a large number will be imported next year to meet the demand. The report of the secretary indicates that the association is in a most healthy condition, there being a substantial balance on hand. The officers elected are: President, A. M. Thompson, -Nashua, Mo.; vice-president D. M. Croft, Bluff City, Mo.; E. L. Davis, Davisburg, Mich.; C. E. Hechtner, Princeton, Ill.; W. C. Gimmell, Sheldon, Iowa; while the secretary, Chas. Gray, is continued in office. The executive committee consists of A. M. Thompson, R. W. Brown, G. M. Leslie, T. E. Boles, and J. C. Ewing. The new directors elected were David McCray, Guelph, Can.; D. W. Lindsey, Red Cloud, Neb., and J. C. Ewing, Youngstown, Ohio.

FREE TO ALL MEN READERS.

On page 16 of this paper appears the advertisement of Drs. Fellows & Fellows, who are favorably known all over the middle West as specialists on diseases of men. Any of our readers needing their services can readily apply to them and be as-

Jewell Seeds and Trees

ured of honest and fair treatment. Drs. Fellows & Fellows offer all readers a month's treatment on trial. If it fails to satisfy they stand the entire expense themselves without argument—which in itself is the most convincing proof of their ability and faith in their treatment. Write to them about your case. Their twenty years' experience and the fact that they have perfected a system of home treatment makes it possible for them to treat you at your own home with greater success than the average physician who treats his patients in his office. Write today. Address Drs. Fellows & Fellows, 323 Rollins Block, Des Moines, Iowa.

The San Angelo Sale.

On November 26th, at his ranch near San Angelo, Texas, Mr. W. Davis Jones, of San Angelo, Texas, dispersed his entire herd of registered Herefords. Mr. Jones' herd was a working herd and was sold right off the grass without any special preparation. Fully two-thirds of the cattle had never been halter broken and as is customary at dispersion sales, no guarantee of their future usefulness was given. One hundred and seven lots were listed and sold, at an average of \$187.50 per head. Eighty-four females sold at an average of \$162.50. Twenty-three bulls sold at an average of \$278.91. The buyers all lived within a radius of sixty miles of San Angelo and five were men who are founding new herds. Mr. C. R. Thomas, of Kansas City, Mo., secretary of the American Hereford Association, through whose courtesy we are furnished this report, managed the sale. Mr. Thomas says the entire 107 lots were disposed of in five hours and fifteen minutes, a record that shows the interest that is being taken in the pure-bred Hereford cattle business in the Lone Star state.

We want to particularly call the attention of our readers to the contents of the different articles published by the Litchfield Manufacturing Company, in their continued story series. Please note that every week there is something fresh and new, and worth the reading. See their advertisement this week on page 5.

MY NO-TAR ROOFING

RESISTS FIRE

IF you put it on your buildings, you can get lower Fire Insurance rates. Acid, weather, wear and water-proof.

Send me your name and address on a post card, and I will write you all about my roofing and send you a sample to test.

Then you can see for yourself that it is the only roofing that is weather, water, acid and almost wear proof as well.

I will also send you FREE a copy of my book which tells you how to lay a roof without any outside help.

AND ALL THE TOOLS YOU WILL NEED WILL BE A SHARP KNIFE AND A HAMMER.

You can't afford to spend money for shingles when you can get roofing as durable and lasting as my "No-Tar" Roofing.

You ought to send for my book right away if you are in any way interested in roofing.

My "No-Tar" Roofing is the best made for new buildings, re-roofing old buildings, or doing patching.

Write me a post card at once and I will tell you all about my roofing by return mail.

H. W. Binnie, President

THE HEPPESS CO.

2401 Fillmore Street, Chicago.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

SCOURS.

Can you tell me what to do for my calves? They have the scours. One has died and a few more are almost dead. Some are yearlings and some are two-year-olds, and they all have the scours. They have been running in corn stalks and pasture, but now I am keeping them up and feeding them timothy hay and a little oats and straw.

The trouble was caused by pasturing in corn stalks. Continue present feeding. Mix half an ounce of formaldehyde with fifteen and one-half ounces of distilled water and give one to two teaspoonfuls of the mixture with each pound or pint of milk fed the calves three times daily. Increase the dose if necessary, and add dried blood meal to the milk. Better give each affected calf a two or three-ounce dose of castor oil in milk before the other treatment. The formaldehyde treatment is especially good for the white scours of factory milk-fed calves.

RESTLESS MARE.

I have a mare eleven years old, weighing 1,600 pounds. She has a colt two months old. There seems to be something wrong with her. She kicks up against her belly and shakes her skin just like the flies were on her and switches her tail. If you should see her you would think the flies were biting her. I work her on the corn wagon. She does not do this all the time, but I have seen her at it three times, I think, since I have been working her. She is not sick; eats well and looks well, only I cannot understand the stamping and kicking. I should be glad to find out what I can do for her.

If she is a heavy milker and you are keeping her too long away from her foal she may kick, as described, from discomfort of distended udder. Otherwise, we suspect she suffers from indigestion and accumulation of gas, which would be done away with by cutting down grain ration, and if corn is being fed, changing to oats, with a bran mash twice a week. Also see to it that the harness is not chafing or pinching anywhere.

STAGGERS.

Can you tell me what is the matter with my cows? They come in from the field and stumble to their knees and fall. Some of them eat and some of them do not. I have lost one and have two more sick.

You are probably running your cows in corn stalk fields and there they are taking in injurious matters which cause so-called "corn stalk disease" or impaction of the stomach. Keep cows off such pasture and feed on hay and silage with meals and corn. Physic affected cows at outset of attack by administering a pint to a pint and a half of castor oil in milk as one dose. Follow with copious drinks of warm flaxseed tea in each of which, at intervals of three hours, mix two ounces of whisky and half a dram of fluid extract of nuxvomica. Do not give the stimulants if cow is crazy. In rabies, following the bite of a rabid dog, staggering and falling are often seen, so make sure that there is no history of such cause of disease.

GLOSS ANTHRAX.

I have a flock of thrifty calves which I turned on my meadow and slough about the last of August. They have all the good water they can drink. I have lost eight in the last month. Their tongues swell till they project from their mouths and they choke to death in a few hours after. I noticed the swelling and after I had lost two I took them out of the meadow, and in about ten days I lost another the same way. Please tell me what I can do for them, what is the trouble and what the cause.

This would appear to be a form of anthrax affecting the tongue and is attributable to contagion contracted in the slough. There is no cure, but prevention should be sought by keeping calves out of the slough. Actinomycosis, affecting the tongue, or mycotic stomatitis, causing ulcers in the mouth and on the tongue might also be suspected, the latter disease sometimes taking on the form of "diphtheritic sore throat" in calves. It would be well to have an investigation made by a qualified veterinarian. Meanwhile change pasture and food.

INDIGESTION—COLLAR BOILS.

(1) I have a black mare five years old weighing about 1,650 pounds. She had a colt last year, also this year, but do not think she is in foal now. She seems to have a weak stomach, although she is in fair shape and works well. The other day, however, she refused to eat well. She stood with her head hanging down. She would rest one of her hind feet, but would change about often. She had a roaring sound in her bowels. I have noticed this roaring or noise for the last few years off and on, but she has never been sick. I have been feeding her pretty heavy. While she was nursing the colt I fed her about ten ears of corn three times a day, about a gallon and a half of oats with a handful of oil meal and a few handfuls of bran twice a day. I have quit feeding corn now. She worked all summer, as I only have one team, and that is why I fed her heavy. She has run in pasture at night and on idle days. I weaned the colt the last of October. (2) I have a mare twelve years old that has trouble with her neck. It is not sore, but gets wrinkled and when I work her lumps appear on her neck or shoulders. These lumps get as large as pigeon's eggs in a few days, and then break, when she is relieved. She is worse before the lumps come. When she got warm in harness this summer sometimes the only way to work her would be to take a handful of smart weed, dip it into cold water and apply.

(1) You have given her chronic indigestion by overfeeding. The corn fed so heavily was quite unsuitable for a mare nursing a foal. Oats and bran are the best foods at that time, along with grass and hay. It would be well to let her do without grain for a month or so and start treatment by giving her a pint and a half of raw linseed oil. When that has acted, feed her lightly on bran mash, carrots, hay and fodder, and gradually get her back onto a light ration of oats. Have her teeth attended to by a veterinary dentist. Allow free access to rock salt and have her exercised every day in winter. (2) Do not feed corn in summer; substitute whole oats and fine hay. Sponge shoulders and neck three times daily with a solution of half an ounce of tannic acid in half a gallon of water. Keep collar and other parts of harness clean and dry. Paint lumps, as they form, twice daily with a mixture of two ounces of tincture of iodine and four ounces of witchhazel extract.

McGavock's David City Sale.

The McGavock sale of Short-horn cattle held at David City on December 12th was one of the best held in this section of Nebraska this year. A large crowd of buyers from all over the state were present and seemed very eager to pick up the good things in the sale. The cattle were all in nice

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

Points of Fat Sheep.

The formation of fat, in a sheep destined to be fattened, commences in the inside, the web of fat which envelopes the intestines being first formed and a little deposited around the kidneys. After that, fat is seen on the outside, and first upon the end of the rump at the tail-head, continuing to move on along the back or both sides of the spine or backbone, to the bend of the ribs, to the neck. Then it is deposited between the muscles parallel with the cellular tissue. Meanwhile it is covering the lower round of the ribs, descending to the flanks, until the sides meet under the belly, whence it proceeds to the brisket, or breast, in front, and the sham or cod behind, filling up the insides of the armpits and thighs.

While all these depositions are proceeding on the outside the progress in the inside is not checked, but rather increased by the fattening disposition encouraged by the acquired condition, and, hence, simultaneously, the kidneys become entirely covered, and the space between the intestines and the lumbar region, or loin, gradually filled up by the web and kidney fat. By this time the cellular spaces around each fiber of

muscle are receiving their share; and when fat is deposited there in quantity it gives to the meat the term marbled. These interfibers are the last to receive a deposition of fat, but after this has begun every other part, at the same time, receives its due share, the back and kidneys securing the most, so much so that the former literally becomes nicked, as it is termed—that is, the fat is felt through the skin to be divided into two portions, from the tail-head along the back at the top of the shoulder; and the tail becoming thick and stiff, the top of the neck broad, the lower part of each side of the neck toward the breasts full, and the hollows between the breast-bone and the inside of the fore legs and between the cod and the inside of the hind thighs filled up.

When all this has been accomplished the sheep is said to be fat or ripe. When the body of a fat sheep is entirely overlaid with fat it is in the most valuable state as mutton. Few sheep, however, lay on fat entirely over their body. One will lay the largest proportion on the rump, another on the back; one on the parts adjoining the fore quarter, another on those of the hind quarter; and one more on the inside and another more on the outside. Taking so many parts, and combining any two or more of them together, a considerable variety of condition will be found in any lot of fat sheep, while any one is as ripe in its way as another.

With these data for guides, the state of a sheep, in its progress toward ripeness, may be readily detected by handling. A fat sheep, however, is easily known by the eye, from the fullness exhibited by all the extended parts of the particular animal. It may exhibit want in some parts when compared with others; but those parts, it may easily be seen, would never become as ripe as the others, and this arises from some constitutional defect in the animal itself, since, if this were not so, there is no reason why all the parts should not be alike ripe.

The state of a sheep that is obviously not ripe cannot altogether be ascertained by the eye. It must be handled,

or subjected to the scrutiny of the hand. Even in so palpable an act as handling discretion is requisite. A full-looking sheep needs hardly to be handled on the rump, for he would not seem so full unless fat had first been deposited there. A thin looking sheep, on the other hand, should be handled on the rump, and if there is no fat there it is useless to handle the rest of the body, for certainly there will not be so much as to deserve the name of fat. Between these two extremes of condition every variety exists, and, on that account, examination by the hand is a rule, and by the eye alone an exception. The hand is, however, much assisted by the eye, whose acuteness detects deficiencies and redundancies at once.

In handling sheep, the points of the fingers are chiefly employed, and the accurate knowledge conveyed by them, through practice, of the exact state of the condition is truly surprising, and establishes a conviction in the mind that some intimate relation exists between the external and internal state of an animal. Hence originates this practical maxim in judging stock of all kinds, that no animal will appear ripe to the eye unless as much fat had previously been acquired in the inside as constitutional habit will allow.

The application of this rule is easy. When the rump is found nicked, on handling, fat is to be found on the back; when the back is found nicked, fat is to be expected on the top of the shoulder and over the ribs; and when the top of the shoulder proves to be nicked, fat may be anticipated on the under side of the belly. To ascertain its existence below, the animal must be turned up, as it is termed; that is, the sheep is set upon its rump, with its back down, and the hind feet pointing upward and outward. In this position it can be seen whether the breast and thighs are filled up. Still, all these alone would not disclose the state of the inside of the sheep, which should, moreover, be looked for in the thickness of the flank. In the fullness of the breast—that is, the space in front from shoulder to shoulder toward the neck—in the stiffness and

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy rams and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs. champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros., Kellerton, Ia.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

NORTON FARM SHROPSHIRE

FOR 30 days special prices will be made on one or a carload of choice recorded ewes, bred. Also Feb. ram lambs. Wish to make room for new importation.

D. M. NORTON, Sanborn, Iowa.

EAR TAGS ONE CENT EACH.

Brass or aluminum. Specify which you desire.

DAY BY DAY

Agricola

The get-rich-quick longing is harmful, whether gratified or not. Agricola has a friend who invented an improved method of evaporating fruit. He did not attempt to defraud anyone with delusive wiles by which to get their hard-earned dollars for a patent right. He built an evaporating house and bought his neighbors' surplus apples and sold the dried apples for good money. This was beneficial to all parties.

Move number two was to go to Missouri where people wish "to be shown." He built a large evaporator in a good fruit country and, as surplus fruit had been considered of practically no account, he bought at his own price. That winter evaporated fruit reached an unusually high price and his net profits from this one job were \$13,000. He would have been delighted with \$3,000, and the extra \$10,000 made life look rosy and delectable.

The next fall he went to the same place to repeat the same tactics, but he didn't do any repeating. Not a bushel of apples would the natives sell him at a price which he could afford to pay. They all wanted to get rich themselves this time. Result—their fruit rotted on the ground and was a total loss, the evaporating plant stood idle and was left to rot also.

In one Iowa locality a farmer planted ten acres to cabbage. He sold at \$9, \$10 and \$11 per ton and received \$1,400 for the ten-acre cabbage crop. This was last year. This year he and his neighbors prepared to get rich quick by the same way. They raised cabbages by wholesale—large fields of them—the landscape from a moving train looked like a sea of green waters. The price this fall ranged from \$3 to \$5 and of course not enough cars to take them all at any price, no matter how low, and an unharvested cabbage field has about as dreary a look in December as beautiful Iowa can offer to the tourist.

When Agricola was a boy, horses rested in summer and the farmers moved lay and cradled wheat and cut corn by hand. The run in the pasture was good for the horses. Now the horses mow and reap and load the hay and hoe the corn and dig potatoes and spread the manure, and their idle spell is in the winter. To keep them in the barn in winter robs them of their vacation. Idleness is not vacation. They should have the run of yards and stalk fields and pastures. It is better for them. It is all right to let them into the barn nights, but not all right to keep them imprisoned there all the time.

And still sales come thick and fast. Never before was there the like of it in this part of Eden. It is not because farmers have failed, but because they have succeeded. They have worked strenuously and have saved some money, and they think they have earned a rest. It is all right when it gives a son a chance to manage the farm, and if the farm will support one family in town and another on the farm, then one farm seems to do double duty and the tired farm wife gets a rest.

But the retired farmer in town! Of what good is he to the town or himself? He is not happy. He is not congenial company for the town residents, nor they for him. He is a back number. He leaves the farm because tired of usefulness and finds town life a poor balm for his tired feeling. But that is his own affair and he believes it the best thing to do, and so sales increase in number and the town increase in retired farmers.

Horses are still high, whether at public or private sale. The reason is that the demand is greater than the supply, and the reason why it exceeds the supply is that not enough good horses are raised. The scrub horse, like any other scrub, is poor property, and the good horse takes some time and considerable care to grow. And the shippers pick up all the good heavy mares they can get, and this tends to limit the production. A span of good draft mares is decidedly good property, but none too good to hold fast too and keep for breeders.

Now is a good time to get next sum-

mer's firewood. Every farm has, or should have, enough trees for summer fuel, even if it is all prairie. Artificial groves are easy to start, and fast to grow, and even the soft woods, like willow and cottonwood, make fine summer firewood. The best way I know is to cut pole timber and saw it with a gasoline outfit.

One evening the watch dog reported an intruder in the front yard. Nothing was visible until someone noticed that the dog's nose pointed skyward. There, silhouetted against the starry sky, was visible a protuberance on a tree limb. The young boy aimed partly by faith and partly by sight, fired, and down came a skunk. Thereupon he, the boy, received thanks and congratulations from the manager of the poultry department, for that skunks like fresh poultry is unquestioned in the Agricola household.

But there are those who put in a plea for the animal of ill-repute and unpleasant perfume. They insist that his chief delight is to hunt and destroy rats, fairly out-Chinaing the Chinese. This is reasonable, too; still, much as we despise rats we have plenty of unspent aversion which unbottles spontaneously at sight or smell of Mephitis mephitis. No scientific name for even a skunk is generally less than one and three-eighths inches long.

But rats like chickens, too; and they

are more persistent in their inroads than the skunk, and if skunks kill rats, give them due credit for it, and still, they are in and of themselves, animals of ill-repute.

Strawberry beds, or strawberry rows, need to be covered with a good, yet open mulch. Clean straw is good. Leaves are better, and probably best of all is manure from the horse stable. It is a porous mulch, if the lumps are disintegrated, it stays where put, protects from the repeated freezing and thawing of the grounds, which weakens the strawberry plant, and in the spring it goes on doing good service as a fertilizer. Rich ground is what the strawberry needs, and horse manure furnishes renewed richness.

Program Kansas Good Roads Association.

To be held at the state agricultural college, Manhattan, Kan., January 2d and 3d:

WEDNESDAY AFTERNOON, JANUARY 2D.

2:00 p. m.—President's address, C. F. Miller, Fort Scott, Kan.

2:30 p. m.—"The Gospel of Good Roads," Barney Sheridan, Paola, Kan.

3:00 p. m.—"Good Dirt Roads Right Now," C. D. Skinner, Topeka, Kan.

3:30 p. m.—"Some Engineering Problems in Road Building," Prof. W. C. Hoad, State University, Lawrence, Kan.

WEDNESDAY EVENING, JANUARY 2D.

7:30 p. m.—"Report of Work in Atchison County," L. S. Hereford, Atchison, Kan.

8:00 p. m.—"Bridges and Culverts," Prof.

E. B. McCormick, Engineering Department Agricultural College, Manhattan, Kan.

8:30 p. m.—Stereopticon Lecture, M. O. Eldridge, Chief of Records, Office of Road Inquiry, U. S. Department of Agriculture, Washington, D. C.

THURSDAY MORNING, JANUARY 3D.

8:00 a. m.—"The Relation of Drainage to Good Roads Construction," W. R. Goit, Oklahoma City, Okla.

8:30 a. m.—"My Experience With the King Road Drag," Hon. Bradford Miller, Topeka, Kan.

9:00 a. m.—"Report on State Experiments on Oiling Roads," Prof. Albert Dickens, State Agricultural College, Manhattan, Kan.

9:30 a. m.—"Importance of Engineering Control in Road Construction," Lute P. Stover, Engineer Wichita Natural Gas Company, Wichita, Kan.

10:00 a. m.—"Good Roads Commission and the Fort Scott Idea," Hon. Robt. Stone, Topeka, Kan.

10:30 a. m.—"Report of Work in Bourbon County," A. J. Sherman, Fort Scott, Kan.

11:00 a. m.—Business session.

I. D. Graham, Secretary, Topeka, Kan.

C. F. Miller, President, Fort Scott, Kan.

Cancerol, a Mild Treatment for Cancer.

The originator of Cancerol claims more cures from its use than from all other treatments combined. Costs but a trifle to satisfy yourself. Write for handsome free book. Address Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

HAVANA, CUBA.

On December 18th to 20th the Chicago Great Western Railway will sell round-trip tickets to Havana at one fare for the round trip, with limit to return of January 9th. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

LOOKING for the Red Letter Date in a Homemaker Red Letter Calendar

The Homemaker has something entirely new in calendars to offer to its readers—a calendar that accurately foretells the future. Who would not read the future if he could? Who would not lift a corner of that impenetrable veil that shrouds the on-coming year in mystery? The Homemaker professes no unholy gifts of divination, yet it holds in its keeping the secret of an event that will befall each of its subscribers on a particular date of this new year.

That secret it will disclose to every reader who performs the trifling service to be explained. The disclosure will come in the form of a beautiful Red Letter Calendar, artistically illuminated and tastefully printed, and bearing on one of its folds a Red Letter Date of especial personal interest to the receiver.

So beautiful is the calendar that it will be treasured by its possessor throughout the year. So significant the date that our prophecy of it will come to him as a grateful surprise. So important the event the calendar foretells that it will bring weeks and months of joy to his household.

If you have the courage and desire to know the future, and time and energy to do FIVE MINUTES WORK FOR US IN YOUR OWN HOME ask The Homemaker how to earn a Red Letter Calendar. Send no money but write today.

Address,

The Homemaker

Des Moines, Iowa
December, 1906

ADVERTISING NOTES.

Mr. J. Mulhall, of Sioux City, Iowa, has farms for rent and sale on crop payments. His advertisement appears on page 18.

The Sunny South Land Co., of Clarence, Okla., are advertising Texas and Oklahoma lands. Write them for particulars. Mention this paper when writing.

Messrs. Nicholls & Moyer, of Coffeyville, Kan., have the best list of unimproved and improved lands in Kansas at from \$5 to \$12.50 per acre. These lands are located in western Kansas. When writing please mention this paper.

On page 18 of this issue of The Homestead the California Farm-land Company, of Los Angeles, Calif., are offering free booklets on farming in California. These booklets are very interesting, telling all about the enormous profits in sugar beets, grapes and alfalfa, dairying, stock raising and other industries. Write the company at once, as per their address in the advertisement.

There is no part of the country that is attracting the attention of more people than Saskatchewan. It is a fast coming country, because of the great opportunities it offers to investors. A company has been organized in Des Moines that is forming extensive plans and will make the people of Iowa some excellent offers in the spring. Send your name to Mr. C. C. Pugh, 310 Crocker Building, Des Moines, Iowa, and you will be sent all the details of the plan as soon as they are developed. It will be time well spent.

We desire to call the attention of our readers to the advertisement of the Bayer Tanning Company, which appears on page 21. We have known this company for several years and also know of the high standard and fine quality of their work, and any one of our readers who contemplate having any hides tanned this season will do well to have their new booklet on tanning, which will be sent free upon application. It tells you all about tanning, the various treatments and processes your hides go through, and will certainly interest you. Write them today and mention this paper when writing.

Undoubtedly there are thousands of readers of The Homestead who are now considering the question of what they shall purchase next spring to beautify their home surroundings. There is nothing that adds more to the beauty of a home than trees, shrubs, vines, roses, etc., and that those who are interested may act intelligently, we want to call their attention to the announcement made by the Sioux City Seed and Nursery Company, of Sioux City, Iowa. They are offering to send a nursery book, which they consider fully worth \$1, to any tree planter free. This book gives the real facts about the care of trees and has over 100 illustrations, mostly taken from photographs. It is sent absolutely free. When writing, please mention The Homestead.

Men of limited means and renters or home-seekers will be interested in an advertisement on page 18 of this issue of The Homestead where some bargains are offered in land. Mr. F. S. Bennett, of Emporia, Kan., is offering some choice bargains and it will be to the advantage of those who are renting or home-seekers to look this up. His land is all well located, fairly improved and the prices he is making he considers right. He has a list that he will be glad to send to any reader of The Homestead who is interested. He prefers that those who want to buy should come on the first train, as the bargains he has on hand will not last long. As the price of land is advancing everywhere, we would suggest, if looking for a farm, that the reader communicate with Mr. Bennett at once. To the renter who is paying out more money for rent every year than the payment on a piece of land amounts to, the proposition by Mr. Bennett will be particularly attractive. However, a careful reading of

What are you going to do with the boys?

Keep them on your farm to share an income that is already too small, or are they going to hire out to a neighbor to work all their lives for some one else? Perhaps they are thinking of going to the city to join in the mad rush for existence. Why don't you

Send them to the Southwest

where in a few years each of them can become independently rich?

It will take only a few dollars to start them—good land is so cheap in the Southwest. If they are hustling fellows, they will soon be doing so well you'll want to sell out and join them.

It's much easier to make a good living in the Southwest than in the older states. You can get from 10 to 20 acres in the Southwest for the price of one where you live and the land is just as good. You can raise as big or bigger crops there and can get better prices for all you raise. Markets are good and schools and churches are abundant. The climate is healthful—the summers no warmer than elsewhere and the winters are so mild no heavy shelter is needed for stock—they have good range the entire year. Contrast this with your climate and see who has the best of it.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines
1413 La Salle Street Station, Chicago or 1413 Frisco Building, St. Louis.

the advertisement, to which we have referred, will convince the reader of the necessity of acting quickly.

One of the nicest-arranged and best-conducted factories in any line in this country is the Queen Incubator Factory, at Lincoln, Neb. These features enable them to make excellent chick machinery at the least cost. Every employee takes a personal interest in the business; they turn out the highest grade of work. Queen incubators and brooders have been on the market long enough (five years) to have every up-to-date improvement. They issue a large, beautifully-illustrated catalog that will interest any poultry raiser. It will be mailed free of charge. Write today to the Pinkerton Manufacturing Company, 1027 N. 14th St., Lincoln, Neb.

If you are going to buy fence and are in doubt about the kind, look into the Anchor fence, made at Cleveland, Ohio. It has an excellent name among people where it has been tried. It is made of good, substantial hard steel coiled wires. The manufacturers claim that the wires they use give Anchor fence double the strength of fences made of ordinary soft wires. An important feature of Anchor farm fence is the patent lock of the horizontal to the upright stay wires at every crossing. This prevents all slipping and insures the fence keeping its upright character permanently. For particulars write to the Anchor Fence & Mfg. Co., Cleveland Ohio, for their free fence book No. 12, which gives all details. Their advertisement appears on page 23.

THE TELEPHONE SAVED HIM \$300.

A writer in the Chicago Tribune tells of a cattle buyer who drove into the yard of a farmer about fifty miles from Chicago the other day and made an offer for all the cattle and pigs on hand, delivery to be made at once. The offer seemed a good one, but before closing the farmer said he would speak to his wife. Going to the house he asked his wife to call up a Chicago commission house by telephone. In less than two minutes he was in communication with Chicago and was informed of a rise in prices and advised what a good offer would be at that moment. Within five minutes he closed a deal with the buyer at prices which paid him \$300 more than the first offer.

FROM A WELL-KNOWN TRAINER.

Mr. Frank Fritz, of Carthage, N. Y., writes: "W. F. Young, P. D. F. Dear Sir:—I think Absorbine is the quickest and surest remedy for soreness. I have found almost invariably that it takes the soreness out in almost any kind of form." Absorbine is now put up in tin containers, making a handy and safe package for use around the stable, as well as a convenient package to carry in the trunk with hoots, blankets, etc. Absorb-

ine will remove blemishes, take out soreness, strengthen the tendons and ligaments, without blistering or removing the hair. In no way interferes with regular use. At dealers or sent express prepaid upon receipt of \$2. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

HUNTERS AND TRAPPERS' GUIDE.

Perhaps the best book ever written on the subject appears under the above title. The work is now being offered to those interested in the fur trade and further particulars will be found regarding its cost on page 13 of this issue. Whether you desire a copy of the book or not it will be worth your while, if you have hides or skins of any animals, to write Messrs. Andersch Bros., of Minneapolis, Minn., for prices on raw furs, etc. Buying as they do direct from the trapper they eliminate extra profits which they allow you. This is why they can pay from 10 to 50 per cent more for this kind of goods than you can get at home. When writing them just ask for price list and market reports. Look again at their advertisement and kindly mention The Homestead when writing them.

TENTS! TENTS!

If it is a tent that you are looking for, then you are on the right trail when you write to the Peoria Tent & Awning Co., of Peoria, Ill. Their situation makes it possible for them to make quick shipments to all parts of the corn belt. A large tent is one of the finest kinds of covers for sales of all kinds, whether stock or ordinary farm sales. This kind of a cover is often better than sheds or barns, as better light is afforded. Whether you wish to rent or buy and whether your pocketbook is large or small, this firm are always ready to make you a proposition. They also sell a patent preparation for dressing all canvas goods to make them waterproof. Any questions regarding their line of goods will be gladly answered by writing them at the above address. Please mention The Homestead when so doing.

POORER BUTTER EVERY YEAR.

Listen, brother dairyman! Are you aware of the fact that the quality of butter made in this country has been on a rapid decline for the last five years? Think of it, and in the face of all the improvement that dairy machinery has undergone in that time. It seems impossible, yet it must be true, for good authorities are making the statement. Still the worst is to come. The fault is placed at the feet of the hand separator, the machine that is one of the greatest inventions of the age. Yet a little calm reasoning will make the assertion seem possible—quite possible, indeed. Complicated machines discourage regular and frequent washing. Foul separator bowls make bad cream

and consequently poor butter. The remedy for this very reproachful condition is to buy only the best, the most efficient and the most simple separator on the market. For this purpose the tubular is hard to beat. There is only one tubular—the Sharples. We cannot tell you anywhere near all the merits of this perfected machine. However, if you desire to get next to the facts in the case and improve the reputation of our butter, send to the Sharples Separator Company, of Chicago, for catalog J. 121. Also please note their advertisement on page 8 of this issue and kindly mention The Homestead when writing them.

GRIND AND SAVE MONEY.

If you have to haul your grain to town to have it ground it takes about a day every week. That is nearly one-seventh of your working hours. Time is money on a farm, as well as in a factory. Besides, you pay the miller enough in a year to buy several good grinders. There is time and money both that could be partly saved. Suppose you had a strong and rapid grinder in the barn yard near the grain bins. A grinder, say, like the "Corn Belt" mill, so named because it is made for the corn-belt farmer and has found much favor with him. How easy a matter it would be to hitch the team to the sweep. Several hours a week would do the work of grinding and do it when the time would never be missed. Think it over. A better grinder, a more rapid one than you now have may save a good many hours' work in a week. It might save the need of a hired man. Think it over some more. Then send for a good grinder catalog to the Spartan Manufacturing Company, of Galesburg, Ill. On page 14 will be found their advertisement. When answering please mention The Homestead.

AN AUTO MADE FOR COUNTRY ROADS.

The motor car has a place on the farm, as well as in the city. The farmer often finds himself handicapped in his business for lack of facilities for rapid travel. Short trips or visits to nearby towns, to breeders or relatives can be made in much better time than by rail or behind the best driving team. The first requirement in a car for successful country service is positive reliability. This quality and others is gained in the Rambler through stanch construction. This car is manufactured by Messrs. Thomas B. Jeffery & Co., of Kenosha, Wis. In construction only the best possible grades of material are used. It requires an expert in every department of supplies. Further, this material is worked into the various parts of the car by only the most expert workmen. Every part must be tested and found perfect before it goes to form a part of one of the Rambler motor cars. There can be no guess work allowed. The power plant is one of the vital parts

FREE! TREATMENT FOR MEN

Cure Yourself At Home!

When afflicted with Nervous Debility, Weakened Vitality, Blood Poison, Skin Diseases, Prostate, Urethral, Kidney or Bladder Disorders, the uppermost thought is "where can I obtain a positive cure with the least inconvenience and at the least expense." Doctors charges for treatment of these troubles at their offices are very high. The cure usually uncertain.

OUR HOME TREATMENT

places within your reach the best possible treatment at a moderate expense. Our 20 years practice and thorough knowledge of these diseases has enabled us to prepare and perfect a new method which can be successfully used at home.

To prove the merit of our new method we will send you a month's treatment especially prepared for your case and allow you to use it for fifteen days. If you are not better or the treatment unsatisfactory return it to us and it will cost you nothing.

Write us today about your case even though you are discouraged with other treatments; let us

DR. F. W. YOUNG
and
FELLOWS

523 Rollins Block, Des Moines, Iowa

of a car. It must be simple and in this respect the Rambler excels. No complicated machinery is found in this part whatever. The car is for service and for the highest degree of service. It is made accordingly. Turn to page 25 for the full announcement of this firm. If interested, write them. Their machines are recognized throughout the country for their good qualities. Kindly state that you saw the advertisement of the Rambler in The Homestead.

IMPLEMENTS AT FACTORY PRICES.

On page 20 of this issue will be found the advertisement of the Hapgood Plow Company, of Alton, Ill., the only plow factory in the United States selling directly to farmers at wholesale prices. There is not a farmer in the corn belt who does not know that Hapgood plows are standard. They are not made simply to sell at low prices, but are manufactured from the very best material. The prices at which this company's machinery is quoted are low as compared with the high prices of the dealers on similar machinery. Of course every dealer must make off a fairly good sized profit in order to make his own business profitable, and the farmer must pay this profit. If you can buy directly from the factory and save all this, why not do it? Anything in the way of plows, harrows, disks, buggies, cultivators, harness, ranges, etc., may be bought directly from this company. Their corn planter, for example, complete with eighty rods of check wire, sells for \$27.25. Write for catalog at once and state what line of goods you are particularly interested in. Mention this paper when you write and address Hapgood Plow Company, 117 Front street, Alton, Ill.

THE PURINTON STEAM FEED COOKER.

Stock feeders who have been cooking feed will be interested, and those who have not been cooking ought to be interested, in the Purinton Steam Feed Cooker advertised on page 20 of this issue. It is unquestionably one of the best things in this line and it makes the cooking of feed very economical. By reference to the picture in the advertisement, it will be seen that it is a simple contrivance. There is nothing to get out of order. From the chamber in upper half of cooker where the steam is generated, pipes are run out and may be placed in a number of barrels around it filled with grain, vegetables, etc., where the cooking is done. The fire pot occupies the lower half of the cooker and you can use whatever kind of fuel you have at hand. The Purinton Cooker is made by the Crescent Furnace and Foundry Company, Des Moines, Iowa, who offer to sell it to farmers and feeders on a very generous free trial plan. It can be had in different capacities to suit the wants of the large or small feeders. To get prices and other particulars look up the advertisement and write direct to the advertiser at 604 Madison St., Des Moines, Iowa.

LEARN TO COOK.

The cooking of certain feeds for hogs and other stock is a live question. No farmer can make any mistake by thoroughly informing himself on all the merits of this manner of preparing food. In this connection, the Greenville Implement Company, of Greenville, Mich., are ready to supply you with any information you desire. "What to Cook and How to Cook for Stock" is the title of a valuable booklet which they will be pleased to send any farmer or stockman on request. It explains the merits of cooking very plainly and tells what a saving of money may be made by the use of their Peerless Cookers. These cookers are constructed of the best and most lasting materials obtainable. They have the advantage of being jacketed or enclosed with a steel casing. This feature saves nearly half of the fuel. Every kettle is warranted to be flawless and everything considered you will find as good a proposition offered by this firm on page 13 of this issue as is on the market. Perhaps you have often wanted a cooker, but could not afford to pay what is generally asked. If so, this is your chance. For a very small sum one of these cookers is yours, kettle, jacket and fire-place. Send for the booklet while you think of it, kindly mentioning The Homestead.

THE FAMOUS GALLOWAY COATS AND ROBES.

One of the most popular kinds of fur garments nowadays is the Galloway coats and robes. They are made from the hides of the Galloway cattle. The hair on these cattle is long and curly and of a jet black color. Many people call this breed the "shaggy coats" because their coats look so fluffy and thick. Without doubt they furnish the best material for fur garments of any of the domestic animals. They make a very favorable impression when shown and always attract attention for their rich black color and furry makeup. Those interested should write to Mr. W. W. Weaver, of Reading, Mich., for further particulars. A fur coat of Galloway that makes a very dressy garment is made up from a hide for \$10. In such a coat there is little piecing of material. In other fur coats this is necessary, and consequently shortens the life of the coat, as rips occur more easily and frequently. This firm are recognized as one of the best among tanners and they handle a great number of small skins such as fox, coon, mink, etc., which they make into all kinds of ladies' furs. On page 4 will be found a further announcement. When writing these parties kindly mention this paper.

CROPS WITHOUT WEEDS.

Did it ever occur to you what an immense amount of loss of labor and crop was caused by weeds? At first thought it seems trivial, but when carefully figured out the sources of loss are so many that the whole totals a great deal. Without mentioning the various sources of these leaks and losses we will refer our readers at once to a very good proposition offered on page 20 by the Hall Grain Grader Company, of Winfield, Iowa. The location of this firm is very favorable. Situated in the midst of a good grain country they have been able to deal with their problems at close range. The result is that in their combined corn sorter, grain grader and grass seed cleaner they have evolved a first-class machine. It cleans, grades and separates any seed or mixture of any four similar seeds at the same time. Practically does the work of three machines, but costs no more than one. It is well equipped for its work, which it does rapidly and thoroughly. Every machine is guaranteed. Do not delay the duty of securing one of these

machines for cleaning the spring seed. If you own one you will be able to use it when ready. Not so if you depend on your neighbors. Write at once to this firm if interested, mentioning The Homestead.

RESPONSIBILITY DEVELOPS CHARACTER.

How different parents view the question of entrusting children with certain responsibilities is well illustrated by the following: One man had been telling another of his shooting trip which he had found doubly delightful, because for the first time he had taken his small boy along. "A boy of twelve? I should be afraid," said the other, "to give my boy the responsibility of a gun." "Well," said the first, "I should be afraid to deprive my boy of his share of responsibility." This man's view is exactly in line with the propaganda being carried forward by the J. Stevens Arms & Tool Company, Chicopee Falls, Mass. They argue very reasonably that by putting a rifle or gun in the hands of a boy, you teach him to be careful, you increase his self-respect, and make him self-reliant and manly. The Stevens Company have issued a catalog on rifles, shot guns and pistols, which every father should see. It not only describes the many different styles there are today, but it is a perfect mine of information on all points connected with shooting, whether for sport or field, or target practice. We have read the copy sent us with the greatest interest, and strongly advise our readers to write for it. The company's only request is that four cents in stamps be sent to cover postage; the book itself is free.

Marston Bros.' Dispersion Sale of Short-horns.

As per announcements in The Homestead during the past three weeks, Messrs. Marston Bros., of Mason City, Iowa, on December 14th, dispersed their entire herd of Short-horn cattle at the feed yards in Mason City, Iowa. This dispersion sale brought forth a goodly number of breeders from Minnesota and Iowa and these, with the fine local attendance, made up a very interesting audience for Colonel Woods when he mounted the rostrum to commence one of his splendid speeches on behalf of the Short-horns. Cols. R. W. Barclay and H. P. Turnure assisted

Colonel Woods in the ring. An unfortunate condition arose before Colonel Woods was through his opening speech. About one-half of the seats, which were very poorly constructed, collapsed with the crowd, but fortunately no one was seriously hurt. A little later on after quiet reigned again, a cow became somewhat unruly, at which juncture the remainder of the seats collapsed, and in the melee a coal oil stove was upset and set fire to the straw in the tent, but was promptly put out and the sale continued. When things were again going in good shape the temporary rostrum on which Col. Woods was situated, followed in the wake of the seats, and the colonel was compelled to stand on a small box to complete the sale, with the entire crowd standing on the wreckage of broken planks. How much this disaster detracted from the sale is a matter of speculation. Nevertheless it was remarked on every side that the sale was damaged from \$500 to \$1,000 by virtue of this commotion and the uncomfortable condition that the buyers were placed in. The buyers in the background could not see the cattle when they were led into the ring. As one breeder explained, it was like buying a pig in a poke. The best cattle did not bring their full worth, and as had been predicted in our write ups of this sale, owing to the sale of Messrs. Marston Bros.' farm, and this sale being determined all of a sudden, there was no time to prepare the thin cattle for the sale ring. Hence much of the better stock entered the ring too thin to bring its worth. The sale was conducted, however, without a murmur or complaint on the part of Dr. Charles L. Marston, who had the sale in charge. Many of the cattle sold below the \$100 mark. Messrs. Avery & Sons contributed a few Short-horns to this sale, which are figured in and calculated in the averages. Messrs. Avery also contributed their Shire stallion, the Lincoln. He was sold at \$475 to Mr. C. Bryant, of Mason City. Messrs. Marston Bros.' Percheron stallion, Happy Hooligan, a four-year-old, brought \$305 and was sold to Mr. A. H. Brett. The nine-year-old black Percheron mare was also sold to Mr. Brett at \$240, while the three-year-old Percheron mare, Vie 2d, was not offered for sale. It was only another illustration that horse sales and cattle sales should not be held together, for the reason that the cattle buyers, as a rule, are not buyers of registered stallions and mares. This sale, in its entirety, was perhaps scarcely up to expectations, nevertheless, all things considered, it was not a

disappointment. Below is a list of the cattle selling for \$100 or over:

FEMALES.

Imp. Zoe 5th, seven years, sire Scotch Thistle, A. H. Brett, Mason City, Iowa, \$200
Zoe 6th, two years, sire Scotland's Crown, same 175

3000 Farmer's Account and Pocket-Book Combined To Give Away.

We believe that we have the handsomest agricultural paper published—SUCCESSFUL FARMING, Des Moines, Iowa.

IN ORDER to secure more readers we intend to give farmers 3000 Combined Account and Pocket Books. If you are a farmer we want to give you one. We want to give you one of these pocket-books so you can show it to your friends and say, Mr. Meredith, publisher of SUCCESSFUL FARMING gave me this. Then you and your friends will think of SUCCESSFUL FARMING that goes to 250,000 readers every month, and you will say among yourselves I want to read this paper and get the benefit of the dollar making information that it contains.

These pocket-books that we are giving away are compiled in our own office and from years of actual experience by practical farmers, enables a farmer to tell at the end of the year just what he has made off his cattle, horses, hogs, poultry, dairy, hay, corn, or other grain. It is not a long-winded set of accounts, but just what every practical farmer needs. Besides being a farmer's account book and pocket-book combined, it contains interest tables, number of pounds per bushel of all different grains, all different tables of weights and measures, many handy rules, ways to tell the height of a barn, a tree, a wind mill, etc. Ways to measure the cistern, a wagon box, corn in crib, hay in stack, number of plants and trees to the acre, how to find the number of shingles needed for a roof, lath for a room, etc. This is not nearly all the valuable features of this book. It is also a wallet for valuable papers and a bill file. It has a place to keep account with your hired man, your grocer and everybody with whom you have dealings; besides telling you at all times just how much money you are making, and an inventory of all your stock. It is just the thing for every farmer. They fold up flat and fit in your inside pocket, just the kind of a pocket book every man likes to own.

Now you don't pay anything for the pocket-book. It is FREE. We send it to you postpaid and don't ask you for a cent. But just to show you are as willing to be as liberal with us as we are with you, we want you to send us fifty cents for a three years subscription to SUCCESSFUL FARMING. Now don't say that is what I expected. Wait a minute and read the rest. You haven't got to the most liberal part of our offer yet. Read this announcement all through. When we send this pocket book to you, we will also send you some sample copies of SUCCESSFUL FARMING, and will send the paper to you three full years, and the pocket-book for only fifty cents. Now, after three months, if you don't like the paper, or if you do not like the pocket-book after you have received it, then you just say so and we will send back your fifty cents and stop your subscription, and you may keep the pocket-book for your trouble. Now that is certainly liberal. That gives you the paper full three months free, and some sample copies for your friends, to say nothing of the fine pocket-book and account book that you get FREE.

Now what do you think of that for an offer? A handsome agricultural paper full three months free, printed in clean, plain type on nice paper, full of dollar making information that every farmer needs, nicely illustrated, containing many articles every month worth more than the price of a years subscription. We mention these things because they are extras. There are so many valuable departments in the paper that make it the best farm paper published.

Now if you don't tell us at the end of three months to stop the paper and that you do not want your money back, of course, we will enter your subscription as a regular subscriber for fifty cents for full three years. Now we only have three thousand of these combined farmer's account and pocket-books, and there are only that many to give away, so you will have to hurry a little if you want one. They are nicely bound pocket-books 7 1/2 inches long 3 1/2 inches wide. Just the right size to go in your pocket, but large enough to carry bills or weigh tickets, or money, or valuable papers, and they will go like wild fire, and you ought to stop right here and fill in the order below and mail it to us at once so as to be sure to get one of these pocket-books. We attach the blank so you do not need to hunt for paper unless you want to. Use a lead pencil, fill out the blank, enclose fifty cents, (stamps, silver, money order or personal check) and mail it to us just as quickly as you can. Do it right away so the pocket-book won't be gone when we get your subscription.

FREE POCKET-BOOK BLANK—Sign this and send to us at once.

SUCCESSFUL FARMING, Des Moines, Iowa.

Gentlemen—Send me SUCCESSFUL FARMING full three years unless I tell you to stop it at the end of three months. Also send me one of those Farmer's Account and Pocket-Books Combined FREE. I enclose fifty cents (personal check, silver or stamps) which you are to return to me if I tell you at the end of three months to stop my subscription to your paper

Yours very truly,

This is all black land and no waste land on either tract. Adjoining land is held at \$15.00. Buy of owner and save money. Easy terms. Can show these lands at any time. C. A. Whitescarver, 206 Temple Court, Denver, Colo.

FOR SALE OR EXCHANGE: 240-acre eastern Texas peach and pear orchard, 2 miles of good growing city of 18,000 population. Owner will sell on easy terms or exchange for northern farm or city property. Northern Iowa Land Co., Independence, Iowa.

The Hanna & Robertson Sale.

At the farm of Mr. J. W. Hanna, on Wednesday, December 12th, occurred the sale of Short-horn cattle made jointly by Mr. J. W. Hanna and Mr. Andrew Robertson, some six miles south of Garrison, Iowa. The cattle offered by Mr. Hanna in most part were not carrying the amount of flesh requisite in order to bring their worth. Nevertheless, they were in good, thrifty condition. Mr. Robertson's cattle were probably in better flesh, yet all were a business lot. It was certainly the farmers' opportunity to buy good practical cattle at modest prices. There were no Scotch cattle in the offering to attract the lovers of the north country cattle. Only one animal brought \$100. This price was paid by Mr. John O'Brien, of Van Horn, Iowa, for Sittytown Heiress, a red cow, calved October 25, 1902, sired by the Cruickshank bull, Sittytown Fame, and out of Red Heiress, she by Sassy Boy. This cow was a Scotch-topped Zelia, or Fashion. There were thirteen bulls in the offering that sold at an average of about \$62 each, while the price on the entire offering of forty-three head was \$360. Considering the fact that all these cattle were bred by their owners and reared under plain farm conditions, the sale was a success in its entirety. Both gentlemen behaved themselves in a straightforward manner when some of their choicest animals were selling for less than their value. They are both in the business to stay, and will be heard from in the future, with other sales, whereby the public will have more opportunities to secure good, practical, useful cattle. The splendid Scotch bulls at the head of their herds, when exhibited in the sale tent provoked very favorable comment. Col. Carey M. Jones, of Chicago, the popular young live stock auctioneer, did the selling in a very satisfactory manner. He was assisted in the ring, and ably so, by Col. J. W. Hite, of Vinton. The cattle were scattered throughout a radius of some fifty miles of Garrison—and the country is much better off by these cattle being taken for seed stock.

Duroc Swine Breeders' Meeting.

The National Duroc Jersey Swine Breeders' State Association will hold its annual meeting in the Commercial Club room in Des Moines, Ia., on the evening of December 27th. A good program has been arranged and a number of prominent men have given their consent to speak on this occasion.

"Roup and Ruin." Many a poultry breeder has found these two to be twin bed-fellows. Get rid of the one if you would banish the other.

THIS WINTER

will probably cause you to decide that you will look up a location where you can be sure of a better climate.

THE BIG BEND COUNTRY OF EASTERN WASHINGTON

IOWA FARMS FOR SALE Write for printed a bargain to offer. J. J. Lynch, Laurens, Iowa.

HOMESEEEKERS, MEN OF LIMITED MEANS, RENTERS

LET me have just a moment of your time. Do you realize lands are advancing in price everywhere and every day? Do you realize if you are to get a home of your own you must act at once? Renters do you realize that each year you pay out more to your landlord than will make a payment on a home of your own bought through me? Is it not time for you to stop? Is it not time to get a home of your own for your wife and children? The amount you are as rents each year applied on your own home and the rise in value will in a few years make you independent, put you on Easy Street; but you must act at once, not next week, month, or year, but now. If you don't buy of me or in Kansas, buy of someone somewhere. Buy land, buy now, have a home of your own, better land, and in a better country than from anyone else on earth. Let me tell you of a few things I have: one 160-acre farm, only \$1,000 down; one 80 acres, \$1,500 down; 160 acres, \$1,200 down; 161 acres, \$1,500 down; 92 acres, \$800 down; 80 acres, \$600 down; 80 acres, \$800 down. No payment then for two years and in small payments for ten years; reasonable interest, optional payments, and perfect titles. These lands all well located, fairly improved and priced right. It's the homeseekers and renters opportunity. Will you avail yourself of it? Send for list. But better come on first train. They won't last long. Call on or address,

F. S. BENNETT, 423 Commercial St., EMPORIA, KAN.

FARMS FOR RENT AND SALE on crop payments. **J. MULHALL,** Sioux City, Iowa.

Farmers Get Rich

What Gov. Hoch Says!

Gov. Hoch in his address, before the Trans-Mississippi Congress at Kansas City, said: "Gentlemen, the Sugar Beet Industry is one of the industries that will make our empire."

Alfalfa Great Feed

You can raise stock cheaper on alfalfa than on any other feed and bring the stock to market finished in better shape.

Growing Alfalfa and Sugar Beets In the Great Arkansas Valley In Western Kansas

Land that will raise Alfalfa is going to be an object in the future. The Same with Sugar Beet land.

We have 30,000 acres of the best Farm Lands out of doors at poor man's prices. This land is in the Great Arkansas Valley in western Kansas. Good Irrigated Alfalfa and Sugar Beet lands at \$40 to \$75 per acre. Alfalfa pays from \$40 to \$75 per acre and Sugar Beets from \$50 to \$90.

Lands in the Arkansas Valley will advance 50 per cent in the next six months. This is the time to buy. You'll never buy land cheaper than you can now.

Our excursion dates are the first and third Tuesdays of each month from Iowa, Illinois and Missouri points. From Kansas City the first and third Wednesdays of each month.

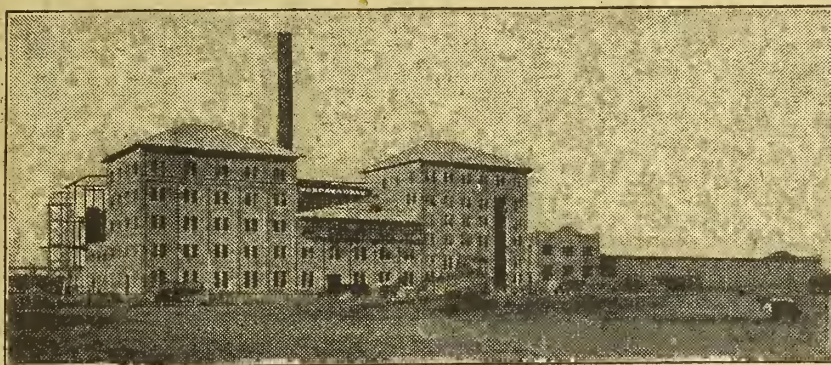

The U. S. Gov. is spending \$250,000 on an irrigation plant near Garden City

Crops Grown in the Arkansas Valley

The Arkansas valley of Colorado produces sugar beets which make a profit of from \$50 to \$90 per acre, wheat, corn, barley, alfalfa, wild hay, sorghum, flax, oats, potatoes, watermelons, cantaloupes, apples, peaches, plums, nectarines, prunes and bush fruits; and all in great abundance. The wheat crop is enough to bread the inhabitants and some over for shipment. It is the best milling wheat, and weighs 64 pounds to the bushel. The yield is 40 bushels per acre and there is one record of seventy.

In the West you can say for the country that it is an alfalfa country. This we can certainly apply to Finney county, for, until we found what we could do with the sugar beet, alfalfa was our best crop. Alfalfa is a splendid crop to grow in connection with sugar beets. After the sugar beets are thinned, which is the busy season in beet culture, alfalfa takes its turn—the 1st of June to the 1st of October, with a period of six weeks between each cutting, which gives all the time necessary for the cultivation of the other crops, and it is out of the way by the time the beet harvest begins.

Instead of one crop, it gives three or four every season, and, in short, a piece of land in alfalfa assures a perpetual income to the owner. It yields about 2½ tons per acre each cutting, and the hay sells for \$4.50 to \$8 per ton in the stack, but if fed to hogs or stock instead of sold, it gives the owner about \$10 per ton. The second cutting is usually used for seed, and gives about seven bushels to the acre, though cases are numerous of much higher yields. The seed sells from \$6 to \$10 per bushel, and the straw can either be fed or sold for about \$4 per ton. Sheep do especially well on the straw.

MILLION DOLLAR BEET SUGAR FACTORY AT GARDEN CITY, KANSAS. THIS FACTORY CONTRACTS TO TAKE ALL THE BEETS FARMERS RAISE AT \$5.00 PER TON.

Remember we have 30,000 acres of Arkansas Valley land to sell at poor man's prices. Do you want a part of it? We make very easy terms. Some cash, balance in three to five years.

Why You Ought to Buy Land in the Arkansas Valley

The increase in value alone will make you rich. Then there is no failure of crops. The average rainfall has been twenty inches for the past fifteen years and there is plenty of water for irrigating. Good, pure drinking water can be had at from fifteen to fifty feet. You will find here a healthful climate, pure, dry air. In a few years the same irrigated land we offer you at \$40 to \$75 per acre will be worth \$300 to \$700 per acre. This has been proven in Colorado in countries similar to the Arkansas Valley. In the meantime you can make from \$30 to \$125 per acre, the land raising alfalfa, sugar beets, cantaloupes, etc.

Can you do this in the country where you now live? And the above statements we stand ready to prove to you if you will go with us to Garden City and talk to farmers who are in the locality. No matter whether you want land for a home or for investment, we offer you an opportunity which has never been equaled, and which you will never have again, for the reason that land is getting too scarce in this country, and the man or woman who owns a piece of dirt is going to be king in the future. And why should you pay \$100 to \$150 an acre for land that will not pay 6 per cent on the investment when you can buy land for less money that will produce four or five times as much? And we stand ready to prove these statements by the experience of those already on the ground. Why raise one crop of corn when you can raise four crops of alfalfa? And the alfalfa seed alone from one crop is worth as much or more than the average crop of corn, or raise one crop of sugar beets that is worth as much as four crops of corn? Or you can raise one crop of cantaloupes that will pay from \$100 to \$125 per acre. Think this over. You'll want to quit work one of these days.

Poor Man's Opportunities

Mr. Farmer:—You don't have to be rich to go into the Arkansas Valley and make money. It's a poor man's country. We can prove to you that you can make more money on 40 acres here than you can on 160 acres of ordinary land, and do it with less work and less money invested in farm machinery, and you can buy land now for less money per acre. Don't you think it's your move?

Land Increasing in Value

Don't do as many have done in the past—wait until the prices go up, until it gets beyond your reach. Buy now, for the lands near Garden City are increasing in value faster than anywhere in the United States. The same kinds of irrigated land we will sell you for \$40 to \$75 per acre is selling in Colorado for \$300 to \$700 per acre. Our lands will make you rich on the increase in value alone, because they produce the crops.

We Own the Land

The Great Western Land Company owns the land. We bought it months ago when the prices were much lower than they are now, and we can sell you good land cheaper than any firm in the Arkansas Valley. We get our profit from the raise in value and you get the land cheaper than others are offering it. But don't wait if you want the benefit of these low prices. Get it now.

Opportunity for Investors

Mr. Investor:—Why let your money lie in the bank at 3 or 4 per cent when you can buy land in the Arkansas Valley and rent it and get 20 per cent interest on your investment in addition to the increase in value, which will amount to 25 per cent a year for the next ten years? Others are doing this now. Why not you? We can furnish large or small tracts. We can prove the above statements.

Go with us in our own private dining and sleeping cars, next excursion date and see this land from our Automobiles.

If you would like to know more about the great Arkansas Valley, write us now and we will send descriptive literature, Map of Kansas, etc., free. Or if you prefer we will have our nearest Agent call on you, and tell you all about it. But don't wait as the lands are advancing in price very rapidly. Every day counts. We have an office in the Blossom House, opposite Union Depot, in Kansas City. Call on us when here.

Write us now or tear this page out for future reference.

The Great Western Land Co.,
1048 UNION AVE., KANSAS CITY, MO.

Western Office, - Garden City, Kansas.

A million emigrants a year coming into the U.S. One reason why land is advancing.

IN THE GREAT SOUTHWEST.

The average yield of corn in Missouri the past year is 33.4 bushels per acre. The total yield is 223,000,000 bushels.

Pilot Grove, Mo., recently received 2,000 turkeys from nearby farmers. The principal streets were blocked with wagons and all records for one day's business was broken.

A wealthy land owner in Green county, Texas, has donated 25,000 acres of land to the Salvation Army. The land is situated in Sterling and Coke counties.

The St. Joseph Live Stock and Horse Show is now a recognized institution and a member of the American Association of Fairs. September 23d to 28th is the date set for next year's show.

Many cattle have recently died in Canadian county, Okla., from eating too many corn stalks. The dry stover becomes compacted in the stomachs and thus causes death.

The second prize fat steer in the two-year-old pure-bred Short-horn class at the last Royal was recently sold for seven and one-half cents, which made him bring \$126.75. He was a roan and owned by W. A. Forsythe, of Greenwood, Mo.

The Denver Live Stock Show to open at that place January 24th has made a new classification for feeder cattle. This entry will be open only to grass or hay-fed cattle which have never been allowed grain. Heretofore this entry was compelled to compete with cattle partly grain fed. The new classification, however, does not bar grass fed cattle from the regular feeder classes.

The total receipts of the relief corporation for the San Francisco disaster foots up to over \$6,000,000.

Two thousand pheasants are on the way from England to Kansas agricultural authorities. It is the intention to restock the state with this much-prized game bird.

A Missouri congressman has secured the passage of a bill through the house which is intended to curb the competition between convict and free labor. The bill gives each state the right to deny entrance to convict made goods from outside its confines.

Not long ago nine barrels containing 1,800 ducks were shipped from Texas to a Chicago firm, but were seized en route by the deputy game warden and given to charitable institutions. This is the biggest seizure since the new state game law went into effect prohibiting the shipping of wild game into or out of Missouri.

The Missouri State University will hold three classes for an eight weeks' course during January and February. The course is for the benefit of boys who have not time or money to take a full course in the agricultural college. The work taken up will be along the lines of plant propagation, animal husbandry and dairying.

Recent action of a convention held in Guthrie, Okla., resulted in fixing the location of the state capitol, temporarily until 1913, at Guthrie. A special election will be held to locate the capitol permanently.

There has almost been a coal famine in some towns in Cowley county, Kansas. Some time ago a through train was stopped on the St. Louis and San Fran-

cisco road and two cars of coal appropriated. This coal was consigned to points in Oklahoma. The citizens expect to pay for the coal, but were unable to get any without taking these extreme measures.

Less than one per cent of Kansas highways are surfaced with stone or gravel, according to a bulletin recently published by the department of agriculture. Ellis county has sixty-six miles of stone and gravel road and Cherokee county forty miles, while Franklin county has thirty-five miles. These three counties have more improved roads than all the other 102 counties in the state put together. The total expenditure on roads in Kansas in 1904 was \$692,823 in cash, \$539,994 in labor, making an average of \$12 per mile expended on the roads in a year.

The Kansas Agricultural College won high honors at this year's International Exposition. That institution succeeded in getting a Short-horn steer into the line-up for the grand championship prize, the first time that a Short-horn ever stood so high at the International. In the herd of steer classes this institution also came within an ace of winning first premium. Many ringsiders favored their three white Short-horns for first place. Had they been put there they would have stood an exceedingly good chance of winning the grand championship herd prize. The affairs of the Kansas Agricultural College, notably in the animal husbandry department, seem to be in good hands.

If Missouri were as thickly populated as Rhode Island her population would number thirty million. The average farmer in Missouri has 120 acres while in Kentucky, where many of the present settlers came from, the average is ninety-three acres. There is little danger of the rural population in our western states being crowded for some time to come.

A Texas congressman recently introduced a bill into the house for the discharge of all colored troops in the United States army. While this element are brave fighters and hardy soldiers that quality it is claimed should not be an argument against the bill, as there are Indians and other races of men that are brave, but nevertheless are a dangerous element in the troops that guard the nation.

McMillan's Percheron Sale.

The eighth annual sale of Lakewood Percherons was held at Sioux City, Iowa, December 12th and 13th, by Mr. H. G. McMillan, of Rock Rapids, Iowa. As had been predicted in former issues of The Homestead, the offering was a very select one, and in fact, the best ever made from this great breeding establishment. The sale had been well advertised and this, coupled with the grand array of prize winnings at the Iowa State Fair, the Minnesota State Fair, Sioux City Interstate Fair and the International in Chicago, caused buyers throughout the length and breadth of the land to prick up their ears and take notice that something was doing at Lakewood. Seldom has it occurred in the annals of history, if indeed ever, that such a choice galaxy of Percheron breeding in such large numbers was ever offered the public. It was the horseman's opportunity, and he embraced it by being present from twelve different states, and rendering assistance in making Percheron history. The get of Calypso (chief stallion at Lakewood) was very much appreciated and sought after. Buyers recognized unusual merit in sons and daughters of this famous sire. Calypso's get in the sale made the handsome average of more than \$700 each, including both stallions and fillies, some of which were hemished (by wire) and several yearlings were included. The unprecedented show record of Calypso, backed by the results of this sale measured by the auction block test, certainly justify Mr. McMillan in refusing to consider \$10,000 for this great stallion. Calypso mares bred to Olbert went like hot cakes on a cold

CROPS WITHOUT WEEDS

The way to get them is to clean and grade your seed. Clean, graded seed yields 5 to 15 bushels more per acre, the grain is better quality, less liable to rust and smut and sells for a much higher price. Every 20 acres of land cultivated will pay for a grader every year; the increase in value and crop yield will net you a handsome increase in profits and pay the Rent for the grader besides increasing your farm of weeds and noxious plants. Our Little Star

COMBINED CORN SORTER, GRAIN GRADER AND GRASS SEED CLEANER

is the most efficient and economical machine of its kind made. Cleans, grades and separates any seed or mixture of any four similar seeds at the same time—does the work of Three Machines but costs only the price of one. Has double the screen surface of any machine of its kind—7 complete riddles and 4 double wire screens. Our "Corn Grader" Screens No. 8 and No. 9 provide an absolutely uniform "drop" from the "Corn Planter," edge drop or otherwise. Every machine guaranteed. Will do all grain and seed work for 100 acres. Price \$19.98. Freight paid. Write today. HALL GRAIN GRADER CO., 224 Locust St., Winfield, Iowa.

day. Certain it is that two more famous high-class stallions do not stand at the head of one stud on the American continent. The bidding was spirited throughout the major portion of the two days' sale. With Col. F. M. Woods in the box, ably assisted in the ring by Messrs. Pat McGuire, Dan Sayre and Mr. Shutt, of Oregon, all was done that was possible to extract the high dollar from the bidders for this choice offering. The following is a list of states that was represented by buyers and visitors: Iowa, Illinois, Nebraska, Kansas, Colorado, Indiana, Wisconsin, Minnesota, North and South Dakota, Missouri and Alberta, Canada. One feature that militated against higher prices of the mares and fillies was the fact that many of them had been bred late in the season and were not showing to be in foal through outward appearances. Nevertheless, the sale must be characterized from every standpoint as the best ever held in America, numbers considered. Mr. McMillan from the start inspired his audience with confidence that this sale, like all its predecessors, would afford the buyers a square deal, and this theme was carried out to the letter. There will probably be no other event of like character occur in the United States this year until February 27th and 28th, at which time Messrs. Watson, Woods Bros. & Kelly Co. will make a similar sale of Percherons at Lincoln, Neb.

Purinton Steam Feed Cooker

Quick and Economical.

Free Trial Offer.

We are so sure of the merits of our cooker that we send it out on

A Week's Free Trial,

without signing of notes or other obligations, to be paid for if it proves satisfactory.

If we hadn't the utmost confidence in our boiler we couldn't afford to do this.

Made in various capacities to suit all requirements. Send for catalogue today.

Takes Little Fuel and is Absolutely Safe.

Use wood, cobs, coal or anything burnable.

Provided with supply tank for refilling while steam is up, and double jointed cooking pipe which can be put into barrels around boiler without unscrewing.

CRESCENT FURNACE & FOUNDRY CO., 804 Madison Street, Des Moines, Iowa.

IN AND AROUND WISCONSIN.

"Grassland," the car carrying an exhibit of northern Wisconsin agricultural products, attracted much attention from visitors at the recent Chicago stock show.

The Minnesota State Poultry Association will hold its twenty-first annual exhibition at Minneapolis, January 15th to 23d. Eggs and dressed poultry will occupy a prominent place and prizes and eups have been freely offered in the premium lists.

Wisconsin implement dealers at their last convention decided to wage a strenuous war against the parcels post and the mail order house. The meetings were two hundred and fifty strong and will petition congress.

A very important discovery of marl has been made in Marionette county which promises to make a great industry for the community in which it is located. Marl is the basis of cement manufacture. The deposit covers a large area and is said to be almost inexhaustible. Whether Wisconsin users of cement may expect lower prices on this material is a question for later discussion; however, the cutting down of freight expense is quite probable.

One hundred and forty students are registered for the winter dairy school at the state university. For the first time since this department has opened, there is an equal attendance of creamery and cheese factory operators. This indicates an awakening among students regarding the importance of the cheese industry. Formerly the low wages of this kind of operators prevented them from taking the full course.

The Wisconsin State Grange held its thirty-fifth annual convention last week at Medina. Among the subjects of discussion were public highways, oleomargarine bill, parcels post and postal savings banks.

The deer slaughter in Michigan is estimated to be about 15,000 carcasses. The fact that nearly a score of people were killed or injured in connection classes this sport with football.

Wisconsin herds and flocks made a strong showing at the recent fat stock show in Chicago. There were four horse exhibits, five cattle herds and five flocks of sheep. The Wisconsin University made a very prominent showing as usual in the sheep and swine departments.

The building committee of the state capitol have now bids for certain parts of the structure under consideration. For the exterior work Georgia marble is favored for its handsome finishing qualities. Wisconsin granite had its advocates, also, though it is difficult to secure.

James Nevin, superintendent of the state fish hatchery recently inspected some of the headwaters of the White River near Wautoma in Waushara county, and think it may make an ideal place for the location of hatchery for trout.

Seven killed and nine wounded is the final report of deer hunters fatalities in Wisconsin. This year has been less dangerous for the sportsmen than any past. Wood choppers and lumbermen have suffered death as well as hunters by being taken for game.

Representatives of three large Milwaukee hotels have organized a company which will operate a farm to supply vegetables, farm produce and poultry to the hostleries. A former surper-

intendent of a state institution takes charge of the farm.

Shipping live carp from Wisconsin lakes, where they are taken in nets, to Chicago, there stored in tanks and fattened for a special trade is a business that is assuming considerable proportions. At the last movement of shipment the fish which range in weight from a few pounds to fifty, are packed in boxes alive and surrounded by snow or chipped ice. This covering prevents the entrance of air and during the few hours of the run to the city there are very few that succumb. In Chicago they are at once turned into large vats and fattened on refuse from eating houses. While the ordinary American palate does not relish carp highly, the Jewish people buy them readily, as the fish can be purchased alive and killed according to religious rites.

The railroad commission of Wisconsin has just issued an order reducing freight rates on sugar beets about 20 per cent. The Wisconsin Sugar Company, of Menomonie Falls, and the Chippewa Sugar Company, of Chippewa Falls, petitioned for a reduction in rates on this product and the commission held several hearings on it. The railroad companies affected are the St. Paul, North-Western, Omaha, Wisconsin Central, and Illinois Central. The new rates range from forty cents per ton for a twenty-five mile or less haul to \$1.70 for 275 to 300 mile haul.

After months of preparation the first work on the new drainage ditch in the townships of Yorkville and Raymond in Racine county has been begun. The work will be pushed as long as the weather will allow and when completed the land within several miles of the canal and extending its entire length of ten miles will be drained and from wet, soggy fields almost useless, will be formed some of the best farming land of that section.

Two hundred and fifty tobacco growers and dealers were in convention lately at Madison. This is the sixth annual affair and a prosperous future of this business in Wisconsin is prophesied. Resolutions were passed asking the feder-

ONE LEVER DOES IT ALL ON THE I.H.C.

You would rather operate one lever than to get mixed up with three or four. The I. H. C. Spreader has but one lever—the only spreader of that kind.

This is just one point of superiority over other spreaders. There are others. No other spreader has a vibrating rake to level the load and bring the manure up square to the cylinder. Everybody knows a spreader works better and gives a more even distribution when the load is level.

Great power is required when a spreader is in operation to run its cylinder, move its apron, level the load, etc. The I. H. C. Spreader gets ample power from both the rear wheels of the wagon.

It not only gets more power but it is surer of its power at any moment. It makes no skips, and it avoids friction, side strains, and consequent breakage.

This same thing helps to secure the light draft for which I. H. C. Spreaders are noted.

Its steel wheels have a superb strength. Broad tires, they do not rut the land or cut in to make heavy pulling. The turned-in flange keeps out the dirt and mud.

Rear wheels are provided with traction lugs. There's no slipping or sliding on wet or frozen ground.

It has a wide range of feed. You spread as thick or as thin as you like.

You see everything has been thought of and worked out to make the I. H. C. the leader of all spreaders.

You have choice of two types—Clover-leaf, endless apron spreader and the Corn King, with return apron. Each type is made in three sizes.

If you buy an I. H. C. manure spreader you know it is right.

Call on the International local agent or write us for catalog.

Send three two cent stamps for a copy of "Farm Science." Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

International Harvester Company of America, Chicago, U. S. A.
(INCORPORATED)

al government for an appropriation to carry on experimental work.

The champion car load of fat Angus steers at the International sold for the highest price yet to be recorded. A New York firm secured them at seventeen cents a pound. They were owned by Funk Bros. Co., of Illinois.

Marking Sale Hogs.

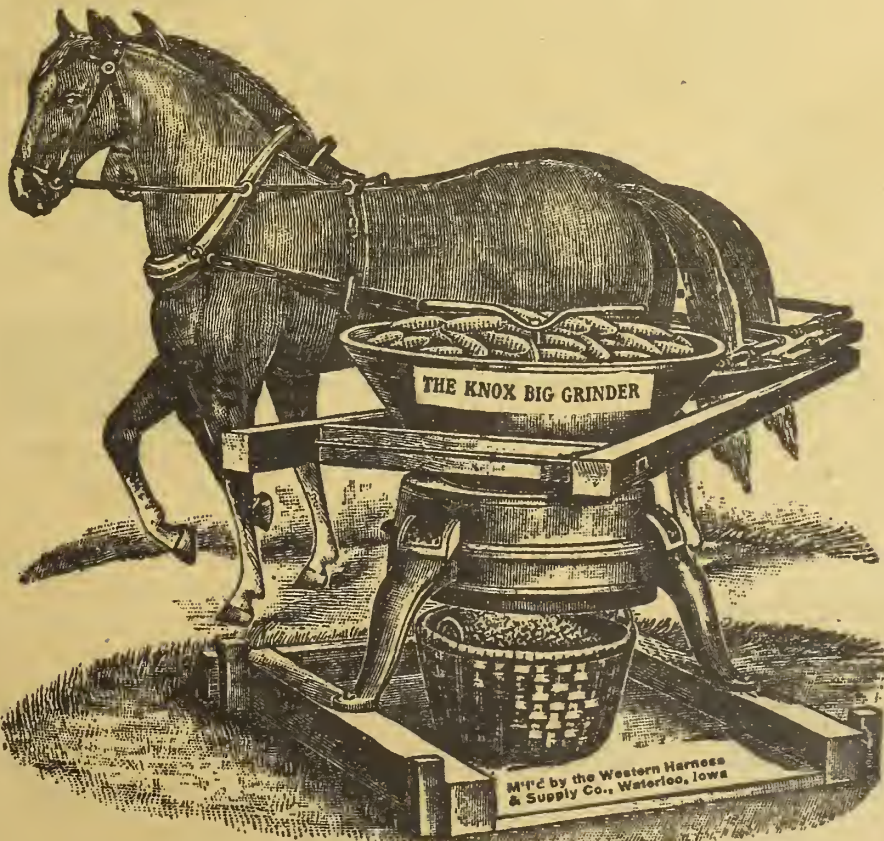

To the Editor of The Homestead:

The marking of sale stock to the satisfaction and convenience of both buyer and seller is no small job. In all my sale experience (which is nine in number) the best method I have ever found is to number the hogs on the back with white paint mixed as thickly as can be

applied with a half inch round brush. The brush should be wrapped with string close to the end to keep it from spreading, thus making the mark too wide and scattered. In making the figures one cannot operate the brush as if on a board or other smooth surface. They should be made by dotting the outline of the figure. By so doing the hair will be left straight.

I have marked my sale hogs in this manner and by the lead being thick and stiff the letters would remain plain for one month after sale. White hogs could be marked likewise with black paint. I usually make figures about four inches long, which can be seen from any part of the sale pavilion.

Iroquois Co., Ill. J. A. Rosenbery.

If any of our readers want to buy a feed grinder, one of the most useful machines on a farm, we would recommend them to the Western Harness & Supply Co., Box 53, Waterloo, Iowa. This concern manufacture a full line of feed grinders, feed cookers, tank heaters and harness which are recognized as one of the best lines on the market. They sell them direct from their factory to the farmers, giving them the benefit of factory prices. They sell their Knox Big Grinder for \$23.25 and guarantee it to grind fifty bushel baskets full of corn per hour and also guarantee it against breakage for two years. They also say if it isn't the best grinder you ever used, they will gladly refund your money. The Western Harness & Supply Co. have advertised in this paper for five years and are a concern our readers may safely deal with. Their advertisement is found on the back cover of this paper. Send for free catalog giving full description of their wares, and kindly mention this paper.

WITH THE EDITOR.

A CHRISTMASTIDE HOMILY.

Think of the bewildering loveliness of
spring-time—sunshine creates it. Sun-
shine frees the prisoned waters and car-
resses them into dimpling streams which
sing in very gleesomeness; sunshine
touches herbs and vines, trees and flow-
ers, and straightway they smile into
beauty and fragrance. Think of the op-
ulent splendor of summer—sunshine cre-
ates it. Sunshine paints the rose and
flavors the strawberry; sunshine brews
the luscious cup of odors which intox-
icates the senses under the August
moon; sunshine stirs every flying, creep-
ing creature until the world throbs with
the whir of wings and the hum of count-
less voices. Think of autumn's splen-
did richness—sunshine creates it. Sun-
shine yellows the corn and the wheat;
sunshine ripens the grape and the ap-
ple; sunshine fills the storehouse and
the barn. The promise of spring, the
joy of summer, the glory of autumn—
sunshine creates them all. Great is sun-
shine.

Some years ago at a Salvation Army
meeting presided over by the late la-
mented Mrs. Booth-Tucker, an English-
woman sang a song whose refrain runs:

Open wide the windows,
Open wide the doors,
Let the blessed sunshine in.

After the soloist had sung this re-
frain Mrs. Booth-Tucker stepped for-
ward and said, "Now, all sing it. Sing
it with a will." And the crowd sang.
Like a command the words rang out:

Open wide the windows,
Open wide the doors,
Let the blessed sunshine in.

Again Mrs. Booth-Tucker stepped for-
ward. This time she said, "Won't you
sing it once more? Softly this time,
please." And the crowd sang beseech-
ingly, entreatingly, as if they prayed:

Open wide the windows,
Open wide the doors,
Let the blessed sunshine in.

Such music never dies; the winds catch
its echoes and toss them to and fro
and on and on. Do you not hear it?
Now it bids you. Now it entreats you.
Listen:

Open wide the windows,
Open wide the doors,
Let the blessed sunshine in.

Sunshine is love and love is God—God
made manifest in the Babe of Bethle-
hem. It is the sunshine song the Christ-
mas bells peal out.

With sweet insistence they reiterate
the love motif. They embroider the can-
tus firmus with wondrous counterpoint.
But the message is the same. "Peace on
earth, good will to men," they peal. Yes,
and one may catch, "Beloved, let us
love one another, for love is of God." It
is a variation on "Let the blessed
sunshine in."

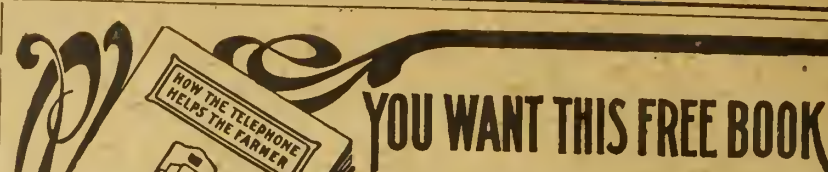

The store windows are gay with prep-
arations for the Christmas trade—since
the wise men brought gold and frank-
incense and myrrh to the Christ Child
in the manger Christmas has been a
time of gift giving. We gaze in the
windows, and as we gaze we long for
the purse of Fortunatus. We sigh and
we turn away. But are we not foolish?

God gave Himself to us in the per-
son of a little child. Stirred by His
gift we fain would give. And we long
for riches that we may buy gifts.

Love is the supreme gift; no material
thing can be more than a medium for
its expression. And no material thing
can be more than a medium for its
expression. To love is to give. As the
sun gives itself in shining, so may the
soul in loving. Love is the sunshine
of the soul. And who wills may have
and give. It is without money and with-
out price, this choicest of gifts; this
gift which blesses the receiver as can
no other gift however costly.

'Tis passing strange how chary some
of us are of giving ourselves, of scat-
tering sunshine as we go. We lavish
our money in the purchase of gifts, or
sigh if we have none to spend, and we
withhold the only thing which makes
any gift worth while.

If only we were wise, if only we un-
derstood, we should know that far bet-
ter than any gift we can buy or make
with our hands, far better than any set
gift at any set time is the daily giving
of ourselves in love and faith, in gen-
tleness and courtesy, in patience and for-
bearance, in tact and kindness, in truth

YOU WANT THIS FREE BOOK

Here is a book—yours for the ask-
ing—which should be in the hands of every
progressive farmer in America. From cover
to cover it is brim-full of facts of vital im-
portance to you. It comes from the great-
est independent telephone house in the world—the
house that has been most instrumental in bringing the
blessings of the telephone to hundreds of thousands
of farm houses all over the land. It shows you
how simple and easy and inexpensive it is to own a

Stromberg-Carlson Telephone

system—a system that is a money-saver every hour in the
day—a convenience and comfort you shouldn't even try to
do without, and a protection against sickness, robbery,
danger and fire that pays back its trifling cost over
and over and over again. You owe it to your business and
your family to get this book at once and read every line
in it. Your letters will get personal attention and you'll
have the help of experts from this great factory in every
move you make toward owning a telephone. Sit right
down now and say: "Send me your 52 page booklet
G12 "How the Telephone Helps the Farmer."

Stromberg-Carlson Telephone Mfg. Company

ROCHESTER, N. Y.

CHICAGO, ILL.

The Easy Way

A child of ten can run an O K washer, standing or sitting, and
do the work right. It is just simplicity itself. No complicated and
expensive parts like machines that squeeze, pound, and force water
through the clothes. Fly wheel turns either right or left—plan wheel revers-
es automatically. Clothes are turned back and forth through the hot
suds, dirt is dissolved and they are cleaned thoroughly and per-
fectly and quickly. O K washers are sold on their merits alone. We make no "free" offers.
So is every other washer sold. Do not be caught by "free" talk. If you don't believe
it just try to get one of their machines for nothing.
O K sales have increased in six years from 25 a week to 350 a day. Sold, mind you,
not given away. It's the washing machine people are glad to buy when they know it.
And it's sold at a fair price. Our free book explains. Write for it.
H. F. BRAMMER MANUFACTURING CO.,

STEM WIND American movement Watch
highly engraved and fully warranted timekeeper
equal in appearance to a Solid Gold Watch, also a
Solid Gold Laid Ring, set with a Famous Cogo
Gem, sparkling with the fiery
brilliance of a \$50 diamond, for
selling 20 pieces of business
jewelry at 10c each. Order 30 pieces
and when sold send us the \$2.00 and we
will positively send you the watch and ring; also a chain, Ladies
or Gents style. **ALTON WATCH CO., Dept. 121, Chicago.**

Better not. The present gain can never
compensate for ultimate cost.

Let's be better neighbors,
With a willing hand
Help to lift the fallen
To a higher stand;
Do some good for others,
Say ill things of none,
Have an easy conscience
When the day is done.

CAROLS AND STORIES.

Never let any Christmas pass that you
do not sing the dear old Christmas songs.
Somebody at the piano, everybody singing
and the whole gamut of praise and melody
weaving itself around the day when to earth's
darkness came the light of the ages. Read
the story of the manger, of the wise men,
of the shepherds, of the angels, of the Babe
on mother's knee. For
"Still through the cloven skies they come
With peaceful wings unfurled,
And still celestial music floats
O'er all the weary world."
And when you have finished St. Luke's
amazing narrative, and the children are all
away, enjoying their presents, you two, hus-

band and wife, can do no better than take down from the shelf your old copy of Dickens, and read again *Boots at the Holly Tree Inn*, *The Cricket on the Hearth*, and *Caleb Plummer and His Blind Daughter*. Not all in one day, but one every day till the holidays are over, and you swing back again into the ordinary work-a-day life and the world of struggle that flamed into such radiance under the star of Bethlehem.

IN MOTHERLAND.

In Motherland, at Christmastide,
That's where I fain would be.
At that dear seat of blessing
Where God appointed me.
To look into my mother's eyes
And see the holy star,
Which leads my soul to love-lit goal
Where God's best bounties are.

In Motherland, at Christmastide,
That's where 'tis best to be.
The safest place of refuge
From care and loss to flee.
To feel again the fond embrace,
And find the high increase
Of heaven's grace in that dear face
Which tells of love and peace.

In Motherland, at Christmastide,
Life's highest throne is set—
There's naught to fear, for Peace is here
To place Love's coronet.
In Motherland, at Christmastide,
While angels thronging come,
The pure in heart may see, in part,
The God who gave us Home.

THE CHRISTMAS TREE.

The very essence of the Christmas tree idea is especially, in the minds of the children, that it not only should be beautiful, but also should bear Christmas fruit. Yet I have seen trees ablaze with lights and glittering bangles, with never a goodie to eat. The pity of it! The disappointment of it! Aye, the wrong of it, since the tree is there with its promise. Practically, it is a saving to digestion to place the Christmas sweets intended for children on trees, as they dismount them slowly, being reluctant to spoil their beauty. Let nearly every article then on the Christmas tree be a receptacle for something good, or fruits, not requiring receptacles. Make a number of little bags (of silk or silkoline) for holding the sugared popcorn, dates, nuts and raisins. The same filling will answer for cornucopias, of which there should be a generous number, and in varying sizes and colors. Gilded walnuts make a very effective decoration, and they always delight children, because, pretty as they are, they may be cracked and eaten. Use English walnuts, and first pass a wire around each one and secure it, leaving an end for attaching to the tree. If you can secure the old-fashioned hearts, animals, walking sticks of pure sugar, be sure to do so, and let the red apples and yellow oranges dangle from the branches.

IN HOLIDAY TIME.

Wrapping Christmas Gifts—Provide yourself with an abundance of white tissue paper, as well as pink and blue, also with pink, blue and white ribbon for the inner wrappings. Then invest plentifully in red and green rib-

bon the shade of holly berries and leaves for tying the outside of the packages. Wrap the packages as daintily as possible in any appropriate shade of paper and tie with ribbon. Lay in this your visiting card, on the back of which write the Christmas message of which the world never grows weary: "Peace on earth, good will to men." Then wrap these in white tissue paper, tie one way with red ribbon, the other with holly green, and where the ribbons cross insert a sprig of holly leaves and berries.

CHRISTMAS CAKES OF OTHER LANDS.

Speculoes (St. Nicholas Cakes)—One pound butter, one pound brown sugar, one-half pound blanched almonds, one egg, one teaspoonful cinnamon, nutmeg, cloves, baking powder, peel of one lemon grated, also of one orange; one teaspoonful salt. Mix well together, add enough flour to make a very stiff dough. Roll out to thickness of a quarter. Leave dough over night, cut in any form desired and bake in moderate oven.

Dutch Haarlemmer Hallelfes—Two pounds flour, nine and one-half ounces butter, three ounces sugar, five eggs, cinnamon and cloves. Beat butter and sugar thoroughly, add the flour; after it is mixed roll it into a ball. Put on board and roll, then cut in small cakes and bake in moderate oven.

Christmas Cookies (Weinachts Kuchen)—Two pints molasses, six eggs, one-half pound sugar, one pint sour milk, two teaspoons soda, four teaspoons allspice, three teaspoons cinnamon, some nutmeg; enough flour to make into dough stiff enough to roll out. Cut with tin cutters of animals. Cover with frosting and sprinkle with anise seed candies.

Braune Lebkuchen—Three-fourths quart honey, one-half pound sugar, one and one-half ounces cinnamon, one-half ounce cloves, one-fourth pound citron, one-half pound chopped almonds. Add flour to roll out thin. Cut in card playing sizes; ice, adding almonds while soft.

AMONG OURSELVES.

How near it is! Everyone knows what "it" stands for. These days nothing is thought of but Christmas. Everyone is making preparation of some kind—some putting the last touches to little gifts; some trying at the last to do what should have been done weeks ago. There is not time for much in the way of work now, but quite a little shopping can be crowded into the last few days, and a little money can be made to go so far that there is yet time to make Christmas a festival time. The great thing is to catch the Christmas spirit—a beautiful, elusive thing which not infrequently escapes the rich and the prosperous, and often blesses the poor and the lowly. But I have talked about this "With the Editor," let us hear from E. M. S.:

May heaven pity the man or woman who cannot look back over many merry Christmases. When a child, Christmas was to me the happiest time of all the year. I began planning my presents for others long before the time. They generally consisted of something useful and were given with a hope that they might make the receiver happier. As I look back now I believe the true secret of my happiness was that I gave willingly and more often to those who were not likely to get much. In hopes that I may make some children happy, I will tell you of the tree that I enjoyed best. The tree itself was nothing unusual. It was the way we arranged the base—took a dry-goods box about fourteen inches high, made a hole in center in which we put the base of tree and made it solid. Then with rolls of fluffy white cotton covered it and filled in around the sides and ends until we could unroll from tree to floor, which made a beautiful mound in which our tree was standing. This we sprinkled here and there with popcorn, simply because little three-year-old May loved to pick it off. "Not anything, very great!" you say. No. On the contrary, very simple, but I have learned that very often it takes what we might call "simple things" to amuse children, and I believe what made it so interesting to us was the doing it ourselves. At least it is worth trying, mothers. This year instead of tiring yourselves doing everything, let the children help with the preparations for the Christmas festivities. A kind word of advice from you, when needed, will only add zest to the merriment.

Christmas is the children's festival by right of custom immemorial. Surely the children of homes Among Ourselves will be given their proper dues of feasting and merrymaking, gift making and gift receiving, but, lest any be hesitating, let us have a few words further, from Mrs. Alice E. Wells:

Whether the family pocket book be plethoric or lean, whether the home circle numbers two or twenty, and whether they live in city or country, the best endeavor should be given to making Christmas at home a happy event for every member thereof, whether present or absent. Ah! never forget the absent boy or girl, if only to send a piece of mother's home-made cake with a "Merry Christmas" and a "God bless you." It takes more loving thought than money to make home folks happy; which fact is a good one, for love and care are within the reach of us all. Giving and receiving has become the most important joy-giving feature of the Christmas season. The best way is to begin early and during the whole of the year keep our hearts open for the reception of God's best gifts of love and sympathy and "good will to men." Let us appropriate a little blank book especially for Christmas ideas—note therein bright thoughts as they occur—of what would be "just the thing" for a gift to father, or "mother would be glad" to have something like that. You hear Mary wish for a book that is beyond her means of purchasing; record the fact where it will not be forgotten. Jerry's wants are often expressed and must not be neg-

To Heat Cold Rooms Quickly

Every house has its cold room. Abnormal weather conditions, inadequate stove or furnace heat often result in some particular part of the house being cold and cheerless. You can make home warm and cheerful with the

MANLOVE Automatic Gate. Always in order. Saves time, adds to convenience, safety, value and beauty of home. **MANLOVE GATE CO., 211 E. Huron St., Chicago**

lected. With a heart filled with "good will" and this little book your mind will not be overtaxed at the last moment with wondering what to do and what to get. We can decorate our walls with holly and mistletoe; load our tables to the "groaning" point with tempting viands and substantial, all stockings and tree with costly gifts; if the Christmas spirit of good will is absent the whole effort is vain. The effect falls far short of its intended lesson. Teach the little ones the story of Jesus and from His life, the blessedness of giving, and living for others. Consult them, as well as the older boys and girls as to the best ways and means of distributing good cheer among less fortunate ones outside the home circle. If the home atmosphere is surcharged with the Christmas spirit, work for others will be a natural overflow and in no danger of being neglected.

Sometimes, do you know, I think we busy ourselves so much with the symbols of Christmas that we almost forget the things the symbols stand for. To do so is to eat the bread and wine of the Lord's Supper, but to miss feasting upon Him by faith with thanksgiving. Perhaps these earnest words from Mrs. Wells will save some of us from such this year.

As I remarked last week we must not allow Christmas to absorb all our attention here Among Ourselves. The friends would not allow it even were I so inclined. Here is a little group all stirred up over Cousin Hardmaster and Mr. R. S. Suppose we pick out a couple to speak for the others. "A West-

CUT ICE

With the Dorsch Double Row Ice Plow We guarantee it will cut more than 20 men sawing by hand. Cakes are cut uniform, of any size and thickness. One man and a horse will cut more ice in a day than the ordinary farmer and dairy man can use. You can cut for others and make the price of our plow in two days use. Ask for catalogue and introductory prices. **JOHN DORSCH & SONS 216 WELLS ST., MILWAUKEE, WIS**

ern Girl" will represent the maids, and Mrs. S. E. O., the wives, who resent the remarks of the men who have so deeply offended many of our women:

I can assure Cousin Hardmaster had his wife her girlhood again she would not choose a husband from the type he represents. For such lose sight of home, happiness and pleasure. For what? The almighty dollar. And when they get hold of it they squeeze it until you can hear the eagle scream from Canada's dominion to the gulf. And do such people ever stop to think of the price they are paying? I am forced to wonder if Cousin Hardmaster knows that it is not the clothes he wears or the dollar he possesses that makes the man. All vegetation dies without water and sunshine. So does love, honor and respect without food for growth. It is time Cousin Hardmaster awoke to this truth, for his wife and children will soon have no respect for him if they still have any. And when his wife has gone to a "better land"—for she cannot long survive under such conditions—he will find out her value when it is too late. And from his children he will reap what he has sown. And he will be despised and rejected not by children alone, but by all who know him. I doubt if Cousin Hardmaster's family really has the necessities.

let alone an organ or piano to cheer their childhood. When they are in homes of their own they will have little happiness to look back upon. Had Hardmaster realized how well the name he chose fitted him I am sure he would never have chosen it.

I have been a silent reader of our Home Department for a number of years. Some questions lately have made me want to get up and say a few words, so here I am. Among Ourselves is a great place to bring out character, some phases of which it is hard to believe existed, or if we did suspect the existence of the species represented by Mr. R. S. and Cousin Hardmaster we did not suppose they would care to air their views in our circle. Not that we are so exclusive, for we are glad to welcome such as Reine's Husband and C. E. K. I hardly understood some of Mrs. Streeter's questions at first, and wondered if there really were any individuals calling themselves men who held women in contempt. (Of course we mean women of good morals.) Can it be there is a kind of man who is utterly careless of his wife's domain? Of her who bears the same relation to the family as the mainspring to the watch? Of her who bears his children, nurses, doctors and cares for them, besides being his cook, washwoman, seamstress, in fact, everything, and is willing when necessary to go out and help him lift his special end of the load? The very easiest that it can be made for us busy farmers' wives is none too good, and you true-hearted men who read this will say to yourselves, "That is so." You may think (to use a homely phrase) that I am laying it on pretty thick for the women, but when Mr. R. S. speaks of woman keeping her place, I wondered what kind of place this world would be if it were not for the women! As to the question, "Why do men stay away from church?" A sincere Christian will not, without a very good excuse, and the picture Mr. R. S. draws of himself—his dress, ten days' growth of beard, etc.—he surely does not want us to think he does it in the name of religion, does he? We are told it was the custom for Jesus to go to the sanctuary on the Sabbath day, so should not that settle it for his followers? I believe with Mrs. Walker, that it is through the mothers we must get rid of these false ideas. Let us teach our boys to be kind and polite to their mothers and sisters, then they will, of course, be so to a wife when they get one.—S. E. O.

It is only once in a while that most of us have the opportunity of seeing ourselves as others see us. When the vision is permitted us sometimes we can hardly endure the knowledge that we look as we do. And, yet, it is good, very good for us to see ourselves so. It is not pleasant to think that we are unlovely, but if we are unlovely it is well that we should know it. Mr. R. S. and Cousin Hardmaster and their relatives should really be grateful to "A Western Girl" and Mrs. S. E. O.

Although Aunt Polly Charles has nothing to say to the two men who have just been taken to task, she has a few words for us which have a bearing upon the subject:

I think it was Mrs. McKerie who asked why a man thought to be saved by his wife's religion. I do not think any man can really think that. Let us pause and consider. How nice it is when husband and wife are agreed on that subject and so order their work that Sunday he indeed "holy" and a day of rest, when they both go with their children to God's house and so strive to bring them up in the nurture and admonition of the Lord. Did we ask before we gave ourselves into their care and keeping if they were like minded with us? If not, we make a mistake and must suffer the consequence of being "unevenly yoked," and perhaps the only hope for us is our consistent life. May God give us wisdom and strength in that case, for it will not often be an easy task. It was asked also, "Should a man be unwilling for us to go away from home and instead of taking us with him say it was the best place for us at home?" No. That would not be courteous and it would really be unkind. A woman needs recreation and relief from the household care and I believe

it is absolutely necessary that she gets it. In what way we must decide for ourselves, for what may bring pleasure to me may not to my sister. It also depends greatly on circumstances when we should and should not stay at home. A husband and wife should mutually agree on that subject. There are times when my husband is from home when I feel my presence there is needed, and when away from home I should not feel happy even with him.

As Christmas is the festival of the home, exalting motherhood and shedding glory upon childhood, there is a peculiar fitness in our having with us this week one who defies the home, placing it above native land or any institution therein except itself. I have pleasure in presenting Donna Juanita:

We should worship the highest work for the highest. It is the highest duty that comes first. A man's highest duty is to the world, the whole of humanity and also a woman. God in his great love has divided the world into families, or we can call them smaller worlds. He has given to each one a little world all of our own, to love, govern and care for until He calls us to give an account of our stewardship. Now, I have never traveled very much, neither have I had the opportunity to read as much as I would have liked, therefore I shall not try to give theories or facts, and as I am only one wee little woman, but with a great big capacity for loving, I shall only try to tell what I feel my first duty to be. You may all sing "Hail Columbia," "The Star Spangled Banner" and "My Country 'Tis of Thee," but to me they never touch the chords of "Home, Sweet Home." Home, the very foundation stone and corner stone of the whole world, the very heart of everything. My very love for my dear ones and my home makes me love my neighbors, perhaps not quite as myself, but I love to be social with them and give them sympathy and help in sickness, in distress and want. Still I have never thought it was my duty to make my husband go without his own dinner while I gave his dinner to another woman's husband. My very love makes me feel my first duty to be to my nearest and dearest. Else why are they mine? My love for my dear ones makes me anxious to do all I can to keep down intemperance and crime, because the less crime and immorality the safer my dear ones are, and man being a money-loving animal, seems to make laws for the benefit of himself and country financially, but I, being a woman and loving my dear ones, look into the details of those laws and can see better than man can the effect the laws have on the welfare of my home and loved ones. And I never hear or see an unscrupulous, drunken sot of a man elected to any public office but I ache—I just fairly ache—to devote my time and energy to have an honorable man or woman placed in that office, not for notoriety and not for the money that is in it, but because those laws govern my dear ones, and I believe it my duty to try to have the best laws made and have them administered by the best people. Yes, I would fight for my country, and as I am a fairly good shot I would really be willing to fight in the front ranks—but not for the number of square miles of land, not for the grand institutions, not for the money that is in it and not for the glory of it, but for this little world of mine away out here in this remote corner of Arizona—this is what I live for. This is what I would fight for and this is what I would die for, and if everyone would do their duty faithfully and honorably to their own little world, keep their own world clean and bright, there would be no need for the millions of mothers attending the big house-cleaning spoken of. But oh, the pity of it—they never all will! And just so long as this old world rolls around, just so long will there be waifs and estrays rambling around from pillar to post steeped in drunkenness and crime for some noble-hearted man or woman to devote their time, love and life in caring for. And I say all glory and honor to those noble souls, and when I think of them it makes me a better woman and makes me try to do my duty more faithfully to my home and loved ones. But if they say it is their first duty, then it must be and it is right for them, but I cannot even pretend to say it is my first duty, for my heart would wander back to my own loved ones and my own home. If you ever lived in a foreign country for several months or a year you know with what joy you turn your face homeward; what joy you feel when you first step foot on your native land, and as you arrive nearer home and meet your acquaintances and friends with what rapture you clasp their hands. But when you stand in the center of your own home by your own fireside, clasped in your husband's arms with your children around you, with their happy welcome, you think "This is my very own, this is love and duty crystallized, the brightest gem I can wear in my heart."

There is an old proverb, which, voicing a self-evident truth, says: "If each before his own door swept, the village would be clean." Unfortunately, as Donna Juanita remarks, a lot of people neglect their dooryards and so make it necessary for some to do more than their share. Most of us here Among Ourselves are so situated that keeping our own dooryard clean is as much as we can accomplish, but we should hold ourselves in readiness to accept new methods and, above all, we should stand loyally by those who are doing double duty in clearing the way for the triumphant reign of the King who came among men as a little child at Christmas time long ago.

variations I have noted nothing nobbler than the one pictured in No. 5452, and yet it is very simple and easily made if the pattern is followed. The costume may be made of the simplest materials, or something expensive may be used if intended for very dressy wear only. That the question of the fabric to be selected is the one that gives the small man's mamma very much solicitude is evidenced by the many queries that come to me. "What shall I make my little boy's suit of and how shall it be trimmed?" The present vogue permits so much variation in the selection that the question is easily answered, and one may select from any of the heavy weight cottons even at this season of the year, or from the medium weight wools, in plain or mixed colors, or in the plaids or in white or cream. Always the latter are fashionable for dressy wear for boys of this age, for winter or for summer. In a garment like the blouse pictured, one may

flar to the one illustrated. The knickerbockers should be of the same material as that used in making the blouse. The belt may be of the costume material or a leather belt may be used instead, and always it should be so fastened on the garment that it will retain the fashionable "drop" at the front. Pattern No. 5452 is cut in sizes for boys of 2, 4 and 6 years of age. Be very careful to give age when ordering pattern, and do not ask for it in other sizes (or ages) than those given.

No. 5524 illustrates a very simple and yet modish dress for girls from six to twelve years of age, but while so simple it yet permits as much elaboration as one is apt to wish for on such a garment. The lines are graceful, the front suggesting the princess, but the skirt and waist portions are cut separate except at the immediate front, then they are joined in a seam which is concealed under the belt that is a shaped one, and may be made of the dress material or of whatever is selected as trimming. The waist has a lining on which the chemisette is arranged, and this may be of lace as shown or of whatever may be selected for the purpose. The sleeves

[5452 Boy's Blouse Suit, 2 to 6 Years.]

[5524 Girl's Dress, 6 to 12 Years.]

are shown pleated at the wrist, but they may be gathered if preferred. Cuffs finish the sleeves. Pattern No. 5524 is cut in sizes for girls of 6, 8, 10 and 12 years of age.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

I want DIFFICULT Eye Cases

I WANT every man, woman or child afflicted with diseases of the eye to write to me. No matter who the person is, what their trouble is, or where they live, I wish to convince them that in my Absorption Method there is hope, and you would say so too, if you knew of the many, many cases that I have cured after others termed them hopeless. Here is one of the hundreds of cases successfully treated by the

America's Master Oculist.

MADISON ABSORPTION METHOD

after others termed it hopeless.

Mrs. F. L. Wintermute, 121 Second St., Jackson, Mich., under date of Oct. 18, 1906, writes: "After having been repeatedly told that there was no cure for my cataracts except an operation, today my eyes are perfect by means of your knifeless home treatment. I have regained my vision in six months."

Now, remember, no matter what your eye trouble may be, even if you are cross-eyed, sit down and write me today describing the case, and I will tell you what to do. I will also send you FREE my 80-page Book, illustrated in colors, which is a classic on diseases of the eye. It will tell you who I am, what I have done and what confidence others place in me. I treat every case personally. My reputation was gained by curing difficult eye afflictions.

The International Sunday-School Lesson.

Fourth Quarter. Lesson XII. Luke XXIV, 36-53, December 23, 1906.

Jesus Ascends Into Heaven.

Only by matching Scripture to Scripture will we have a complete delineation of this transcendent scene. Take, for example, the closing verses of the gospels of Mark and Luke, the opening paragraph of the Book of Acts and Psalm lxxviii, 7-18.

On a certain day, conspicuous and memorable, last of the forty mystic days since His resurrection, Jesus led His disciples to well-remembered Olivet. Together they went down into the deep chasm and across the Brook Kedron, past Gethsemane, place of agony and betrayal, along the oft-trodden road, the very way by which, strewn with garments and palm branches, He had approached the city in triumph, and so on toward Bethany.

The text in Acts reads, "And being assembled together with them;" the margin reads, "Eating together with them." This was the real "last supper." Under some grateful shade, beside some brimming fountain, they sat.

The ten recorded appearances, and the many not recorded had helped to wear away in good part the preternatural character of the risen Savior's associations with His disciples. So that this last instance of personal contact was preeminently natural, social and solacing.

Under these favorable conditions, Jesus' last commands, which are of inexpressible importance, are now communicated. Personal safety would have suggested to the disciples immediate flight from Jerusalem. Two days would have taken them to happy Galilee, with its comparative security—far from the melancholy scenes of the Savior's betrayal, humiliation, and death. But Jesus offsets the dictates of heart and flesh with His direct command that they should not depart from Jerusalem. He promises the effusion of the Spirit. Here inveterate racial prejudice intrudes the question whether this is the time when the kingdom will be restored to Israel. Jesus' patience is unending. He shows how an exclusive pride of race can have no place in the world-wide dimensions of His coming kingdom.

Frederick W. Robertson has spoken discriminating words upon progress by "oblivion of the Past." But there is also a helpful oblivion of the Future—there is a blessedness in not knowing "times and seasons" with absolute precision. The disciples are encouraged by the affirmation that the kingdom is near. They are not told how near in order that they may be alert.

It is surprising to notice that the com-

mentators magnify the resurrection of the Lord at the expense of His ascension. Among all the lives of Jesus, scarcely one devotes more than a single paragraph to the latter scene. This is philosophically wrong. The whole life of Jesus was an ascending scale. It was progressive and cumulative. The last scene on Olive's brow was a splendid golden climax and triumph of the inspiration of which the Church ought not to be robbed.

The last attitude in which Jesus appeared on earth was that of hands outstretched in benediction. "And He lifted up His hands and blessed them, and while He blessed them—" Could anything be more significant? The whole tenor and purpose of His life was to bless. What mute significance in this last act and attitude.

While in this very act He was parted from them—literally, "He stood aside from them"—as the minister stands apart from his congregation in plainest view of all. Every disciple had an equally favorable opportunity to witness the spectacle. Every eye beheld Him. While His hands were still extended in benediction He was "taken up"—possibly by a convoy of angels. "The chariots of God are twenty thousand, even thousands of thousands."

Again, a cloud received Him out of their sight. No ordinary cloud, this! A royal chariot of fire awaited Him who makes the clouds His chariot. This was the shekina, the effulgent flame of the Divine Presence. The glory of God the Father covered the retreating form of God the Son. This was a spectacle, the majesty of which shall only be equaled by the "second appearing of the great God and our Savior."

No wonder that as the apostles gazed upon the ineffable scene they worshiped they burst forth into adoration and praise. Thus they stood long after the radiant spectacle had vanished. They were riveted to the spot. They gazed wistfully into the heavens as if they longed to follow their ascending Lord or to see Him return.

Jesus, even in the midst of His triumph, was tenderly mindful of His disciples. He detached two of the angels from His train and dispatched them to break the spell which held the disciples as if in chains. How tenderly these ministering spirits, in their bright festive garments, accomplished their task! There is just the gentlest possible rebuke of this continued and wistful gazing, and there is joined to it the delightful and inspiring promise of Jesus' sure return in equal glory.

And now, the spell broken, the disciples take their Sabbath day journey from Bethany into Jerusalem, "with

DEFORMITIES CURED!

ALL PERSONS CRIPPLED OR DEFORMED, LAME OR PARALYZED, SHOULD INVESTIGATE AND SEE
WHAT IS BEING ACCOMPLISHED AT THIS INSTITUTION FOR THESE CASES.

CROOKED OR CLUB FEET of any variety, and at any reasonable age, can be made straight, natural and useful. The methods used are mild; no cutting, no plaster paris, no severe or painful treatment of any kind, and the result is guaranteed.

POTT'S DISEASE, when treated in time at this institution, will result in no deformity; paralysis will always be prevented; the health and strength of the patient is at once improved; the growth not interfered with. Plaster paris is never used.

SPINAL CURVATURE, even in long standing cases, can be perfectly corrected by the new and improved methods in use here; plaster paris, felt or leather jackets are never employed. Names of patients recently cured, after all ordinary methods and doctors had failed to afford relief, will be furnished on application.

HIP DISEASE can be cured without surgical operations or confining the patient to bed. Abscesses, shortening deformity and loss of motion can always be prevented, and, if already present, can be cured. The methods used here in the cure of Hip Disease in all its stages are radically different and more successful than those generally employed. Write for information.

PARALYSIS AND RESULTING DEFORMITIES. For no class of conditions has greater preparation for successful treatment been made. Deformities of the limbs, joints or feet, resulting from Paralysis, can always be corrected without surgical operations or severe treatment. Paralysis should never be neglected; children never outgrow it; it is not incurable.

CROOKED AND DISEASED KNEES, HIPS, HANDS, LIMBS and deformities resulting from Rheumatism are successfully treated without pain.

This is the only thoroughly equipped institution devoted to the cure and correction of deformities. Examination and consultation by mail or in person, free of all charge. References furnished on application. Pamphlets sent on request.

great joy, praising and blessing God."

Analysis and Key.

1. Last of forty days. Approach to Olivet. Last meal en route. Preternatural character of Jesus' presence reduced by contact.

2. Last commands. Flight to Galilee natural course. Departure from Jerusalem enjoined. Effusion of Spirit promised. Racial pride shown to be inconsistent with world-wide kingdom. Progress by oblivion of the Future.

3. Resurrection of Jesus magnified at expense of ascension. Latter dismissed with single paragraph; philosophically wrong. Jesus' life—progressive. Ascension, golden goal.

4. Last attitude—benediction.

5. Parted and received.

6. Apostles worship and gaze. Angels break their spell.

The Teacher's Lantern.

An old legend says St. Luke was a painter as well as a physician. Whether that be true or not, he shows genuine though unconscious skill in this delineation. He paints with words if not with pigments.

Jesus talked about the things pertaining to the kingdom of God in the last moments with His disciples. The things we consider supreme are the things we talk about. Not talk in the sense of philosophizing, but with a purpose that the end be accomplished.

Christ's words are spirit and life—"Breakers ahead! starboard hard!" How

meaningful such words to imperiled passengers. They are spirit and life. But not more so than Jesus' words.

The architect may be dead in the crypt and the cathedral still go on building according to his plans. But our Master Builder ever lives and directs His ever growing structure.

He did not give His disciples history, but He bade them make it.

The vertical power of religion in the heart measures its horizontal power in the world.

The visible ascension was necessary. Those who were to preach a risen Savior must needs know what had become of Him. They must know it by their physical senses.

The ascension was the correlate of the resurrection.

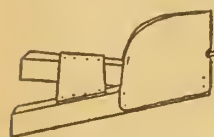

NOTICE.

When you write your friends in North Dakota advise them about the low-rate tickets on sale now for home visitors to Iowa points—one and one-third for the round trip. Don't forget to tell them that the Chicago Great Western Railway is the only line which has three trains every day in the year between St. Paul and Minneapolis and Iowa points. Complete information from E. J. Sawyer, 514 Walnut St., Des Moines, Iowa.

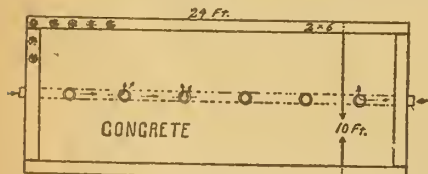

HOLIDAY RATES VIA M. & ST. L. R. R.
On December 20, 21, 22, 23, 24, 25, 30 and 31, 1906, and January 1, 1907, the Minneapolis & St. Louis R. R. will sell excursion tickets to all points in Iowa, Minnesota, Wisconsin, South Dakota, North Dakota and to many points in the South and West at one and one-third fare for the round trip. Final return limit Jan. 7, 1907. Purchase tickets at City Ticket Office, 512 Walnut St., or Union Station. D. B. Ransburg, City Pass Agent.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

The spirit of railroading pervades the heart of many a farm boy. This simple sketch of a small snow plow shows how one boy has solved one of the phases of travel on the farm. For forty years perhaps his father has waded the banks and worked hard with the scoop, to clean a path to the barn and out-buildings. With a horse and a simple wedge-shaped sheet-iron protected snow plow a path can be made to the mail box and every other building on the farm in so short a time that it is more like play than work.

This illustration entails a problem in corn crib floor construction. One of our subscribers, Mr. J. B. Abell, Christian county, Ill., desires to have his plan discussed by our readers who have had experience along these lines. The plan is to use hedge posts two and a half feet long, setting them in the ground every two feet apart to support the sill, which is a 2x6 oak timber. The hedge posts are set deep enough to allow the sill to come within four inches of the surface. Next a line of sewer pipe is laid from end to end of the floor with a pipe or T joint leading upward every three or four feet. The space enclosed by the sills is then ready to be filled with concrete. The holes around the hedge posts are filled and when finished the floor should be on a level with the sill covering the sewer pipe and leaving the T's level with the surface. The idea is to have a substantial floor under which rats cannot work. The sewer pipe is intended to supply ventilation. Screening over the tops of the T's keep vermin

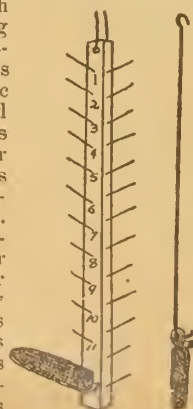

from entering. The following questions are asked: Will the sills hold the sides from bulging at the floor line? Is the floor thick enough to support the weight of the corn? Will plenty of ventilation be afforded? This last question is the important one. Considering the width of the crib, it looks rather doubtful if corn would keep except under the very best conditions. However, we leave the question open for discussion. The crib is 10x24 feet.

A very handy and simply made grit box is one made after the pattern shown in the illustration.

The grit is placed in the feeder from the top and will hold a peek, more or less, depending on the size, which may be made to suit the needs. At the bottom the grit works out and is there picked up at will by the poultry. The box is made with a hook on the back and may be placed against the wall wherever convenient.

Two devices for hanging and drying seed corn which have proven valuable on many farms, are represented in the drawing. The one is simply a heavy iron rod or wire with a hook for hanging and one at the bottom to hold the ears from slipping off. The first ear is attached by the husk, as is each succeeding ear until the top is reached. We are under obligation to Mr. L. K. Russell, Nodaway county, Mo., for this hint. The other device is made by driving finishing nails into the four sides of a strip two inches square and of any desirable length. This latter probably allows a better circulation of air and may be used when husks

have been removed. It gives the further advantage of being less attractive to mice and other vermin which are always looking for a place to work mischief. Ears can be removed with more ease when it is wished to test them. While this may find many readers with their corn already hung, we trust it will be a reminder to those less provident to get that precious seed corn where there can be no doubts as to its wintering well.

The man who milks from five to ten cows every morning and evening will appreciate a device in the form of a comfortable stool which will give free use of both hands and save time as well, says "The Farmer." The idea of strapping the stool around the waist will be conveyed to the reader at once. The up-rights from the stool to the belt loops are preferably of stiff or sole leather. A padded top on the seat adds comfort. The device, however, may have the disadvantage to many milkers of not being able to serve as a reminder to "Spot" to "staud over."

"A simple and effective way of making wire cable," writes Mr. S. E. Clippinger, Mercer county, Ill., "is shown in the illustration. Number twelve wire is or-

dinarily used. The strands are measured off somewhat longer than the desired length of cable. At one end they are attached to a post. The other ends are tied to the circumference of a wheel on the corn-sheller or any similar wheel that can be turned. A wagon wheel could be jacked from the ground and used. Cable can be twisted as desired and finds many uses on the farm, especially in grubbing and hedge and stump-pulling."

SOME MORE ON THE CORN SCORE CARD.

An article appears in this issue on the value of the score card in selecting seed corn from Prof. A. M. TenEyck, of the Kansas Agricultural College. We desire to call special attention to that article, because there are few men who are better qualified to cover the subject than Professor TenEyck. The data he gives is based on sound experimental evidence, and any man who is specially interested in the production of good corn will get some sound notions from Professor TenEyck's article.

As a rule, we do not ask our readers to peruse as long an article as this, but the subject could scarcely be covered in less space, at least it could not be covered so thoroughly, and we speak for it a careful reading.

The Homestead feels that it cannot do better than keep the subject of corn improvement before its readers, and in having station and college men discuss it we believe that we are going directly to the fountain head. However, this discussion during the winter will be taken part in by those who are especially interested in the practical side of corn improvement; that is, those whose livelihood depends upon the production of good corn. If there are any opinions advocated or expressed by Professor TenEyck that do not accord with the ideas of our readers, we shall be pleased to have them take up any phase of that question and discuss it through these columns. Only in this way can the subject be thoroughly thrashed out, and men who are just starting in the business of breeding good corn be led to sound conclusions.

Anent Farmers' Bulletins.

The total number of farmers' bulletins issued during the fiscal year was 437, of which 404 were reprints, and the total number of copies issued was 6,568,000.

The demand for farmers' bulletins by senators and representatives, who, under the law, are entitled to 80 per cent of the whole number printed, has been so much larger than usual that practically none were left to carry over to the present fiscal year. There being therefore no surplus available and the appropriation for the current fiscal year

being no larger than formerly, the number available for each congressman will, this year, be greatly reduced. The department of agriculture therefore felt obliged to include provision for an increase in the number of these bulletins in estimates for the ensuing year. The number of copies of farmers' bulletins distributed during the past year on congressional orders aggregated 5,279,476.

The demand for the publications of this department continues to increase more rapidly than it is possible to meet them. The policy followed in the past of continuing the distribution after supplying the regular divisional lists, including libraries, agricultural colleges, and stations, exchanges—foreign and domestic—and persons actively co-operating in the work of the department, to all miscellaneous applicants until the edition was exhausted, and then ordering a reprint to satisfy further demands, while perhaps the best method to be pursued in any plan of unlimited gratuitous distribution, was found very unsatisfactory.

In the first place, the funds at our disposal precluded the possibility of unlimited reprints, and thus, while a great many persons were supplied who undoubtedly did not need the publications they asked for, a large number of persons to whom the publication would prove useful were unavoidably left unsupplied, including very often persons whose services to the department gave them a special claim on us for our publications. Such a plan might have been satisfactory enough in the days when the demand for the department's publications was restricted, though even then it was wasteful; but at the present time to undertake to supply all miscellaneous applicants—and this is the only fair way if the principle of gratuitous distribution is to be accepted—would involve a cost far exceeding any sum which congress is likely to provide. In the face of the difficulty thus presented to me for solution, I concluded to abandon any attempt at general gratuitous distribution of all department publications other than farmers' bulletins

FREE ADVICE ON CURING CATARRH

Catarrh Specialist Sproule

Read these questions carefully, answer them yes or no and send them with the Free Medical Advice Coupon to Specialist Sproule. You will receive a careful diagnosis of your case without its costing you a cent.

Is your throat raw?
Do you sneeze often?
Is your breath foul?
Are your eyes watery?
Do you take cold easily?
Is your nose stopped up?
Does your nose feel full?
Do you have to spit often?
Do crusts form in your nose?
Are you worse in damp weather?
Do you blow your nose a good deal?
Are you losing your sense of smell?
Does your mouth taste bad mornings?
Do you have a dull feeling in your head?
Do you have pains across your forehead?
Do you have to clear your throat on rising?
Is there a tickling sensation in your throat?
Do you have a discharge from the nose?
Does the mucus drop in back of throat?

Answer the questions I've made out for you, write your name and address on the dotted lines in the Free Medical Advice Coupon, cut them both out and mail to me as soon as possible. 'Twill cost you nothing and will bring valuable information. Address Catarrh Specialist SPROULE, (Graduate in Medicine and Surgery, Dublin University, Ireland, formerly Surgeon British Royal Mail Naval Service, 473 Trade Building, Boston.

Don't suffer with Catarrh any longer! Don't let it destroy your happiness—your health—your very life itself.

Don't waste any more time—energy—money, in trying to conquer it with worthless nostrums.

Don't think it can't be vanquished just because you have not sought help in the right place.

Write to me at once and learn how it can be cured. Let me explain my new scientific treatment—perfected by myself—used only by myself. Thousands of persons, many of them living right near you, testify it has cured them absolutely—completely—permanently.

Catarrh is more than an annoying trouble—more than an unclear disease—more than a brief ailment. It's the advance guard of Consumption. Neglected Catarrh too often becomes Consumption. It has opened the door of death for thousands. Take it in hand now—before it's too late.

I'll gladly send you a careful diagnosis of your case and give you free consultation and advice. It shall not cost you a cent.

Let Me Tell You Just How To Cure Catarrh

Let me show you what I'll do for you entirely without charge. Thousands have accepted this offer—today they are free from Catarrh. You've nothing to lose and everything to gain. Just for the asking you'll receive the benefit of my twenty-one years of experience—my vast knowledge of Catarrh and the way to cure it.

EXCURSION RATES FOR THE HOLIDAYS TO EXTENSIVE TERRITORY.

Via the North-Western Line. Excursion tickets will be sold at reduced rates on ten dates: December 20, 21, 22, 23, 24, 25, 29, 30, 31, 1906, and January 1, 1907, good returning until and including January 7, 1907, to stations on the North-Western Line (including C. St. P. M. & O. R'y.), and to points on several other lines, for full details of which apply to agents Chicago & North-Western R'y.

VERY LOW RATES TO DENVER, COLO., NATIONAL AND WESTERN LIVE STOCK SHOW.

Via the North-Western Line. Excursion tickets will be sold January 19, 20 and 21, with favorable return limits. Apply to agents Chicago & North-Western R'y.

THE VALUE OF THE SCORE CARD IN SELECTING SEED CORN.

By A. M. TenEyck, Kan. Agricultural College.

The study of corn by the use of a good score card should be a valuable aid to the farmer in selecting seed corn. The purpose for using the score card in the study of corn is not especially to select "nice" ears, but rather to select the "useful" ears of corn. Every point named in the score card used at the Kansas Agricultural College is a utility point and is related to the vitality, hardness, composition or productiveness of the corn. True, an ear which scores high is a nice ear of corn in appearance, and "nice" ears of corn are not always necessarily "good breeders," but I believe that it is generally true that "good breeders" are "nice" ears of corn, because well-formed ears and well-developed kernels (as required by the score card) are certainly associated with large yields and a good quality of grain.

However, this fact is as true in plant life as in animal life, that the value of an individual as a breeder can be actually determined only by the production of offspring. By planting the kernels from individual ears of corn on separate rows it is possible to study the characteristics of the corn and determine the yield and the quality of the crops produced, thus discovering which are the best producing ears, and by selecting seed from the highest-yielding rows for future planting the yield may be increased and the corn made more uniform in type and better in quality. The final test of a good ear of corn is to plant the seed and secure the crop, but the score card is a great

inferior in quality and type, and this is true of corn also. An ear of corn may be large and well-formed and of good quality, but if it is mixed in breed there is no assurance that the mixed grains, when planted, will produce true and again give a large yield of desirable ears. However, if pure-bred corn is planted, it should under favorable conditions produce its kind again almost exactly. Hence the importance of requiring seed corn to show strongly the points which denote purity in the variety or breed.

The "standard of perfection" for different breeds or varieties of corn differ very slightly in the essential points required in a "good" ear of corn. In fact, the points in the score card which distinguish type or breed are not "fancy" points, but "utility" points, which largely determine the value of corn for seed, whatever the variety.

In shape the ideal ear of corn should be cylindrical or very slightly tapering with straight rows of kernels and a proportional length to circumference of about ten to seven. The cylindrical shape allows for the same number of kernels

in all parts of the ear. In a tapering ear, either some of the rows run out, or the kernels become small and shallow near the tip of the ear, which makes less weight of shelled corn per ear and a number of kernels of irregular size and shape, which will not permit of even distribution with the planter. Likewise, straight rows are necessary in order that all of the kernels in an ear be of uniform size and shape.

Ears which are long and slender usually have shallow kernels and give a relatively small percentage of grain, while ears which are large in circumference and short, often have very large cobs with shallow grains and large shanks, which cause the ears to break off hard in husking, or if the grains are very deep, such ears are often late in maturing and are apt to yield light and chaffy corn.

Perhaps the form of an ear of corn should be allowed to vary from the proportions given above, but this is the standard generally adopted by corn breeders. The "standard of perfection" requiring a certain length and circumference in an ideal ear of corn of a certain variety is not for the purpose of limiting the size of the ear of corn or of decreasing the yield, but rather to train the ears to grow larger and more symmetrical in form, resulting in larger yields of corn of better quality. The pure-bred ear of ideal form is a large ear of corn for that particular breed or variety. If this is not true, then the standard is not high enough.

Similarly as the color points in pure-bred live stock denote purity of blood in the individual, so the proper color of grain and cob in corn indicates freedom from mixture with other varieties

Governor Warner, of Michigan, Talks:

Farmington, Mich., Aug. 25, 1906.
The "NEW WAY" Motor Company.
Gentlemen:—Answering your inquiry, I am pleased to advise that the 2 1/2 H.P. "NEW WAY" AIR COOLED GASOLINE ENGINE which I purchased in April after careful investigation, to operate 6 Burrill Miling machines on the Huron County farm, owned by Cong. S. W. Smith and myself, is giving excellent satisfaction. The features of cooling the cylinder of the motor by air and without water will eliminate a source of trouble in filling and emptying water tanks in the winter, as well as the danger of water freezing and damaging the engine. It looks neat and is furnishing ample power.
Yours very truly, FRED. M. WARNER.

HOG WORMS ARE KILLING YOUR HOGS

Dead Shot Worm Killer Kills the Worms and Saves the Hogs.

One hundred seventy-five million dollars worth of hogs died last year from so-called hog cholera. Ninety per cent of all losses originated from hog worms, the certain fore-runner of constipation, fever and hog cholera. "Farmers," don't experiment with uncertainties, but send direct to us for our "DEAD SHOT WORM KILLER." Five cents per head is all it costs to rid your pigs of hog worms. Price, 3 lbs., \$1.50; 7 lbs., \$3.00; 10 lbs., \$4.00. Express charges prepaid to your nearest express office. Send today and you will get the remedy tomorrow. Address,

Farmers Hog and Cattle Powder Company, Shenandoah, Iowa.

and insures the reproduction of the same type of ear and kernel when such corn is planted and grown.

It is essential that the kernels be uniform in shape and size in order that the corn may be planted evenly, and thus insure a perfect stand. A deep or medium deep indentation appears to be associated with a long kernel and uniformity in indentation is a strong indication of purity of breed. All pure-bred varieties of corn are required to have kernels of medium or medium-deep indentation, and this character indicates a capacity to produce large yields.

PROPORTION OF CORN TO COB.

As already shown, the shape and size of the ears are important factors in securing large yields of corn, also the ears should be well developed at the butts and tips. The shank should be of medium size and the kernels should swell out about the shank in regular order, with straight rows of uniform kernels. Likewise the tips of the ears should be filled out with straight, parallel rows of uniform kernels.

If we can breed corn so as to add one more kernel to the ear, (estimating 100 ears of 900 kernels each, per bushel) it would add every year nearly 200,000 bushels to our average Kansas corn crop.

The proportion of corn to cob and the yielding capacity of corn depends not only upon the shape and finish of the ear, but even more upon the depth and form of the kernels. A well-formed kernel should be almost rectangular in shape, tapering slightly toward the tip, with straight edges so that the adjoining kernels on the ear may fit together perfectly from the tip of the kernel to the crown, leaving no space between the kernels. The length of a well-formed kernel should be at least twice its width and the cross-section should be a rectangle, with the thickness about one-half the width.

There is no objection to a rather large cob in an ear of corn, provided the cob is covered with many rows of deep, well-formed kernels. In fact, a small cob is objectionable because if the kernels on a small cob are as long as they should be to give a large percentage of corn to the ear, they are necessarily too tapering, inclining to the shoe-peg shape, or chaffy type of kernel. Again, a medium large cob is necessary in order to give body and firmness to the ear. Perhaps also a large cob is associated with greater vitality and hardness in the plant. This seems to be true in the West where small-cobbed varieties from states farther east do not succeed so well as the "native" or naturalized varieties, which usually grow a larger ear with a larger cob.

It is essential to have a broad tip in a kernel, not only to give firmness and weight to the ear, but also to give room in the kernel for a large germ. The germ contains the embryo plant, and a large germ in the kernel indicates strong vitality and power to sprout, even under adverse conditions, and produce hardy, vigorous plants. The narrow, wedge-shaped kernels cannot have so large a germ as the broader, rectangular kernel, and is therefore more apt to be deficient in vitality.

COMPOSITION AND FEEDING VALUE.

The chemist finds by analyses of the substances composing the different parts of a kernel of corn that the germ contains a large part of the fat or oil in the kernel and a considerable propor-

tion of the protein. The white, floury part is largely starch and the part least valuable for feeding. The hard, clear, flinty portion of the kernel is also largely starch and contains little fat, but contains a larger percentage of protein than the floury part. It is important, therefore, in breeding corn for higher feeding value to select ears for seed which have kernels with large germs and a considerable amount of the hard, clear matter at the edges and back of the kernel, and a relatively small proportion of the white, starchy part which occupies the crown of the kernel and surrounds the germ.

The protein is very necessary, and a valuable part of the feeding ration, yet it is doubtless much cheaper to supply it in alfalfa or clover than in corn. Also there may be a tendency to make corn harder and less desirable for feeding whole to stock, if the seed is selected too closely for a large proportion of the hard, clear, flinty part in the kernel. (Millers have informed me that "hard" corn makes the best quality of corn meal.) Experiments have shown also that it requires a "high protein" soil to produce "high protein" corn, while larger crops of "low protein" corn may be produced on soil deficient in fertility. On the other hand, alfalfa, or clover, is a cheap, protein feed, since the crop takes the nitrogen, the principle constituent of protein, largely or wholly from the air and, in fact, the nitrogen supply of the soil may be actually increased by growing alfalfa or clover, which makes it far more desirable than corn as a crop to furnish protein for feeding live stock.

It is, therefore, much more important to select for a large germ in seed corn than for a large proportion of the flinty part of the kernel. It costs the farmer no more to grow "high oil" corn than "low oil" corn, since the oil is composed of oxygen, hydrogen and carbon, elements which are supplied wholly from the air and from the water used by the growing plant; thus the production of more fat in corn makes no added drain upon the soil fertility. Likewise, a large germ in the seed kernel portends strong vitality, good stand and a large crop.

VALUE FOR SEED.

All of the points in the score card relate to the value of the corn for seed, but a special score is made on the vitality of the corn as indicated by the maturity and clear, live color of the kernels and by the large, bright germs. Worm-eaten, mouse-eaten, cracked or otherwise injured kernels may not germinate or at least may be impaired in vitality. As already described, a large germ in the kernel indicates greater capacity to sprout and to produce strong, vigorous plants.

Although an experienced judge may determine the value of seed corn very closely by examination, yet the final proof of the value of the ear for seed is to test the germination of the kernels. In breeding corn at the Kansas Experiment Station, by testing the germination of the kernels from individual ears we have often found ears of corn which did not give a perfect germination, although there was no evident lack of vitality in the appearance of the ears or kernels. In most cases, the seed corn had been carefully saved and dried, and all of the ears had been subjected to practically the same conditions.

This is an indication perhaps that

STUDENTS' SCORE-CARD FOR CORN, AGRONOMY DEPARTMENT, KANSAS STATE AGRICULTURAL COLLEGE.

Trueness to Type or Breed Characteristics:

1. Shape of ears: Cylindrical, straight rows, proportional length to circumference	10
2. Length of ears, conformity to standard	5
3. Circumference of ears, conformity to standard	5
4. Color:	
(a) Grain, no mixed kernels	5
(b) Cob: White kernels, white cob; yellow kernels, red cob	5
5. Uniformity of kernels: Uniform size, shape, indentation	10
	40

General Quality, as Related to Yield, Feeding Value and Vitality of Seed:

Proportion of corn to cob as indicated by:	5
1. Butts of ears: Kernels swelled out about the shank regularly	5
2. Tips of ears: Filled out with regular-sized kernels	5
3. Kernels:	
(a) Shape: Wedge-shaped	5
(b) Depth: Deep or long	10
4. Space:	
(a) Furrow between rows	5
(b) Space between kernels at cob	5
	35

Composition and Feeding Value:

Large germ and horny layer, and a relatively small amount of the white, starchy portion	10
	10

Market Condition and Value for Seed:

1. Vitality: Bright, well-matured kernels, firm on cob, large bright germ	10
2. Soundness or freedom from injury: No cracked, rotten, worm-eaten, or otherwise injured kernels	5
	15

Total	100

aid in selecting the good ears of corn for planting.

By the score card used at the Kansas Agricultural College, corn is studied or judged under two general sub-heads or divisions of the subject, namely: "Trueness to Type or Breed Characteristics" and "General Quality, as Related to Yield, Feeding Value and Vitality of Seed."

TRUENESS OF TYPE OR BREED CHARACTERISTICS.

The purity of the variety or breed of corn is indicated by the form, size, color and general similarity of the ears and by the color and uniform shape, size and indentation of the kernels, always in conformity with the standard of perfection required in a pure type of the variety of corn judged. The score on these points is 40 per cent of the total score, and at first thought the farmer is inclined to believe that too much importance is given in the score card to the matter of breed and trueness to type. Every breeder of live stock knows that in breeding pure-bred stock it is very important that the individuals bred together shall be of pure blood in order to insure the production of offspring true to the type or breed, and often the so-called "fancy" points of color and form in animals are given great prominence as indicating purity of blood and the capacity of the animals to reproduce their exact kind when bred again.

It is true that the first cross between pure-bred animals of different breeds may often result in producing an excellent individual, but if the crossing is continued by breeding together the cross-bred animals, then the stock is very apt to deteriorate and become

there are invisible, but inherent characters in corn which relate to its quality, vitality and productiveness not brought out in the study of corn by the use of the score card. Still further proof of this is found also when the kernels of the most desirable ears are planted in separate rows, as is the practice in breeding corn by the "ear row" method, so that the product of each ear may be kept separate, the yield determined and the quality and type of corn produced from individual ears carefully observed.

In four years' trials in breeding corn by the "ear row" method at the Kansas Experiment Station, in which we have tested as many as 300 individual ears of seven different varieties of corn in a single season, we have not grown a crop in which the highest producing ear of a certain variety has not given one-third greater yield than that secured from the poorest producing ear in the test, in spite of the fact that all of the ears used were carefully selected as being the most desirable ears from which to breed. The first year that the selection was begun, variations in yield have been much greater, reaching more than 400 per cent in 1903 with a certain variety, the yields from the same area of land planted with seed from individual ears ranging from nineteen to seventy-nine bushels per acre. It should be remembered that these enormous differences in yield were secured by planting the choicer ears of a certain variety and not by comparing the less-desirable with the more-desirable ears.

Similar differences are observed in the quality and type of the corn produced from different ears, the score of the product ranging from 30 to 80 per cent as judged by the use of the score card, and we have observed this, that with few exceptions the high-yielding corn is also the corn which scores high. I made a very careful note of this point this season, and in examining some 250 piles of corn spread out on a large floor, the product of 250 different ears of seven different varieties, it was usually easy to observe without scoring the corn that the largest piles contained the breediest and most uniform looking ears.

This season trials were made with two varieties of corn in comparing the yields from seed selected from the high-yielding ear-test rows with the first-grade seed (choice ears) selected from the general field. The varieties of corn used were the Silvermine and the Hildreth. With the Silvermine the yield from the general field seed was 40.15 bushels per acre; from the high-yielding-rows seed, the yield was 52.15 bushels per acre, or twelve bushels in favor of the seed from the high-yielding rows. It was also observed that the high-yielding-rows seed produced more uniform and better ears than the general field seed, the average yield of first-grade seed ears being 32.6 per cent in favor of the high-yielding-rows plot.

At the Kansas Experiment Station our purpose has been to improve corn by careful selection of seed ears and

breeding plants. I have made a few experiments to prove, by comparison, what may be accomplished by breeding corn, being satisfied that the corn which we are handling is steadily improving, both in yield and quality. There have been experiments made to show the effect of breeding for opposite types or characters by seed selection, notable results having been obtained in breeding "high protein" and "low protein" and "high oil" and "low oil" corn at the Illinois station. The United States Department of Agriculture has also undertaken some interesting experiments with reference to changing characters in corn and these experiments have shown that any reasonable change in corn may be made in a few years by seed selection and keeping the corn pure in breed. Namely, such as changing the height of the ear on the stalk, form of ear, type of kernel, composition of kernel, etc. There is no question but that such changes may be readily brought about by careful seed selection of ears, with especial reference to the character desired. It is also doubtless equally true that few of the improved characters bred into corn remain as permanent characters of the corn unless great care is taken to keep the variety pure and to continue the careful selection of the seed.

Breeding corn also includes much more than simply the selection of seed ears. The planting and cultivation of the seed crop, the selection of the breeding plants by detasseling the inferior and undesirable types, cross fertilization and the introduction of "new blood" to maintain the health and stamina of the breed, and the final selection of the seed ears in the field from the most vigorous and most uniform plants, are very important factors in corn breeding which I may discuss later in another article.

A Splendid Book on Alfalfa.

It is doubtful if any man in the corn belt has done as much teaching favorable to the growing of alfalfa as Mr. F. D. Coburn, secretary of the Kansas State Board of Agriculture. In season and out of season Secretary Coburn has been advising men to grow alfalfa. He has been the means, through his teaching, of settling thousands of families on alfalfa lands in Kansas that were formerly regarded as worthless, and these families today are happy and prosperous.

Secretary Coburn has recently put the results of his long alfalfa experience into book form, and it makes a work of 334 pages. Of course many of our readers are already familiar with Mr. Coburn's former book on the subject, but this one goes into it so much more extensively and, without question, brings the subject up to date. It is illustrated and practically every illustration is taken from an actual photograph, and nothing has been left to the imagination. We have been unable to find, upon examining the book, a single phase of the alfalfa question that is not discussed in detail.

The Homestead offers this book of Mr. Coburn's for sale at its regular price.

The Best Time for Sows to Farrow.

To the Editor of The Homestead:

Of late years I have purchased from neighbors aged thoroughbred boars about Christmas time. They are very much cheaper then and I can see their last season's pigs and know what to expect. My very early pigs have caused me as much bother as the late fall pigs, so I like to have them arrive about the last of April and before the 1st of November. We seldom have very cold weather here before the new year, so if the pigs have dry beds and the freedom of the farm, except the manure pile and dooryard, they will do well on the alfalfa, clover and timothy meadows, corn shocks, etc. I attribute my poor luck with pigs last season to poor fences. The old sows knew how to pry off boards and lift gates. They ate with the fattening hogs too often and were among the steers too much. Fences should be good if old sows are kept. Their pigs are usually the best and there will not be many of the pigs killed if the sows do not weigh more than 400 pounds.

I dislike to take on extra chores in February and March, because an overcoat or muddy feet make me slow, and at that time of year little pigs need extra care if they are expected to be nearly as good at three months of age as pigs farrowed two months later.

Chas. A. Babbit.

Brown county, Kan.

THE NORTH-WESTERN LINE

First-class daily through service from Des Moines to Council Bluffs, Omaha, the Black Hills, Wyoming, Colorado, Utah and the Pacific Coast on the west; to Sioux City, Mankato, St. Paul, Minneapolis, Superior and Duluth and all points in North and South Dakota, Minnesota, Northern Wisconsin and Michigan on the north, and to Chicago, Milwaukee, Peoria and the east, over

The Only Double-Track Railway Between The Missouri River and Chicago

BRENTFORD.

NEW TOWN—on the Watertown-Missouri River extension of the Minneapolis & St. Louis R. R. in South Dakota. In the heart of the famous Jim River Valley. Country around Brentford is well settled and it will be one of the best of the new towns on the line. Offers excellent business opportunities. Place has received a wonderful impetus from prominent South Dakota business men in the vicinity who have invested and have organized a commercial club to boost the population to 1,000 in six months. It is a market for a million bushels of grain. Has an exclusive territory covering an average radius of twenty miles. Rails are laid into the town. Already has two brick banks, three brick stores, five elevators, 150 residence lots sold. First residence will cost \$4,500. For particulars go to Brentford, or address Commercial Club, Brentford, S. D., or Thos A. Way, Townsite Agent, M. & St. L. R. R., Aberdeen, S. Dak.

HOMESEEKERS' RATES VIA CHICAGO GREAT WESTERN RAILWAY.

On the first and third Tuesdays of each month this winter the above railway will sell homeseekers' tickets to points in states of Alabama, Arizona, Arkansas, Colorado, Florida, Georgia, Idaho, Indian Territory, Iowa, Kansas, Kentucky, Louisiana, Mexico, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Tennessee, Texas, Utah, Virginia, Wisconsin, Northern Michigan and Wyoming at rate of one fare plus two dollars for the round trip. To some points in the South and Southwest a flat rate of \$23 is made, which is less than the regular one way rate. Tickets have limit to return of twenty-one days to some territory and thirty days to other and allow stopovers in homeseekers' territory. For full information address E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast, West and Southwest. Rate one fare plus \$2. Liberal limits and stop-over privileges. For rates and further particulars call on agents or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

THREE THROUGH TOURIST CARS TO CALIFORNIA

The Chicago Great Western Railway offers choice of three through tourist sleeping cars to California each week via different routes. One car goes via Kansas City and Santa Fe route; one via Kansas City and Rock Island El Paso route and one via St. Joseph and Santa Fe. No other line offers such a choice of routes. For full information apply to E. J. Sawyer C. T. A., 514 Walnut St., Des Moines, Iowa.

SPECIAL OFFERS FOR THE HOLIDAYS.

On December 20, 21, 22, 23, 24, 25, 29, 30, 31 and January 1 the Chicago Great Western Railway will sell special round trip tickets to points in Arkansas, Colorado, Illinois, Indiana, Indian Territory, Iowa, Kansas, Michi-

gan, Minnesota, Missouri, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, Wisconsin and Wyoming at rate of one regular fare plus one-third, tickets having limit to return of January 7, 1907. On December 20, 21 and 22 tickets will be on sale to Mexico City and return at one fare for the round trip with thirty days limit to return. Also, remember that homeseekers tickets are on sale December 18th to southwestern and southeastern points at very low rates. For full information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

EVERY DAY

This winter the Chicago Great Western Railway will sell tourist round-trip tickets to points in Alabama, Central America, Colorado, Cuba, Florida, Georgia, Louisiana, Mexico, Mississippi, New Mexico, North Carolina, Porto Rico, South America, South Carolina, Tennessee and Texas at very low rates. Tickets have limit of June 1st, to return and allow some stopovers. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa, for full information.

WINTER VISITORS. WEEK END RATES.

Commencing November 3d, and each Saturday and Sunday thereafter until December 16th and from January 5th to March 31st THE CHICAGO GREAT WESTERN RAILWAY will sell tickets to points in Iowa at one fare for the round trip good to return until Monday following. Rates apply to points as far north as Bristow, New Hampton and Oneida and south as far as Blackton. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Ia.

FOURTEEN FOR ONE FOR X-MAS!

To introduce in American homes our splendid pictures of the scenery in the Rockies—the snow-clad peaks under the blue skies of Colorado, we make a most extraordinary offer for this X-Mas.

We will send, postpaid, on receipt of only one dollar, six large, fine pictures—ready for framing, of the most beautiful scenery in the states, and as a premium a splendid, guaranteed fountain-pen, the like of which you cannot buy anywhere else for less than \$2.50. This is \$4.00 worth for one.

But this is not all. To the first 100 customers, who mention our ads, we will further give FREE a splendid stickpin set with a pure gold nugget, right out from the treasure chests of the Rockies, with a gold value of \$10. Thus you can get \$14 for one.

Our pictures should be in every home, our pens in every pocket and if you order promptly, you will own that splendid stickpin of pure gold.

Old and young will think it the greatest X-Mas present of the year. Address,

FIELD NOTES.

A few good Aberdeen Angus bulls are offered for sale by Mr. C. H. Seibel, of Paton, Iowa.

Mr. H. B. Moats, of Villisca, Iowa, is offering some high-class Poland China boars for sale.

A few good Ohio Chief boars are offered for sale by Mr. W. D. Pittman, of Lake City, Iowa.

Registered Shropshire rams and ewes are offered for sale by Mr. Willard Miller, of Anita, Iowa.

Some choice Hereford cows and heifers are offered for sale by Mr. W. W. Wheeler, of Harlan, Iowa.

Mr. W. H. Leslie, of Auburn, Iowa, will hold a closing out sale of Hereford cattle on February 9th.

Poland China bred sows and gilts are offered for sale by Mr. A. C. Lanham, of Battle Creek, Iowa.

About thirty good, lusty Poland China boars are offered for sale by Dr. H. Pritchard, of Wisner, Neb.

Twenty head of Chester White boar pigs are offered for sale by Mr. Chester Bloom, of Bridgewater, Iowa.

Some very choice Iowa farms are offered for sale or for rent by the Alien Land Company, of Laurens, Iowa.

Messrs. Rhea Bros., of Arlington, Neb., are offering a grand lot of Percheron stallions and mares for sale.

Mr. Henry Dorr, of Remsen, Iowa, writes: "I am all sold out of Poland China boars. My sows are doing fine."

The Homestead desires to obtain the address of any breeder or breeders of Dutch Belted cattle located in Iowa.

A closing out sale of Poland Chinas is announced to take place by Mr. C. A. Steel, of Ogden, Iowa, on January 30th.

A public sale of Duroc Jersey bred sows is announced to take place on February 26th by Mr. G. J. Mack, of Clarion, Iowa.

Mr. Austin Renshaw, of Blair, Neb., names February 4th as the date on which he will hold a Duroc Jersey bred sow sale.

Mr. E. O. Wolcott, of Gilmore City, Iowa, offers fifteen spring and six fall Poland China boars for sale at popular prices.

Choice Shropshire rams, at special prices for the next thirty days, are offered for sale by Mr. D. M. Norton, of Sanborn, Iowa.

Some exceptionally good Poland China boars are offered for sale by Mr. John Schmieder, of Remsen, Iowa, and at popular prices.

A public sale of Aberdeen Angus cattle and Poland China hogs is announced to take place on March 27th by Mr. J. H. Eno, of Havelock, Iowa.

Mr. J. L. Barber, of Harlan, Iowa, is offering for sale some very choice Chester White sows and gilts, all sired by the his state fair prize-winning boars.

Fifteen good Chester White boars are offered for sale by Mr. J. M. Janssen, R. R. No. 3, Sibley, Iowa. He also offers some choice gilts for sale.

About twenty head of Poland China boars are offered for sale by Messrs. Wm. Ray & Son, of Defiance, Iowa, at special prices for the next thirty days.

Some good herd-heading Chester White boars are offered for sale by Mr. W. R. Webb, of Spencer, Iowa. He also offers gilts for sale, bred or open.

Two good Ohio Chief boars, one Zoo V. Orion, and a few other choice Duroc Jersey boars are offered for sale by Mr. W. D. Pittman, of Lake City, Iowa.

Mr. Grant Summers, of Malvern, Iowa, is offering some good Duroc Jersey boars for sale sired by Crimson Wonder Again, the state fair sweepstakes boar.

Some choice Poland China sows and gilts, sired by L's Sunshine, the second-prize boar at Sioux City, are offered for sale by Mr. A. C. Lanham, of Battle Creek, Iowa.

Mr. Z. T. Kinsell, of Mt. Ayr, Iowa, offers a few very choice Hereford hogs for sale, and a few good Duroc Jersey boars. Read his advertisement on page 35 and write him at once.

Mr. Frank Paup, of Kirkman, Iowa, offers seven good Angus hogs for sale. One of these is a K. Pride, a Queen Mother, a Heatherloom, a Duchess and a Carnation. He is pricing these within the reach of anybody.

Mr. E. H. Dacer, of Lamoni, Iowa, has sold his farm and he is offering to close out his entire herd of Hereford cattle and Berkshire hogs. He is offering some exceptionally good bargains, because he must give possession of the farm.

Messrs. C. W. Daws & Son, of Harlan, Iowa, are offering for sale a few very choice Cruickshank bulls, and two or three good Scotch-topped bulls. It will pay any breeder who wants a herd header to go and see what they have before buying elsewhere.

A few very choice Poland China boars are offered for sale by Mr. J. C. Hoag, of Manson, Iowa. These are sired by Robert J. and Keep Alert by the great sweepstakes boar, Prince Alert, and also by Manager, one of the best sons of the noted boar, Manager.

Messrs. Reubel, of Rockwell City, Iowa, have a few choice Poland China boars left that they are making reduction prices on for the holiday season. If you want one write to them at once, because they won't last long.

Mr. Geo. Allen, of Lexington, Neb., one of the most noted Shropshire breeders in this country, is offering a few very choice Shropshire rams for sale. He also has a few good Short-horn bulls, good enough to head herds, that he will price right.

On page 22 of this issue will be found the advertisement of the McMillan Fur & Wool Co., of Minneapolis, Minn. To those who ship furs, hides, and pelts to them, they will send their Trapper's Guide free. Write for their price list and circular.

In the pointers column in our last issue we made a slight mistake in a pointer for Mrs. C. E. Wonderly, of Benedict, Neb. We stated therein that she had Buff Cochins chickens for sale and we would have said that she had Partridge Cochins. Readers of The

The most important thing in the world to me is a lamp-chimney.

I have been for years and years making the best, and always trying to make them better. I put MACBETH on them and no one ever disputes my claim.

The Index explains how to get a MACBETH chimney to fit every lamp, and how to care for lamps. Sent free to everyone asking for it.

Address, MACBETH, Pittsburgh.

Homestead will please bear this in mind that it is Partridge Cochins chickens that Mrs. Wonderly has for sale and not Buff Cochins.

Mr. Fremont S. Gibson, of Mason City, Iowa, has improved farms, wild lands, general merchandise stocks, hardware stocks and city property for sale or exchange. Write him for particulars. His advertisement appears on page 18.

Mr. Julius E. Rix, of Westside, Iowa, is offering a Norman Percheron registered stallion for sale. He is gray in color and aged twelve years and weighs 1,700 pounds. For particulars, write Mr. Rix. The advertisement appears on page 33.

Mr. John Weighton, of Audubon, Iowa, the well-known Duroc Jersey breeder, writes: "Just say to Homestead readers that I have about ten good Duroc Jerseys that I am making special prices on for the next fifteen days. Tell the boys to write me immediately."

Mr. T. A. Stevenson, of Shannon City, Iowa, offers some of the best strains of Chester Whites for sale and a few good Aberdeen Angus hogs. Mr. Stevenson is one of the most reliable breeders in southern Iowa and he can be relied upon to send you just what you order.

Mr. A. A. Hummer, of Keswick, Iowa, breeder of Chester White swine, reports that he is sold out of boars entirely and that he has a few choice gilts yet for sale. They can be supplied either bred or open as desired by the purchaser. Mr. Hummer's advertisement appears on page 36.

Mr. W. J. Finley, of Marshall, Mo., claims March 1st for a sale of registered jacks and jennets. Mr. Finley deals in the best only and will, on March 1st, show as good a lot of Missouri-bred jacks and jennets as are often found. Remember the date and watch these columns for future announcements.

The Southside Realty Company, of Petersburg, Va., successors to Percival Bros., have 500 special bargains in farms, an advertisement of which they have on page 18 of this issue of The Homestead. They desire that northern farmers learn about that country and ask our readers to send for their new catalog.

If you want a good Scotch bull, one that is fit to head any herd, you will be able to buy him of Mr. J. D. McDermott, of Wiota, Iowa. He has several for sale, all sired by imported and straight Scotch bulls, and some out of imported cows. Write him about these, because they are all right and the price is right.

Imported and home-bred Percheron stallions, ranging in age from two to seven years, all coal black, are offered for sale by Mr. G. C. Harrison, of Blencoe, Iowa, in his advertisement that appears on page 33. Mr. Harrison requests those who want stallions to come and see him, as he has the best of bargains.

Mr. John Lefebure, breeder of Scotch and Scotch-topped Short-horn cattle, of Fairfax, Iowa, is offering for sale two Scotch herd bulls of excellent breeding, also young hogs, cows and heifers at attractive prices. Anyone wanting a herd bull or a few cows and heifers would do well to visit his herd. See advertisement on page 35.

Messrs. Reubel Bros., of Rockwell City, Iowa, have a few of those choice Poland China hogs left, and they say for us to tell Homestead readers that special prices will be made on these for the next fifteen days. They have some extra good ones on hand and will be pleased to hear from our readers and quote prices on one or a dozen.

Messrs. M. A. Sellers & Son, of Huntley, Neb., write us under date of December 5th that their Durocs are doing fine and that they have about fifty sows bred for their spring sale, which will be held February 26th. They have some extra good individuals of the choicest breeding and one can do no better than write them in regard to what they will offer in their coming sow sale.

Mr. W. J. Prather, of Russell, Iowa, has Duroc Jersey spring boars by Top Notcher again, bred gilts and yearlings by Tom Davis, Top Notcher Again and Red Rock, which he will sell at one-half of last winter's public sale prices as per advertisement on page 33 of this issue of The Homestead. Here is a good chance for Homestead readers to secure some well-bred Durocs at very low prices.

Mr. C. H. Drake, of Stockport, Iowa, has some extra fine fox terrier dogs which he is offering for sale on page 10 of this issue of The Homestead. Some of these dogs are nicely broken. He also has young stock of both sexes and all are guaranteed to make extra good rat dogs. He has one broken Collie bitch that he will sell or exchange for Single Comb White Leghorn hens or pullets.

Mr. Hughes Atkinson, of Mt. Sterling, Ky., breeder of Hampshire swine, writing under a recent date says that his bred gilts are all sold and also most of the boars. In his new advertisement, Mr. Atkinson is offering a few spring boars, by first prize hogs, and also hogs and gilts weighing from sixty to ninety pounds. His herd made a great record at the Kentucky and Illinois State Fairs in

1906, winning fifty-two ribbons and showing against the strongest herds in the country. His advertisement appears on page 35.

Mr. F. Rabeler, of Leigh, Neb., announces on page 33 that he has the best imported and home-bred Yorkshire hogs in America and that he has made five importations. Oak Lodge Minstrel 8th 1855 and O. L. Fusilier 6443, both imported hogs, and Hanover Emperor 7038, stand at the head of his herd. He has stock for sale at all times and can furnish it not akin. He is hooking orders now. Write him for prices and other particulars.

One of the best 430-acre farms in Kansas is offered for sale on page 18 of this issue by Mr. F. W. Parks, of Abilene, Kan. This farm is finely improved with a new seven-room, modern cottage; bank barn and all necessary outbuildings. Two hundred acres are in meadow, 150 acres in blue grass, sixty acres in alfalfa, the rest in corn. Mr. Parks is its owner and he offers it for sale at \$35 per acre. For other information read the advertisement and write him.

Mr. Frank Kean, of Mt. Pleasant, Iowa, in furnishing copy for his new advertisement found on page 33 of this issue, says: "I am breeding forty of the best gilts I ever raised. They are of heavy bone, lengthy and of good color. The males I am using are Crimson I Am 53591, Top Notcher Boy 53589 and Kan't Beat Me 53837. The gilts are not loaded with fat, but are in the best breeding condition. I will quote reasonable prices, quality and breeding considered."

Mr. Jas. P. Spearman, of Papillion, Neb., the well-known young live stock auctioneer, writes us as follows: "Just say to Homestead readers that I have a few open dates left, and I will be glad to hear from those who are going to hold sales. My work has given entire satisfaction to those for whom I have conducted sales, and I am hooking orders every day." Any of our readers who have not secured their auctioneer will do well to write Colonel Spearman at once.

Mr. A. Latimer Wilson, importer of Percheron horses, of Creston, Iowa, writes that he sold to Mr. John Bray, of Richland, Iowa, one of the best imported black two-year-old stallions, Amans 63285, that ever left his barns. This stallion weighs over 1,700 pounds and has an extra good bone and finish all over. Mr. Wilson says that this colt will be heard from in the show ring, and he also writes that he is selling his choice Percheron horses at \$1,000 at his stable doors.

On February 28th, at the farm near Oakland, Neb., will occur the closing out sale of the entire herd of Short-horn cattle owned by the late lamented breeder, Mr. Patrick Gleeson. This herd was one of the best in the West and is headed by the noted bull, Count Waterloo, for which Mr. Gleeson paid \$1,000 at the Martin Flynn sale a few years ago. Many of the young heifers are sired by him and most of the older cows will be bred to him. The sale is made to close up the estate, and as Mr. Gleeson was a liberal and a good buyer, our readers can rest as-

sured that some good Short-horns will pass under the hammer on this occasion.

Mr. F. A. Ham, of Saronville, Neb., in sending in new copy for his advertisement which will be found on page 37 of this issue writes: "I have a very nice bunch of gilts (about twenty or twenty-five) to sell and as I am not going to have a sale, am offering them at private sale. The gilts are bred by Chief Knight 52495, he by Red Light, dam Improver Jewell; Imported King 54117 by Hamilton's Improver, dam North Star. My yearling sows are bred to Ham's Challenger."

The new advertisement of Mr. H. A. Sexsmith, proprietor of the Fairview herd of Duroc Jersey swine, of Greenfield, Iowa, will be found on page 37 of this issue. Mr. Sexsmith is announcing a public sale of bred sows on February 13th. His herd hogs are King Top Notcher 38703, the second prize senior yearling at Des Moines in 1906; Crimson I Am 43105 by Crimson Wonder, and H. A.'s Choice Goods 5197 by W. A.'s Choice Goods. They are mated to the tops of over sixty head.

Mr. F. Alldritt, breeder of Duroc Jersey swine, of Friend, Neb., in remitting for advertising already done, writes: "I have some choice hogs by Higgins' Model 3251 that I will sell at \$50 each if taken soon. I have some left by Ohio Chief 8727, Van's Perfection 1571, Hambletonian 21837 and Royal Prince 41911 that I will sell worth the money. I will have a bred sow sale February 5th, at which time I will offer a grand lot of sows and gilts bred to six good sires. Nebraska Chief 50889, one of the best sons of Ohio Chief, will have several sows in the sale bred to him." See Mr. Alldritt's advertisement that appears on page 33 of this issue.

On page 33 will be found the announcement of Mr. John Secor, of Mechanicsville, Iowa, announcing for sale nine choice Hereford bulls, of the low-down, thick, beefy sort. Mr. Secor is not a novice in the business, but has been breeding Herefords for seventeen years, his herd having been originally founded on stock purchased of Mr. Gill Burleigh. On this class of foundation stock Mr. Secor has used some of the very best Hereford bulls known to the breed. Perhaps the first one of national reputation was Beau Donald 48th, a son of the celebrated Beau Donald 58996, and he by Beau Brummel. Thus it will be seen that through Beau Donald the blood of Anxiety 4th is mingled in abundance. The dam of Beau Donald 48th is Early Princess 3d. She is a line-bred Lord Wilton and Earl of Shadeland. To follow on the daughters of Beau Donald 48th Mr. Secor secured Iowa Donald Premier 187137, which was sired by the Gudgell & Simpson-bred bull, Rex Premier, a son of Dandy Rex. Thus we find on the sire's side Lamplighter, Beau Brummel and North Pole. The dam of Iowa Donald Premier is Belle Donald 57th, a daughter of Beau Donald and out of an Earl of Shadeland and Lord Wilton dam. It can easily be seen that Mr.

THE OLD RELIABLE
..Anti-Friction Four Burr Mills..
 Double the Capacity of other Mills.
 TWO HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.
 30,000 Bu. With One Set of Burrs.
 I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.
 Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

Secor will preserve the Anxiety 4th type by this method of procedure, and to still follow in this line of breeding he has recently bought of Messrs. Gudgell & Simpson the best bull calf that we have seen this year. He has the euphonious name of Subject 252969. He is the son of Publican and he by Paladin and he by Lamplighter. He is unquestionably one of the most intensely bred Hereford bulls in Anxiety 4th lines that has ever gone forth from the Gudgell & Simpson herd.

On page 34 of this issue of The Homestead will be found a rare bargain in the shape of a very choice bred yearling Polled Durham bull. This fellow is sired by a noted prize winner, is out of a richly-bred cow and possesses all the good qualities necessary to make up a strictly first-class young herd bull. He is priced right, is right in breeding and individual merit. His owners, Messrs. J. J. Williams & Son, of Grand View, Iowa, are back of the above description and statement and will be pleased to show this bull to any prospective buyer who is conversant with what it takes to make a first-class Polled Durham herd bull. In writing them for particulars kindly mention The Homestead.

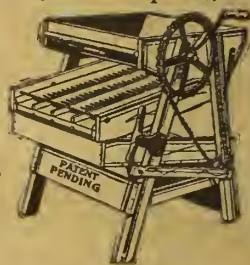

Messrs. E. K. Young & Son, of Havelock, Neb., in remitting for advertising already done, write as follows in regard to their Duroc Jersey herd: "Our hogs are doing fine. We will not have a bred sow sale this winter. We have two Malcom Model boar pigs to sell from a Gold Dust Jim sow. They are smooth and good enough to go in any herd, also one of Belle's Echo pigs from a Red Knight sow. He is a smooth, fine pig, of good bone, feet, head and ears. All three will weight 200 pounds strong. We bought a pig from Mr. R. J. Harding sired by Orion and out of Proud Lady, the \$1,275 sow, that we are using. We also have Luther H.'s, third prize boar in senior yearling class at the late Nebraska State Fair, still in ser-

vice. We will be on the market next year with better pigs than ever before." See Messrs. Young's advertisement that appears on page 38 of this issue.

Mr. Frank E. Hankins, breeder and shipper of pure-bred O. I. C. swine, of Sciota, Ill., in making remittance for advertising already done, writes: "My herd is in good condition and I have plenty of choice stock from which to fill orders. I can fill an order on anything from a weanling pig to a two-year-old sow, bred to my big boar, Duke. Mr. Wesley Michaels, of Media, Ill., made my herd a personal visit December 14th and bought a fine boar. Mr. Thomas Brown, of

DO YOU RAISE CORN?

We will ship you this Owens Seed Corn Grader and Sorter on 30 days' free trial. It will help to increase your yield from 10% to 20%. Write at once for full description and prices.

J. L. OWENS CO.,

PREM VICTOR, CHAMPION SHIRE STALLION, INTERNATIONAL 1906. Owned by Robt. Burgess & Son, Wenona, Ill.

This is The Moline THE IRONCLAD WAGON!

Built since 1854 in the largest exclusive Farm Wagon factory in the world, by machinery that does the work with such wonderful precision that each part fits the other with unfailing exactness. This enables us to produce the

Lightest Running Wagon Under Heavy Loads

The Moline has for its foundation the best woodstock that grows—all Hardwood. Selected Hickory for axles, doubletrees and singletrees, and white oak for the rest of the gearing and wheels. Yellow pine boards that are tongued and grooved for

the bottom of box; and we put in the sides the best lumber material obtainable. Now on top of all this we have reinforced every conceivable place on the wagon which is liable to wear with iron and steel protections, not of flimsy size, but with heavy plates.

which are so in evidence on the wagon throughout that The Moline has been called The Ironclad Wagon.

THE WONDERFUL BOOK

Pole—Reach—Hind Gear—Front Gear—Box inside and outside, all have special ironing everywhere. Our master mechanic has written a book, "How the Moline Wagon is Made Ironclad." It is FREE. Whether you want to buy or not, get the book! You will learn a whole lot more about wagons than you ever knew before. Write for it today. Address

MOLINE WAGON COMPANY,

MOLINE, ILL.

BRANCHES—Deere & Webber Co., Minneapolis; John Deere Plow Co., Kansas City, St. Louis, Omaha, Dallas, New Orleans and Portland, Indianapolis and Baltimore.

Good Hope, Ill., also made a personal visit December 15th and selected a fine boar. I can sell my pigs a little higher to men who see them than I can by letter." Mr. Hankins sold a hog to Mr. Z. N. Miller, of Elkhart, Ill., who, after receiving same, wrote: "I write you concerning the pig you sent me last fall. I tell you he is a fine one and a fine breeder. Can you furnish me with one that will not be akin to the one I have?" See Mr. Hankins' advertisement on page 36.

On January 17th Mr. W. H. Hudson, of Lohrville, Iowa, will make a Duroc Jersey brood sow sale, at which time he will sell between thirty-five and forty head of fall yearling and matured brood sows, and one of the best bunches of gilts that we have seen so far this year. These will be bred to Ohio Chief Primrose, a son of the prize-winning boar, Critic's Echo, and Jim's Junior, a son of the great Junior Jim. He is selling a granddaughter of Tolstoy, the sire of Crim-son Wonder, and two granddaughters of old Orion. Ohio Chief Primrose, his present herd boar, is a son of Ohio Chief and his dam is a granddaughter of the noted sweepstakes sow, Nebraska Belle. He is a splendid young boar and a sow bred to him should be sought after by breeders. Mr. Hudson is putting in some good brood sows in this sale and an exceptionally good lot of gilts. Breeders can well afford to come out to Mr. Hudson's sale, as they can use many of the good things that he is selling.

Mr. J. B. McAllister, of Palo, Linn county, Iowa, writes: "The Poland China boars pigs I am advertising in your columns are going fast. What I have left weigh around 160 to 175 pounds, not fat, but good, vigorous pigs ready for use at once, sired by an 800 pound hog and out of old sows, price \$20 each. Extra choice young sows also for sale bred to a son of Chief Price 2d by Chief Price, Mr. Peter Mouw's 1,005-pound boar. Also the finest Barred Plymouth Rock cockerels to be had. Pure 'Eclipse' strain, which have a peculiar type of their own, large, fine-colored fellows. Also have a pen of Silver Spangled Hamburgs, the best layers known. Prices cheap for quality of stock. I must say in conclusion that The Homestead is a business bringer and as long as I am in the business of breeding fine stock will place my advertisement in its columns. My herd boar, H's T. C.'s U. S., a great massive hog, is still for sale at \$40. He is guaranteed a sure and good breeder." See advertisement that appears on page 36 of this issue.

Mr. Joe Steward, the well-known Poland China breeder, of Ames, Iowa, has been enjoying a splendid trade on his famous Poland China boars, sired by Gay Perfection 2d and Impudence. Among his more recent shipments was one choice boar pig to Mr. Frank O. Loudon, of Oregon, Ill., and a full brother to this pig to the well-known Short-horn breeders, Messrs. I. N. Forbes & Son, of Henry, Ill. Mr. Steward still has some five of the same class of boars for sale at \$25 each while they last. When the boars are gone he will have twenty choice gilts for sale by Gay Perfection and Sultan. The last named is by Mr. Ed Klever's great boar, Thickset. Three gilts are by Radium, and he will also sell six old sows by Hulda's Perfection and bred to Gay Perfection 2d and Sultan. Mr. Steward has one very choice boar left yet sired by Impudence that he is now using on a few sows, but is ready to sell him at any time at \$50. He is a very large, smooth hog, big boned, stands on the best of feet and legs. Mr. Steward can be relied on to treat his customers exactly right.

Mr. J. C. Webber, of Montezuma, Iowa, writes that he has had a very good trade in Chester White boars all from his advertisement in The Homestead. Mr. Webber thinks that the Chester White hog is gaining ground each year over the other breeds, and that they are more prolific and will make larger and stronger hogs when matured. He says: "Farmers have found that the first cross with the Chester White on the other breeds makes the best hog for the feed yard and market. I have got the first complaint to receive from a customer. I have one yearling boar for sale yet. He is a good, big, coarse, heavy-boned fellow, stands up well on feet, good shaped ears and head, weighs 300 pounds, not fat, but in good breeding condition. I will offer a few gilts for sale, open or bred. They will weigh 200 to 250 pounds and are of March and April farrow. I can breed them to my young herd boar recently purchased from Mr. Trumbauer, of Patterson, Iowa." It will pay breeders of Chester Whites to investigate Mr. Webber's stock be-

Papers For \$1.00 a Year

USE THIS ORDER BLANK.

SPECIAL OFFER

TWO PAPERS FOR THE PRICE OF ONE.

You Know The Iowa Homestead

One of the two. It is recognized everywhere as the foremost agricultural weekly in the world—edited by working farmers—embodying the wisdom and experience of the largest corps of editors and contributors of any farm journal that is published. It has no equal.

You Have Heard of Farm and Fireside

The other one; published twice a month, twenty-four times a year, a paper for the farmer, the farmer's wife and the farmer's children. Twelve of the numbers include the splendid Fiction Magazine Section, filled with stories, games and interesting reading for the family. An early feature is a complete novel by Miss Maude Roosevelt, entitled "The Strange Adventures of Helen Mortimer."

Homestead Co., Des Moines, Iowa.

Gentlemen:—Enclosed find \$1.00, for which you will please send me The Homestead and Farm and

Fireside for one year. This subscription is (new)

Date _____ 190_____

fore buying. His advertisement appears on page 36.

Mr. Fred Post, of Moulton, Iowa, can supply Homestead readers with White Holland turkeys, Imperial Pekin ducks, Barred Plymouth Rocks from prize winners of extra heavy weight and high scoring. His advertisement will be found on page 11 of The Homestead.

A NEW INDUSTRY FOR FARMERS.

The Telephone Supply Company, of New Hampton, Iowa, are placing on the market a book by Mr. F. B. Wright, containing the new law and instructions for distilling denatured alcohol, etc., giving full information how to make alcohol from farm products. It is in cloth and the price for which it can be obtained is named in the advertisement on page 26. Write for description of this and other books on rural telephone, electricity for boys, etc.

A COMBINATION TOOL KIT.

The Telephone Supply Company, of New Hampton, Iowa, are placing on the market a combination set of tools which consists of six heads and one pair of handles. It comprises the following tools: Pincers, end-cutting pliers, harness and belt punch, pruning shears, tinner's snips, pliers, wire cutters, adjustable alligator wrench, pipe tongs, nut cracker, screw driver, tack puller, nail

puller, calipers and dividers. The heads are of tool steel, drop-forged, ground, tempered and polished. The handles are of steel, ground, polished and finished in blue and polished nickel. Each tool is from ten to eleven inches in length and is fully warranted. A complete set wrapped and boxed, weighs less than three pounds, occupies very little space and can be carried about with- out inconvenience. For prices and other information see advertisement that appears on page 28.

A GOOD BUNCH OF POLAND CHINA BOARS.

Those of our readers who have not already purchased a Poland China boar should write at once to Mr. Chas. M. Hulbert, of Oakland, Neb. Mr. Hulbert is one of the best-known breeders in Nebraska, and he always has some of the good things in his herd. He wants to close out his entire crop of boars and has about twenty on hand. These are sired by Oakland's Prospect, the second-prize boar at the Nebraska State Fair, Nemo L's Oakland and Chief Enterprise. He has a splendid March boar sired by Chief Enterprise out of Logan B. 94th, the dam of the sow that sold in his last sale for \$108. Another very topky fellow is sired by Oakland's Prospect out of a Proud Monarch dam. These are two of the very best he has.

He also has a number of others that he is now selling from \$25 to \$35, just to close them out. If you want a boar write Mr. Hulbert at once and mention The Homestead when doing so.

A CHOICE LOT OF POLAND CHINA BOARS.

Any of our readers who have not bought their Poland China boar should write to that veteran breeder, Mr. W. N. Booth, of Danbury, Iowa. He has a number of very good ones sired by Keep On Jr., a son of the great Keep On, and also Uneeda Thickset, a son of the Ohio sweepstakes boar, Thickset. Mr. Booth has size and quality in his herd and he says that he is making a great reduction in prices for the next fifteen days.

S. J. MILLER'S PERCHERON AND FRENCH COACH STALLIONS.

Those of our readers who contemplate buying a Percheron or French Coach stallion would do well to look over the advertisement of Mr. S. J. Miller, of Kirksville, Mo., which appears on page 39. Mr. Miller's stallions will be found as good a lot of strong-boned, well-quartered fellows as have ever been imported. Another thing, the price is always right at Mr. Miller's. These stallions are selected personally by Mr. Miller and are sold at as small a margin of profit as is con-

sistent. Write him today if in the market for a first-class stallion, and kindly mention The Homestead.

HAMPSHIRE HOGS.

One of the largest herds of Hampshire hogs in the middle West is owned by Mr. Hughes

Atkinson, of Mt. Sterling, Ky. At the various state fairs he has been a successful winner and can supply Homestead readers with extra good hogs or gilts at very reasonable prices. Look up the advertisement on page 35 and write for further particulars, kindly mentioning The Homestead.

S. P. BRIGGS BUYS GOOD BOAR.

Mr. S. P. Briggs, of Seward, Neb., writes us that he has recently purchased a fine male pig which he considers a great attraction for his coming brood sow sale. This pig was purchased from the well-known firm of Messrs. Watt & Foust, of Cedarville, Ohio, and has a show yard record that few can boast of. He was sired by Golden Rule 46013, the sire of most of Messrs. Watt & Foust's show herds in 1905 and 1906, and having for his dam Cedarvale Queen VIII., the first prize and Junior champion sow at the St. Louis Exposition. Junior Champion 53137, as he is called, won first prize at Ohio State Fair, also beaded first-prize young herd; won first at New York, also reserve championship and headed first-prize young herd. This we consider one of the good things brought to Nebraska this fall and a sow bred to this young boar would be a credit to any herd. Remember the date, February 20th, and arrange to attend this sale.

LAWSE SELLING CHESTER WHITE SOWS AND GILTS.

In this week's Homestead will be found a change of copy for the well-known Chester White breeder, Mr. Geo. H. Lawse, of Harlan, Iowa. He has disposed of his entire crop of boars and now he is ready to ship sows. He will not hold a public sale and therefore has about 100 head of yearling and matured brood sows, and his entire crop of spring gilts, and these he is now offering at private sale. Never in all of his years of experience in the breeding of Chester Whites has he been able to offer as good a bunch of sows as he now offers to readers of The Homestead. These are sired by his well-known prize-winning boars, Monarch Jr. 13301, Captain 14119, Jerry S. 13167, Advance 2d 15431 and Look Out 2d 13911. These are all proven sires and are prize-winning boars. These sows and gilts are bred to prize-winning boars and the man who sends Mr. Lawse an order will be pleased with the sow or the gilt he orders. Mr. Lawse has shown his herd at the Iowa State Fair and several others fairs the past few years, and he always gets his share of the ribbons. Now, then, he offers the public the same kind of sows that he has repeatedly shown, and he will be pleased to have any of our readers call on him and examine the sows he

is selling. Write him at once if you cannot call, and order what you want, and kindly mention The Homestead when doing so.

W. F.'S MODEL 12101 FOR SALE.

W. F. Hemmerling, of Dike, Iowa, offers his famous Chester White prize winning boar, W. F.'s Model 12101, for sale. In regard to this boar Mr. Hemmerling says: "W. F.'s Model was farrowed Sept. 12, 1904, and was bred by Mr. A. M. Ellsworth, of Grand Ridge, Ill. His sire was A. M.'s Leader 10749, bred by Mr. W. A. Hoover, of Oskaloosa, Iowa, grand sire Teddy R 11305; dam, Lady Fault 13702, she by Dewey 8359. I am now through using him, and have a good many spring gilts and a fine bunch of fall pigs; also a few sows with pig to his service for spring farrow and cannot use him longer to good advantage. He is a good server and sure. My litters to his service average a trifle better than mine. He is in fine breeding shape and will be priced worth the money, or, I will trade for choice bred gilts. W. F.'s Model won second in class at the Iowa State Fair, first in class and sweepstakes boar any age or breed at our county fair in 1906. This great hog should go to some good herd." See advertisement on page 36.

A SUCCESSFUL BREEDER OF POLAND CHINAS.

We take pleasure in presenting to our readers a very good likeness of Mr. F. C. Thackaberry, of Tampico, Ill., one of the most successful breeders of Poland Chinas throughout the middle West. Mr. Thacka-

berry has been a liberal purchaser from some of the best herds of the country, and the blood lines are fully as good as can be found in any herd. Large, smooth, heavy-boned gilts, either bred or open, are offered for sale at reasonable prices, as per announcement on page 36 of this issue. When writing them please mention The Homestead.

DRAFT HORSES AT WATSON, WOODS BROS. & KELLY BARN.

Mr. Joseph Watson, a member of the firm of Watson, Woods Bros. & Kelly, of Lincoln, Neb., importers of draft horses, makes all the selections in the old country for this firm. It is also well known that Mr. Watson is a most critical judge of the drafter and that his long years spent in the business enable him to get the best. Mr. Wat-

son from the start selected only the best and by so doing has built up a great reputation for his firm. The importation this season numbers fully as many as has ever been brought over by this firm. They are of the Percheron, Sibre and Belgian breeds and are stallions of the right kind, having the necessary bone, quality, style and action. Particular attention was paid to scale, but quality was also looked after carefully. In colors this season's importations run to the darker colored horses, with an occasional gray among the Percherons. High prices are not the rule at the Watson, Woods Bros. & Kelly barns, and as a result their old customers are numbered among their best patrons. They invite all prospective buyers to come to their barns at Lincoln, Neb., a this is where they prefer to sell, and the buyer has the opportunity of seeing all the horses before buying. This year the Watson, Woods Bros. & Kelly Co. are in the best position ever to offer superior horses at reasonable prices. See page 38 for their advertisement and remember that they are always glad to have you call and inspect their stock.

Comes Back To The Old Reliable Homestead.

FINDS THAT LOWER PRICES FOR ADVERTISING DO NOT NECESSARILY MEAN TRUE ECONOMY IN BUYING SPACE—A COMMON EXPERIENCE AMONG LIVE STOCK ADVERTISERS.

The live stock advertiser who seeks to save money by using mediums of smaller circulation and lower rates invariably has the experience of learning that Homestead space, though perhaps a little higher priced on account of our much larger circulation, is really the most economical in the end. Here is a letter from Mr. J. M. Janssen, owner of the Pleasant Grove herd of Chester Whites, Sibley, Ia., which is a sample of many received from well-known breeders:

Sibley, Ia., Dec. 5, 1906. Publishers Homestead, Des Moines, Ia. Gentlemen:—I find that I shall have to come back to the old reliable Homestead; in fact, it seems as if I cannot get along without it. I had excellent returns from Homestead advertising last year, but thought I could better myself and save a little money by going elsewhere. The result was that I got badly fooled and that for actual returns The Homestead beats them all. Enclosed find my order for six months regular space.

Very truly yours, J. M. Janssen.

son from the start selected only the best and by so doing has built up a great reputation for his firm. The importation this season numbers fully as many as has ever been brought over by this firm. They are of the Percheron, Sibre and Belgian breeds and are stallions of the right kind, having the necessary bone, quality, style and action. Particular attention was paid to scale, but quality was also looked after carefully. In colors this season's importations run to the darker colored horses, with an occasional gray among the Percherons. High prices are not the rule at the Watson, Woods Bros. & Kelly barns, and as a result their old customers are numbered among their best patrons. They invite all prospective buyers to come to their barns at Lincoln, Neb., a this is where they prefer to sell, and the buyer has the opportunity of seeing all the horses before buying. This year the Watson, Woods Bros. & Kelly Co. are in the best position ever to offer superior horses at reasonable prices. See page 38 for their advertisement and remember that they are always glad to have you call and inspect their stock.

LAST CALL FOR THE McLEMORE SALE AT COLUMBUS.

On Friday, December 28th, Mr. W. M. McLemore, of Kearney, Neb., will make a public sale of thirty head of select Short-horn cattle at Columbus, Neb. They are a choice lot and good enough that breeders can well afford to attend. Every one of the females in this sale of breeding age has raised a

specimen. The ranchman is looked after in this sale and the man who wishes to buy a pair or half dozen good bulls can find what he wants in this sale. Mr. McLemore is selling some good cattle and they are certainly a money-making lot. There will not be a cow in this sale that is not a regular breeder and all right in every respect, so buyers will know just exactly what they are getting when they buy in this sale. Kindly write Mr. McLemore for a catalog and then arrange to attend the sale.

GOOD HEREFORDS AT AUCTION.

Mr. Martin Liebzig, of Muscatine, Iowa, has announced December 28th as the day when he will disperse his entire herd of thirty-five registered Hereford cattle at the Joe Hampton farm, in Illinois, six miles southeast of Muscatine, Iowa. Mr. Liebzig will have lively teams in waiting at Muscatine to transport all of his visitors from a distance across the bridge and to his farm where the cattle sale will be held. During the forenoon of the 28th he will offer for sale eighteen splendid high-grade yearling steers, in good fix and fit to be put on feed at any time. He will also sell at the same time thirty head of high-grade cows and heifers, after which five registered Hereford cattle will take place at 1 o'clock sharp. Mr. Liebzig's herd is founded on as good Hereford blood as ever came to America. His first purchases were made of that pioneer importer and breeder, Mr. Adams Earl, and later purchases were

made of Mr. W. S. Van Natta, and still later of Gov. John Sparks, so the foundation of this entire herd is on purchases made of these three well-known breeders, with a national reputation. Nothing but Anxiety bulls have been used on this foundation. The present herd bull, Sir Jack, and the one used prior to him, Patrol, were intensely-bred Anxiety bulls. Thus it will be seen that no one can possibly be disappointed in the good blood that has been used on this herd. The Hereford herd book furnishes no richer breeding. Inasmuch as Mr. Liebzig has never advertised much nor exhibited his cattle, he is consequently not extensively known away from home, and for this reason he does not expect his cattle to sell for anything near their real worth, and for the further reason that there has been no sales of registered Hereford cattle in this section of the state in recent years. It is the opinion of those best informed that where the smaller breeders have used such very valuable blood as is contained in the pedigrees of Mr. Liebzig's cattle, it affords a splendid opportunity for not only beginners, but breeders generally to secure cattle at much less prices than were they to attend sales held by parties who were much more widely known. For catalogs of this sale and any further particulars, application must be made to Mr. Martin Liebzig, of Muscatine, Iowa. Col. Griff Johnson will wield the hammer over this bunch. There will be thirty-five head listed, eighteen cows with six calves at foot and all rebred to Sir Jack; eleven choice yearling heifers and six good bulls. Certainly the farmers of eastern Iowa, western Illinois and northeast Missouri will find this an opportunity of a life time.

THE IAMS NOTED STALLION EMPORIUM.

Mr. "Shy Ann"—Everybody and their "wife's folks" know Iams, the big stallion importer of "Peaches and Cream" fame. Twenty-five years ago with three stallions, a very little money, but a big "bundle of push" and a determination to be a "noted horseman" and successful business man, he pitched his tent at the "wide-awake" horse town of St. Paul, Neb. He "lifted the lid" in the stallion business. Had a "way all his own," in buying and selling first-class stallions at "let live prices." His business has grown and is today a mammoth department store house of the best and finest draft and coach stallions in the world. For the past five years his importations have come by special express train of from eighty to 150 stallions in a bunch. He has kept "sawing wood" and butts in and is selling more and better stallions every year. Iams by his "pushin' and a-shovin'" has side-tracked and laid "on the shelf" barns full of "consalesmen" and "hammer knockers" and they are still "boosting Iams" with their knocking, but Iams believes in first-class advertising and at the "round-up" you find Iams "has the goods." Makes all buyers of stallions "sit up and take notice," that he is the "king pin" for first-class stallions and low prices. His 160 stallions, two to six years old, weight 1,700 to 2,500 pounds, fill his "town of Iams" to the roof with "top notchers." Everybody who visits Iams are "all up in the air" over his "black boys" and say, "Iams has the goods." Better than the pictures he has in the papers, and if you visit

OUR RED LETTER

Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Seaboard Air Line Railway, Dept. "S."

BIG FARM PAPER A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsomely printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published on its own \$30,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people. Its circulation reaching every state in the Union. Address with stamp Valley Farmer, 575 Jackson street, Topeka, Kan.

him and don't find everything in his advertisement or catalog as represented, you get that \$100 he hangs up. Iams guarantees to sell you a better stallion at \$1,000 to \$1,100 (few higher) than are being sold to "farmers' stock companies" at \$2,500 to \$1,000, with 60 per cent breeding guarantee, freight and fare paid by Iams. He furnishes buyers \$1,000 or \$1,500 insurance. You say: "Why can't others?" Iams buys and sell every stallion himself, at his home-barns. He buys stallions by "special train load," eighty to 150 at a time. He speaks the languages, saving you 20 per cent. He is not in the "stallion trust," saving you \$300. He pays no "slick salesman" \$100 to \$1,000 to sell you a fourth-rate stallion. He has no "two to ten men" as partners to share profits. He pays spot cash for his stallions, owns his farms, houses, barns, stocks and stallions. He sells stallions by "bot advertising" and having the koods to make "every statement good." Iams sells stallions "so good" that they do not need a "slick peddler" or the "auction block" to sell them. Iams will save you \$1,000 or more in commissions and middlemen's profits. Our illustration on page 1 is Iams and his famous Royal Belgian, "Préfer de Thnew 30204," three years old, weight 2,040 pounds, prize winner at Belgium, Iowa, Illinois and Nebraska. He is an up-to-date drafter with two good ends and a middle. A big-boned, high-class "Yankee doodle boy" that makes all the boys "lift their lid" and say, "He is Iams' kind." A warm bunch on dress parade. Iams' town of barns are "filled to the roof" with "top notchers." He is hypnotizing buyers with big bargains in stallions that will positively suit you. Write for his eye-opener and greatest horse catalog on earth. Read it, and it is "100 to 1," Dad, that you will buy a stallion of Iams. His "selling clothes" fit all stallion buyers. You won't get away from Iams if you have money or bankable note. His sales this week were a 1,740-pound German coach—a "Johnny on the spot boy"—to Peter Perry, Grass Range, Mont.; a big, lusty, two-year-old "black boy" to Peter Beck, Humboldt, Iowa; a top-notch of a three-year-old Percheron to Bob Olson, of Bertba, Minn., and a real "peaches and cream" boy to the "Edison Horse Company," of Edison, Neb.

A HOME NEAR AGRICULTURAL COLLEGE.
On this page of this issue will be found the advertisement of an ideal home adapted to parties who desire to reside near a college so that the boys and girls can be educated and at the same time be kept under the good influence of the home. It is located between the city of Ames and the agricultural college. The home is nearly new and contains ten rooms with all modern conveniences. There are twenty acres of land that go along with this home. It has become necessary during the last few days that the owner sell this property in order to give attention to his business interests elsewhere. It will be sold at a bargain. For information address Messrs. Smith & Davis, Ames, Iowa.

RAISING SUGAR BEETS AND ALFALFA IN THE GREAT ARKANSAS VALLEY.

The valley of the Arkansas river, in the vicinity of Garden City, Kan., is one of the most prosperous in the world today. A few years ago this section of Kansas was just like many other parts of western Kansas, except that the grass was more luxuriant in its growth and consequently it required less acreage to graze the cattle which the stockmen fed there. Today the Arkansas Valley leads in the production of alfalfa and sugar beets, two very profitable crops, and the man or woman who owns land in this valley is indeed fortunate. There is no country in the United States today where there are such opportunities for making money in farming, or where the profits on the investment in land would be larger than in the Arkansas Valley. With the government's new \$250,000 pumping plant near Garden City, and other irrigation projects which have been or are being finished, thousands of acres of fine alfalfa and sugar beet land will come under irrigation—the government alone furnishing water for 20,000 acres. When it is understood that alfalfa pays from \$40 to \$75 per acre and sugar beets from \$50 to \$80 per acre, it is easy to see that those who own this land are sure to be prosperous. And do not overlook the fact that under irrigation there is absolutely no failure of crops. There is plenty of water for irrigating purposes, and good, pure drinking water

can be had at from fifteen to fifty feet. The land near Garden City, in the Arkansas Valley, can be purchased now at \$40 to \$75 per acre. This certainly beats farming land that will only pay from \$5 to \$20 per acre, and cost from \$70 to \$200 per acre, especially when the crops on high-priced land are uncertain on account of the drought or too much rainfall. With the opening of the new million dollar beet sugar plant and the establishment of the government irrigation plant here, a new impetus has been given to this region, and new settlers and capital are coming in each day. Men who have laid by a competence by farming in other regions; those who have tired of city and desire a country life where their activity will bring good returns from the cultivation of the soil; shrewd capitalists who have money to invest, and the young man who is in search of a home, have all turned their eyes to this, the Nile valley of Kansas, as soon as they have learned of its facts and possibilities. The Arkansas Valley, of which Garden City is the center, is a wonderland to the man who knew this section in the early days of Kansas. Then it gave little promise of what it has now accomplished. With the endowment by nature of this region with good soil, fine water and a mild climate, its resources might have lain undeveloped for centuries had it not been for the enterprise of citizens who knew its possibilities through their residence there. The Santa Fe railroad has been a great factor in the development of this section of Kansas which, in the language of a high official of the United States Department of Agriculture, is destined in the near future to become the most productive part of the United States. The commercial clubs of the cities have been largely instrumental in placing facts before the people of less favored regions and inducing immigration. The

This is the tabulated pedigree of the grand Hereford bull, Beau Donald 48th 121465, bred by W. H. Curtice, of Eminence, Ky. He is one of the three choice herd bulls heading the splendid herd of Herefords owned by Mr. John Secor, of Mechanicsville, Iowa. He is a son of Beau Donald and out of Early Princess 3d, hence combines the best blood that has been used in building up the Hereford breed in America. He is chock full of the blood of Anxiety 4th, Garfield and Lord Wilton. It will be thus seen that there are few Hereford bulls as well bred as this fellow. The nine young Hereford bulls offered for sale by Mr. Secor are most all sired by this bull. His announcement appears on page — of The Homestead.

most potent factor, however, in turning this desert into a garden has been the land agencies whose untiring energy has presented the merits of this region in season and out of season until men have become convinced against their will and have moved their household goods to a region where they have prospered and where they have learned that the half had not been told. In the vicinity of Garden City the greatest of these agencies has been the Great Western Land Company which runs a regular sleeping car between Chicago and Garden City for the accommodation of its patrons. To the young man in search of a home where he can prosper, as well as to the capitalist with idle

TOO LATE TO CLASSIFY.
.....9 CHOICE YEARLING HEREFORD BULLS 9.....
FOR SALE.

I HAVE for sale the choicest lot of yearling Hereford bulls that I have ever had. They are sired mostly by Beau Donald 48th 121465 and out of cows of the richest Hereford breeding known to the breed, such as Anxiety, Lord Wilton, The Grove 3d, and others of like breeding. A visit to my farm, two miles west of Mechanicsville, Iowa, will prove that the bulls I am offering at from \$100 to \$125 are the equal of those usually sold at twice this sum. I have no females to spare at this time. I have been breeding Herefords seventeen years and have fifty breeding cows in the herd. For particulars, address,

JOHN SECOR, - - - **Mechanicsville, Iowa**

Ohio Chief Male Pigs For Sale

I HAVE three extra good Ohio Chief male Duroc Jersey pigs that I will price right, if taken at once. I also pigs by Adams Express, a full brother to Crimson Wonder. Male pigs by ten leading sires. I can suit you. Write me at once.

FRANK ALDRITT, - - - **NEBRASKA**

funds to invest, there is perhaps no region in this country that promises so large and so immediate returns as does the Arkansas river valley of Kansas. The following letter, written by Secretary Coburn, of the Kansas Board of Agriculture, is certainly proof positive that the Arkansas Valley is all that is claimed for it, as Mr. Coburn is one of the greatest authorities on agriculture living: "Kansas Department of Agriculture, Capitol Building, Topeka, Kan., November 16, 1906. My Dear Harrison:—That sugar factory is

Large, Improved English Yorkshire Swine.
F. Rabaler, Prop., Leigh, Neb.

I HAVE the best imported and home-bred Yorkshire in America. Have made five importations. Only Lodge Minister Sch 1855 and O. L. Fustler 6443, two imported boars and Hanover Emperor 7038 at head of herd. Stock for sale at all times. Can furnish stock not akin. Now booking orders. Write us at once.

TWENTY ACRES FOR SALE.

THIS land lies between Ames and the Agricultural College. It is well improved, has a new ten-room house with bath-room and closet, electric light, good cement cellar, good well, windmill, private water system, and is just the place for a home to educate one's family and have the children under home influences. The owner has other interests and will sell this property right. For information apply to

W. J. PRATHER, - - - **Russell, Iowa**

FOR SALE—A gray Norman Percheron registered stallion aged twelve years, weight 1700 pounds. For particulars write to Julius E. Rix, R. F. D. No. 2, West Side, Iowa.

finished animal for market purposes than any other feed. And the farmers of the Arkansas Valley cut four crops of alfalfa each year. No person who invests money in land in the Arkansas Valley now will ever regret it, for the land will grow in value even beyond the expectations of those who are thoroughly acquainted with conditions there. One of the most enterprising real estate firms the writer has come in contact with is the Great Western Land Company, of Kansas City, Mo., and Garden City, Kan. This company is composed of three young men who have done a large share toward building up the industries around Garden City. The gentlemen are Messrs. D. A. Fleming, R. A. McCray and H. C. Wiley. Mr. Fleming, who is general manager of the company, was formerly cashier of the United States Sugar & Land Co., who own the factory. The Great Western Land Company have an office in the Blossom House, opposite the Union Depot, in Kansas City, and a western office at Garden City, Kan. They would be pleased to have anyone interested call at their office in Kansas City and talk over the matter of Arkansas Valley land with them, or they will gladly send literature, map of Kansas, etc., free to anyone who will write them. They run dining and sleeping cars from Chicago every excursion date—the first and third Tuesdays of each month and the first and third Wednesdays of each month from Kansas City. The company also maintains a whole garage of automobiles at Garden City for the purpose of showing the landseeker around over the country. This company own or control all the land they offer for sale and can make very low prices on it. Do not fail to read every word of the Great Western Land Company's advertisement in this issue. It will be found on page 19. Write or call and see them.

SPECIAL RATES.
On Saturdays and Sundays from December 16th and January 5th to March 31st the Chicago Great Western Railway will sell winter visitors week end tickets to points 150 miles distant up to and including all stations within fifty miles of St. Paul and Chicago at rate of one fare plus \$2 for the round trip. Tickets limited to seven days, with privilege of extension on payment of one-third of regular one-way rate. Short-limit tickets to nearly all stations on sale at all stations Saturdays and Sundays at one fare for the round trip. Tell your friends about it and have them come and visit you. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HOLIDAY RATES TO CUBA.
The Iowa Central Railway will make a holiday rate of one fare for the round trip to Havana, Cuba, on December 18th, 19th and 20th; return limit January 9th. Passengers will be taken via New Orleans in connection with the Southern Pacific Company's steamers. The trip will be a delightful one and with the cheap rates offered for the holiday season, is particularly desirable at this time. For information as to rates, etc., address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

surely one of Kansas' big things. I am proud of it and the men whose enterprise, courage and capital have made it a reality. The hospitality of Garden City is superb, and the broad-gaged style in which the factory opening celebration was carried out by your people will long be remembered and talked about by thousands who were so fortunate as to be present. What is being done at Garden City and the adjacent territory is sure to give permanent prosperity to southwestern Kansas and the Arkansas Valley. Determination, grit, gumption and irrigation, acting in harmony, work miracles, and that's what seems to be going on all around Garden City. Cordially yours, F. D. Coburn, Secretary." The above letter speaks volumes for the beet sugar industry, as Mr. Coburn does not pay compliments to any institution unless deserving. The possibilities of western Kansas can't be estimated. A Finney county alfalfa field would make a central Kansas farmer weep, while a sight of an upper Arkansas Valley sugar beet field, a sorghum or kafir corn patch, would make him jump in the creek to drown his sorrow. The country is about 3,000 feet above the sea level and its altitude, irrigation and cold nights put the sweet into the sugar beets, and into the Rocky Ford melons. Not long ago this same Arkansas Valley was very thinly settled, and as stated above, about the only thing that grew there was grass. Now all this is changed. Garden City is the center of a great farming country. Not only does this country raise alfalfa and sugar beets, but you can see there, growing in abundance, apples, peaches, pears, cherries, plums and in fact all fruits, except the tropical, and they thrive and are singularly free from blight and worm. They reach maturity perfect in flavor, form, color and size, and it is a well known fact that Arkansas Valley fruit brings the highest market prices, both in the East and the West. This is one of the best horse and mule countries in the West. The mild winters and abundance of cheap nutritious feeds, such as alfalfa and beet pulp, and the freedom from disease, renders this the ideal section for the man who handles horses and mules for the market. To those who want to buy land we would say that they must act quickly, as this land is advancing in price so rapidly that it will soon be almost beyond the reach of men of ordinary means. The area of alfalfa and sugar beet land is very limited. To raise either of these crops soil of a peculiar kind is necessary. Another thing, land is advancing in price all over the country, and the soil that will produce such profitable crops will naturally be worth a great deal of money. It is a well-known fact that Alfalfa is the best feed for stock of any crop raised in the United States, and will produce a better-

Mr. G. W. Post, of York, Neb., will hold his bred sow sale January 22d, in which will be sold some royally-bred sows. Most of the young stuff in this sale are daughters of Top Notch 41815, a son of Tip Top Notcher 20729, and having for his dam Goldie O. XXXX., the dam of more prize winners than any sow living. This young hog weighed 640 pounds at eighteen months old and was pronounced by very competent judges one of the very best boars Tip Top Notcher ever sired. This hog is a large, smooth fellow, of extra good bone and as a sire is proving a good one. The gilts sired by him will be bred to a son of Ohio Chief and the combination ought to produce something good. Mr. Post will sell some of his very best aged sows, including the great sow, Briggs' Choice, which is surely one of the good sows of the breed. She will be bred to Top Notch and the man who gets her has a right to expect something good from this cross. There will be about forty head of well-bred sows in this sale and breeding is extra good. Don't forget to attend this sale if you are in the market for some good sows.

RICHLY BRED SHORT-HORNS

---COMING TO COLUMBUS---

To be sold at Tom Branigan's Sale Barn Friday, December 28, 1906, Sale to Begin at One O'clock Sharp.

20--Bulls--20--Big, growthy bulls, 10 to 22 months old. 16 Cows and Heifers--Of the useful kind. Every female of breeding age raised a calf this year. Six cows with calves by their side and the rest safe in calf to the best of Scotch bulls. The bull offering is one of the best, both in breeding and individuality. Three are Scotch, the rest from three to seven Scotch tops, coming from the best herds in Iowa and Nebraska--five head coming direct from the great herd of W. D. Parsons, of Newton, Iowa. Twenty bulls that are second to no twenty bulls ever tied in one barn or offered in one sale in Nebraska--all red, big bone, low down, blocky kind; come and see them and be your own judge. I extend an urgent invitation to all stock farmers and breeders, and assure you that no better or more useful lot of cows and bulls will go under the hammer this season. Catalogs ready now--send for one. Remember the date. Friday, Dec. 28. Sale under cover. No postponement.

LIVE STOCK AUCTIONEERS.

MISSOURI AUCTION SCHOOL TRENTON, MISSOURI.

***** NEXT TERM OPENS JANUARY 1, 1907. *****

The only auction school in the world where students are given actual practice selling in bona fide sales. This school's first term had double the enrolment of any other school's first term. All branches of auctioneering, oratory and live stock judging taught by instructors of from five to thirty years' experience. We only require one-half of tuition down on entering school, the other half to be paid after you have made it out of the business. What could be more fair? Write for our large, 40-page illustrated catalog, which gives testimonials from our students in all parts of the United States.

W. B. CARPENTER, PRESIDENT.
President Missouri Auctioneers' Association.
President for State International
Auctioneers' Association.

COL. C. A. EWING, VICE PRESIDENT.
First President of International Auctioneers' Association.
Twice President of Missouri
Auctioneers' Association.

The Jones National School of Auctioneering and Oratory

Is the original school, and has had five times as many students as all other auction schools in the world combined. The instructors are practical auctioneers of national reputation. Their reputations have been made by a careful study of the auction work and by conducting all classes of sales throughout the United States and Canada. A special instructor is employed in each department. Students conduct sales every day. The school does not advertise to instruct students in work we do not understand ourselves. When spending your time and money to secure an education the school should be considered, not the price. The eighth term opens January 2, 1907, and following this term the school will practically be open all the year round, with the possible exception of a short summer vacation, and there will be classes opening at short intervals, enabling those who desire to attend to enter at almost any time, the tuition remaining the same, and each class will be given a six weeks' course, with an opportunity to graduate in four weeks if proficient. Write for free catalog, list of graduates, and other information, mentioning this paper, and come when you are ready.

His Majesty, King Edward VII, and Lord Rothschild's Exhibit of Stallions were purchased by us at the INTERNATIONAL, CHICAGO, 1906.

ROBERT BURGESS & SON,

Prizes Won in this Year, Demonstrating to the Public the SUPERIOR QUALITY of our Stud.

Champion Percheron stallion at the Kansas State Fair; champion Belgian stallion at the Kansas State Fair; champion Shire stallion at the Illinois State Fair; champion Shire stallion at the American Royal, Kansas City, Mo.; champion American-bred Percheron stallion at the American Royal; first best five Percheron stallions at the Kansas State Fair; first best five Belgian stallions at the Kansas State Fair; first best five Shire stallions at the Illinois State Fair; first best five Shire stallions at the American Royal, Kansas City, Mo.; second best five Belgian stallions at the American Royal, Kansas City, Mo.; second best five Percheron stallions at the American Royal, Kansas City, Mo.; first, third and fifth Shire stallion four years old and over; first Shire stallion three years old; first Shire stallion two years old; first Shire stallion one year old; champion Shire stallion any age; gold medal best imported Shire stallion any age; second Percheron stallion one year old; second Percheron two animals from same dam bred by exhibitor; third Hackney stallion four years old and over; third Hackney stallion three years old.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the HELPER who is assisting in placing the stallion in your neighborhood, who is usually one of your own neighbors (the most influential man) whose influence is obtained by a large commission paid to him by the seller, in placing the stallion. The long-time notes from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500, which has to be paid to this influential neighbor or neighbors.

Good American Bred Stallions, \$800 to \$1,000 **First-Class Imported Stallions, \$1,200 to \$1,600**
CHOICEST STALLIONS A LITTLE HIGHER.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over 32 years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get our guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guarantee and will sell to you more good horse quality for less money than anyone. Come to the barns and get the most reasonable terms that can be offered.

WENONA, ILLINOIS.

WICHITA, KANSAS.

DUROC JERSEY HOGS.

Prairie Glen Herd of Duroc Jerseys.

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. HORSES.

FRANK IAMS

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 SAVED AT IAMS \$1,000

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His 1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye opener and greatest horse catalog on earth. A FEW CHOICE SUFFOLK FILLIES FOR SALE.

Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not jampered with grain and drugs; thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

THE KNOX BIG GRINDER

**THE FASTEST TWO-HORSE GRINDER BUILT.
WE GUARANTEE THIS.**

¶ Over two thousand of the Knox Big Grinders sold in the last three years, and every one of them pleased the buyer. If you need a grinder we guarantee it will please you. ¶ There is no breakage with the Knox Grinder. Every part is strong enough to stand ten times the working strain. It weighs 800 pounds. It is a BIG GRINDER. We guarantee it for two years. ¶ The draft is light; an ordinary team will run it easily. There is no wear out to it. It will last a lifetime. By putting in new burrs at any time it is as good as new. We have customers who have ground 10,000 bushels with one set of burrs.

Breeders' Sale--200 Horses 200

BLOOMINGTON, ILL., IN COLISEUM, Jan. 9, 10, 11, 1907.

Wed. and Thurs., Jan. 9, 10, Will sell 140 Reg. Percherons, French Draft, Shires, Clydesdale horses, mares, stallions
Friday, Jan. 11, Will sell 60 Reg. Trotters, Grade-Draft, Coach, All-Purpose and Saddle horses, stallions, mares and geldings.

These horses are consigned by the very oldest breeders in the state and out of the very best families and show herds, that represent over 2,000 premiums to their credit. We don't claim to have all the prize winners of France, England or Scotland, but we do claim to sell you horses that were good enough to win at St. Louis, Springfield and other fairs in 1904-5-6. This will be one of the largest sales of pure-bred horses ever held in the state. These are the wide-as-a-wagon kind and a number of them will weigh over 2,000 pounds. We have some with fast marks and several good match teams and a number of gentleman drivers.

CONSIGNORS—Wm. Crownover, Hudson, Iowa; A. J. Dodson, Normal, Ill.; A. M. Storm & Son, New Lenox, Ill.; John C. Baker, Manhattan, Ill.; D. Augustin, Carlock, Ill.; Hurt & Reid, Arrowsmith, Ill.; Ed Hodgson, El Paso, Ill.; Ed Moots, Normal, Ill.; Barron & Raboin, Ashkum, Ill.; Geo. D. Enyart, Onward, Ind.; S. H. Johnson, Minier, Ill.; Downs Bros., Clinton, Ill.; Tisley Bros., Lockport, Ill.; Wm. Ritter, Arrowsmith, Ill.; Walter Allen, Dunlap, Ill.; W. F. D. L. BROWN, AUCTIONEERS.

TAYLOR & JONES, WILLIAMSVILLE, ILLINOIS, IMPORTERS AND BREEDERS OF PERCHERON, SHIRE AND BELGIAN STALLIONS.

WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND
SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN
ANY OTHER FIRM IN AMERICA.

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DU HAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

THE Lafayette Stock Farm Lafayette, Ind.

Largest importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International surprised the hundreds of thousands of visitors that attended. We can and do sell our stallions as low as they can be sold at any place in America.

SEDALIA, MO. NASHVILLE, TENN. SAN JOSE, CAL.

VOL. LI. NO. 52.

DES MOINES, IOWA, DECEMBER 27, 1906.

WHOLE NO. 2580

THE HAPPY NEW YEAR.

The year 1906 closes, so far as The Homestead is concerned, as we go to press on this, the twenty-seventh day of December. The issue will reach our readers during the bustle and turmoil of the holiday season—at a time when the greetings of a new year are on the lips of all.

History records no period of twelve months that brought to the people of the United States so large a degree of prosperity as did the year 1906. Home and foreign trade during the year simply bounded past all former records, and as a result we have the most genuine kind of prosperity permeating every class of society.

Of the fulness of things The Homestead has had its share, and we know that to the great majority of our readers the year has been a fat one. The most appropriate greeting, therefore, we can extend to our readers is to wish for them that the year of 1907 will prove to be but the counterpart of the year that is now closing, bringing with it the same plenitude to which the great majority are now accustomed.

Our lot has not fallen among times when all things in our political and industrial lives is exactly as we desire, but every man who looks on the right side of things will acknowledge that there has been progression. Men whose dominating motive is greed are being hemmed in by sensible laws. Corporations are learning the lesson that individuals have rights which must be respected, and this in turn opens wider the door of opportunity to the rising generation.

When it comes to affairs on the farm we find that things are in a healthy condition. The crop that has just been stored is a bountiful one, and its bulk and quality are partly due to increasing intelligence on the part of producers. There never was a time in all the ages when agriculture as an industry was held so highly in esteem by all men as at present, and never a time when the individual farmer was so near to the front in the matter of intelligent citizenship and all that this embraces.

From the standpoint of an agricultural journal it is exceedingly important, as the foundation for another year's prosperity is being laid, to adhere closely to the sounder scientific principles of modern times. In other words, let there be less guess in our affairs in 1907 than in 1906. Keep in mind that good crops can only come from good seed, planted in a well prepared soil. Keep in mind, also, that the improved animal, as found in all modern breeds, has been brought to its present high standard by improved methods of care and handling. The high type of these animals can only be maintained, let alone improved, by putting skill into their care and their management. This matter of using good seed and giving the soil good care, in addition to the keeping of animals of a high class, represents a profitable type of agriculture, but it represents much more. It furnishes an ideal to the boys and girls that will do more to rivet their affections to the farm home and what is found there than all the other forces combined that ordinarily can be brought to bear.

If The Homestead could express one wish which would be fulfilled in the case of each individual reader it would be that there shall in

1907 be grown on every farm some seed of the principal crop produced that is just a little better than has ever been grown there before, and that there shall be introduced into the herds blood just a little richer than has been found there in the past.

The things that contribute to our prosperity are the same things that bring happiness to us daily, and the chief joy of life must be found in our daily tasks. No man ever enthused or even experienced much joy over producing a poor crop or poor animal. We need better crops and better animals because of their commercial value, but we need them more because of the effect on ourselves of producing the improved kind.

In wishing its readers a Happy New Year The Homestead can only promise that it will endeavor to do its part during the coming year to lighten the labors of the man who toils with his hand, by making his work more effective, and to give such timely advice as will prevent or tend to prevent its readers from making costly blunders. We expect to help each subscriber a little in the building up of his material prosperity, knowing that when this is done it contributes in the greatest degree to the higher mental attainments and satisfactions.

DRAINAGE CONVENTION IN OKLAHOMA.

At the conference of drainage interests which was held in Oklahoma City, December 5th, 6th and 7th, sixteen states

were represented by one or more delegates. The meeting resulted in the organization of the National Drainage Association, of which Hon. Geo. E. Barstow, of Texas, was chosen president. The work of the new association will be carried on under the direction of an executive committee of six members, the president of the association being an ex-officio member also.

It is probable that the executive committee will maintain its office at Washington. The object of the National Drainage Association will be to secure the co-operation of those citizens of the several states which are particularly interested in the reclamation of swamps, marshes and other lands which are submerged or subject to overflow, by the construction of drainage ditches, levees or other artificial means of relief or prevention. The effective campaign of education which has been carried on in recent years by the irrigation interests furnishes an admirable example of what may be accomplished in the way of practical results by systematic efforts along nearly parallel lines. The almost unanimous sentiment of the delegates present was favorable to the inauguration of a national policy with reference to the reclamation of undrained lands. The membership fee is \$5.00 per annum. The National Drainage Association will hold its next annual meeting at St. Paul, Minn., in October, 1907.

GRADING UP HORSES.

Prices for draft horses have been high enough during the last few years to in-

duce every man who is in a position to raise draft colts to get into the business. These colts in most instances must be raised from grade mares, because at the present time not more than one mare in 150 in the entire central West is eligible for registration, or, in other words, they are grades.

Dr. Alexander, in his recent bulletin on "The Horse-Breeding Industry of Wisconsin," deals with this question of grading up and among other things says:

The stallion owner could do much good by decrying the practice of breeding from a mare of different blood than that of the stallion. If the mare is rich in the blood of a particular breed, further progress in the grading up process instantly is stopped by mating her with a stallion of a different distinct breed. The filly foal from such mating will be a cross-bred and, while such animals are often good sellers, they practically are useless for breeding up to purity of blood, so cannot profitably be used to carry on the up-grading work. If, on the contrary, the grade mare once more had been bred to a stallion of the breed used in her up-grading, her filly foal would be one step nearer pure blood than the dam, and if the filly, in turn, were bred to a stallion of the same breed as its sire, the offspring would still farther progress in purity of blood and all of the breed attributes accompanying its possession.

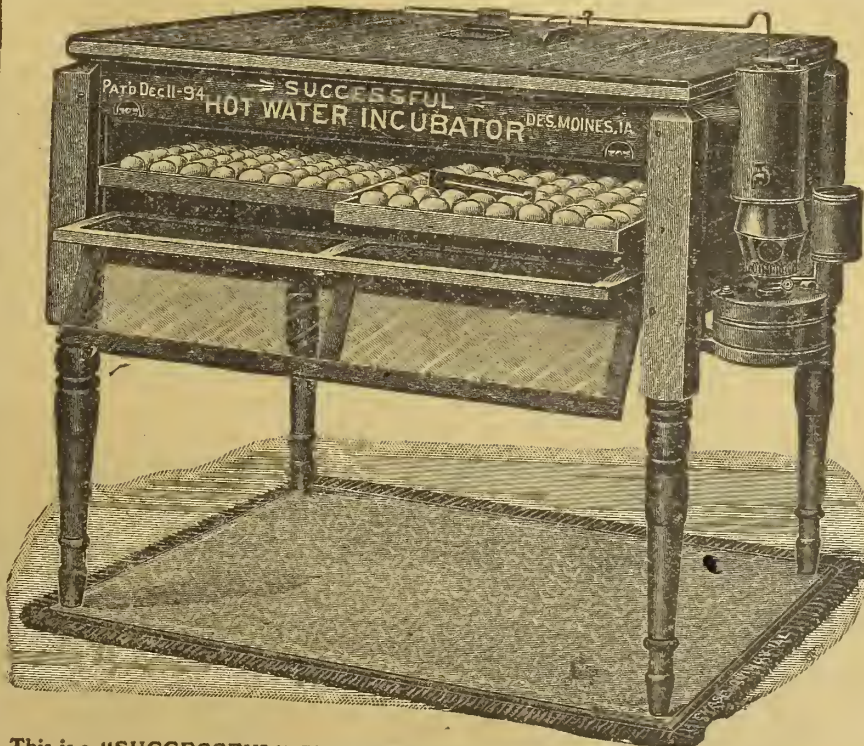

This is the process we advocate for general practice throughout the state. The stallioner will help on the good work if he unselfishly accepts as mates for his stallion only those mares that are of like blood or graded up to a certain degree with the blood of his breed. If he allows his horse to mate with a mare of alien blood he hinders the progress of horse breeding in Wisconsin and he should be philanthropic enough to educate his patrons to mate their mares with stallions of suitable breeding so that, in each case, the upward grading process may be continued.

To make this matter plainer it may be suggested that the owner of a pure-bred stallion of any one of the recognized breeds should to the best of his ability dissuade the owners of mares from breeding to stallions which in blood are different from the mares. If a mare, brought for service, is seen to be of a breed different from that of the stallion the stallioner should persuade the owner to take her to a stallion of her own breed or blood, and in so doing, he will encourage the grading up of our horse stock.

By acting contrary to this plan the owner, even of a pure-bred, sound stallion of fine individuality, quality and utility, actually is retarding the progress of horse breeding. On the other hand, did he always use his horse to a suitable, sound mare of like blood the upward grading process would go on apace and result eventually in a grand stock of practically pure-bred, sound horse stock in Wisconsin in place of the present sorry aggregation of non-descripts, misfits and mongrels.

It is to be hoped that the day will soon come when it will be practicable to carry out the excellent advice given here by Dr. Alexander. At present it would be very difficult to comply with the conditions here laid down. In the first place, it frequently happens that men in one or more townships have only access to stallions of the same breed and if they must breed mares, no matter what their breeding may be they are obliged to use these horses. We have in mind one instance where you could search a whole county and not find anything, but Percheron stallions, and yet within the borders of that county are plenty of grade Shire and Clydesdale mares. Under such circumstances it can hardly be expected that the stallion owner, who is necessarily in the business for the revenue in it, will turn away such mares. To the mare owner it is simply a matter of breeding to a Percheron horse or no horse, and while we do not like the plan of mixing the blood, yet if the mare is sound and of good weight, and likewise the horse, we would take our chances, at the present prices of good geldings, on a colt from a good grade Shire or Clydesdale mare, for example, and a sound ton Percheron horse.

The conflict here between what is theoretically sound and what is practicable

This is a "SUCCESSFUL" Chicken Factory, made by the Des Moines Incubator Co., Des Moines, Iowa.

The hatching season is close at hand and with the accompanying illustration we like to remind our readers of the largest and best-equipped plant for manufacturing incubators, brooders and poultry supplies in America. Last year this firm sold many thousand machines all over the world. Can anyone imagine such a number of incubators and brooders, shipped mostly between January and June? It certainly signifies that the machines must give entire satisfaction to the people who use them or such an enormous output could not be possible. Furthermore, if you consider the fact that the Des Moines Incubator Company have now been in business here for almost fifteen years, we believe we can make the statement that the company have built up its wide reputation largely on the merits and good quality of their machines and that it is the best guarantee of satisfaction to anybody who wants to invest in a hatching outfit this season. Those interested should write at once for their large and beautifully illustrated catalog, just from the press. It is a very interesting book for everybody who raises or wants to raise poultry and is printed in English, German and Swedish. A postal card addressed to this firm will bring either one to you by return mail.

can only be stamped out by men in a community taking up one breed of horses. In this respect there is a splendid opportunity for a profitable line of co-operation between farmers. By pulling together it will be more profitable for all.

THE COLLEGES IN COMPETITION WITH INDIVIDUALS.

Reference is here made to the practice of admitting the colleges to compete with private individuals in the steer, hog and sheep classes at the Chicago International Exposition. The winnings of these state institutions have been notable, and of course this in every instance has been due to the fact that they had the goods to show and in most cases the animals have been fitted to the point of exact ripeness. No one has ever claimed that the colleges got more than they were entitled to.

The herd from the Kansas Agricultural College this year took high rank, and The Industrialist, which is published by the Kansas Agricultural College, comments on the winnings as follows:

The state agricultural college secured a good slice of the premium money and honors as a result of the showing of fat steers at the International Live Stock Show in Chicago last week. Ten head of steers were shown, winning in all, five first premiums—three second, one third, two fourth, one championship and one reserve championship. In the pure-bred Short-horn two-year-old class the white steer, Tim, won first place easily in a class of eleven head. In the yearling class the smooth, blocky steer, Captain Primrose, secured fourth place. The college calf, Colonel Harriman, did not get inside the money in the open calf class, which was one of the strongest classes of the Short-horn show. In the senior calf special of the Short-horn association, Colonel Harriman won fourth place. The college herd took second place on the Short-horn herd with Tim, Captain Primrose, and Colonel Harriman.

In the open cross-bred and grade classes for two-year-olds the grade Angus, Kansas Laddie, of the college, was walked to the head of a herd of twenty-nine entries. In the Short-horn special for two-year-olds grades, Pride of the Maples took third place. Pride of the Maples also won first in the Short-horn special, beating Tama Jim, Jr., a blue-gray shown by the Iowa college. Boniface, shown by the K. S. A. C. in the senior calf class, won second place in the Short-horn special for senior grade calves.

The college won first in grade Short-horn herd, with the steers Landor, Pride of the Maples, and Boniface. In the calf class the college had an exhibition in the calf ideal, winning first place.

Now, while this state of facts brings much credit to the institution and to the men in charge of the animal husbandry department, yet at the same time it does not brighten the outlook for the individual who has ambitions to become an exhibitor at the International. An exchange recently suggested that the day has arrived when competition between the stations alone should be cut out if they are to show in the open classes. The average stockman believes that this is putting the matter wrong end to and that, in reality, the stations should be allowed to compete with one another, but not with the public.

It is not necessary to point out why it is that the state institution has a natural advantage over the private individual, and because of this natural advantage most states in the corn-belt prohibit the college or station from competing with the private individual at the state fair. It is not for us to say whether or not the day has come when the keen competition put up by the colleges tends to cut down competition between individuals, though we do have in mind instances where individuals who formerly competed have withdrawn on the grounds that, while they are willing to take their chances in open classes with the private individual, they cannot go to the expense of fitting only to be scooped out of the premium money by state institutions.

The colleges are represented on the board of directors of the International, and rightly so, and it is to be presumed on general principles that college competition will be allowed in the future unless some organized effort is put forward to disqualify state institutions. They have taught the public a valuable lesson and have attracted attention to themselves in a way that has extended their influence for good and in a manner that could have been accomplished in no other way so effectively.

This is a proper subject for discussion, and we hereby solicit the views of either those who have had practical experience in competing at the International or those who have not been competitors, but who have watched with interest what has transpired there from year to year.

The Problem of Renting Lands

BY B. S. ALLEN.

Since the renting question has been opened, I wish to discuss the problem with the landlords and renters of The Homestead.

As the assistant secretary of the Allen Land & Loan Co., at Laurens, Iowa, I have the management and care of about seventy farms and am dealing with as many or more renters. We have been in Pocahontas county for the past twenty-two years and during all that time we have been owning and renting lands.

First, I wish to consider the plan of renting proposed by Mr. Reinhart, of Dallas county, Iowa. With all due respect to Mr. Reinhart, experience forces us to the conclusion that the plan suggested by him is open to some criticism. The plan he proposes is, indeed, fair enough to both parties, but the trouble is to find the man. He bases his plan upon finding a man who is as good a business man, as good a manager, and as capable in every way of running a large farm as is the landlord himself. This is almost impossible for a man of such capacity will be found doing business for himself. Moreover, I believe that if everything on the farm is to be shared equally, as Mr. Reinhart proposes, there should be no charge made for pasture land. A plan which we have tried several times in the vain hope of finding a man who would make money for himself as well as for us is as follows:

We furnish the land with no rents whatever charged for pasture, meadow, or farm land, and one-half of everything needed to stock the farm except the horses and machinery, which the renter furnishes; the horses to be all mares and each mare to raise a colt each year, the expenses of which are to be borne equally and the colt considered joint property—this is because the mare and colt both eat jointly-owned feed, and the colt services are paid for jointly, therefore an equal division is the only fair adjustment that can be made. The renter is allowed to keep a limited number of chickens, generally three hundred, which are his own and nothing is charged for their keeping; he is also allowed his garden and truck patch free. In all instances the renter has been allowed the milk for his own use and butter for his table. If the renter has not had money to buy his share of the stock we have gone into the open market and bought it and taken his note for his share secured by a chattel mortgage on his undivided one-half interest. We have also several times, in fact nearly every time, furnished the money to buy the horses and most of the machinery.

The results have been in each instance as follows (I shall designate a few of the instances by number): Trial number one occurred from about 1885 until about 1890. Although highly recommended, the man proved to be a miserably poor manager. His large family of boys upon whom both he and we counted for help were an extravagant and worthless set. The result of five or six years' business was that they had drawn from us and spent a great deal more money than their share of the proceeds of the farm. Being indebted to us for their one-half of the original investment, the total proceeds from sales were turned in to apply on this indebtedness. Any money needed for their personal expenses was borrowed from us upon their note given at the time the money was obtained. They obtained this excess of money by putting up a "hard luck" story about needing shoes, groceries, etc., when they should have saved for this purpose money previously advanced them instead of squandering it.

Trial Number two was contemporaneous with Number one and resulted in the same way from much the same causes, their accounts being overdrawn about twenty-five hundred dollars in each case.

Between trials Number one and two and trials three, four and five is a period of about five years, during which time we tried similar plans of renting to two or three different men; none of which proved satisfactory nor were the returns from these farms any greater

than if rented in the ordinary way. Trials Number three, four and five were contemporaneous and were upon much the same basis as the former with the exception that the feeding and raising of sheep were especially kept in view although we intended to feed cattle and hogs, and do any like business by which it was thought money could be made upon these farms. The result in one case was fairly satisfactory to us but less so to the renter on account of his having no help of his own and hired help not to be depended upon nor to be had when most needed. The other two cases were losses and aggravations to us from the start though not particularly so to the renters as they had nothing whatever to lose. We not only lost the rent but money besides and now have their note for the balance which we will discount liberally for cash. Besides the direct losses, we put in a great deal of our own time helping look after the stock and planning to save both in feed and labor. Also, we put improvements on the farms which have not been needed since by the ordinary renter who has the usual amount of stock. In the two cases mentioned which were failures, both were caused by lack of ability to manage and a disinclination to work. In one case no manure to speak of was hauled during the entire time the man was on the place and in neither were things run in a way to make money. At the same time that these men were feeding cattle and sheep we were doing the same on our own account and were making money out of it. In each case we had felt confident that we had at last found a man who would fill the place; a man who could run the farm and do it right; with help enough of his own to be relied upon, to make him independent of hiring help and the high prices which it demanded. This had been our experience up to about 1902 and looking back over the entire period our experience taught us that it was a poor way to rent land on account of not being able to get the right man. In each case, except one, the men were extravagant as to their personal expenses and seemed to be endeavoring to get ahead of us at every opportunity; in fact, wanted us to support them and take all the risk while they did the least amount of labor possible. It must be borne in mind, too, that these farms were average farms and have since been rented in the ordinary way and have paid as well as the average farm.

We are trying it again, however, and I must admit, with almost the same results. We have a farm of 400 acres, capable of carrying about seventy-five milk cows and the young stock therefrom; there being about one hundred acres of farm land and the balance good pasture and meadow. A man was recommended to us with whom we made a deal to run this as a dairy farm. We were to furnish all the capital, he to pay interest on his share and do the labor. He represented to us that he had two boys who would stay with him and help him, that he had one team and would have three hundred dollars when he took possession of the farm with which to buy another team. He came the first of last March, but without the three hundred dollars and with a mortgage upon some of his machinery. After he was settled he told me he would have to have money to pay one boy twenty-five dollars per month as he had given him his time. We went ahead according to our agreement and bought cows and hogs and put them on the farm. In July one of the boys left him and he must now hire extra help to milk, pick corn, etc. The man himself has done about one week's work this summer. He says he must be careful or he will get rheumatism, and I might add that he has been careful. Now, this matter simmers down to this: He wants us to guarantee himself and family a comfortable living and some profits, we taking all the responsibility, furnish the capital and labor, or money to pay for same. This, we of course do not feel

inclined to do. We had better hire the help ourselves and run the farm to suit ourselves. We would like to find the right man for this place. We would like to disprove what our experience so far has taught us. One of our neighbors has a farm rented on this plan and his renter being an industrious, economical, energetic man, is making himself rich and giving the landlord a big rent from his land.

Our most satisfactory plan of renting land is for a share of the crop and an agreed cash rent for pasture, meadow, etc. In this locality the prevalent share rent is two-fifths of the crop delivered at the market and from two dollars and fifty cents to three dollars and fifty cents per acre for pasture and meadow. By this plan of renting it is to the interest of both the landlord and renter to keep the productiveness of the soil up to the highest point possible. This is especially so when renting for a term of years, and we have no time for one-year renters. They make no money either for themselves or for the landlord. Taking share as we do, we try to get the best renters possible and it is our aim not to rent to a man who does not take care of the farm properly; i. e., one who does not haul the manure out, keep the weeds down along the fence rows, roads, and all over the farm, keep all loose boards nailed up, fences in repair, and yards neat. We are always willing to furnish staples, nails, etc., for such purposes. Renting for share this way makes the interests of the landlord and tenant one, and both must endeavor by every means to increase the productivity of the farm.

I consider the seeding of a reasonable amount of land to clover each year on each farm as one of the best things that can be done, and we have a plan for doing this which we expect to put into operation next year. For instance, on a two hundred and forty-acre farm we will furnish enough seed next spring to seed down a patch of ten acres and another patch of ten acres the following spring. In the fall of 1908 we should be able to get a crop of seed from the patch first sown. Enough of this will be cut for seed to sow whatever sized field might be agreed upon to be sown. The balance of the second crop will be turned under for the purpose of enriching the ground, and at the termination of the lease the renter must leave seed enough to sow down a field of at least twenty acres to clover. This seed, of course, has all been grown on the farm and he needs to be at no expense except for thrashing it. In this way each year from ten to twenty acres of clover sod will be broken up, and this together with the manure made upon the farm, we think ought to keep up the productiveness of the soil instead of allowing it to deteriorate. The renter must pay cash rent for the clover land from which he cuts hay. This is our first experiment of this method of seeding and we would like to have the opinion concerning it of any who feel inclined to give it through the columns of this paper.

As to plowing, if a renter is leaving the farm and we have not found a new tenant for it in time to do the fall plowing when it should be done we pay the renter one dollar and twenty-five cents per acre for what plowing he may do and have the ongoing tenant pay for this, we agreeing to pay him at the termination of his lease the same price per acre for at least an equal amount of plowing.

The best method of dividing the grain is, of course, a difficult problem. If the renter is honest there is no trouble. If he is dishonest the landlord must be protected in such a way that he may obtain his share and proceed to oust the dishonest man.

To sum up, our experience has been that the plan or one similar to the one proposed by Mr. Reinhart is a failure, and this has been the experience of many landlords of our acquaintance. Of course, there are notable exceptions to the rule as in the case of our neighbor, whom I mentioned above. Our most successful plan is to rent for share to the very best man we can get. In this way we hope to improve all the time and to build up the productivity of the farms. We are intensely interested in this subject and are anxious to hear from landlords and tenants as to their different views of renting.

Farm Furrows

Turned by a Practical Farmer.

The Furrows man is almost convinced that it is possible to save seed corn in such a way that it will not need testing.

Unless a man is up against agriculture as a practical proposition he is in no state of mind to give up-to-date instruction to farmers.

Marketing grain at the elevator is a mighty slow way to liquidate a debt. If it is marketed through the medium of good live stock it counts much faster.

Corn stalks alone will make no cow break the state record in the production of milk. A pail of half and half night and morning will help some—half bran and half ground oats.

There comes a time in the life of almost every boy and girl when they know a good deal more than dad, and it's a puzzle to the average parent to know just how much rope to give them. The spell only lasts a year or two, but where one has about a dozen children it helps some to bring gray hairs.

As a rule our best farmers are not public speakers, and I know of many exceedingly successful men who cannot be persuaded to take part in a farmers' institute. Too many of these "gab" fellows are theoretical, and the news is in the air that some of them can scarcely get a hearing now.

Did you ever stop to think of the clove as the essence of Zanzibar, the much noted island on the east coast of Africa? Nine-tenths of the total production of the world is grown there and the natives are so lazy that government prisoners are hired out by the officials to pick the prized spice.

The department of agriculture has recently published an interesting bulletin, entitled "A Successful Hog and Seed Corn Farm." It is issued as Farmers' Bulletin No. 272 and may be obtained by writing Department of Agriculture, Washington, D. C. We have read it from cover to cover and recommend it to every man who raises hogs.

You can't expect to correct the evil results of careless feeding by the use of condiments and other mixtures of this nature. Feed stock in regular amounts and at regular times and with food that is bright and free from taint and mustiness. Moldy hay and weather-beaten water-soaked corn fodder is about as tempting to the stock as a pancake a week old would be to you.

It will soon be time for the annual visit of the nursery agent who carries a line of novelties. The seedless apple is a standard one and it is safe to say that the specimens sold under that name are as fruitless generally as they are seedless. This very fact often makes them true to name, as being without fruit there can be no seeds.

In an early day two New England lads started on a jaunt of ten miles, their objective point being a railroad crossing where they could see a train "go by." They were given two pennies for spending money. Half their capital was spent for crackers at the five-mile point and the balance went in the same way before they reached their destination. As they sat eagerly devouring the half cracker one of the boys remarked: "What would mother say if she knew

we were carrying on like this?" The grandson of one of those boys, with three companions, dined at the Astor House in New York recently and their bill for one meal was \$65. That surely is going some.

Will someone rise and explain why it is that turkeys roost higher and higher in the trees as Christmas approaches? Early in the fall the Furrow man's turkeys started roosting in apple trees, a little before Thanksgiving time they took to the box elders, and the week before Christmas they forsook the box elders for some very tall willows. The young, tender ones seem to get the highest, while the old gobbler, who is now a great-grandfather, is contented to perch on a five-foot fence.

An evergreen Christmas tree is almost half the pleasure of the holiday at our place. It is often impossible to buy them in small towns and those that are so purchased come a long distance and are far from being as fresh and green as those newly cut. Our boys used to trim out a bunch of spruce branches from the scattering trees about the grove and by arranging them on a trunk of cottonwood or other wood a very close duplicate of natural tree was formed. The branches were inserted in holes bored in the trunk.

Ketchup bottles and the rest of the list of sauces that burden the counter of restaurants have assumed a much brighter and fresher look of late. In compliance with the pure food law the bottles tell the truth about their contents. On many these words will be noticed: "Contains one-tenth of 1 per cent of benzoate of soda." This chemical is a preserving agent formed by a combination of benzoic acid and soda. We will probably continue to soak our ham sandwich with it just the same when getting a short order. Anyhow we know what we're eating.

THE LAND RENTING PROPOSITION.

Elsewhere in this issue will be found a contribution from Mr. B. S. Allen, of Laurens, Iowa, on the subject, "The Problem of Renting Land." Mr. Allen, as stated in the beginning of his article, is in charge of about seventy-five farms and of course his experience is necessarily rather more extensive than the average man. These farms vary in size from one-quarter section to one section, so that there is an immense responsibility in running them, and the ideas here suggested have grown out of a long, practical experience.

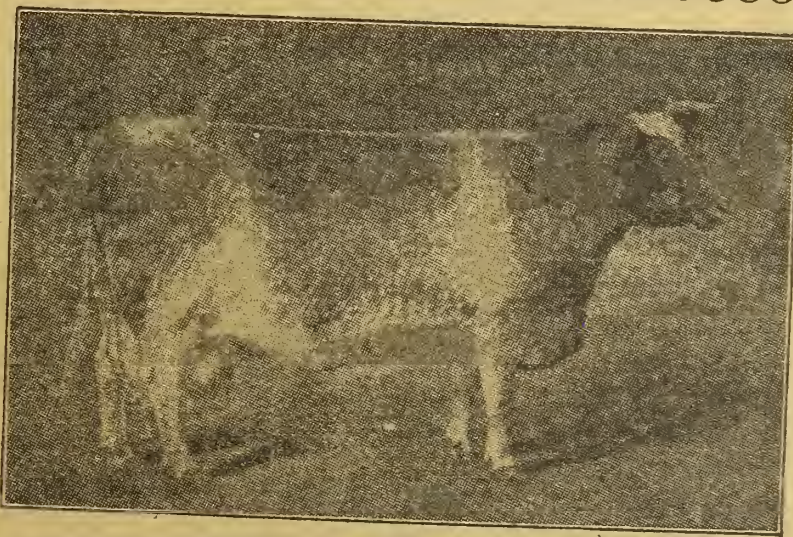

It will be remembered that an article appeared in these columns some time ago

from Mr. Rhinehart, and this is referred to by Mr. Allen. Mr. Rhinehart's plan was for the landlord to go into partnership with the tenant on the half and half basis, the owner putting his land against the labor of the tenant and dividing the proceeds equally. It may be that Mr. Rhinehart has had rather better success in finding the right man than Mr. Allen, and for that reason naturally comes to a different conclusion regarding what is a feasible plan for renting his land.

We would like now to hear from the tenant side of the question, and if this is taken up we hope it will be in a broad-minded spirit, bearing in mind that there is just as much difference in landlords as there is in tenants, there being good and poor ones in both classes. The outlook of both Mr. Rhinehart and Mr. Allen is a broad one because the latter acknowledges that in the case of a neighbor a tenant has been found who is making money for himself and for the land owner, working on the half and half plan, though it has failed to work out satisfactorily in his (Allen's) case. The subject is of great importance and we hope that it will be discussed at thoroughly from the standpoint of both landlord and tenant.

A Successful Combination.

The Combination Oil Cure for Cancer and Tumor is a recognized success. Beware of imitators. Write today to the Originator for his free books. Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

Rowena 2d, the subject of the above illustration, was entered in the dual-purpose contest at the St. Louis World's Fair by her owner, Mr. H. J. Hughes, of Trenton, Mo. She is today doing better work at the pail than she did at the World's Fair 201 pounds, and during that time she gained 140 pounds in weight. Prior to this sixty hours just previous to the test she would undoubtedly have made a much better record. At "Hughesdale," her home, she is today outstripping her World's Fair record. Mr. Hughes says she is milking better than forty pounds per day and on ordinary feed. Her yearling son is now offered by Mr. Hughes and should go to some herd where the milking Short-horn is appreciated. See page 29 for advertisement of Hughesdale dual-purpose Short-horns.

Jayne's Tonic Vermifuge

gives rosy cheeks and active health to pale, sickly children.
And it is good for their elders, too.
Ask your druggist for it.

BUILDING

MATERIAL AT 1-2 OF THE ORIGINAL COST

We have purchased outright, the most historic land-mark in St. Louis, the famous Coliseum and Mammoth Music Hall, covering four blocks; also the most beautiful feature of the Louisiana Purchase Exposition, the world renowned *Tyroleean Alps*, which was erected at a cost of \$1,000,000.00. We now offer everything of every description used in the construction, furnishing and operation of these immense structures, at one-half the original cost. Ten million feet of lumber, all sizes; twelve million brick, one million feet of pipe, all sizes; 500 toilets, 100 lavatories, electric motors, wire, lamps, fans, blowers, exhaust fans, radiators, heating plant, boilers, Rubberoid, tiling, slate and steel roofing, plate glass, window frames and doors, etc. Also 5000 common chairs, 5000 dining room chairs, 1000 dining tables, 100 leather seated chairs, 100 solid oak fancy tables. Send us your estimates and get our prices by return mail. We guarantee everything we sell and refund your money if you are not thoroughly satisfied. We refer you to the Merchants Laclede National Bank or any commercial agency. Write to-day for descriptive catalogue and prices. Address

ST. LOUIS WRECKING & SUPPLY CO.
3809 MANCHESTER AVE., ST. LOUIS, MO.

Wouldn't You Like

to have us show you the wonderful opportunities existing in the South, and how you could improve your present condition?

THE "Seaboard Magazine"

Devoted to the agricultural and industrial development of the South, will point out the many advantages of a location in our mild climate, where life would be a greater pleasure as well as profit by reason of being able to carry on work throughout the entire year. Why battle against the elements? If you want a stock or grain farm, a fruit farm, truck farm, where lands are fertile and productive, in fact, anything, and want it in Virginia, the Carolinas, Georgia, Alabama or Florida, the magazine will assist you. Sent FREE on request, together with other handsomely illustrated literature descriptive of the South and its wonderful resources and progress. Special low round-trip rates for homeseekers, prospectors and investors.

Mysteries of Mexico

A story of the Lost Bullion Spanish Mine, formerly worked by the Spaniards with slave labor. This interesting booklet contains much valuable information for investors; also tells the story of the conquest of Mexico, and romances of lost mines. Beautifully illustrated and bound in handsome crash cover. Free. Write today.

Special Announcement

We have just received a message from the mine that new and important discoveries have been made. From the tone of this message this discovery will have an important effect on the future policy of the company in regard to its stock selling, so that the Directors feel justified in placing the stock at 15c to go into effect this day and date. Manager A. E. Keables with a corps of expert Engineers has left for the scene of the new find. To our Clientage: The significance of the above will appeal to you who have in the past followed our advice in such matters. Every indication at headquarters of the company points to rapid and sudden advance of this stock and we would urge you to wire your reservation and orders for stock immediately.

STEREOSCOPES

FOR NAMES OF FARMERS

The Farm Magazine Co. wants names of farmers likely to be interested in their big, handsome illustrations of farm paper. For 5 names they will allow our readers a and a stereoscopic outfit. The subscription price is 50c. Send 5 names and addresses of farmers and 25c. The publishers will enter you as a subscriber fully paid for 1 year. They will mail

you FREE a boy's and girl's stereoscope and 50 views. Address, FARM MAGAZINE CO., BOX 43, QUINCY, ILL.

WHAT DO YOU SAY?

Several hundred thousand farmers say that the best investment they ever made was when they bought an

Electric Handy Wagon

Low wheels, wide tires; easy work, light draft. We'll sell you a set of the best steel wheels made for your old wagon. Spoke united with hub, guaranteed not to break nor work loose. Send for our catalogue and save money.

ELECTRIC WHEEL CO., Box 43, Quincy, Ill.

THE HOMESTEAD

A Practical Journal for the Farmer,
Stockman, Fruit Grower, Poultryman,
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

SCATTERING DISEASE.

The following communication has been received from a subscriber, Mr. J. Briney, of Marion county, Iowa:

I am interested in the discussion which is going on in your paper about disease among hogs. I have been in the business for thirty years and up to date I find no cure for cholera. I think the party who is more responsible for the spreading of disease, especially among hogs, than any other agent is the hog buyer. He hears that a man's hogs are sick and off he goes with the thought of getting a snap. He tramps around the yards and possibly an hour afterwards is looking at the hogs of a neighbor where no disease has been introduced. In the meantime no attempt whatever is made to disinfect his buggy or his boots, and consequently it is but natural he spreads disease.

In my opinion no hog is immune until he is dead. I think more hogs are killed by treating them wrongly than die from cholera. A neighbor of mine was feeding coppers and I told him that if he could use that compound without hurting his hogs he was the first man I ever knew who could do it. He said his hogs looked and acted as if they wanted to die, and he then allowed them to get good and hungry and fed his coppers. In many cases they died after getting a dose. No wonder. No remedy that I know anything about works the same under similar circumstances. If a thoroughly scientific preventive were found I think it would do this. The whole business is a hit-and-miss affair. I am hoping that some day the department of agriculture at Washington, or some scientist somewhere will discover a remedy for this disease.

It is, no doubt, true that disease is often spread in the way here described by Mr. Briney. In many cases stock buyers are not very serious students of science, and many of them take no stock in the theory that a little germ can destroy a hog in a few hours, when it is once introduced. We once stopped a man at the gate whom we knew had driven from a farm where cholera existed. What we were afraid of was both the contamination on his boots and on his buggy wheels. He ridiculed the idea that there was any danger of introducing disease in this way, but nevertheless he never got into our yard and the hogs up to date are healthy.

Regarding the matter of doping hogs, we will say that this can possibly be carried too far, though we never could see any harm in allowing hogs to have access to plenty of material such as salt and ashes and to give them a little coal tar product in their swill occasionally. Of course these coal tar products are not very palatable, but if fed in small quantities they do no harm, and there are a great many farmers who believe that they do good. That kind of doping, as we state, is harmless and it may be beneficial.

ONE REASON WHY HIRED HELP IS SCARCE.

The following communication has been received from a subscriber of Clay county, Iowa:

A little incident recently occurred in this locality which, in a measure, shows to some extent why each year it is more difficult to get competent farm help. A farmer here employed a man for a term of months. The employee was faithful and trustworthy and took specially good care of the stock when the employer was away, which was about one-third of the time. In working a little over seven months he lost but two days, Decoration Day and the Fourth of July, these of course being his by law. He was also away only two Sunday evenings and did the chores the balance of the time, week days as well as Sundays. This man was up every morning at 5 o'clock and did not finish his work until 8 or 8:30 p. m. When settlement day came the employer deducted the two legal holidays and he also kept out the value of the employee's time while he was working on the road. I myself

have nothing to do with this case, but these are the facts, and as I try to analyze the farm help situation and come across incidents of this kind I am not surprised that young men go to the cities or go anywhere rather than stay on the farm.

I do not mean to say that all farmers are as niggardly as was the case in this instance, and yet I think that in too many cases farmers are a little close when it comes to the matter of settling up. In this case the young man who was employed frankly stated that it was his last summer on the farm; that he would take his chances in the future in towns or in cities.

No farmer whose eyes are opened to his own best interests will treat a faithful man in this way. There is so much difference between a good man and a make-shift of a man that any employer can well afford to be liberal in the matter of making allowance for holidays and for lost time generally when he gets a good man. No employer should consider that he is sacrificing in the least if he allows a good man to take not only the legal holidays, but even a little more time than this to call his own. Where each understands the other and each trusts the other, the matter of a day now and then when work is slack amounts to so little, taking the year's work into consideration, that no broad-minded man will compute the value of such lost time for purposes of deduction. Of course there is a reasonable limit to the amount of lost time allowed, but where faithful services are rendered the owner of a stock farm can well afford to throw in fair days and circus days, and then some.

Of course there are men whose service does not entitle them to any such favors, but a farmer is much farther ahead at the end of the year, even if he throws in a few days' time, with one who will look after things without being looked after himself than if he employs a man who has to be "watched."

After all, this is not a subject that one can treat satisfactorily by laying down specific rules, because so much depends, not only upon the farmer himself, but upon the hired man. If each makes up his mind not to take advantage of the other, the relationship between the two may be kept exceedingly agreeable, by each giving and taking in the smaller matters that mean so much to both. A good man on the average farm in the corn belt can, in addition to earning his wages every day, save for his employer the value of his wages over and above what a shiftless fellow can possibly do.

TO CURE A COLD IN ONE DAY

Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

An Important Change.

Mr. David L. Taylor has resigned the vice-presidency of the Lord & Thomas advertising agency at Chicago, and accepted a like position with the Long-Critchfield Corporation, of the same city, becoming a stockholder in the latter enterprise. Mr. Taylor is regarded as one of the most forceful, original and successful men in the advertising world, and handles some of the largest agricultural,

THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.
TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs.
I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.
Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

mail order and general publicity accounts now being placed, and is credited with exceedingly good standing with his clients on account of his success in coordinating copy and selling plans so as to bring results in large volume and a steady stream.

The Week in Kansas.

Once again we have been given the kind of weather asked for. It has been just what the belated corn huskers wanted, and weather by no means undesirable to those who have finished husking. In other words, it has been fine winter weather. No moisture has fallen, though some has been threatened, and the ground has been frozen so that the "soft spots" in the corn fields have not hindered pulling out full loads. The days are so short, however, that no one is bothered by being able to husk more than two full loads in a day. The majority are fast getting through with their husking. While some probably will not be through in a month from now, if we have the best of weather, the bulk of the corn will be in the cribs at the end of this week.

We are still working under the same difficulty here in Kansas, not having cars enough to haul stuff to market or haul goods back. In a section to the south of us, in Woodson county, there are thousands of tons of prairie hay waiting to be marketed, but no cars can be had. When a man has from 200 to 300 tons on hand, and the price in Kansas City is better than it has been before in years, it seems a piece of tough luck that he cannot make the short distance from here there, and get the money out of his crop. There is an apprehension that the shortage of cars is what is keeping the price of hay up, and that as soon as cars can be had hay will be rushed in in such quantities as to break the price. Many are getting anxious to get their crop to market on this account.

The corn market remains the same. In many instances the scarcity of cars is proving a good thing for the farmers, as not being able to rush their corn off is causing some to keep it, and they may feed it right on the farm. No one has lost money feeding either cattle or

hogs this fall and the only corner to watch now is to get good stock to feed to make money the rest of the season; providing, of course, the unexpected does not happen.

Here in Kansas there never was so much to make the Christmas day merry as there was this year. Coburn's Thanksgiving story tells what we have done this year much better than we can. With a valuation of crops nearly double of that of ten years ago, there is every reason for this Merry Christmas and the starting of a Happy New Year.

The weather this morning promises to continue fair. Santa Claus will have to come in his auto this year, instead of his sleigh, unless there is a decided change.

Henry Hatch.
Coffey, Co., Kansas, Dec. 20, 1906.

Barclay's Short-horns Dispersed.

On December 18th a goodly number of representative Short-horn breeders assembled at West Liberty, Iowa, to witness the dispersion sale of Mr. C. S. Barclay's Orchard Farm Short-horns. Mr. Barclay has been breeding Short-horns for a third of a century, and it was with regret that we witnessed his closing out of this most popular breed, for which Mr. Barclay has stood a staunch exponent for these many years. The cattle in most part were too thin in flesh to bring their worth. This, coupled with the fact that a number of them were very old and past their day of usefulness, militated against high prices. Iowa breeders only were in attendance. Some of the cattle (particularly the young things) owing to short pasture, had not been well grown. This also cut down the averages to some extent. Mr. O. C. Bigler, of Victor, Iowa, and Mr. C. R. Steele were among the most liberal bidders and buyers, as were Messrs. E. Moore & Sons, of West Liberty. The sale was conducted with Col. F. M. Woods in the box, who made one of his usual strong talks, complimenting Mr. Barclay in various ways. He was assisted in the ring, and ably so, by Messrs. Ralph W. Barclay, A. Alexander, of Morning Sun, Iowa, and P. N. Gibson. The sale was not a spirited one at any juncture, but with considerable effort Colonel Woods wound up the offering with a satisfactory average. The following summary will furnish some information as to where the cattle went and the prices paid. We append the buyers' names only where \$100 or more was paid:

FEMALES.

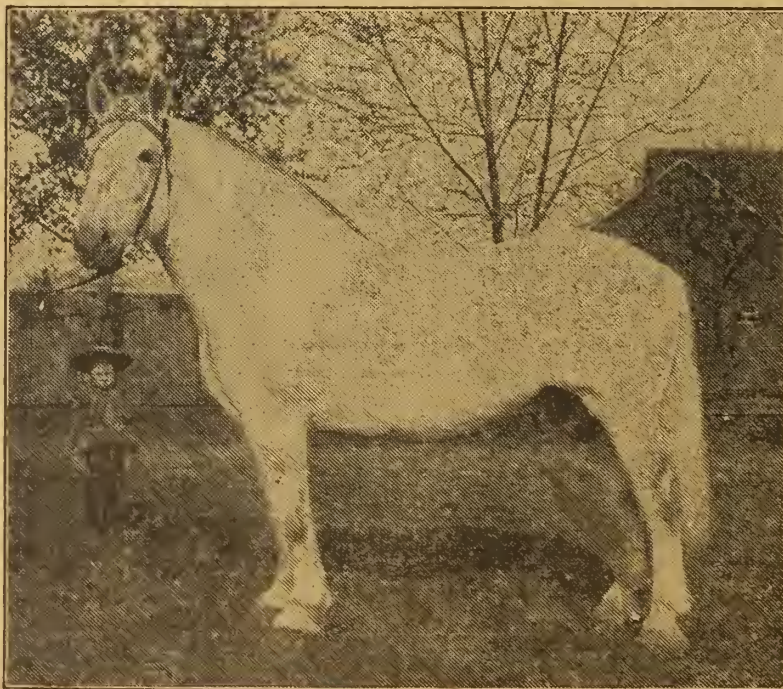

Orchard Farm Flora 4th, six years, sire Golden Hero, and c. c., Mrs. O. C. Bigler, Hartwick, Iowa \$250
Orchard Farm Victoria 4th, one year, sire Iowa Champion, same 230
Beauty's Price B. 6th, twelve years, sire Imp. Harvester, and b. c., O. L. Lechlitter, Prescott, Iowa 110
Glendale Violet, seven years, sire Glendon, and b. c., C. R. Steele, Ireton, Iowa 270
Beauty's Pride 7th, three years, sire Imp. Favorite, Mrs. O. C. Bigler 110
Orchard Violet, one year, sire Iowa Champion, E. J. Mason, Calumet, Iowa 150
2d Missie of Loudsboro, six years, sire Royal Hardy, and c. c., Mrs. O. C. Bigler 230
Orchard Missie 2d, eleven months, sire Iowa Champion, O. L. Lechlitter 210
Orange Blossom B. 11th, eleven years, sire Field Officer 2d, and c. c., Ed Moore & Son, West Liberty, Iowa 140
Mysie Ann, nine years, sire Commodore, and b. c., same 125
Pride B. 16th, one year, sire Iowa Champion, J. Barr & Son, Davenport, Iowa 140
Alexandrina of Edan, six years, sire Baron Linwood, B. L. Norton, Wilton Jct., Iowa 120
Alexandrina of Orchard Farm, one year, sire Iowa Champion, E. C. Holland, Milton, Iowa 100
Lady English 6th, three years, sire Iowa Champion, E. E. Keck, Stockport, Ia. 130
Lizzie Lesley B. 31st, four years, sire Baron Gloster, and c. c., Wm. Hart, Sheffield, Ill. 100
Lady Oxford 2d, four years, sire Sittytton Fame, and c. c., J. Barr & Son 115
Jenny Lind 4th, one year, sire Iowa Champion, J. Cardell, Wolcott, Iowa 110

BULLS.

Imp. Favourite 180306, five years, sire Proud Victor, Mrs. O. C. Bigler 180
English Champion 2d 264460, one year, sire Iowa Champion, E. C. Holland, Milton, Iowa 160
Mysie's Champion 264462, one year, sire Iowa Champion, J. F. Kinmouth, Columbus City, Iowa 150
Orange Champion 2d 264463, one year, sire Iowa Champion, J. Barr & Son 335
Lavender Champion 2d, one year, sire Iowa Champion, H. L. Mosher, West Liberty, Iowa 100

SUMMARY.

42 females \$4,396.50; average \$104.00
10 bulls \$1,212.50; average 121.25
52 head 6,609.00; average 107.85

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

CONTRACT—DRUNKENNESS.

If a man enters into a contract, and afterwards attempts to avoid it upon the ground that he was drunk when he made it, he must prove that he was at the time so completely under the influence of intoxicating liquors that he was unable to understand the effect and consequences of the transaction. This is the general doctrine on the subject in all the states. It was approved recently by the supreme court of Iowa.

LAW-QUESTIONS CONSIDERED:

HORSE DOCTORS.

A Reader, Ross, Iowa.—(1) Can a graduate of a veterinary correspondence school in Canada lawfully practice in Iowa? (2) Must one have a state certificate to practice veterinary medicine and surgery in Iowa, or is a diploma from a college all that is necessary?

Answer.—(1) A person cannot practice veterinary medicine or surgery in Iowa without being registered by the state board of veterinary medical examiners, and receiving a certificate signed by the members of the board. A diploma from a correspondence school in Canada would not answer. (2) A certificate from the state board is absolutely necessary. In order to obtain such a certificate, a person must now be a graduate of a legally chartered and recognized veterinary college, and also pass the examination required by the board.

RENTED LAND—SHARES.

A Subscriber, Kalona, Iowa.—A rented a 200-acre farm to B on shares. B did not move on the farm, but lives in a house near it. They have a written contract which took effect March 1, 1906, and will expire on March 1, 1907, but a clause in it provides that if both are satisfied, the lease is to run for two years. About May 1, 1906, B told A there was more land than he could handle and asked him to rent some of the hay land to someone else, so A rented the hay ground to C. C took off the first crop for hay and the second crop for clover seed. Who is entitled to the clover seed, A, B or C?

Answer.—It depends upon the terms of the renting contract between A and C which you have entirely omitted to state in your letter. How did it happen that you missed the one essential point or fact necessary to an answer? If C rented the hay ground for cash rent, he is entitled to all of the clover seed. If he rented it on shares, he is entitled to whatever share was agreed to between he and A, and A is entitled to the balance. B is not entitled to anything on land rented to C.

MEANING OF "MORE OR LESS."

A Reader, Any Old Where.—A rented a farm from B, agreeing to pay grain rent for the farm land, and cash rent for the hay and pasture land which was stated in the contract to be so many acres, more or less. A public road runs along one side of the farm, half on B's land and half on the adjoining land, the division line between these farms being the middle of the road. To get the number of acres mentioned in the contract, one-half of the road must be counted, so it practically requires A to pay rent on half the road. Can B lawfully require this of A?

Answer.—This correspondent absolutely ignores a rule or requirement published many times in these columns, viz., that an inquirer should state his post-office address, or at least mention the state in which he lives. His inquiry should, therefore, go into the waste basket,—but because the law he inquires about happens to be general, and applicable in every state, we answer. The words "more or less" in a contract about land, give it elasticity to a certain extent, or rather an uncertain extent as to area, and neither party can hold the other to the precise and exact number of acres stated preceding the words "more or less." These words are meant to cover a slight deficiency, or excess. That is what they are for—and the ground covered by half of a public road would be such a deficiency in a contract of sale or lease, as to be provided for by the words "more or less." Besides, the fee title in the land extends to the middle of the road.

TRESPASSING STOCK.

Mr. C. C. Cary, Mott, North Dakota.—I am a homesteader in North Dakota. There is a herd of horses running at large in this vicinity, which does great damage to my crops. (1) Could I take up a couple of these horses and hold them for damages done by the whole herd, or would I have to take up the herd? (2) Tell me the necessary steps to take in order to hold trespassing animals for the damages done by them?

Answer.—(1) You could not take up any of the horses unless the voters of your county have voted to abolish the law allowing live stock to run at large. The general law in North Dakota is that horses and cattle may run at large, but this may be changed in any county by a vote of its citizens. If this has been done in your county you may take up trespassing stock, and keep it until damages are paid, but as the law is somewhat complicated, you should engage a lawyer to conduct the proceedings. Notice must be given to the owner of the stock, and suit brought within sixty days, unless damages are paid before that time.

TRAIN KILLING STOCK.

A Subscriber, Lushton, Neb.—(1) Where live stock gets upon a railroad track in Nebraska, because of the railroad fence along the right of way being blown down, or being down from any cause, and such stock gets killed by a passing train, is the railroad company liable for full appraised damages? (2) Two or three hours after a train passed, seven or eight persons saw stock dead on the railroad right of way. Appraisal of the stock was made by three persons, one appointed by the railroad section boss and the other two by the owner of the stock. The engineer of the train claims that he did not run into any stock. Can the owner of the stock recover damages? (3) Could a suit be maintained against a railroad company because an engineer fails to blow the whistle at public road crossings?

Answer.—(1) The railroad company is liable for the actual value of the stock—whatever it can be proved to be worth. (2) The owner of the stock can recover damages from the railroad company by proving these things, viz.: first, that the stock was actually killed by the train; second, that the stock was on the track on account of the negligence of the railroad company, or being on the track was struck by the negligence of the company; third, the value of the stock. (3) Yes, \$50 forfeiture for each offense, one-half to the informer and one-half to the state, and besides liable for all damages.

ADMINISTRATION.

Mr. W. H. Marx, Waukesha, Wis.—My father died in November, 1903. I was named in his will as executor, and appointed accordingly by the county judge. I made a claim against the estate for \$1,000 for wages, and the county judge allowed it for \$900. Some of the relatives appealed the matter to the circuit court and judgment was rendered there in my favor for \$1,000. I paid my attorneys \$265 for their services. They said I would have to pay the costs in the circuit court, but said I would finally get the amount back, so I paid \$75 for costs and got a receipt for the costs and for filing judgment, and also for attorney's fees. The parties appealing gave a bond of \$250 for costs. The judgment is not payable till after the death of my mother. The estate has not been settled in court, though I have paid all bills against it except my judgment. I have asked my lawyers to take steps to have the estate settled, but they do not seem to care to do anything about it. What can I do to recover the costs I have paid?

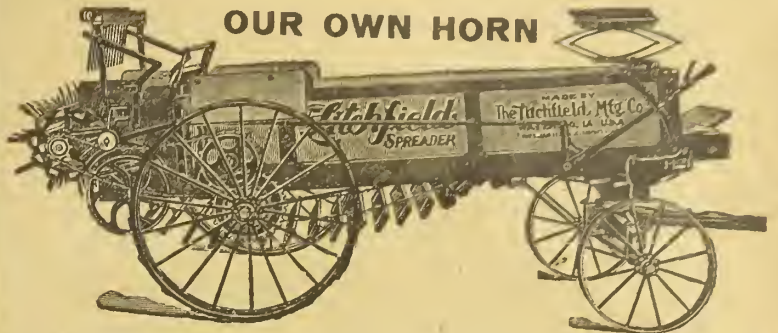

Answer.—Present the matter to the county court and get an order to reimburse yourself for costs paid from the assets of the estate now in your hands. Your lawyers should make this application for you and obtain the order without any trouble.

Notable Animals at Iowa Short Course.

The animal husbandry department of the Iowa Agricultural College has completed arrangements for the most complete collection of animals for the coming short course in stock judging, to be held from December 31st to January 12th, ever used for instruction purposes by any institution in the world. Horses from King Edward's stables will be used to illustrate the Shire horse breed. The Clydesdale champion geldings of Scotland have also been secured. McLaughlin Brothers, of Ohio, are sending all of their best prize winners and champion Percheron and French Coach horses at

TOOTING

OUR OWN HORN

WE are not artists. We lay no claim to such a title. We don't expect the readers of this paper to follow our continued story because it is "pretty" or overflowing with high-class rhetoric. We are tooting our own horn (we fully realize this), but we have got a horn to toot and something to toot it with.

The Manure Spreader question today with every land owner is of much more vital importance than any of the leading problems of modern farming. Granting that every farmer who is progressive concedes this, we then feel that it is a question of what spreader he is going to purchase, and here, the Litchfield Machine stands out in the "lime light."

We wish to emphasize the fact that the *Spreader Question* is our horn, and the "Litchfield Spreader" is what we are tooting it with. We hardly feel that any company should be criticised for exploiting their product when they can back it with a guarantee like we back the Litchfield Spreader with.

We believe that when a machine is equipped with the most modern devices, from the scientific steel wheels along through the line of improvements; such as the abruptly-widened spreader box, the new style long and short tooth heater wheel, the car-journal bearings; along through the dozens of various superior features to the only successful endless, automatic cleaning conveyor that has ever been put on a machine—we think, under these circumstances, we may be excused if we make a noise that is heard all over the territory where men are becoming interested in this modern machine.

To our readers we say, take pains to search out quality in deciding what spreader you shall buy. See if the machine has wide-tired traction wheels with round edges that will not cut through the sod or if it has the narrow, square-edged, old-fashioned tire. See if it has a freely swiveling pole or if it is of the "sore neck" variety, braced on the horses' necks. Examine, if you will, and compare the measurements of the axles, also the strength of all those parts and pieces that go to make up the entire machine.

Practical value, not value in theory, is what we are trying to prove to our customers. We make claims, it is true (good, strong ones) and, to substantiate these claims, we have the evidence. Let us receive your inquiries. We are here to answer questions.

Continued next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

the Paris show and all the leading American live stock shows. This insures an excellent equipment of horses.

In the cattle line, Defender, the grand champion steer of the International, and the leading winners in the Angus, Galloway, and grades and cross breeds will be used in the fat cattle classes. Donohoe Brothers, of Holbrook, Iowa, are sending to the college their famous prize-winning herd of Angus breeding cattle. Prominent dairymen have sent in their most select specimens of the dairy breeds.

The International grand champion fat barrows were also brought back for this work. More attention than ever before will be given to the slaughter test work. Special work has been outlined for those who have attended in previous years. Reduced rates will be given on all railroads.

Courses in farm crops, horticulture, and domestic science will be given at the same time.

For further information write the Animal Husbandry Department, Iowa Agricultural College, Ames, Iowa.

Professor Shaw Endorses Stock Food.

Prof. Thomas Shaw, an eminent authority on feeding, says, "When the animal doesn't digest its food, which is indicated in the droppings, or when it doesn't respond sufficiently in appearance or in production, though given a sufficiency of food, in such cases a mild tonic would be helpful in affecting improvement."

Dr. Hess Stock Food, manufactured by Dr. Hess & Clark, Ashland, Ohio, meets just these requirements. It contains tonics for the digestion, iron for the blood, nitrates to eliminate poisonous waste material from the system and laxative to regulate the bowels. These ingredients are also endorsed by every medical writer in America.

Now, if the digestion is stimulated, the appearance improved and the production of the animal increased by the addition of the above mentioned ingredients, it is undoubtedly a wise investment to use Dr. Hess Stock Food. It costs less than a penny a day to feed Dr. Hess Stock Food to a horse, cow or steer and but three cents per month for the average hog. Consider the small amount of additional increase in weight or milk that is necessary to cover the cost of the stock food and remember it is sold on a written guarantee.

Geo. A. Heyl, Washington, Ill., says, "I have been in the stock and poultry business for a great many years and can say Dr. Hess Stock Food is all O. K. It is scientifically compounded and seems to be just the thing to make stock thrive. It is a food as well as medicine."

Dr. Hess Poultry Pan-a-ce-a is also a great food for poultry and has been of much value to me in raising some of the fanciest chickens that were ever placed on the market. Instant Louie Killer, manufactured by the same firm, is also invaluable as a disinfectant and for keeping fowls free from parasites."

Cownie Fur Coats

Are the only Fur Coats made that have a two year written Guarantee.

NOT one skin is used in a Cownie coat that is not taken off in Dec. or Jan, when the fur is the best. Not one drop of strong acid or chemicals is used in the tanning of these hides. That's why we can guarantee a Cownie Coat

twice as long as any other fur coat made. If your dealer cannot supply you write us.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

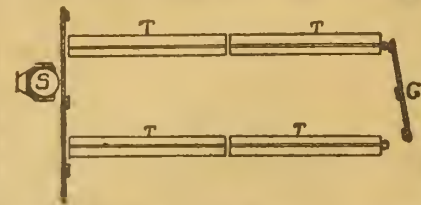

During this season of the year it is necessary to carry a light at chore time. There is always more or less difficulty in hanging a lantern so that the light will be where wanted. A very satisfactory arrangement is a wire string taut overhead and behind the cows or horses. On this a line snap or hook holds the lantern which may be slid back and forth. In milking or harnessing teams one may thus secure the best light possible.

One of our subscribers, Mr. P. F. Peterson, asks for the plan of a good wood rack suitable for either a wagon or sled. We appeal to our subscribers to satisfy Mr. Peterson's demand. The chief value of the Hints and Devices department lies in the fact that its material is to a large extent made up from suggestions received directly from the farm. Let readers who have good wood racks on hand take the time to make a rough drawing and briefly describe same and send it in without delay.

The little chore of making the rounds of the swine sleeping quarters and closing the entrance doors for the night is often forgotten. Some people do not bother to do it, yet it may save sickness and hours of snow shoveling before the winter is over. It is a good practice to prevent drafts over the sleeping hogs. In the illustration is a door that is called the "hogs' own door." Instead of the ordinary pen door being hinged on the side, the door is hung on a rod by means of strap iron eyes. The ends of the rods are bolted to the door jam and the hogs pass in or out by pushing the door before them. Thus the door is always closed, though not tight, so that a considerable volume of air can still enter the pen from this source, but not in gusts that may fill the quarters with drafts and often snow.

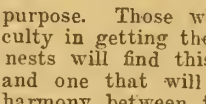

Slopping a hundred head of hungry hogs at this time of the year in the ordinary way of walking among them to the trough is like taking one's life in one's hands. On our farm we have a plan which we think most excellent. The letter S represents the swill barrel on one side of the fence. On the other are four hog-feeders marked T. At the letter G is a gate which is closed when slopping time is at hand. This prevents the hogs

from entering the space enclosed by the feeders and the fence. The contents of the barrel can then be carried to the different feeders in pails, without having the work impeded by a rush of hogs and besides being done with less haste and waste. The feeders naturally are high

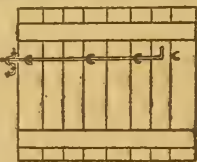

enough to prevent the hogs from climbing over. If troughs are used woven wire fencing may be stretched over the center of the troughs. As soon as all the slop is distributed the gate is opened, giving access to the feeders from both sides.

Mr. S. R. Fletcher, Monona county, Iowa, has embodied a very good idea in his poultry house in a portable nest. The box is hung on a spike driven in the wall at a suitable height from the floor for the hens to reach. When setting time comes and a biddy is found that shows inclinations to hatch out a brood the box with the occupant is transferred to the room set apart for this purpose. Those who have found difficulty in getting the hens to accept new nests will find this idea very valuable and one that will contribute to more harmony between fussy hens and their attendants.

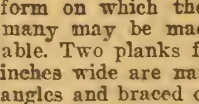

There are many serviceable and simple barn door fasteners in use, but our readers will find difficulty to improve on this one for general purposes. Mr. J. A. Hanna of Appanoose county, Iowa, thinks that one of the advantages of this idea is that the door can be clasped and unclasped without stepping outside of the buildings.

Strong staples are used on the door for the wire to slide through while a piece of wire is made into a loop and stapled to the barn to serve as an eye for the sliding rod or wire. A handle next the doorway is made by bending the rod at right angles. In withdrawing the rod from the eye to close the door a bumper formed of a staple or block of wood stops the rod from being drawn back too far.

Painting the buildings is a task that is always more or less dreaded. One of the reasons that make it so is the difficulty of making a safe and cheap scaffold to work on. The illustration represents a device that is in use by painters and on farms in many parts of the country. We have used a set of three on our farm for a number of years and find them satisfactory for painting old roofs. The drawing merely represents one support of the platform on which the worker stands. As many may be made as is found desirable. Two planks four feet long and six inches wide are nailed together at right angles and braced on each side with inch stuff. When ready to raise the scaffold a six inch plank is inserted in the bracket as shown and with one side to the building and the upper side for the support of the plank platform the bracket is elevated to the required height, while the end of the support on the ground is embedded to prevent slipping. As the weight on the platform tends to push the bracket against the building and the pole prevents it from coming downward, the platform must hold its position.

The Morgan Sale at Blue Rapids, Kan. The second annual sale from the Capital Bluff herd of Mr. E. R. Morgan was well attended and fairly successful. Local and outside buyers were out in large numbers. The offering was a good lot of cattle, young and

U. S. CREAM SEPARATOR

STRONG AND DURABLE

Used 15 Years
Repairs 50 Cents

BLACKICK, OHIO, Oct. 20, 1906.

To whom it may concern:
I have used one of your No. 5 U. S. Cream Separators for the past 15 years and I have paid out only 50 cents for repairs in that time. I am using the machine every day and it is in good shape now. I would not have any other—only the U. S. Separator. I can cheerfully recommend the U. S. to all who want a good machine. SCOT RACHELL.

27 pictures with plain, easy-to-understand explanations in our new catalog, make the construction and operation of the U. S. as plain as though the machine was before you. Let us send you a free copy. Just write: "Send Construction Catalog No. 81." Write today.

Don't buy a Cream Separator before you see this book.

VERMONT FARM MACHINE COMPANY

Bellows Falls, Vt.

Eighteen distributing warehouses centrally located in the United States and Canada

WE PAY YOUR FARE

Today if you succeed you must be trained. The world demands it; for the untrained it has little use. Many ambitious young people anxious to succeed are prevented from securing the necessary training on account of the expense. When and how shall these young men and women get the required start in life? The Western Normal College solves the problem on the most liberal and practical lines offered by any educational institution. Our aim is to help the student in every possible way. Student's Rail Road Fare paid. Our Bulletin sent free.

Will You Come?

The Institution is approved by the State of Iowa, located in an ideal college city, and proudly claimed by thousands of students from all over the U. S. as their Alma Mater. We offer instruction in twelve departments and forty courses. In each of these we have the ablest instructors and finest equipments. Students may enter at any time without examination.

Distance is no Barrier

This is your golden opportunity to secure an education; to fit yourself for your part in the world's work. Hundreds are taking advantage of the opportunity. Hundreds more are will. Do you not desire to be one of them? Write today. Address

J. M. HUSSEY, Pres., Box 10 Shenandoah, Iowa.

1856-Sandwich-1906

Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country. The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, belted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

SANDWICH MANUFACTURING COMPANY, 143 Main Street, Sandwich, Ill.

Send for Free Catalogue and full particulars.

CLEVELAND CREAM SEPARATOR COMPANY, Cleveland, Ohio.

Dept. H, 33 Michigan Avenue, N. W.

In nice condition. Leta 2d and her bull calf by Onward 18th topped the sale at \$215, and went to Mr. L. A. Oberhelman, of Winkler, Kan. The splendid bull, Dale, was secured by Mr. Henry Kaump, of Randolph, Kan., for \$210, while another nearly his equal, Major, went to Mr. Wm. Henn, of Kansas City, for \$125. The females averaged \$83 and the total average on fifty-one head was \$73.30. Colonel Edmonson, assisted by Colonels Brady, Gordon and Trasper, secured the following prices. Sales at \$75 or over were:

Lot.	Cow.	Ed Teburen, Cleburne, Kan.	Price.
13.	Cow, H. H. Johnsmeyer, Cleburne, Kan.	80	
17.	Cow, Ed Teburen	110

42.	Cow, Ed Teburen	75	

43. Bull, Wm Henn, Kansas City..... 160

48. Bull, A. Colon, Morganville, Kan.... 95

It is not a "Braas Band" that you will hear by referring to page 5, but you can read about the way the Litchfield Manufacturing Company are disposed to "toot their own horn" and it will do no harm to study it a little, as there is certainly information for those who own the land and are interested in keeping it at its standard.

EXCURSION RATES FOR THE HOLIDAYS TO EXTENSIVE TERRITORY, Via the North-Western Line. Excursion tickets will be sold at reduced rates on ten dates: December 20, 21, 22, 23, 24, 25, 29, 30, 31, 1906, and January 1, 1907, good returning until and including January 7, 1907, to stations on the North-Western Line (including C. St. P. M. & O. R'y), and to points on several other lines, for full details of which apply to agents Chicago & North-Western R'y.

DAY BY DAY

Agricola

This is the time of year for making new resolutions. It is a time to remember, also, the saying of that wonderful teacher, Horace Mann, "I never heard anything about the Resolutions of the Disciples, but a great deal about the Acts of the Apostles."

The above refers to the mental and spiritual man. For the material man this is the time of year to take an inventory.

It is said that bankruptcy awaits any merchant who fails to take his regular inventory, so that he may "know where he stands."

Why does not the farmer need to take an inventory the same as the so-called "business man?" Is he not in business?

But to Agricola's mind, the inventory of the man himself is more important than the inventory of his property. An honest search-light investigation of what he is himself is what every man should conduct at the beginning of the New Year, and keep a careful tab upon himself as the days, weeks and months pass into eternity.

One philosopher who was in advance of his own time, if not of ours, held that a man's reputation is what he takes from the world, and his character is what he gives to the world. To take too much and retain a good reputation is the puzzle of the magnates. To give much, to sacrifice much, is the soul of Christianity.

So, now let us, one and all, take an inventory of our own character. What is our great, our dominating desire? To get all we can or to give all we can?

The commercializing of Christmas is too common, and it is out of harmony with the true Christmas spirit. The commercializing of farming is likewise inimical to the best in farm life. To make a home, to make it the best home in the world—better than any other pursuit permits—this is the duty and privilege of the farmer.

What the crop of 1907 is to be depends vitally upon what is now in the mind of the farmer. This is not limited to the vegetable world, but applies to the animal kingdom. That pig crop! The lamb crop! The fruit trees which should be set out! The flowery Eden which delights the wife, and whose absence makes her soul barren! Resolutions regarding them must be born of determination.

In urging reflection Agricola does not countenance idleness. Planning, taking a hindsight and a foresight, deep thinking—these are part of true work, and not the insignificant part either. Each morning should find us clear in mind what to do during the day. "The first hour of the morning," said Beecher, "is the rudder of the day."

Occasionally one sees a cellar wall banked with stable manure. This is to protect from frost. But it opens the door to worse trouble. The eye is offended. Good taste is outraged. The health is menaced, for the effluvia gets into the cellar and into the living room above. That the family grows unconscious of this fact makes the danger insidious and threatening.

Underfeeding causes runts; overfeeding sterility.

Do not judge the farmer by his clothes so much as by the wardrobe of his wife.

One reason for the broadness of the farmer is that he is not a specialist. The specialist is thin and sharp, rather than big and broad.

What a farmer becomes depends chiefly upon what he earnestly desires to be. You can not keep a man down perpetually unless he wills to stay down.

There is a saving which is a waste. You can save eggs by setting hens on one egg apiece, but it is a waste of hens.

Few there be in this favored state who are not now wishing that ten years ago they had set out more ever-

CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must in variably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted under this heading. Each number and initial letter or abbreviation counts one word. For the printing of this page please refer to the circulation of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 165,000, reaching a farm population of at least 825,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

PLYMOUTH ROCKS.

EVERGREEN Lawn Farm, M. Hummel, prop., Monroe, Iowa, breeder of heavy-boned Barred Plymouth Rocks for 22 years, has for sale 450 birds sired by high-scoring Iowa State Fair and Jasper County Fair first prize-winners. We won nine first prizes at the Jasper County Fair in 1905. Nothing but first-class stock shipped.

BARRED Plymouth Rocks, Hawkins, Thompson, Fitch and Todd strains. Cockerels \$1.50 to \$2.00 each, hens and pullets, \$1.00 a dozen. Must close entire stock by January 1st, as we intend to leave. Lou Blatner & Co., Prairie City, Iowa.

BARRED and White Rocks, Buff, Golden and Silver Laced Wyandottes. Eggs in season. Write for prices. A. L. Anderson, successor to Anderson Bros., Indianola, Iowa.

300 CHOICE Barred Plymouth Rock cockerels and hens, large and healthy, narrow barred to skin, \$1.00 each, six for \$5.00. Willis Scheibon, Merrill, Iowa.

MASON C. OGG, Fairmount, Iowa, breeder of extra large, well-shaped, nicely marked Barred Rocks, 100 choice cockerels for sale. Eggs in season.

BARRED Plymouth Rock cockerels, scored and unscored. Mrs. A. S. Wilkinson, Paton, Iowa.

75 BARRED ROCK Pullets, extra large, 15, \$10. Mrs. C. H. Medberry, Wadena, Iowa.

LANGSHANS.

FOR SALE—Black Langshan cockerels and Bronze turkeys of high quality. Cockerels at \$2.00, toms at \$5.00. One cock 94 score; one tom 35 pounds, for sale or exchange. Mrs. S. S. Spangler, Milan, Mo.

100 BLACK Langshan cockerels from pens scoring 93 to 95; four firsts, grand sweepstake, Creston Fair. Philip Stalcup, Lorimer, Iowa.

FOR SALE. 200 Black Langshan cockerels and pullets as fine as I ever raised. For prices write E. D. Keasey, R. R. 1, Wiota, Iowa.

BLACK LANGSHAN cockerels, \$1.00 each. Leonard C. Paup, Marlan, Iowa.

WYANDOTTES.

CHOICE White Wyandotte pullets, \$10 per dozen. White Wyandotte and Barred Plymouth Rock cockerels, \$1.00 each. Martha Resh, Emmetsburg, Iowa.

WHITE Holland turkeys, White Wyandottes for sale. Write for prices. W. A. Marsh, Jr., Alledo, Ill.

green trees. Next spring, when trees should be set out, something else will keep most of us busy, as in the past.

Cornplaters here are arranged to plant 3,555 hills to the acre. One good ear of corn contains enough grain to plant 300 hills. From this it is undeniable that it does not require many good ears to plant an acre. Two such ears per hill will give 100 bushels per acre, and then some.

The Norway spruce gives the best satisfaction of any of the common varieties which Agricola has set out. It is a beautiful tree any and all times of year, and it is an excellent windbreak.

The willow hedge is death to apple trees within several rods of it. Now is the time to cut down willows and convert them into firewood. What about protecting the orchard? The windbreak

LEGHORNS.

ROSE Comb Brown Leghorns exclusively. The best lot of cockerels ever raised at Pike Thuber Stock Farm, for sale. T. A. Davenport, Belmond, Iowa.

SCORED and unscored Single Comb Brown Leghorn cockerels. Mrs. Clyde Nelson, Birmingham, Iowa.

COCHINS.

FOR SALE—A fine lot of Partridge Cochlin cockerels and pullets, Geo. Mitchell strain, \$1.00 and up. Mrs. C. O. Brewer, Route 4, Atlantic, Iowa.

RHODE ISLAND REDS.

Rhode Island Red cockerels. Extra large, good color. For sale very cheap. Mrs. J. Holmgren, Gilmore City, Iowa.

SQUABS.

SQUABS—Homer pigeons, straight bred are most profitable for squab raising. Buy acclimated birds from finest flock in the central states. Hawkeye Squab Co., Marshalltown, Iowa.

DOGS.

RATS. My Scottish Terriers will make them git. Fine pups for sale. S. W. Harr, Riverside, Iowa.

CATTLE.

REGISTERED Herefords for sale. Twenty cows and heifers, \$50 each; 27 calves, \$30 each, by bunch. Also four home-raised registered Percheron stallions. Address, L. H. Luckhardt, Tarkio, Mo.

FOR SALE—One finely bred yearling Holstein bull, nicely marked and a fine individual. From rich milking family; grandam tests over 4% butter fat. J. K. Elliott, Woodward, Iowa.

RED POLLED Cattle. Champion beef and milk producers, choice animals, either sex, priced right. Write for booklet and particulars. O. P. Russ, Ravewood, Mo.

HOGS.

POLAND CHINA PIGS sired by State Fair winner, Victor M., Perfect I know and others; mature dams; all ages. Write G. Kirchhoffer, Elkhorn, Wis.

HORSES.

THREE home-grown, pure bred Percheron stallions for sale; two 3 and one 2 year old, blacks, 1,500 to 1,800; heavy boned, extra quality. Priced right. Grant McCoy, Indianapolis, Indiana.

AGENTS WANTED.

FARMER Agents Wanted. Time saver and money saver for farmers. Over one thousand sold in one county. Quick easy seller. Liberal commissions. Write right now. Farm Record Company, Newton, Iowa.

AGENTS—Sell Automatic Self-cleaning Curry Comb. Money-making opportunity for hustlers. Write for introductory offer. Clean Comb Co., Dept. 10, Racine, Wis.

JOB PRINTING.

FIFTY printed envelopes sent free with 100 neatly printed Note Heads, your name, business and address for 50c, cash accompanying order. National Printing Co., Des Moines, Iowa.

MISCELLANEOUS.

AT LAST, the Perfect Collar Button, indestructible. Won't rub the neck; by mail, 10 cents. Warner Specialty Co., A-1767 Walker St., Des Moines, Ia.

ECZEMA—I will send a receipt guaranteed to cure Eczema for \$1.00 in 2c. stamps, P. O. or express order. H. M. Belvel, Des Moines, Iowa.

must be quite distant. Our experiment is that good air circulation is what fruit trees need.

Would you be a respectable and a self-respecting man? See that the cow does not disgrace you. If she is not a success she reflects discredit upon the one who owns and cares for her.

There are many types of plants and of animals. Type is due to the peculiar modification of cell growth. The first specimen is properly a "sport." Perpetuating it makes a type.

Butter fluctuates in price, but less than any other farm product. This makes intelligent dairying one of the safest occupations.

Scotch pine is a handsome evergreen when young, but it grows scraggly with age. Russian pine is homely in its

REAL ESTATE.

FARMERS, ATTENTION! Better yourself—go to blue-sunshine climate where crops are absolutely sure and destructive storms unknown. Come to Southern Idaho where the Snake river irrigates the broad valley. No expensive reservoirs, and the irrigation system enables one to tend 80 acres where you turn on water when needed and put right to make the best possible crop. You raise more on 40 acres here than on 120 where you are now. Alfalfa makes 8 tons per acre, potatoes 400 bushels, wheat 70 and oats over 100; sugar beets, barley, etc., in proportion. Country is settling fast, land advances everywhere. Write at once for particulars. Reliable information and fair dealing guaranteed. Reference: Bank of Kimberly. Call on or address, Wells Webster, Kimberly, Idaho.

A BARGAIN—One of the best half sections in Minnesota. 18 located in the corn belt near Iowa line. Produces seventy bushels of corn to the acre and bumper crops of grain and grass. 280 acres under cultivation, mostly tile drained; five acres orchard; buildings surrounded by large evergreen hedge. Good set of farm buildings. For full particulars, address, A. W. Trow, 944 Ashland Ave., St. Paul, Minn.

CALIFORNIA land, \$1.00 acre; balance entire purchase 20 cts. week for each acre, no taxes; no interest; 5-acre tracts; level, rich clear, ready to plow, under irrigation; perpetual water right; immediate possession given; particulars, maps, photographs for San Francisco, Room 47.

FLORIDA farm, 40 acres on Indian River, suitable for all sub-tropical fruits and vegetables; four-room house, six acres pineapples, two acres oranges and grape fruit, two acres garden. Price, \$6,000. Address, Stewart Ankney, 1942 Arlington Ave., Des Moines, Iowa.

BEST 120-acre farm in DeKalb County, Missouri joins county seat, ½ mile to graded school, 30 miles from St. Joseph. Plenty of water, all rich land; would make fine dairy or hog farm. Splendid improvements. For full description address F. B. White, Maysville, Mo.

A BARGAIN—Well-improved 400-acre farm in central Minnesota. Owner not a farmer. Price, 30 days only, \$30 per acre. Easy terms. Might take cheaper land for part payment. Write quick, if wanting a bargain, to D. F. Nicholson, Lamoni, Ia.

TEXAS RANCH for sale in Oldham County, Panhandle, three miles from county seat. 6,000 acres good land, inclosed with five wire fence; 10,000 improvements, price \$4.00 per acre; easy terms. Also smaller tracts. Thos. J. Pugh, Omaha, Neb.

SALE OR RENT—160-acre farm, 8-room house with furnace, two barns, tenant house, etc. Convenient to church, school, cheese factory, railroad stations. Address owner, E. S. Wolcott, Richland, Ia.

FOR SALE—80 acres clay loam, good dwelling, orchard, barn, stone stable, silo, 4 horses, 30 head of cattle. Marquette nine miles. Price \$80.00. Address Frank Wood, Peshtigo, Marquette Co., Wis.

WESTERN Kansas Lands. 40,000 acres, Finney, Kearney, Hamilton counties. Wheat and alfalfa lands; \$5.00 and \$12.50 per acre. Write for list. Nicholls & Moyer, Coffeyville, Kan.

560 ACRE RANCH, well improved, in Coffey county, no better in eastern Kansas, at a bargain if taken soon. For description and maps write Lane & Kent, Burlington, Kansas.

GOVERNMENT bonds no better than these farm bargains, being well improved and well located; \$40, \$16,000; 160, \$5,200; 80, \$2,100. Buckeye Agency, Williamsburg, Kan.

TEXAS FARM for sale. Section of valley land near Vernon; produce anything; sandy loam. Write to owner for details. Joseph W. Laud, owner, Vernon, Texas.

A BARGAIN—24 acres, well improved, one mile from railroad and creamery, five miles from county seat. Write owner for particulars. Box 76, Osgood, Iowa.

BAYFIELD County farm lands. I own and have for sale all sorts of lands close to Washburn. Low prices; easy terms. O. P. Swanby, Washburn, Wis.

NOTICE TO HOMESEEKERS—If you want homes in eastern Kansas please write for lists of land. Burger Brothers, Burlington, Kan.

FOR SALE. A fine lot of farm bargains in east Kansas. Any size; write for free list and map. Her & Mansfield, Garnett, Kansas.

PATENT ATTORNEYS.

ROE & ROE, Des Moines, Iowa. Branch in Washington. Send description of invention for free opinion.

youth, but improves as it approaches maturity.

According to the United States census the average expense for each farm in the United States for commercial fertilizers is \$10 per farm. This fact should "give us pause." New York farmers pay \$20 per farm, Georgia \$26 per farm, and Wisconsin starts out with \$2 per farm. Should Iowa become a sugar beet state she will join the commercial fertilizer class.

There is but one housewife who has a sweet-smelling dish cloth, and she is the one who is now reading this item.

Eight years ago a farmer set out a white willow hedge twenty-two rods long. From this he has now cut four cords of wood, one hundred ten-foot poles, and three loads of firewood.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

SHEEP IN THE ORCHARD.

A writer thus enumerates the advantages of keeping a flock of sheep in the apple orchard: Sheep, if properly fed, will keep down the weeds and grass, eat the fallen apples, and add very materially to the fertility of the soil. Orchards are continually overrun with insects, which are multiplying on every hand and are more destructive than ever. Among them are the caterpillar, the try-peta, or maggot borer, etc. The spraying pump will subdue many, but one little fellow that bores through the fruit we cannot reach by spraying—the try-peta. The only way is to destroy the fallen apples containing it as soon as they drop. The apple grower has no better assistant than sheep. To use the sheep to advantage there must be a sufficient number to keep the grass grazed short. A ten-acre orchard must have a hundred sheep, and smaller in proportion. Put in twice as many as the lot will pasture, with a liberal addition of grain or bran. It costs three dollars a week to feed one hundred sheep, and with this money buy 250 pounds of bran and an addition of meal. This will give them fifty pounds a day, or half a pound for each sheep. Three special objects are thus obtained. The sheep are the best insecticides, and will exterminate the codling worms and all the apple maggots that fall. They crop the weeds, and enrich the soil with their droppings. The spraying pump fails to accomplish a part of these, and the machinery costs more than that of the sheep when already owned. A Mr. Woodward states that he has an orchard that has not been plowed for seventeen years, pastured in this way, which is reasonably healthy, and makes an annual average growth of full fifteen inches on the limbs. The leaves are dark green, and he ascribes its good appearance and health to his overstocking it with sheep. They are kept from gnawing the bark by wire netting, with meshes one and one-half inches in diameter, and three or four feet wide. All the winter-made manure is applied at least every second year.

Weeds and Sheep.

Of the 600 weeds and grasses growing in the Northwest, it is estimated by those who have made a study of it that sheep will eat not less than 576 of them, while horses consume but eighty-two, and cattle only fifty-six of them. The fact is sheep prefer many kinds of weeds to grasses, and weedy cattle and horse pastures are always improved by turning a small flock of sheep into them.

Whenever I see a boy in a mustard field of large area pulling out the mustard plants, where the grain grows among the mustard rather than the mustard plants among the grain, memory goes back to the days when I worked at the discouraging task of cutting thistles with a butcher-knife. There are many ways of killing weeds that are commendable.

THE AUTO-FEDAN
3-Stroke HAY PRESS 2 Men Can Run It.

Satisfaction Guaranteed.

THE AUTO-FEDAN HAY PRESS CO.
1062 Jefferson St., Topeka, Kan.Cancer Cured
No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Keegan, (Galesburg, Ill.), writes: "It is only a question of time—I must die. Doctors said 'no hope.' My new method was used and to-day Mr. Keegan's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smarting, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address DR. RUPERT WELLS, 2165 Hadol Bldg., St. Louis, Missouri.

TWO PIANOS! CASH! BIG PRIZES FREE!

If this chart gets destroyed another printed upon heavy paper will be sent upon receipt of 20 stamp for postage.

Test of Skill—This contest is not to be confused with the guessing or estimating contests. Our contest is a test of skill in counting and planning and the best man wins. It depends upon you. There is no guess or chance about it. Do not hesitate about entering but get your counts in at once.

CONDITIONS—50 cents pays for a year's subscription to SUCCESSFUL FARMING and one count; \$1.00 pays for two years and three counts and makes you eligible for the special \$50.00 prizes given to winners of 1st prizes if they have three counts. See below.

AWARDS will be made as follows—The persons giving correct or nearest correct count will get first prize. Next nearest correct, second, etc.

\$50 PRIZES—We believe everybody should have three counts so they can have one each side of what they think is correct to be more sure to hit it. To encourage this we will give \$50.00 extra to winners of 1st prizes if they have three counts. Remember if you have one count you get 1st prize only, but if you have three counts you get \$50 extra.

TIME PRIZES—\$25.00 Extra. We feel early counters should be rewarded and we will give \$25.00 to the person sending best answers by March 31st.

In case of tie we will write each person so tied asking them to make as few words as possible from the letters of the alphabet, using each letter of the alphabet twice and only twice, and no one word more than once, each letter left over counting as one word. To the one tied in the counting who gives us the fewest words as above will be awarded first prize. This practically eliminates all question of tie, but if there should be any possibility a tie in this the prize will be divided equally between those so tying.

Subscription without counts is 25 cents per year, additional counts after you have three entered as per our terms in paragraph "condition" above may be entered at 25 cents each.

Publisher SUCCESSFUL FARMING, 203 Tenth St., Des Moines, Iowa.

Don't Delay! If you want a Piano or other Prizes FREE, send your counts at once.

PRIZE WINNERS IN PAST CONTESTS

A Piano for \$1.00. Surely people may enter your contests knowing that they will receive fair treatment. How glad I was to win a piano for so small an amount and wholly unexpected. The paper alone is worth all I paid.

MRS. L. W. NOTT, Marion, Ia.

He Won a Piano. Refer people to me if they are honest. I got a piano for a prize and never heard of you until I answered your ad. Your paper is worth twice the subscription price. W. C. ELLIOTT, Audubon, Iowa.

\$100.00 Prize. I got my \$100.00 and it was the easiest I ever earned. The dots are hard to count but I know the prizes go to those who win them fairly.

Won \$350 Cash. To Whom It May Concern: I won grand prize of \$350.00 Cash in last contest. I was much surprised. I want to vouch as to Successful Farming's fairness to any and every body.

JOHN A. GOODWIN, Richmond, Va.

Do You Want \$100 Cash? I received greenbacks. Thanks to you gentlemen. Your contest must be fair. The judges have been impartial. Refer to me. J. W. SMITH, Rome, Okla.

\$50.00 for Canada. Way naphere in \$50. Never knew there was such a paper until I answered ad, now I will never be without it again.

Miss E. Fournier, Mantane, Quebec

Won a Piano. I received the elegant piano which I won in your recent contest, and all was perfectly grand. I am recommending you to all my friends and you are at liberty to use my name as reference any time you wish.

ISAAC SHOTWELL, Rockland, Ohio

Others Who Have Won: Buckner, Fredonia, Kas. \$100—C. S. Wyman, Vinton, Ia. \$50—S. Irving, E. 22 E. Balt., Baltimore, Md. \$100—E. M. Hall, Montrose, Mo. \$50—L. F. Stinson, Arcata, Calif. \$50—A. J. Perdue, Altoona, Ia. \$50—Albert Peterson, Holdrege, Neb. Piano—Mr. Libbie Grulich, St. Paul, Minn. Piano—W. S. Keever, 817 Freeman St., Cincinnati, O. Piano—J. Gemachlich, Kensington, Kan. These are but a few of many. We could give a list of hundreds if we had space. You might as well be a winner, if you go at it at once.

A Piano for Illinois. An elegant Piano for a Dollar. That is what I got, and anybody that thinks your prizes are not awarded fairly don't know. There can be no favorites or I would not have won.

MYRA A. FURSMAN, Panama, Ill.

Nobody connected with our paper will be allowed to compete. Contest closes June 30, but get your counts in at once. See about time prize above.

A PIANO

MRS. L. W. NOTT, Marion, Iowa.

EUGENIE FOURNIER, Mantane, Quebec.

These include turning fields into meadows and pastures, summer fallowing, and growing hoed crops. But none of these will compare with that system of destroying them by growing on the infested lands successive pasture crops, to be eaten down by the sheep as often as they grow. No other plan of killing weeds will compare with this in cheapness. None will compare with it in effectiveness, and none will compare with it in the use to which the weeds are put. The system of thus destroying weeds is in outline as follows: Take a piece of weed-infested land and grow upon it a succession of pasture crops for one, two or three years, according to the tenacity of the weeds and to their numbers. The aim should be to grow them in as close a succession as possible, and to crowd the largest number of them possible into a single season. With annuals this should more especially be the aim, since every stirring given to the soil by the plow or the cultivator is helpful in sprouting dormant weed seeds in the soil, and until they are sprouted they cannot be said to be destroyed so long as they retain the power to germinate.

Without applying some such process to a field smitten with mustard, it might take many years to see the end of the mustard plants by the ordinary methods of cultivation. Of course it is not necessary to follow the system further than to so reduce the weeds that it will be practicable to pull out by hand any stray plants that appear. The system is economical. It could not be otherwise.

When sheep devour weeds they do not charge anything for their work. On the other hand, they pay the farmer for the privilege of pulling the weeds. They never go out on a strike. They never clamor for short hours, and they never weary in the work. It seems to afford them so much pleasure in pulling the farmer's weeds that if they could they doubtless would sing more cheerily than the negroes do, as they toil amid the cotton and the cane. They do not tear the weeds out and leave them to waste on the surface of the field, as the cultivator does. They do not gather them in armfuls, as the boys do, and then carry them laboriously to the ends of the field. They turn them into mutton, fresh, juicy and crisp. A sheep's stomach is the most perfect receptacle that was ever made for weeds. It is sure death to every form of weed life. No weed seeds retain the power of resurrection after having been buried in that living sepulcher, the stomach of a sheep. A more suitable receptacle is it than a Gehenna or a Tophet would be. Either of these would deprive the weeds of the power to grow, but in doing so they would consume all the nitrogen in the weeds. Only the phosphoric acid and potash would be left in the ashes. But when sheep consume weeds they take out some of the nitrogen, a little of the phosphoric, and the potash to supply their own needs, and the residue they put back over the land to stimulate the growth of the crops that shall yet be sown.—(Thos. Shaw in Kansas Report.)

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy rams and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs. champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros., Kellerton, Ia.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

NORTON FARM SHROPSHIRE

FOR 30 days special prices will be made on one or a carload of choice recorded ewes, bred. Also Feb. ram lambs. Wish to make room for new importation.

VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this
department to regular subscribers only. We do
not answer veterinary inquiries for the benefit of
"neighbors." Parties desiring information will be
required to send their names in full with their ad-
dress. No question will be answered by mail unless
accompanied by a fee of one dollar. In order that
correct information may be given, the symptoms
should be accurately described, stating of how long
standing, together with color and age of animal, and
what treatment, if any, has been resorted to. All vet-
erinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

THUMPS.

Please tell me what is good for the thumps
in hogs. I have a male hog that lies around
all the time and will not eat nor drink much.
It is getting gaunt and poor and its sides
thump all the time. It has had good, dry
sleeping quarters. I just bought him about
a month ago.

The case is an aggravated one and
it is questionable whether he can be
cured. Physic him with epsom salts in
slop or as a drench and follow with fif-
teen drop doses of tincture of opium in
milk every three or four hours until
relieved. Feed light slop and have him
take all the exercise possible as the dis-
ease is caused by lack of exercise and
overfeeding. We could not advise breed-
ing from a boar so affected even if he
recovers, as the tendency to it is heredi-
tary and he may transmit a like weak-
ness to his progeny.

SICK HOGS.

Can you tell me what is the matter with
my hogs and what to do for them? They
swell up under the throat and seem to get
short of wind. They will eat and drink, but
are not as spry as the other hogs. One has
died and three or four are affected. These
are shoats weighing about 125 pounds each,
but this disease makes them thin. The one
that died was affected about six weeks.

The swelling under the jaws may be
dropsical and merely an indication of
debility and bloodlessness, and as the hog
lived six weeks we think this is the
case. A post mortem examination should
have been made to determine cause of
death, but it seems quite likely that
some internal parasite led to the condi-
tion described and we would therefore
advise you on general principles to treat
for worms according to directions so
often given in this department of the
paper.

MECHANICAL CHOKER.

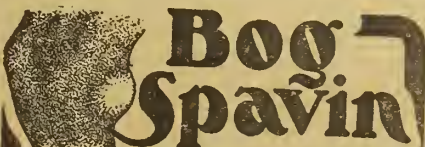

I have a bay horse nine years old. He
was in good condition until about two weeks
ago when all at once while I was hauling
corn he started to choke up after pulling up
a hill—that is, his breath was short and he
trembled in his limbs and then fell down.
I unhitched him and let him rest a while,
and then drove slowly home. I have tried
him several times and it is always the same
way, only he does not always fall. I have
been giving him oil meal. He eats heartily
and I cannot notice anything wrong until
he pulls up a hill. What is the matter with
him and is there a cure for him? He weighs
about 1,600 pounds.

Horse chokes himself when he gets
his head down to pull load up hill and
first point should be to see that it is
not due to a tight collar pressing down
upon jugular veins. It is more likely
that he is short and thick in the neck
and has enlarged glands about the
throat, which condition is incurable.
Such horses are sometimes benefited by
an overhead check to prevent lowering
of head.

PRURITIS.

Can you tell me trouble and cure for my
work mare nine years old? About six weeks
ago she began to rub out mane and tail.
The itching continued to spread all over
body and legs. She has rubbed and gnawed
sore all over her head, belly and legs. Our
veterinarian gave me some medicine to feed
and tablets to wash sores, but treatment does
no good. There are other cases like mine
among stallions, which the veterinarian calls
eczema. He says it is not Texas itch nor
scab.

Have mare clipped at once and wash
all affected parts with a one-fiftieth so-
lution of coal tar dip, and while wet
rub in flowers of sulphur. Afterward,
if itching continues, apply a little of

Bog Spavin
Cure the lameness and
remove the bunch without scarring the
horse—have the part looking just as it did
before the blemish came.

Fleming's Spavin Cure (Liquid)
is a special remedy for soft and semi-solid
blemishes—Bog Spavin, Thoroughpin,
Splint, Curb, Capped Hock, etc. It is neither
a liniment nor a simple blister, but a remedy
unlike any other—doesn't irritate and can't
be imitated. Easy to use, only a little re-
quired, and your money back if it ever fails.

**Fleming's Vest-Pocket
Veterinary Adviser**

describes and illustrates all kinds of blem-
ishes, and gives you the information you
ought to have before ordering or buying any
kind of a remedy. Mailed free if you write.

IOWA STOCK FOOD
FREE!

To any person who has never fed Iowa
Worm Powder we will send a \$1.00 pack-
age FREE on receipt of 25 cents in
stamps for postage and packing.

Gentlemen:—
I purchased some of the Iowa Worm Powder last February and
I don't think I ever made a better investment. The Iowa Worm
Powder can be depended upon. I had some of it left that I fed to
my spring pigs and it surely done the business.
I gave your Mr. Deal an order today for some more of the Worm
Powder, as I want it on hand. An occasional feed of it keeps the
worms from accumulating in my pigs. Feeding to prevent sickness
beats curing after pigs are sick. Most of the pig losses are due to
worms and the Iowa Worm Powder is sure death to worms.
Truly yours,
Alex. Norman.

a lotion composed of ichthyol, two
drams; glycerine, one ounce, and water,
one pint. Stop feeding grain and after
feeding two bran mashess without hay,
administer a physic ball supplied by vet-
erinarian. Do not give ball if she is
in foal. If the trouble continues give
half an ounce of Fowler's solution of
arsenic twice daily. Corn feeding should
be avoided for the present and exercise
should be taken every day in the open
air.

INDIGESTION.

I have an eight-year-old brown mare which
after foaling her first colt a year ago last
May, seemed to be overheated and last win-
ter did not fatten. I bred her on the ninth
day after she foaled, and about two weeks
before foaling again this spring I had to
stop working her. She worked about two
hours in the morning and then would lag
behind, sometimes nearly falling over. After
foaling this spring I took her to our vet-
erinarian and he gave me some medicine for
her. She then got better so I could work
her. She is again with foal, but acts as if
she were in heat or wanted to urinate. The
mare is in good flesh and doing well. What
can I do for her?

She is probably affected with indiges-
tion and the urinary difficulty may come
from this or from feeding musty or
moldy hay. Avoid such food; let her
run out day times or work her lightly
each day and give her a roomy box stall
when in stable, which should be kept
clean and perfectly ventilated. As she
is in foal we would not give her any
medicine, but carrots might aid in re-
lieving the trouble and she may be al-
lowed free access to rock salt. Have
her teeth attended to by veterinarian.

CORN STALK DISEASE.

Will you please inform me what is the
matter with some of my milk cows? They
are in quite good condition and are always
kept in the barn nights since cold weather
has commenced. They have been running in
the corn stalks for about a month and do not
get too much corn to hurt them. Feed them
hay at night. About three weeks ago I had
one that in the evening could not get up in
the yard. I put her in the barn and in
twenty-four hours she could stand and walk
as well as ever. Have had one since that
also got well and now I have one which is
down again and cannot get up. Please tell me
what I shall do to prevent this or what to
do when they have it. They always eat well.
The trouble seems to be in the front legs
mostly. I think it is cramps.

Such trouble is common where cattle
are allowed to run on corn stalks and
will cease as soon as they are yarded
and properly fed hay and other suit-
able food not containing injurious mat-
ters. The affected animal should be
physicked with castor oil (one pound of
it in milk) and afterward should have
a dram of fluid extract of nux vomica
twice daily for a few days and then
three times daily until she can get up.

Cancerol, a Home Treatment for Cancer.

IN THE GREAT SOUTHWEST.

A million dollar, twenty story building is to be erected in Kansas City.

Considerable snow fell in Western Kansas, Indian Territory and Oklahoma last week. Trains were delayed and and unprotected stock suffered some loss.

Secretary Coburn, of Kansas State Board of Agriculture has received a request from Panama, South America, for sunflower seeds. This plant does not grow in that country and Americans there are longing to see the gold and black flowers again.

The Wamsley game law in Missouri netted \$45,000 from sale of licenses and fines during last two years. However, the law is unpopular with farmers and commission men and many hope to have parts of it repealed soon. The Humane society will oppose the movement.

The United States Food Standards Commission recently recommended to the Secretary of Agriculture that he advise food manufacturers and dealers not to use any food preservatives other than salt, sugar, smoke, vinegar, alcohol, spices and saltpeter.

The work of reading the bids on the Big Pasture lands in Oklahoma is now in progress and there are 7,621 propositions on hand. Many of the bids come from business and professional men. However, special agents of the government will see that homesteaders comply strictly to the law.

The Missouri Valley Horticultural society declared in a resolution at its late meeting that the present system of free seed distribution by members of congress was a "graft," and authorized the officers of the society to notify the Missouri and Kansas members of congress of the resolution, asking them to use the money for agricultural experiment stations that is now used for seeds. The game laws of Kansas and Missouri were approved. Officers for next year elected were: W. G. Gano, of Parkville, Mo., president; Asa Chandler, of Randolph, Mo., vice president; A. V. Wilson, of Muncie, Kan., secretary, and Daniel Lowmiller, of Parkville, Mo., treasurer.

At its last annual session the Kansas state Grange elected the following for officers for the ensuing year: Master, George Black, Olathe; overseer, M. Radcliff, Overbrook; lecturer, A. Reardon, McLouth; steward, R. C. Post, Spring Hill; secretary, A. L. Hunt, Olathe, and treasurer, Henry Rhoades, Olathe. The meeting of next year will be in Lawrence.

According to an agreement concluded between the representatives of leading railroads in Kansas, Missouri, Oklahoma and Indian Territory, the "free time" on coal, coke, lime and ore has been reduced from seventy-two to forty-eight hours. This requires that freight receivers must remove these commodities from cars within forty-eight hours after being received or else demurrage charges will be made.

Colorado new potatoes are quoted at thirty cents a peck in Kansas City, Florida strawberries at eighty cents a quart, mushrooms at seventy-five cents a pound. Butter is thirty-five to forty cents a pound and eggs as much per dozen.

Missouri state officials, judges and newspaper men are urging the coming legislature to appropriate funds for a new state capitol at Jefferson City.

Ex-Senator Harris, of Kansas thinks that the West is not so much in need of cars—there being many empties on Kansas City sidings—as need of motive power and railway management.

The Missouri Poultry Association has adopted a new seal. Formerly the state coat-of-arms was used, but now in place of the two bears upon it the association will have two chickens. Otherwise the seal will remain unchanged and its adoption as the state seal has been urged.

Following that meeting on January 7, 8 and 9 the Improved Stock Breeders' Association will meet in Topeka, Kan. Besides a splendid program including talks by well-known men on such subjects, the association will have

SPECIAL OFFER

TWO PAPERS FOR THE PRICE OF ONE.

important business to consider, such as the proposed semi-centennial of 1911, the state fair and needed legislation.

January 4 and 5 is the date set for the meeting of the Kansas Aberdeen Angus breeders to be held at Manhattan, Kan. A judging demonstration will be given and some of the speakers will be L. H. Kerrick, Bloomington, Ill., Geo. Stevenson, Waterville, Kan., and Professor Kinzer of the state agricultural college.

PILES CURED IN 6 TO 14 DAYS.
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

We call the attention of our readers to page 5 where we publish the latest chapter of the Litchfield continued story, "Tooting Our Own Horn."

Combination Sale at Wichita Kan.

The first annual combination sale of purebred Poland Chinas, Duroc Jerseys and Short-horns held in the new live stock pavilion at Wichita, Kan., December 18th and 19th, by the Improved Breeders' Association of the Wheat Belt, was well attended by breeders from Kansas, Missouri and Oklahoma. The offering was a creditable one. The sale as a whole was well managed. In the Poland China class, Peach Blossom, a fancy gilt sired by Ideal Keep On 36989 and owned by Mr. Chas. O. Parsons, of Clearwater, Kan., of Ideal herd fame, brought the top price, going to Messrs. Dyke Bros., of Whitewater, Kan., for \$55. The eighteen head of Duroc Jerseys offered were a good lot. Sunny Slide's Best, a well-proportioned sow owned by Messrs. H. H. Hague & Son, of Newton, Kan., went to Mr. L. L. Morgan, of Helzer, Kan. The consignors of Short-horns were well pleased with the results of their consignments. Pride of Orange 244059, red bull, bred and owned by Mr. Henry Stunkel, of Peck, Kan., was bought by Messrs. Neuser Bros., of Anson, Kan., for \$95. The next best buyers were Messrs. W. A. Newkirk, of Kiowa, Kan., and B. Cook, of Derby, Kan. Colonels Sparks, Snyder and Freese did the block work very satisfactorily to all. Below will be found a list of the principal sales:

SUMMARY.

28 head\$1,490.00; average....\$53.20

The Audubon Short-horn Sale.

One of the very best attended sales of the season was held at Audubon, Iowa, on December 20th. It was not one of those buying crowds, but everything was sold at an average of \$75.37. Mayflower of Pine Grove, a five-year-old cow topped the sale at \$250 and was purchased on order by Messrs. A. J. & M. L. Andrews, of Melbourne, Iowa. Ben Hur, a yearling Scotch bull, sold for \$200 and was purchased by Mr. Thos. Green, of Lorah, Iowa. Those selling for \$100 and above are as follows:

COWS.

Mayflower of Pine Grove, five years, A. J. & M. L. Andrews, Melbourne, Iowa....\$250
Scottish Queen, three years, W. H. McLaughlin, Shelby, Iowa 105

BULLS.

Improver 192364, four years, Geo. Larson, Harlan, Iowa..... 105
Rockford Boy 265449, two years, Chris A. Jorgensen, Audubon, Iowa..... 130
Craibstone Chief 255554, one year, Jerry N. Jorgensen, Audubon, Iowa..... 105
Roan Victor 2d 265482, Sims & Son, Portsmouth, Iowa 105
Iowa Chief 251909, one year, E. W. Stetzel, Audubon, Iowa 155
Ben Hur 247712, one year, Thos. Green, Lorah, Iowa 200

The Harrison Short-horn Sale.

A fair sized crowd of breeders and farmers gathered at the farm of Mr. George W. Harrison, of Washta, Iowa, on December 18th, the occasion being his second annual sale of Short-horn cattle. All of the females cataloged were sold except Victoria Crown, Mr. Harrison reserving the right to place a \$500 bid on her. Quite a few good breeders were on hand to buy her, and several were willing to pay at least \$400 for her, and it was possible that she might have gone beyond the \$500 mark. Mr. Harrison's offering was largely young heifers and he put in an excellent lot of these. They were picked up at good fair prices and about fifty head averaged nearly \$50. A couple of bulls were sold at about \$100 each. These cattle were all raised by Mr. Harrison, assisted by his two boys. The cattle were fitted by these two sons, and were brought into the ring in nice condition, and the boys are to be complimented on the way they handled the sale. A man like Mr. Harrison is to be congratulated on having two such assistants, and they will some day help materially in bringing the herd to a high state of perfection.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

FARM DAIRY COURSE.

Dairy practice every forenoon.
Buttermaking, five lectures.
Cheesemaking on Farm, two lectures.
Dairy Bacteriology and Care of Milk, two lectures.

Scoring Butter and Cheese, two lectures.

Feeding and Breeding, five lectures.

A one week's course in farm dairying will be given at the state college at Ames, commencing January 7, 1906. This course is intended for farmers and their wives, sons and daughters.

It will include a thorough study of the underlying principles of dairying, such as chemical and bacteriological changes that take place in milk and cream; the manufacture of the highest grade of butter and cheese on the farm; the operation of hand separators so as to procure the best possible results; the feeding and breeding of dairy cattle; the operation of Babcock test, and the testing of milk and cream; and the bottling and preparing of milk for city trade.

The forenoons of each day will be given over to practical demonstrations, and the afternoons to lectures. During the course practically all the leading makes of hand separators on the market will be seen in operation here, thus giving the students an opportunity of judging the merits of the different separators.

The above course will be of great benefit to any one connected with a dairy farm, and people taking this course will be in a position to judge intelligently the advisability of manufacturing their own dairy products or selling the cream.

A small fee of \$2 will be charged to cover the necessary expenses of this course.

Application should be made to G. L. McKay, Professor of Dairying, Ames, Iowa.

An Abortion Preventive.

To the Editor of the Homestead:

It was my privilege at one time to be acquainted with a notable breeder of Short-horn cattle and Poland China hogs. This man had almost a national

reputation as a lawyer, teacher and business man. While as a breeder of good stock he stamped his name upon the times in which he lived. This man's motto could be put in the following words: "In case of abortion or threatened abortion in a herd of cows, first be sure your cows are thriving."

I would like to emphasize the last part of the above sentence, namely, "first be sure that your cows are thriving." I was called upon at one time about the first of February to assist in treating a herd of eighty cows. Already eight calves had been lost. The first evening I was taken into the owner's private office and shown letter after letter from stockmen and specialists to whom he had appealed and extracts were read from all kinds of doctor books regarding the matter in hand, but in all this pile of literature there was nothing that appealed to me so much as the above clause in a letter from the gentlemen referred to.

I called attention to this item and said it sounded good to me, but the owner shut me right off by saying that the first two cows to abort had been dry all summer and hence were the fattest in the herd. We took three of the cows and a few heifers and put them in the horse barn and fed them exactly as the work horses were fed, giving them a liberal feed twice a day of oats and shelled corn. The balance of the herd were drenched with extract of black haw, but they went on aborting and dropped from three to five dead calves every week. Of the cows and heifers put in the stable and fed grain each one brought forth a lusty calf.

The owner then had business away from home, and told me that as I knew where the cribs, granaries and hay stacks were, to take the old cows and feed them as I liked. I started in and soon had the cows eating a few ears of yellow corn daily, broken of course into three or four pieces. The first week we had three or four dead calves, but at the end of the second week we had, I think, five live calves and two dead ones. During the balance of the season we lost perhaps two or three calves, and by the middle of May had some fifty head of good, strong, healthy calves. Furthermore, this herd continued afterwards to be regular breeders.

Now, when it is said that a cow must be kept thriving it is not meant that she must necessarily be kept fat. Some of the cows mentioned above were rolling fat, but they had been on good blue grass pasture and then turned onto corn stalks and hay and while they were still fat they were not "thriving," but, on the other hand, were losing flesh every day. The good old mother cow that had raised one or perhaps two fine calves and was as poor as Job's proverbial turkey when the calves were taken off, we find in the middle of winter not fat but she is gaining, or, in other words, is on the mend. Such a cow hardly ever goes wrong at calving time.

In all my observation and experience it has been an over-fat cow or an old cow past age or losing flesh or a herd taken from a good pasture and turned into green washy grass—I say that it has been my experience that animals treated in this way generally start the trouble. Of course when abortion once starts there is need then for rapid action, in the way of change of quarters, change of feed, injections, drenchings, disinfection and washing. I think that this doctrine holds good in the case of all animals, both as a preventive and a cure. If the animal is too fat regulate the matter before breeding, not afterwards. New Mexico Farmer.

THE CREAM SEPARATOR PROBLEM.

The last of one year and the beginning of another is always a kind of stock-taking season for farmers. At that time the work of another year is being mapped out and plans are generally made at such a time for the purchase of new machinery or new utensils of any kind. Men who keep as many as five or six or seven cows are obliged to consider the purchase of a separator, because on every hand they hear of those who are getting so much better returns than they are from a given number of cows. "Can I afford to buy one?" Nowadays it is, "Can I afford to be without one?" Indeed, there are few dairymen who can actually afford to be without a good separator, and if you will look at the advertisement of the Sharples Separator Company on this page we feel sure it will interest you. This company have been in business since separators were first introduced, and they have always made a specialty of constructing high-class machines. Their tubular bowl involves an idea in sep-

Saves Hours of Cleaning

Of course your wife would try to wash even the worst cream separator bowl properly twice every day. But why ask her to slave over a heavy, complicated "bucket bowl," like either

of the four on the left? Why not save her hours of cleaning every week by getting a Sharples Dairy Tubular Cream Separator with a simple, light, tubular bowl, easily cleaned in 3 minutes, like that on the right? It holds the world's record for clean skimming.

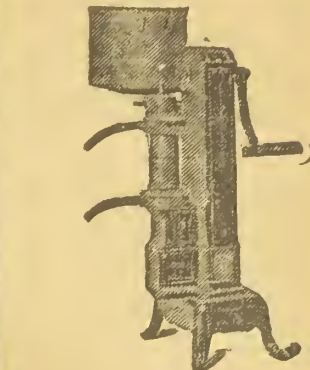

Sharples Tubular Cream Separators are different—very different—from all others. Every difference is to your advantage. Write for catalog M-121, and valuable free book "Business Dairying."

You Want All The Cream

Therefore You Want the

Iowa Dairy Separator

No other Separator made extracts every particle of cream. Some is always left, and this "some" is your loss.

The "IOWA" does not take part of the cream part of the time. If it did, it would be no better than the others; but it takes all the cream all the time. A Separator that does less than this you cannot afford to buy. Gold medals at World's Fair and Portland mean something. Write today and ask for catalog 25. It's free, and you will find your investment of one cent in a postal card the best you ever made. All sizes from 250 to 750 pounds. Address,

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

When writing please mention this paper.

THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or
DAIRY QUEEN MFG. CO., FLORA, IND.

IN AND AROUND WISCONSIN.

The state board of agriculture will hold a meeting in Madison on December 27 to consider plans for the state fair next year, and discuss means for securing an adequate appropriation from the legislature for the coming biennial period.

One hundred and twenty-six lives were lost in navigating the great lakes in the season just closing. Compared with the loss of 215 lives in 1905, the season's death list appears small, and yet, with only two exceptions, it was the largest in a decade.

Hunters returning from the north say that the woods near Thunder hill in Marinette county are filled with wild hogs. These wild hogs are the result of a hog ranch started near Thunder mountain. The first year that the owner established his ranch he got big results, but after letting his hogs run wild through the following winter, he was not able to catch them. The animals have multiplied until the woods are full of them.

Circular letters are being sent out by U. S. Baer, secretary of the Wisconsin Cheesemakers' association calling attention to the annual convention of the organization which will take place at the state capitol January 9th, 10th and 11th. The foreign cheese interests of the state will receive special attention and speakers of national reputation have been engaged for the various sessions. In connection with the convention an important exhibit of the various kinds of cheese made in this state will be held.

The dressing out figures on the carload lots of lambs at the International show have just been issued. The grand champion load were Southdowns averaging ninety-eight pounds each and dressing 55.39 per cent. This lot brought \$11.25 per hundred.

The state live stock sanitary board will soon issue a complete statement of its work. Since the board has been operating under the present law—since April 19, 1905—the state has paid \$35,000 for cattle slaughtered on its order, and received \$12,000 for cattle shipped and killed under its direction at certain abattoirs. The salary of the state veterinarian is \$2,250 and his expenses amount to about as much more. His assistants receive about \$2,500 a year, their pay being based on the number of days they devote to state work. The expenses of the sanitary board average \$500 a year.

A freak animal was recently killed on Sugar island, near Sault St. Marie, Mich. Its body resembles that of a deer, while its head is more like that of a wolf. The animal has been inhabiting that region for several years.

Every effort has been put forth by Wisconsin postoffice authorities to handle the holiday mail without delay. In Milwaukee thirty-five extra clerks will be on duty and ten express wagons will be going constantly.

Fort Atkinson, Wis., is becoming quite noted for its manufacturing enterprise. One implement firm has made and sold five thousand cutters and sleighs during the last few weeks. One dairy farm has doubled its volume of business in sausage and pork products this year and has been butchering about seventy hogs daily.

Workmen excavating for water mains in Beloit unearthed bones which Dean Collier, geologist of Beloit college, says are those of a mastodon of prehistoric times. The bones were probably washed to their present location during the glacial period, but not necessarily far, for it is known that mastodons once existed in this region.

At their last meeting the United States Food Standards commission recommended to Secretary Wilson that he advise food manufacturers and dealers not to use any preservatives other than salt, sugar, smoke, alcohol, spices, vinegar and saltpeper.

John Lister's Short-horn Sale.

On December 20th the Hon. John Lister, of Conrad, Iowa, held his annual sale of Short-horn cattle at Pleasant Ridge farm. A large congregation of breeders and farmers were in attendance, as is always the case

at Mr. Lister's sales. The high standing that Mr. Lister has among his fellow breeders and neighbors always brings forth a large attendance when he offers Short-horns at the auction block. As has been previously stated in the columns of The Homestead, this was the best lot of Short-horn cattle that Mr. Lister has ever offered the public, and it was to be expected that the sale would be a success and that satisfactory prices would be obtained. Aside from the mail bid of Mr. Frank Fentress, of Norfolk, Neb. (Formerly a prominent breeder of Poland China swine at Grinnell, Iowa,) the buying was confined entirely to Iowa. That wide-awake Short-horn breeder, Mr. H. D. Parsons, of Newton, Iowa, topped the sale by the purchase of the beautiful Scotch cow, Imp. Ruby of Ruddington, and heifer calf. Mr. N. W. Meyers, of Beaman, Iowa, the next station to Conrad, started in the Short-horn business and made several judicious purchases. He paid \$310 for the Cruickshank Flora cow and heifer calf by Fearless Victor. Mr. F. A. Edwards, of Webster City, Iowa, was one of the best bidders at the sale and paid \$300 for Pleasant Ridge Athene. He also secured the beautifully-bred Duchess of Gloster cow, Larchhill Countess of Gloster, and cow calf by Royal Banner. Mr. Edwards was forced to pay \$305 for this purchase. A rare bargain was secured by Mr. J. Y. Campbell, of Dunkerton, Iowa, in the Cruickshank Victoria bull, Double Victor. This bull went at a bargain counter price, namely, \$145. It is true this bull is eight years old, but it is also true that he is one of the best breeding bulls in central Iowa, and Mr. Campbell is to be congratulated. An old-time Homestead advertiser, Mr. Frank Fentress, of Norfolk, Neb., bought one of the top bulls at \$240, he being a son of Double Victor, while Mr. R. H. Hadley, of New Providence, Iowa, topped the bull offering on King Victor at \$265. The appended list of all animals selling at \$100 or more is gratifying, not only to Mr. Lister, but to the breeders of Short-horns generally. A number of animals sold below this figure and all are calculated in the averages given:

COWS.

Victoria 2d, four years, sire Collynie Victor, M. L. & A. J. Andrews, Melbourne, Iowa\$270
Orange Blossom of Forest Lawn, six years, sire Victor Prince of M. V., and b. c., Jesse Blinford, Albion, Iowa 190

OUR RED LETTER

Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

HOLIDAY RATES VIA M. & ST. L. R. R.

On December 20, 21, 22, 23, 24, 25, 30 and 31, 1906, and January 1, 1907, the Minneapolis & St. Louis R. R. will sell excursion tickets to all points in Iowa, Minnesota, Wisconsin, South Dakota, North Dakota and to many points in the South and West at one and one-third fare for the round trip. Final return limit Jan. 7, 1907. Purchase tickets at City Ticket Office, 512 Walnut St., or Union Station. D. B. Ransburg, City Pass. Agent.

NOTICE.

When you write your friends in North Dakota advise them about the low-rate tickets on sale now for home visitors to Iowa points—one and one-third for the round trip. Don't forget to tell them that the Chicago Great Western Railway is the only line which has three trains every day in the year between St. Paul and Minneapolis and Iowa points. Complete information from E. J. Sawyer, 514 Walnut St., Des Moines, Iowa.

Joll, the subject of the above illustration, is but a sample of the imported Percheron stallions offered by Mr. S. J. Miller, of Kirksville, Mo. Mr. Miller's barns are full of this kind and they are being offered at very reasonable figures. Mr. Miller has issued a neat forty-page catalog which gives the breeding of all the horses now in his barns. Write today for one, also ask for pictures of his horses. See page 26 for advertisement.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Moving an Orchard.

To the Editor of The Homestead:

The following communication from one of your subscribers at Oxford Junction, Iowa, has been submitted to me for reply:

I have purchased a farm which has a new orchard set out about three years ago. The trees are from five and a half to six and a half feet high and are about three and four inches and some as much as six inches in circumference. I would like to transplant this orchard to the farm where I am now living. Could you give me any information in regard to transplanting young trees? Which would be advisable, to transplant now or early in the spring? I would appreciate any information on this subject you may see fit to give.

In regard to the above inquiry I would say that the smaller trees may safely be moved by the ordinary method of transplanting. I would advise doing the work as early in the spring as possible. The tops should be trimmed well, as the root system will necessarily be disturbed and the top must be lightened to maintain the balance between root and top.

In taking up the trees a strong spade is the only necessary tool. The digging should be in a circle about eighteen inches from the tree on all sides. The roots should be cut off at that distance and the tree removed to its new location.

In transplanting trees they should be kept wrapped in wet burlap in order

that there may be as little drying out as possible.

The larger trees present a somewhat more difficult problem. It is doubtful if they could be moved successfully by the above method. Some weeks ago a method for moving large trees was described in this paper. This would prove rather expensive if a large number of trees were to be moved, but for the largest trees described it is the only advisable method.

This method consists of removing the trees with the soil upon the roots. A trench is dug around each tree before the ground is frozen, leaving a sufficient block of earth to insure a good root system. This block should be broken loose by digging under it and then using a pry or crowbar. The tree is then left standing until the block of earth is frozen solid. It is then raised by means of a block and tackle and loaded on a stone float or truck and moved to the new location, where a hole has been prepared for it.

If the ground has frozen too hard to move trees by this method I would say, transplant the smaller trees next spring and let the larger trees stand until next winter. Franklin Brown.

Root Grafting the Apple.

To the Editor of The Homestead:

For making root grafts of the apple, good, straight roots the size of a lead pencil are selected. These may usually be obtained from nurserymen. With scions selected from the new wood of the desired variety these are kept in earth or sand in a cool cellar until January or February when the grafting is done.

The necessary apparatus consists of a sharp shoe knife which can be bought for twenty cents from any shoemaker, grafting wax and plenty of waxed string. The wax is made as follows: Resin, four parts; beeswax, two parts; beef tallow, one part; melt the resin first, add the beeswax and when it is melted, add the tallow. Mix well and pour into a pail of cold water. Pull until white, using tallow to prevent from sticking to the hands. The string is a loose cotton thread about half as heavy as ordinary cord. It is waxed by drawing through a pan of the above wax (melted) and then wound upon a reel. The reel may be made from a wire spool by nailing laths across the ends of the legs to increase the circumference.

The scions are cut in six-inch lengths and the roots in four-inch lengths. These are wrapped in damp cloths to prevent drying out, and the grafting begun. The ends which are to be joined are cut slanting and as nearly alike as possible. A tongue is then cut near the center of each cut surface and the scion and root fitted together with each tongue in the corresponding groove in the other piece. The success of the operation depends upon the inner bark of both pieces coming in contact on one side at least, for it is here that the union takes place.

The parts are then wrapped three or four times around with the waxed cord and the cut surfaces (including the tip of the scion, but not the end of the root) covered with wax. Next the graft is drawn through fine, clean sand which covers the wax so that the hands do not become sticky in the future handling.

The grafts are then packed tips upwards in a box of sand and kept in a cool cellar until spring, when they are planted in nursery rows.

Franklin Brown.

Putting Waste Land in Wood.

To the Editor of The Homestead:

I heard a farmer complaining the other day because he had several acres of waste land on his place which it was apparently impossible to utilize. A deep ravine runs through part of the farm. It has a crooked channel, but its general course is straight so that it does not impair the regular outlines of the fenced fields on either side. A narrow lane leads down one side of the ravine from the barnyard to the pasture gate. While this lane is of ample width to accommodate the cattle and horses of the farm as they pass to and from the pasture, no fence separates it from the ravine and they frequently climb up and down over its banks. As a result the grass long ago disappeared and nothing grows, but weeds which each year furnish seeds enough to stock the adjoining fields with pests for the succeeding year. Why not run another fence, separating the lane from the ravine and then plant the banks

Williams' Shaving Soap

It is easy to get 200 shaves from a 10c cake of Williams' Shaving Soap—1-20 of a cent per shave.

Isn't it worth that to always have your face smooth and comfortable?

If you want an easy shave and a healthy face—get Williams' Shaving Soap.

Send 2c. stamp for trial sample (enough for 50 shaves).

THE J. B. WILLIAMS COMPANY, Dept. A, Glastonbury, Conn.

LITTLE STAR Grain and Seed Cleaner

A money-maker for the farm. Increases yield of every acre 5 to 15 bushels. Pays for itself every year with every 20 acres tilled. Has 7 complete riddles, 4 double wire screens, 11 in. all, and does the grain and seed work for a 160 acre farm perfectly. Has double the screen surface of any machine of its kind. Separates, cleans and grades all kinds of seed, performs all three processes at once and will perfectly clean, separate and grade any four similar seeds at the same time no matter what proportion the mixture. The cheapest, most efficient grader made. Our "Corn Grader" screens No. 8 and 9 provide an absolutely even "drop" from the "Corn Planter," edge drop or otherwise. You are sure of the exact number of grains in a hill. Removes all weeds and noxious seeds including thistles. No shifting riddles nor change of adjustment. Does work of three machines, sells for the price of one. Price complete, freight paid, \$19.98. Order today. Every machine guaranteed. Hall Grain Grader Co., 224 Locust St., Winfield, Ia.

FOUR EVERGREENS FREE

We grow our Hardy "Blizzard Belt" Evergreens in ten million lots.

To prove they are healthy, well rooted and vigorous we offer to send Four Fine Sample Trees, 3 years old Free to a limited number of property owners. Mailing expense 5 cts which send or not as you please. A postal will bring them. Our Catalogue containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Evergreens, Ornamentals, etc., with a mine of valuable information for fruit growers, free for the asking. Write to-day.

THE GARDNER NURSERY COMPANY, Box 702, Osage, Iowa.

and bends of the latter with some quick growing varieties of timber, such as black locust, catalpa and cottonwood? If desired, other varieties, such as elm, burr oak and black walnut may be interspersed among the quicker growing varieties, to be left for more complete development after the latter have matured sufficiently to be cut. Such a wood lot, besides covering up an unsightly waste, would furnish a good windbreak or shelter belt, a retreat and nesting place for birds of the beneficial species, produce considerable fire-wood, poles and posts and add several hundred dollars to the selling value of the farm. Subscriber.

SAVED BABY LYON'S LIFE.

Awful Sight from That Dreadful Complaint, Infantile Eczema—Mother Praises Cuticura Remedies.

"Our baby had that dreadful complaint Infantile Eczema, which afflicted him for several months, commencing at the top of his head, and at last covering his whole body. His sufferings were untold and constant misery, in fact, there was nothing we would not have done to have given him relief. We finally procured a full set of Cuticura Remedies, and in about three or four days he began to show a brighter spirit and really laughed, for the first time in a year. In about ninety days he was fully recovered. Praise for the Cuticura Remedies has always been our greatest pleasure, and there is nothing too good that we could say in their favor, for they certainly saved our baby's life, as she was the most awful sight that I ever beheld, prior to the treatment of the Cuticura Remedies. Mrs. Maebelle Lyon, 1826 Appleton Ave., Parsons, Kan., July 18, 1905."

The chimney has as much to do with the light as the lamp has.

There is only one make of good lamp-chimneys; there are many poor ones. Macbeth is the good one, the only one advertised, the only one worth advertising.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

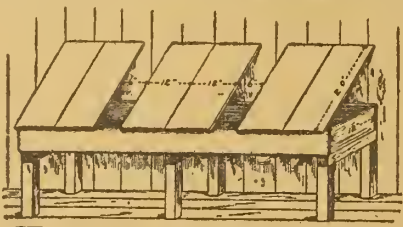

SOME SUGGESTIONS ABOUT BUILDING.

Prof. W. R. Graham, of the Ontario Agricultural College, who has been at the head of the poultry experiments for a number of years lays down some very pertinent points in building poultry houses and in the inside arrangement. It is his opinion that every hen should have at least six square feet of floor space and that each bird of the Plymouth Rock, Wyandotte and such breeds, requires about nine inches of perch room; Leghorns, etc., about eight inches; Brahmas, ten inches. Roosts should be made low and near the ground. The reasons are that heavier breeds cannot fly up on high roosts and lighter breeds frequently injure the soles of their feet in jumping from high perches. When dropping boards are used they should be moderately low down to admit of cleaning. They should be made of matched lumber and should be twenty inches wide for one roost and three feet for two perches, the first being placed eight or ten inches from the wall. Most poultrymen like perches two inches square with the corners slightly rounded.

Nests are usually made from ten to twelve inches square. Ground floors are more in favor than board floors and cost less. Houses with a straw loft are cool in summer and dry in winter.

ONE PLAN FOR NESTS.

A poultryman in an exchange writes that he had a good deal of difficulty with his hens roosting on the nest boxes and he set to work to invent some sort of an arrangement that would prevent this habit and he finally hit upon the plan as shown in the illustration. In the large nest box it will be seen that there are no divisions, just a number of nests and the hens find their own nests. Over the nest trough are a number of boards set on an incline. The boards are held in place by a cleat on the under side at the bottom, which rests on the edge of the nest box and when hunting eggs they can be lifted out of the way. This correspondent writes that he has nests for five hundred hens on his place fixed in this manner and

that he would not change it for any other plan of which he has knowledge.

A SURE CURE FOR ROUP.

Roup in poultry corresponds to diphtheria in human beings. It is fully as contagious and fatal. The fowl that stands about listlessly, droops its head which becomes swelled and sore, finally blinding the sight, can be suspected of having roup. Treatment is difficult and for the ordinary bird at this stage there is hardly use of trying a cure.

It is generally considered that the hen that survives an attack is not worth much afterward. The owner of the flock is generally responsible for the disease making an appearance. It is caused by drafty and damp quarters. When a fowl shows symptoms of having taken cold, the best thing to do is to squirt kerosene into the nostrils. If the cold does not abate and roup symptoms follow, then the best cure is the hatchet. Bury or burn the bodies at once, as the healthy fowls will very easily become infected by the microscopic roup germs.

Watch the poultry now for the old sick members. Do not allow an epidemic to start and take half the season's raising. Allow the flock respectably, decent care, and sunny quarters free from drafts and foulness and much trouble may be avoided.

A Convenient Drinking Fountain.

To the Editor of The Homestead:
It is always more or less trouble to

HATCH ALL Incubators Will Hatch Your Eggs

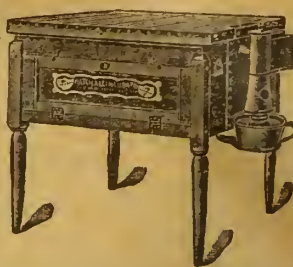

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

HEBRON INCUBATOR CO., BOX 8, HEBRON, NEB.

get a satisfactory poultry drinking fountain in the winter, especially when the poultry quarters are so cold as to freeze water. I have succeeded in solving that problem to my own satisfaction. I cut a pumpkin in two and place it in the chicken house. The poultry soon eat the inside out of it and there is left the rind, and this I use for a drinking vessel. When the water freezes it can be thrown out and a new one put in its place.

A. E. W.

A good many things are happening at the poultry school at Cornell University. With them no theory, however generally accepted, goes, until it has been proven by thorough, actual experiment. They are now giving especial attention to the molting problem. They have flocks of White Leghorns colored every hue of the rainbow and combinations of those hues, (done by means of aniline dyes) till the experiment yards are a gleam of gorgeous color. A young lady in charge is watching these vari-colored hens, noting in each case when, how, and now long it molts, also the subsequent condition. They are seeking to learn how quickly a hen may be forced to molt, and how this forcing effects health, egg production, egg fertility, etc. Before they are through, they will be able to speak with authority on this important and much mooted subject.

A late unique enterprise was "A Poultry Show on Wheels," inaugurated by the Missouri Pacific and Iron Mountain R. R. It was called by the railroad people "The Poultry Industrial," and was a big proposition. One car contained an exhibit of the best breeds of poultry, the other poultry appliances. In fourteen days this train visited fourteen towns, and fifteen thousand people visited the exhibits. It is intended eventually to run these poultry specials over the entire Missouri Pacific system, some sixty-three hundred miles of road.

Truly, the reform "microbe" has found its way into poultry editorial sanctums. Its latest development is along the line of "fake" or "improved" pictures, as appearing in the poultry papers. It is a move in the right direction, since the "improvement" of photographs, allowing the illustration to pass as the actual representation of stock, was not exactly honest, ethically considered. Two of the leading poultry journals, notably one famed for the beauty and fine quality of its illustrations, have taken the lead in this matter. It is one of the many signs of the times.

POINTERS.

—White Holland turkeys are offered for sale by Mr. J. S. Teal, of Lamoni, Iowa.

—Fifty Buff turkeys, both sexes, are offered for sale by Mr. Lloyd Peterson, of Corning, Iowa.

—Rose Comb White Leghorns are offered for sale by Mr. M. T. McEvoy, of Emmetsburg, Iowa.

won five firsts. My motto is deal with others as you would have them deal with you."

—Mrs. Nettie Crane, of Blencoe, Iowa, writes: "Through the good services of The Homestead advertising columns I have already disposed of all my stock of Orpingtons." This will save prospective buyers the trouble of corresponding.

—Mrs. Will Michael, of Selma, Iowa, is offering Single Comb Brown Leghorn cockerels for sale in her advertisement on page 15. She says: "The stock I am now offering are large, well marked, with nice combs, good hackles, hack and saddle. I use only high-scoring males and females. I won every premium in the Single Comb class at

the Eldon Big Four Fair in September. I guarantee them as represented."

—Mrs. Cora E. Berger, of Harlan, Iowa, in furnishing copy for her advertisement on this page, writes: "I have about 100 cockerels of the breeds that I am offering for sale in my advertisement on this page that will be sold at reasonable prices. They are nice, large-bodied birds."

—Mrs. Floy E. Collins, of Viola, Iowa, in furnishing copy for her advertisement of Partridge Cochins and White Holland turkeys, found on this page of The Homestead, writes: "These birds are first class. I can please either fanciers or farmers in Cochins, but make a specialty of fancy turkeys."

—Mr. Oren J. Spalti, of Pleasantville, Iowa, has been a breeder of Light Brahma chickens for the past ten years. He writes as follows in regard to the stock he is advertising: "I have a fine lot of cockerels and pullets for sale. I will offer pullets at \$10 per dozen and cockerels from \$1.50 to \$5." See his advertisement which appears on this page.

—The advertisement of Mrs. H. L. Jones, of Montezuma, Iowa, appears on this page of The Homestead. In furnishing copy Mrs. Jones writes: "I have a fine lot of cockerels, hens and pullets from prize winners, the best I have ever raised. At the Montezuma poultry show, November 4th to 7th, I took two firsts, two seconds, fourth and fifth, and two specials. I have some extra good ones for sale, also Pekin ducks at \$1 if taken soon."

—On this page of The Homestead will be found the advertisement of Mrs. Edith Eygabroad, of Grundy Center, Iowa, offering choice Silver Laced Wyandotte cockerels, White Wyandottes, Light Brahmas and Mammoth Pekin ducks of both sexes for sale. In furnishing copy Mrs. Eygabroad says: "I have a fine lot of Silver Laced Wyandotte cockerels for sale, also a choice lot of White Wyandotte cockerels, pullets and hens and a few choice Brahma cockerels and pullets. I also have some extra choice Pekin ducks and drakes for sale at reasonable prices. I have used The Homestead for the past seven years and find it the best paper in which to advertise my poultry."

Echoes From a Kansas Farm

By Henry Hatch

No man begins the new year right who keeps his stock in a state of semi-starvation.

This is the time when felt shoes and boots come into good use. The latest and best thing, at a reasonable price, are high top shoes, lined with sheep's wool.

Down here in Kansas our corn is always fully matured, or is nineteen years out of twenty. Farther north it is a good plan to go slow on shelling corn, to store, that is a little soft. It may be frozen when shelled, and apparently dry when it is not.

A number are talking of thrashing their shocked corn, providing they can get a thrasher in to do the work. The man who has done our thrashing for the last few years says it is not hard on the separator to thrash corn, and it takes no more power than small grain in ordinary condition for thrashing, but he dislikes the work in winter. A person cannot tell one day whether he will be able to do any more work in the next two weeks, on account of the weather.

Everything in this world is evened up pretty well. Land prices are higher here than they have been in the history of the state, yet about the same amount of work and management will bring as many acres as it would fifteen years ago. The pessimist predicts that land will soon sell cheaper—"when hard times come"—but even if it should, being caused by "hard times," wouldn't it be as hard to pay for a farm then as now?

Ten years ago a renter was able to buy the eighty-acre farm he was then living on for the ridiculously low price of \$900. He wouldn't do it. Four or five years later the farm brought \$1,600. Last week a gentleman bought it for \$2,600, and he got as good a bargain as any we know of, too. The man who refused to buy at \$900 is still a renter. There is a moral in this for any renter who is putting off the day of buying a home, waiting for something to happen, he knows not what.

For fourteen years we lived in a sandy portion of northern Nebraska. At that time we all confidently congratulated ourselves on the fact that hog cholera never would gain much headway on that kind of soil. All the time we lived there we never lost a hog with cholera. This year reports from there indicate the loss of a large per cent of the crop raised, with the disease still unchecked. It seems, after all, that hog cholera is no respecter of soil or climate. No one had better brag on his herd having

been free from the disease, or the first thing he knows he will lose about nine-tenths of them.

It is a hard matter, hereabouts, to get a crowd out to a farmers' institute meeting. It has been tried in this county two or three times this fall. Sometimes only three or four real farmers attended, the rest being street loafers and the kids from around the town where the meeting was being held. All these came out of curiosity.

On the same line of reasoning as with cholera, no one, who pastures his cattle in stalk fields, should have much to say about not losing cattle with the corn stalk disease. For years one of our neighbors contended that it was absolutely safe to pasture cattle in stalks, if proper care was taken. Last fall, with all his care and precaution, he lost two head. They died, too, after they had been having the run of the same field of stalks for several weeks.

Stock cattle—that is, ordinary cows and heifers and growing steers—will quickly eat their heads off, if fed all they will eat of present-price hay. Our feed rack (thirty-six feet long) is filled with hay or straw every few days, and it quickly goes. Were it not for the cheaply-grown fodder, such as cane, kafir corn and corn, they would eat up their value before grass grows again. The man who claims it pays to feed all stock all they will eat is sure to find himself only keeping even with the business, unless he feeds something poor in quality, therefore cheap in price.

The tendency of the times is running more and more towards cutting out a part of the middlemen. Formerly, all land selling was done through real estate agents. The bulk of it is handled that way yet, but some is not. The habit of a great many buyers is to go direct to a neighborhood, many times to friends and relatives, and deal direct with the owners. It is true, too, that many farmers ask more for their farms, when talking direct to a prospective buyer than they will allow an agent to sell for. There are farmers and farmers, buyers and buyers and agents and agents.

Jas. Burk's Short-horn Sale.

The dispersion sale, as previously announced, of the Fremont Stock Farm Short-horns, owned by Mr. Jas. Burk, Sr., at Mechanicsville, Iowa, was held on December 20th, during the snow storm. A very large gathering congregated to pay respect to Mr. Burk's last sale of the reds, whites and roans. Owing to very advanced age he is retiring from business and leaving the farm, so that he and his aged companion may spend the afternoon of life with more ease in the little town of Mechanicsville. At no sale during our experience covering twenty years, have we seen better arrangement for the proper handling and selling of cattle, as well as for the comfort and convenience of the guests, than was provided at this sale. Some forty years ago Mr. Jas. Burk landed from Ireland in Cedar county, with not a dollar in his pocket, and by hard, honest effort, coupled with thrift and assisted by a faithful companion, achieved success. Mr. Burk retires leaving one of the best and largest farms in Cedar county, highly improved, and owns a splendid residence in Mechanicsville, as well as having a very comfortable bank account. Not being unmindful of his success as an adopted son of the United States, he had reared on the center pole of the tent Old Glory and the flag of our union on either side of the auctioneer's stand. Such loyalty to this country manifested by an adopted son inspired Col. Griff Johnson, the auctioneer, to make the speech of his life, paying high tribute to Mr. Burk and to his efforts in the cattle breeding business. There were no Scotch cattle in the offering, not even the herd bulls were Scotch, both being Scotch-topped Young Marys, but individually were splendid specimens of the breed. Individual merit has been the watchword with Mr. Burk during his entire career as a Short-horn breeder, and the dispersion of Fremont Stock Farm cattle displayed a rare business lot, such as seldom go through a sale ring. Quite a number of calves were separated from their dams at an age when they are usually sold with their mothers. These separations are calculated in the averages given, which materially reduces them. Like all dispersion sales, there was a number of older cattle that had seen the best of their lives, which was another factor that kept prices down. The fact that there was no Scotch blood was doubtless responsible for there not being any breeders present from a distance of more than twenty-five miles away. Col. O. S. Johnson and Wm. Brock both did excellent work in the ring, securing and passing bids up to Col. Griff Johnson. The sale was conducted in a straightforward and frank manner, which inspired confidence in the minds of the buyers that the same straightforward, honest methods were being pursued in Mr. Burk's last sale that he has practiced during his forty years' stay in this community. Some of the young and thinner cattle sold as low as \$37.50 each, yet all are calculated in the averages given below. Only ten head sold at \$100 or over. A list of these sales bringing this amount, with buyers' names attached, will be found as follows:

COWS.

Rena Croft, three years, sire Baron Taylor, and b. c., W. A. Jackson,

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

Well, Christmas has come and gone again; turkey remains have been eaten cold and eaten hot, and Sunday will see the last of the plum pudding disappear; the children have devoured their sweets and broken half their toys; the young people are still merry-making back and forth, filling each others homes with laughter, but the older folk have settled back with a sigh that is half weariness and half content; although they were glad to see Christmas come they are not sorry the excitement of it all is over.

In some home there is still a flutter of expectation, although Christmas is past. These families are to exchange their gifts on New Year's Day. They have found that waiting a week at this particular season doubles the purchasing power of a dollar in many directions. Pretty things which were quite beyond them for Christmas present may become theirs by waiting, and so they wait. On Saturday and Monday they will study the advertisements and haunt the bargain counters. It is to be hoped they will not yield to the temptation to buy things, simply because they are marked down. A large amount of the goods offered for sale at Christmas is dear at any price, much of the bric-a-brac is showy, tawdry, and anything but beautiful, and many of the toys are so badly made that they are quite useless as playthings. This is the class of goods usually most reduced in price, but as there are some lines marked down where values are really genuine, discriminating shoppers frequently pick up rare bargains between Christmas and New Year, or directly after the 1st of January, when the inventory sales begin.

It is to be hoped that every home has been reached by at least one of the magazine publishers who are offering attractive clubbing rates for 1907. Every home is the better for at least two or three attractive magazines, in addition to the county paper and a farm journal, and when they may be secured at the figures offered this year it is surely false economy to limit the family's reading, as is sometimes done by well-to-do people. Not only is it well for individual families to avail themselves of these clubbing rates, but some arrangement might profitably be made whereby neighbors could subscribe for different sets of magazines and exchange in rotation, so that while each would eventually retain possession of the magazines subscribed for, each would have the reading of those subscribed for by the neighbors.

The close of the year should be a grand "clarin' up" time. Do you owe money; are you behind with your pew rent, or in debt to your grocer? Pay up and so do your share to help the world start the new year with a clean ledger. Have you borrowed tools or books or patterns about the place? Send them home and make a vow to borrow less in future. Are you on bad terms with some member of your family or someone in the neighborhood? Go and say you are sorry for your share of the misunderstanding. It takes two to make a quarrel, so you are at least partly responsible, and while it may be hard to offer to shake hands, hard to try to make friends, it is the right thing to do and you will feel better for doing the right thing. If it is a pity to let the sun go down upon one's wrath, it is a shame to carry ill will and an unforgiving spirit over the threshold of the new year.

We have had a good year in the Home Department, everything went well while I was abroad; the friends were most faithful and my substitute managed so beautifully that I have been accused of being a twin, or having a double, and since my return each week has seen an access of interest and an increase of power. In some homes there are factions and fusses, in others there is the monotony and the chill that marks the absence of life. We have escaped both Scylla and Charybdis, our atmosphere is not only warm with the breath of earnest living, but it is fragrant with peace and good will. We have a comfortable, attractive home. It is

Mayer Western Lady SHOES

are very stylish, serviceable and comfortable to wear.

They are dressy, fine looking shoes that can be depended upon for wear and for correct style.

pardonable to be proud of it. But let us beware the pride which goeth before a fall. Good as 1906 has been, 1907 should be even better. As the old year departs, as the new year draws near, shall we not pledge ourselves to the pleasant endeavor of making it so?

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Sometimes the storm is dark above,
Sometimes the rain is chilling;
And not a bird in all the tree
His merry note is trilling;
Yet in spite of dreary weather,
Sing my heart and I together;
"Clouds may hide the radiant skies,
Yes the sunshine never dies!"

—Emily Huntington Miller.

Serve God and be cheerful. The winter
Rolls round to the beautiful spring.
And o'er the grim grave of the snowdrift
The nest-building robins will sing.

—William Newell.

Do not be discouraged by your faults; hear with yourself in correcting them, as you would with your neighbor. Lay aside this ardor of mind which exhausts your body and leads you to commit errors. Speak, move and act as if you were in prayer. In truth, this is prayer.—Fenelon.

GOOD CHEER AT THE TABLE.

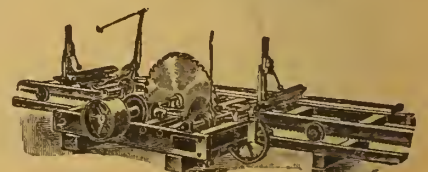

Among the forbidden speeches at table should be, "I don't like that," says Table Talk. "And if, from any personal idiosyncrasy, a child is really unable to eat a certain dish, in which others indulge with impunity, he may be trained to pass the fact by in silence and to feel that his peculiarity is a misfortune, not a virtue."

There is sound philosophy in the custom of civilization to make a meal of ceremony. For if the ceremonial aspect be observed properly—if it be forbidden to make the home meal the occasion for the home-grumbling—then amid talk and laughter will eating be slow, as it should be, and mastication thorough. So when at the family dinner table appear only pleasant faces; when conversation is bright and merry, and when from one to the other of the diners is a hearing as courteously as if each were "company," then does indeed "good digestion wait on appetite, and health on both."

BORROWING TROUBLE.

You do not know how happy you are in your everyday life until Trouble looms up

in your path, makes a how and says: "I came to call on you." Annoyances are everywhere outside of paradise, and there is no earthly use to try to avoid them. You can do your best, be as cheerful as the law allows, but the visitation of this evil spirit is regular. The best thing to do is to meet him like a man, shake hands, and, as one man says, "make him think he is making the mistake of his life when calling on you." One man has written on the first page of his book, "The most trouble I ever had in my life was the trouble which never happened." How true those words are, for we are all prone to cross that "Bridge of Sighs" before we reach it. Strange to say, while we all have days when we are not the happiest,

when trifles and real troubles annoy us, we are never very liberal in excusing the same fault or weakness in others. We are inclined to think the second party cross and peevish, even unreasonable, while very often we are placing our own moody nature upon innocent shoulders, thinking the fault is not with self, but with the other.

THE BABY.

Speaking of the baby, someone wants to know why we do not let it eat meat. Meat is excellent food for young chickens, why not for young humans? In the first place, a child does not and cannot chew meat properly. The first teeth are not strong enough for such chewing. The meat is swallowed half chewed, and the little stomach is overworked. Again, meat makes the fretful child bad tempered. It is too stimulating. It makes the glands soft and spongy. We have made quite a study of this matter for the past eight years, and have had several children in the family that were troubled with throat diseases. We are well satisfied that the trouble with 90 per cent of the cross and fretful children with enlarged throats and almost constant colds or catarrh, lies in their diet. Meat is responsible for many ills of childhood. Our children shall not eat lean meat until their second teeth are well formed. Oat meal, or other whole crushed grain well cooked, with good milk and cream, fruit and vegetables—not too much potato—a little fish and good bread and butter, will make child-flesh that one may be proud of. It will not do to compare a chicken with a child, for the chicken can use stones to grind up its food.

GENEROSITY.

Rebecca, aged five, who claimed a handsome, heavily-bearded young man—a neighbor—for a sweetheart, was asked by a young lady if she would not give her a claim also on the young man.

"No," said Rebecca, positively, "I want him all to myself."

"But won't you give me a part of him—just a little bit?" pleaded the young lady.

"You see, I haven't any sweetheart."

"Well," answered Rebecca, deliberating, and somewhat softened by the appeal, "you may have his whiskers."

TO 1906.

Another year of setting suns,
Of stars by night revealed,
Of springing grass, of tender buds
By winter's snow revealed.
Another year of summer's glow,
Of autumn's gold and brown,
Of waving fields and ruddy fruit
The branches weighing down.

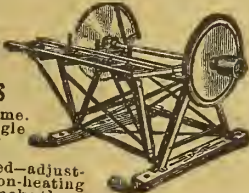

—John W. Chadwick.

CORNERED BEEF.

The following recipe has been used for fifteen or twenty years and the one who follows it will have the finest corned beef in the country. For 100 pounds of beef take four pounds salt and two ounces of saltpeter; dissolve in enough water to cover beef, which should be closely packed in a barrel. Keep under the brine in cool place. This makes it

The "DEAN" Ear Corn Slicer

Any Farmer or Cattle
Raiser should appreciate
the advantage of slicing
or chopping ear corn
for stock. The
health of all ani-
mals requires it.
Feeders today know
that grain should be mixed with
"roughness." The cob is the best
mixture for calves and steers.
"The Dean" Slicer soon saves
the price in cob feed alone. Also
saves time. Chops ears in 1/2 to
2 1/2 inch slices and cuts from 30
to 40 bushels an hour. Calves thrive
on the small slicing. It's so easily
adjusted that even a boy can run it or
any power can be attached. Elevator
attachment to bin or wagon. Prices
and terms very reasonable. Write
today, for your stock's sake.

Enterprise Wind Mill Co., 24 Main St.,
Sandwich, Ill.

BOWSHER

(Sold with or without elevator)

FEED MILLS

just salt enough to use. If in the spring
when the weather begins to warm up the
brine seems to sour, pour off and renew; or
boil and skim, and recover.

USE OF THE COLD MEAT.

The cold roast sliced thin is pink and
juicy and makes a delicious supper with
some palatable condiment. It is best, how-
ever, to save it till the next day, as even
the most appetizing dish is not rolled as
much if served twice on the same day, says
What-To-Eat. Only perfect slices should be
served cold, reserving the ragged bits for
other uses. These may be warmed in the
gravy with a little chopped onion, and poured
over split hot biscuits. Or they may be made
into delicious hash with potatoes and onion,
and served on slices of toast. Still another
way is to run them through a chopper with
half the amount of bread crumbs and a
small onion. Add the cold gravy and a
beaten egg. This may either be molded into
small, flat cakes and fried, or baked in a
loaf to be served with tomato gravy.

AMONG OURSELVES

This Among Ourselves circle is the
very heart of our home. Here we talk
about the things that are interwoven
with the very fiber of our being, of
the things which make and mar happi-
ness, of the things which, though they
be commonplace in themselves, are an
important factor in the life product we
are making. It is fitting that in such
a circle the voices of youths and maid-
ens should mingle with those of their
elders. One of the things which has
pleased me most in the last six months,
is that our young people have found
their way here in increasing numbers.
At this, our last meeting in 1906, let
me express the very earnest hope that
now the young folks have made their
presence known they will continue to ex-
press themselves, introducing topics
which are of special interest to them-
selves and seeing to it that they are
discussed with vigor and propriety.

"An Illinois Bachelor" has created
quite a flutter of excitement. Matrons
and maids are both moved to expression
by the speech he made a few meetings
ago. We shall hear several, beginning
with Mrs. Shelmadine, who will take
the floor for mothers and be followed
by "An Iowa Maiden," and "A Kansas
School-girl."

Illinois Bachelor has given such good ad-
vice to the girls I think someone had bet-
ter give him a little. Certainly a mother
who would give such good advice to her
girls as he writes his mother did, would not
neglect her duty to her son. Any mother
with such advice for girls would not advise
her son to ask a girl the first time he
had a chance, for a good-night kiss, and
surely a man who can give such good advice
to girls would not be guilty of such an of-
fense as asking for a good-night kiss—
surely there are not many girls who would
give it without being asked. He therefore
condemns himself. If it is wrong for the
girl to allow the kiss, it is equally wrong
for him to ask it; and he is first in the
wrong.

I think the young Illinois bachelor quite
right when he says, "Girls should be care-
ful," and should never submit to a good-
night kiss from a gentleman friend; it is
often the first step to destruction, and if
there were more young men like our bachel-
or friend the world would be better for it.
Girls should have good influence thrown
around them in their homes, and be taught
to do all kinds of housework. Mothers
should give advice and keep their daughters
at home until they know right from wrong;
then when the girl has gentleman company
she knows what to do and how to act. I
am twenty-two and I find in my experience
that a girl needs to be firm and independent
with young men, and that she is respected
for it. I have had strict parents, and I
am glad of it.

The letter of Illinois Bachelor prompts me
to say in regard to the downfall of young
girls, if mothers (and fathers) would teach
their sons morality, as well as their daugh-
ters, few girls would fall. The fault lies
with the parents. If all boys were made to
obey their parents' teachings as well as the
average girl does, when they reached man-
hood few would ever cause trouble. Girls
are lectured and warned from morning until
night and the average boy is allowed "just
to grow up." They are allowed to associate
with men and boys who have for the subject
of conversation, when alone, the latest scan-
dal, a new vulgar joke, etc. Somebody said,
"Remove the cause and the fault will mend,"
which can be applied in this case. If there
were no tempters there would be no dis-
graced girls. I am an eighteen-year-old girl
and am studying almost night and day that
I may teach school next year. I am of
passable appearance, I will venture to say,
and have been kissed by none excepting very
near relatives. The neighbors say, "She
never has no fellers; she is too cranky and
stuck up; the boys don't like her." Judg-
ing from his letter, Illinois Bachelor is a
very good young man, but he, even, could
improve. A girl as pure as the one he is
looking for will not have a man who has
kissed the lips of all the other girls in the
neighborhood, trying to find one that would
not let him kiss her.

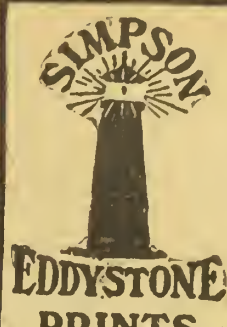

And there is more to follow. Little
Miss Modesty and One Who Has Experi-
ence both have something to say in re-
ply to our Illinois bachelor friend, al-
though they speak of another matter
also:

I have been a silent but interested reader
of this department and I feel that I must say
a word about fallen girls. I think the reason
why so many girls fall is because their

mothers do not give them the advice they
should have. But who is at the bottom of
all this disgrace? I say it is a man. Mothers
should talk to their boys, as well as the
girls. They should teach them to respect
women, and tell them how mean and dastardly
a man is who will tempt women to do
dishonorable things. A man who betrays a
girl sinks to the level of beasts. He ruins
two lives, his own and the girl's. If so-
ciety would only make men bear the dis-
grace, as well as the women, then most of
the misery would be out of this world. The
bachelor from Illinois gives the girls some
good advice, and as "one good turn deserves
another," I will give him some in return.
The good girl would give him the "bounce"
if he would ask her for a kiss, so "if the
right one comes along" he had better be
careful and try some other means of ascer-
taining her character, or he will be a bachel-
or all his life. Besides, if it is wrong for
a girl to kiss a man, then it is also wrong
for a man to tempt a girl to kiss him. A
kiss may be a girl's first step to ruin. A
girl shows her character by her demeanor
and a young man need not disgrace himself
by tempting her to do anything dishonorable
if he will study her and thus read her char-
acter.

I would like to say a few words in reply
to An Illinois Bachelor. Often a good young
man could lead a girl away from evil ways
if he would. Perhaps she is an orphan or
far away from home and loved ones. A few
words or a tender caress will often turn her
thoughts into a good way. She has been led
into evil companionship by coaxing and fair
promises of love. Her heart may be hungry
for love and she is led from right, not think-
ing of the evil to come. And even if she is
at home, the parents may not be given to
demonstrations of their love, and it would
seem to the children that all they cared for
was work and money, and they would turn
to those who supplied what their hearts

The temperament and character of

country go far in determining correct
usage in their intercourse, but there are
certain things which self-respecting
young men and women will not do.
Good taste demands that a girl shall
not cheapen herself by promiscuous kiss-
ing, and the chivalrous man who expects
the girl he chooses for his wife to come
to him, like a half-blown rose, sparkling
with dew and fragrant with the breath
of morning, will bear himself to all wom-
en so that the wives of other men may
go to them as pure and sweet as he
desires the woman of his choice to be.
There should be but one standard for
the sexes, whether of manners or of
morals, and when women rise to the
justice of this conception, when moth-
ers are governed by it in the training
of their children, the millennium will be
hastened; but let us hear Mrs. Massey
who has been thinking along this line:

Why will people, and respectable women
at that, receive and be cordial and friendly
to a man who is known to be morally cor-

But, while they will never speak a good word to or of a girl who has made one wrong move, no matter what the extenuating circumstances are. Perhaps you can't put your finger in her place "in your mind," but just try to think how that girl feels. Perhaps she was well brought up and never thought that she would ever make such a false step, but did so under sudden temptation by the one she loved or perhaps it was done under the influence of drug, so I've heard, and now she is put on the plane with the most vile of women. She may be suffering agonies of shame and repentance and if people would only extend a helping hand she might be saved from ever again doing such wrong. Perhaps she is strong enough to live blamelessly the rest of her life in spite of coldness and neglect, but don't you think it would be more Christ-like to give her your hand and show you appreciate her efforts and will do all you can for her? Receive her at your home, and visit with her, for if your morals are as they should be and your character firm and strong she can do you no harm and you can help her wonderfully. I really believe that fewer women would live such wicked lives if people would only be more ready to help them up instead of when they are down, each and every one being ready to give them a "kick." Let us give those men and boys a few more frowns and "cold shoulders" and perhaps they will be a little more careful of their morals if they find respectable people will not "countenance" them, for they are generally the most to blame. As Mrs. Walker says, there is less excuse in these days for good and blameless women refusing a helping hand to the erring. Let us not be afraid of what people will say of us, for if our life is morally blameless they cannot help but judge our motive aright.

Some of the friends may question the wisdom of allowing an entire program to be occupied with the matters discussed today, but the large number of letters received persuades me that the circle desires that certain subjects which have not heretofore been discussed should receive attention. There are a number of odds and ends which I had planned putting upon the program today, but like Queen Elizabeth I keep a keen ear to the ground and I found my people wanted something else. Will the friends please remember that here Among Ourselves, as far as it is possible, they are

given what they ask for and they receive back what they give? That our meetings are such a success is your doing. As was the past so is the future in your hands, I face it unafraid, and with a glad and thankful heart say, "Happy New Year." I wish I might not only say "Happy New Year" to each and every one of you, but that we might clasp hands and receive the inspiration which comes from the tongue of kindred souls.

Dressmaking and Millinery—No. 549.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] Although there is a riot of color in the season's garments it is not to be inferred that black has been crowded out, or even made to take a secondary place, and one need only note its prominence in a well-dressed crowd to assure herself as to its favor. In the early showing of coats and wraps black seemed to hold a small place, but there came a turn in the tide of favor and the black coat is now given first place. It is said, too, that the separate skirt in black is regaining its former prestige. In millinery, too, there is a marked return to black, the all-black hat or the hat that has only a touch of color being among the most dressy. Noticeable among the latter is the black velvet hat with rich black plumes and a single large rose usually a deep red or a deep pink.

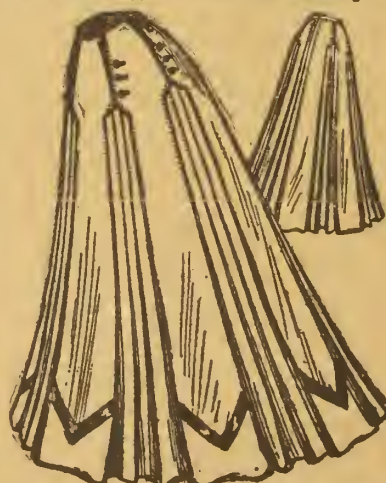

For this number I have again two designs that will combine very effectively in making a costume of one material throughout, and when showing such I find it necessary to repeat that in no case are two such offered or sent as one pattern. The patterns are put up in separate envelopes, each has its own number, and the two may be used together or separately.

Fancy blouse waist No. 5527 has several new features that belong especially to the season. The chemisette effect was never in more general favor, and the outlines in this design are simple and attractive. Although the chemis-

[5527 Fancy Blouse Waist, 32 to 42 Bust.]

ette is of lace as here pictured, any variation liked may be adopted. The front is in novel shape that is emphasized by the application of buttons and "simulated" button-holes. The latter are made of cord or marrow fancy braid, and should correspond in color with the buttons, and these of course match the trimming. Button-hole effect may be made on the material in embroidery (button-hole stitch), but without cutting the

[5528 Fancy Pleated Skirt, 22 to 32 Waist.]

cloth. The overlapping parts are stitched in place, not depending at all on these applications. Flat stitched tucks extend the full length of the back. The arrangement of the pleats at the front give the effect of fullness. The waist closes invisibly at the center front, the chemisette being hooked into place beneath the left front. The sleeves are in novel shape and are in keeping with the other parts of the design. While the pattern does not provide for these in full length they may be cut longer and still the outline kept the same. Or a deep cuff may be made of the material or of lace to be worn when desired. Pattern No. 5527 is cut in sizes for a 32, 34, 36, 38, 40 and 42 inch bust measure. Give size when ordering pattern.

No. 5528 pictures a fancy pleated skirt that combines pleats, panel and yoke effects in a pleasing manner. It is to such an extent on the lines of the waist described above that I need not repeat what was said in regard to

Saves You 50%

30 Days Free Trial

Wagon Box Manure Spreader

\$59.50

Freight Prepaid

Guaranteed and Backed by a \$25000.00 Bond

FITS ANY TRUCK.

Miller Testimonial Letter.

I have thoroughly tried your two horse spreader. Have hauled over 300 loads of manure of all kinds and it did the business to a queen's taste. It has caused no trouble whatever. My 13 year old boy used it without any trouble. I am recommending it to my neighbors and friends. I thought all spreaders were troublesome but you have changed my mind.

LEWIS MILLER.

No spreader made a third as simple as the Galloway.

But one operating lever. Many new features such as our endless apron conveyor, solid bottom box and double chain drive.

We positively guarantee the Galloway to handle any kind of manure.

Sold direct to the buyer without one cent paid to us in advance.

We pay the freight and save you 50%.

My Spreader Booklet tells you all about this New Spreader for every farmer. I want you to read in it what my customers think of it; and some interesting things about the future of your land in fertilization. It's free.

Just write me personally a letter or postal.

WILLIAM GALLOWAY, President.
WILLIAM GALLOWAY COMPANY.
109 Jefferson St., Waterloo, Iowa.

Write your name and address plainly on this Ad., cut it out and send it to me.

William Galloway,
Builder of the Only Wagon
Box Spreader called the
"Galloway."

SOLD direct from my factory to you.

Built on honor.

Not how cheap but how good, is my motto.

After I have made them as good as I can, then I make the price as low as I can.

A spreader for \$59.50.

A spreader that I personally guarantee to work as well or better than any other spreader on the market to-day.

My guarantee is the broadest possible—and backed up by a \$25,000 legal bond.

To show you my confidence I will send you one, you take it out in the field and use it, or abuse it if you want to, for 30 days, and if you don't find it worth more than the \$59.50 I ask for it, just take it back to the depot and ship it back to me. I will pay the freight both ways. You can try it for nothing—and at no risk.

My free trial plan is such that you don't have to send me one cent in advance. You get my plan when you get my booklet.

I save you over one half the price you would have to pay for any other spreader as you use your own wagon truck. Why tie up \$65 in a spreader truck, useless 11 months in the year?

An important feature of the Galloway Spreader is its light draft. Two horses will haul it. Read what Mr. Miller says about it.

Best Baker Built **SOLD DIRECT from FACTORY at WHOLESALE PRICE**

We save you from \$15 to \$40 when we sell you a Hand-Made Steel Range direct from our factory at our low wholesale price, besides we give you the best range on the market. Don't buy until you get our complete catalog of stoves and ranges. A moment's time and a postal card will bring it to you and save you money. Write for it today—ask for catalog "G."

JUDSON A. TOLMAN CO.,
7730 Woodlawn Ave., Chicago, Ill.

THE TOLMAN STEEL RANGE

"Queen of the Kitchen"

The manner of producing the button and button-hole effect. The skirt is cut in nine gores, extensions on each of these being laid in the small side pleats. Below the yoke portion the pleats are stitched a short space, and below this left to flare about the foot of the skirt. If waist and skirt are of one material the trimming should correspond, but may be omitted or varied at will. Any mode of panel trimming may be used and variation made in trimming the waist to correspond. The skirt may be made in sweep or round length, the pattern being perforated for taking off for the latter. Pattern No. 5528 is cut in sizes for a 22, 24, 26, 28, 30 and 32 inch waist measure. Give size when ordering pattern.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

THE NECESSITY FOR GOOD TOOLS.

The old, battered hammer or hatchet—the discarded saw or chisel, are silent witnesses of the necessity of buying good tools for the home. A good job cannot be done without good tools, and nearly every day something turns up about the house that could be improved or repaired if the proper tools were at hand.

The Keen Kutter Tool Cabinets are designed for the convenience of the home. The assortments of tools were carefully thought out by men who know tools and their requirements.

Every tool has a place of its own in the cabinet, so it will not be damaged by contact with others. Every tool belongs to the famous Keen Kutter brand, which means they are the best you could buy.

Keen Kutter Tool Cabinets are made in various sizes, costing from \$7.50 to \$100.00, according to the assortment of tools.

All Keen Kutter Cabinets are complete in every detail within the limits of the requirements for which they were designed. All contain in various numbers and varieties, Saws, Braces, Bits, Chisels, Gimlets, Awls, Planes, Hammers, Hatchets, Files, Pliers, Screwdrivers, Wrenches, Nail-sets, Reamers, Rules, Squares, and everything that is needed.

Nothing is forgotten—you don't have

ADVERTISING NOTES.

The Myers-Boyd Commission Co., of St. Louis, Mo., announce in an advertisement on page 11 of this issue that they will pay the highest price for furs. Write them for price list.

An 800-acre farm located one mile from the center of a town and about forty acres of which is natural timber, with fine orchard and good house on the place, is offered for sale on page 21 of this issue. The address in the advertisement is Box 223, Wessington Springs, S. D.

Messrs. Willis & Co., of Emporia, Kan., are offering an 800-acre farm, 300 acres of which is under cultivation, for sale in their advertisement that appears on page 21 of this issue of The Homestead. Five hundred acres of this farm is in grass, having fine water, tank, hydrant, windmill, etc.; good feed lots, orchard, large eight-room house, small tenant house, two large barns, three large cribs and other improvements. The price at which it can be purchased and other information can be found in the advertisement.

When looking for a new location, the average reader is often bewildered by the many advantages that different parts of the country seem to offer; one offers this, another that advantage, and it is hard for him to settle on a selection. One state, however, offers somewhat unusual advantages; that is Washington. Doubtless you have often heard of the famous Big Bend country, but never came across facts interesting enough to read. First, the soil is of volcanic origin—light in color, fine as wheat flour when thoroughly pulverized, easily workable and makes the finest kind of seed bed known. Climatic conditions are all one could desire; otherwise, the record-breaking crops that make eastern Washington the garden spot of the West could not be produced. The usual spring rains continue to the middle of July; thereafter, little rain falls until September. There are no destructive storms, or, in fact, storms of any severity and in harvesting his crops the farmer is secure in the knowledge that no delays or damages will ensue from this source. In the central and midwestern states we know storms to be of more or less frequent occurrence. The Big Bend country is the greatest wheat-producing section in the entire West and freedom from rain before and during harvest time insures grain of the finest quality, totally unlike the somewhat shriveled grain of other localities. One may own a home in an unproductive country where it is a matter of dig and delve from morn to night, hard to keep even and often running behind. One may have hopes and work like the proverbial beaver, but if the climate, soil and other conditions that make farming successful are not present, he may not hope for success. In comparison with other localities Washington land is cheap and its fertility and productiveness are self evident. Where the central states may "miss" a crop occasionally, Washington bears the pennant for her regularity. The Big Bend Land Company are sending out interesting literature to interested land buyers and we suggest that any so interested write for information to the Big Bend Land Company, Dept. 1, Wilbur, Wash.

WANT TO SELL YOUR FARM?

If you do, write the Glenn Realty Company, of Kansas City, Mo. They have an announcement in this issue that will interest anyone who wants to buy or sell property of any kind. Look up their advertisement and write them.

MISSOURI FARM CHEAP.

To anyone who wants a good grain and stock farm the one offered for sale by the Howell Realty Company, of Kansas City, ought to be considered. This is an excellent farm at a low price and is only a short distance from Kansas City. Read this firm's advertisement on page 21.

A GOOD HAY PRESS.

Those who want a good hay press should consider the merits of the Auto-Fedan before buying. The following testimonial letter speaks for itself: "Luverne, Iowa, Oct. 21, 1906. Auto-Fedan Hay Press Company, Topeka, Kan. Dear Sirs:—We pressed over twelve tons of timothy in four hours and thirty-five minutes last Thursday, running 301 bales. W. L. Niver." Those who have used the above press are greatly pleased with it because two men can operate it, and help is hard to get nowadays. Then it only takes two-horse power to run this press, and it is said to be the only successful self-feed on the market. Read the advertisement on page 8 of this issue.

HENRY FIELD'S SEED CORN.

Mr. Henry Field, of Shenandoah, Iowa, makes about the most liberal offer in his advertisement on this page that any man could wish. He says he allows the purchaser of his seed corn to test it and if he is then disappointed in any way, return the corn and get purchase price. This guarantee applies to both shelled and ear corn. Now Mr. Field is not a man to make an offer and then back out. He has built up a reputation for two things, namely, for good seed corn and for "making good." Of course, the scientific manner in which he keeps his corn enables him to stand behind it with his bank account. Mr. Field also handles good clover seed and fresh garden seeds. His catalog tells all. Send for it and mention this paper when you write. Address Mr. Henry Field, Shenandoah, Iowa.

BUILDING MATERIALS CHEAP.

The meaning of the above title is a very different thing from "cheap building material." The St. Louis Wrecking & Supply Co. have none of the latter for sale. However, this company are offering all kinds of building material at a low cost. They can do this because they have recently purchased the famous coliseum and mammoth music hall of the St. Louis Exposition. This was erected at a cost of one million dollars. Ten million feet of lumber, all sizes, were used in its construction, as well as twelve million brick, one million feet of pipe, 500 toilets, 100 lavatories, in addition to electric motors, wire, lamps, fans, blowers, etc. Also 5,000 common chairs and 5,000 dining room chairs, as well as 1,000 dining tables. There are 100 leather-seated chairs and 100 solid oak fancy tables. This material is now being offered for sale at great bargains. Everything is guaranteed or money will be refunded. A

catalog has recently been published and will be sent upon application. You will find the advertisement on page 3 of this issue. Mention The Homestead when you write and address St. Louis Wrecking & Supply Co., 3809 Manchester Ave., St. Louis, Mo.

SPEAKING OF INCUBATORS.

Every man or woman who raises enough chickens to really amount to anything, that is, to bring in any substantial income, uses incubators to hatch out the great bulk of their chickens. The old hen is simply used as a side issue, and this is especially true where the "Hatch All" incubator is used. The regulator on this incubator never fails to control the heat and one hatch of early chicks will pay for both this incubator and the brooder that accompanies it. It is made by the Hebron Incubator Company, Box 8, Hebron, Neb., and the advertisement of this firm will be found on page 14 of this issue. Orders for incubators should soon be sent in and our readers should at once write to the above address for their new catalog, which is beautifully illustrated and contains much valuable information on poultry. Please mention this paper when you write.

FALFURIAS IN THE WONDERFUL GULF COAST COUNTRY OF SOUTH TEXAS.

The northern farmers have recently learned of a new country in the great Southwest and hundreds of them are going there and are bettering their condition. Land is getting so high in price in the old, settled countries that it is almost beyond the reach of the ordinary farmer, and if he wants a home for his family, or a little more land for the boys, he goes to the countries where he can buy cheaper and get land that will produce more valuable crops. This being true, there is no better country anywhere today than the Gulf coast country of southern Texas, in the vicinity of Falfurrias and other new towns which are now being built in that section. The Falfurrias country certainly has a great future. The farmer in that vicinity raises crops that pay them from \$50 to \$300 per acre and two or three crops from the same tract of land the same year. Farmers in the northern states cannot do this, as the climate is not right. But it is said that the Gulf coast country has the finest climate in the world. The Falfurrias Immigration Company have built up the town of Falfurrias from a population of twenty-eight people in 1904 to a population of 1,200 in 1906, and Falfurrias will have 2,000 people in 1907. This same company are now building new railroads and new towns, and there are many excellent opportunities in and around these new towns for those who go to that country now. These new towns will be developed just as Falfurrias has been and those who get in now are going to get the benefit of this development. But do not delay. Naturally such opportunities as are offered now will not be open long. The price of land will double and treble in a short time and those who buy at this time will get the benefit of the raise. The proof of these statements may be found at Falfurrias, and the way to find out the truth is to get the letters of farmers who live near Falfurrias, or better still, go on the next excursion and talk with them. What has been done can be done again, and will be done, for this company have ample means to carry out their plans, and men of vigorous character and integrity are back of this proposition. Do not fail to read the advertisement of the Falfurrias Immigration Company, of Kansas City, in the Lands and Homes department of this issue, and we would advise all those who want a home or investment to write them for free literature, latest map of Texas, etc. They will gladly send these on request.

The Saunders Sale.

The anniversary sale of Mr. C. A. Saunders, at Manilla, Iowa, on December 19th, commemorative of his ten years' connection with breeding of Short-horn cattle, proved to be one of the greatest attractions of the year. Not since the dispersion of the Tebo Lawn herd at Kansas City has such a representative lot of breeders been at a ring side as was gathered together at the Greeley Stock Farm on this occasion. When Col. F. M. Woods called the meeting to order he did so with a few preliminary remarks and touched upon the occasion of his first meeting with Mr. Saunders at a Short-horn sale when he advised him to buy a cow. He said to him at that time that if he would take good care of her and her descendants that in ten years it would be possible for him to have seventy-one head of cattle. He not only lived to see the fulfillment of his prediction, but also to witness the rise of one of the most noted breeders and show men of today. Colonel Woods then called upon Mr. Saunders, who welcomed those present and in a few words gave a resume of his career as a breeder. He said he took particular pride in the fact that during all these years his very best and most loyal supporters were his neighbors and his friends, and he was glad to have them with him here again today, besides many of the very best breeders of the present day. Mr. Saunders then called upon Mr. E. O. Cowan, assistant secretary of the American Short-horn Record Association, who made a most appropriate speech to the 500 persons present, and then Colonel Woods opened the sale with Lady Fragrant, a daughter of Imp. Marengo's Count. The bidding was rapid, and she soon reached the \$500 mark, and was finally knocked down to Mr. Owen Kane, of Wisner, Neb., at \$760. She was also the top animal of the sale. Imp. Scottish Myrtle, an eight-year-old roan cow, was brought into the ring and she went to Messrs. J. R. Mansfield & Son, of Wisner, Neb., at \$480. The Scotch females were sold first, and brought most satisfactory prices. Most of these were purchased by well-known breeders, Mr. N. A. Lind being one of the best buyers in the sale. Lord Champion 2d, a yearling son of King Champion, was bought by Mr. G. H. Miller, of Harlan, Iowa, at \$300, and Scottish Champion also went to Nebraska at the same figure. In all respects it was a great sale. Fifty-nine head sold for \$11,290, or an average of \$191.35. Forty-six females sold for \$9,410, or an average of \$204.50. Thirteen bulls sold for \$1,880, or an average of \$144.60. Col. F. M. Woods cried the sale and was most ably assisted by Col. Geo. P. Bellows and Col. Carey Jones. Below is a list of those selling for \$100 and over:

COWS.

Imp. Scottish Myrtle, seven years, J. R.

Mansfield & Son, Wisner, Neb. \$480
Lady Fragrant, four years, Owen Kane, Wisner, Neb. 760
Imp. Miss Law, seven years, Aug. Sonne-land, Harlan, Iowa. 530
Czarina, four years, N. A. Lind, Rolfe, Iowa. 500

Merry Marshall 7th, one year, A. Dauthe, Fullerton, Neb. 150
Champion's Lad, one year, Thos. Norris, Denison, Iowa. 155
Leigh Champion, one year, F. W. Downs, Davenport, Iowa. 145
Victor Champion, one year, Chris Lawrence, Defiance, Iowa. 120

E. R. Morgan's Hereford Sale.

The sale of Hereford cattle held by Mr. E. R. Morgan, of Blue Rapids, Kan., on December 19th, was well attended by breeders and cattlemen from northeast Kansas and southeast Nebraska. The cattle were offered in just nice breeding condition. Many thought the offering of thirty-five bulls would not find buyers, but twenty-eight head were sold. The larger part of these were quite young and cut the average to a great extent. Mr. Wm. Henn, of Kansas City, Mo., bought several of the older bulls for the western trade. The top on bulls was \$210, paid by Mr. Henry Kaump, of Randolph, Kan., for Lot 30, a May yearling got by Earl of Willowbrook. The heifers bred and in calf to Mr. Morgan's great herd bull, Onward 18th, were ready sellers. The top on these and the top of the sale was \$215, paid by Mr. L. A. Oberhelman, of Winkler, Kan., for Lot 29, a granddaughter of Beau Brummel, with a coking bull calf at foot got by Onward 18th. All the females found ready buyers and at reasonable prices. Col. R. E. Edmonson in his opening address spoke at some length on the pedigrees on Hereford cattle, explaining clearly to the man who might be contemplating starting in the Hereford business that he had nothing to fear as to families, as this is one breed that is not affected by any family craze. A list of all sales with the averages follows:

BULLS.

Julia's Keep On, one year, Peter Peterson, Morganville, Kan. \$ 55
Stanford, one year, J. M. Williams, Home City, Kan. 65
Gershom, one year, Wm. Henn, Kansas City, Mo. 60
Hero, one year, W. B. Hobe, Barnes, Kan. 65
Perfection, one year, L. Pfle, Palmer, Kan. 70
Roseberry, one year, Ed Rice, Blue Rapids, Kan. 45
Sir William, one year, Wm. Henn. 65
Daniel, one year. 50
Kansas Boy, one year, F. W. Toburen, Cleghorn, Kan. 50

Priest's Keep On, one year, O. H. Roberts, Wymore, Neb. 45
P'less Roseberry, one year, Wm. Henn. 45

If a grocer says "certainly," when you ask him for a MACBETH lamp-chimney, it's an indication that he is a safe man to deal with, as it shows a desire on his part to serve his trade with the best of everything.

The merchant who always tries to sell you something "just as good," when you ask for a standard article, doesn't sell MACBETH lamp-chimneys.

My Index is useful to everyone who owns a lamp—and it's free.

Address, MACBETH, Pittsburgh.

FIELD'S SEED CORN

Sold ear or shelled. All graded, tested, proven—then guaranteed. No better at any price. Test it in your sprouting box. If you don't like it—fire it back. You'll get your money back double quick. "Guaranteed-pure" Clover seed. Garden seeds that will really grow. Catalogue and samples free.

HENRY FIELD, SEEDSMAN,
BOX 25, SHENANDOAH, IA.

CUT ICE

With the Dorsch Double Row Ice Plow We guarantee it will cut more than 20 men sawing by hand. Cakes are cut uniform, of any size and thickness. One man and a horse will cut more ice in a day than the ordinary farmer and dairy man can use. You can cut for others and make the price of our plow in two days use. Ask for catalogue and introductory prices.

French Drafters Sell Well at Perry, Iowa.

Everything conspired to make the pure-bred horse sale at the farm of Messrs. J. R. Mills & Son, near the above place last week, a splendid success. The day was ideal and the crowd was unusually large and good natured. Mr. Mills is a firm believer in good horses and the fact that on twenty head of horses sold that day the average price secured was \$420, confirms that opinion quite conclusively. Those who are looking for good horses in the future will do well to keep this breeding firm in mind. The horses were all home bred, which fact won much commendation from buyers. From start to finish the sale was well managed and lively bidding made the event one of the pleasant ones of the year. Four Short-horn purebred bulls averaged \$66 and seven head of Angus bulls consigned by Mr. Andrews averaged nearly as much. Col. Grif Johnson had the sale well in hand throughout and secured the following prices:

Lot.	Price.
1. Narcisse 10976, R. E. Doidge, Perry, Iowa.	\$ 720
2. Constant 15086, Wm. Wafford, Linden, Iowa.	1,000

ANNUAL MEETING OF THE MISSOURI BOARD OF AGRICULTURE.

The forty-second annual meeting of the Missouri State Board of Agriculture was held in the office of Secretary Ellis in the agricultural college, Columbia, January 18th. The board is composed of one member from each of the sixteen congressional districts in the state; the governor, state superintendent of schools and the dean of the agricultural college, members ex-officio. The following members were present at this meeting: W. B. McRoberts, Monticello; J. L. Christian, Tarkio; N. H. Gentry, Sedalia; William C. Howell, Uman; John Deewester, Butler; M. B. Greenefelder, Clayton; Norman J. Coleman, St. Louis; W. R. Wilkinson, St. Louis; W. C. Hutchinson, Jamesport; Allen M. Thompson, Nashua; S. W. Hudson, Buckner; E. E. Swink, Farmington, and A. T. Nelson, Lebanon.

The following officers were elected for the ensuing year: S. W. Hudson, president; Norman J. Colman, vice president; George B. Ellis, secretary; W. A. Bright, treasurer.

The board is made by law an examining board for the agricultural college and after examining that institution recommended the following appropriations for improvement and extension of the work: \$15,000 for continuing the work of the soil survey inaugurated two years ago; recommended that the board of curators provide means for the college of agriculture to enter students in the live stock judging contests at the American Royal and International Live Stock shows; for establishing a poultry barn, \$10,000; experiments, \$25,000; animal husbandry department, \$15,000; other departments, \$16,000; a new model dairy barn; the enactment of a pure food law placed under the control of the experiment station; an agricultural building to cost \$200,000; a veterinary laboratory, \$50,000.

The report further states that in the opinion of the board it is inevitable that "in the heart of the greatest agricultural region of the world—the Mississippi Valley—will grow up in the near future the greatest agricultural college in the world. To it will be attracted students from every civilized country on the globe. It will furnish the citizens of its own state with the best instruction of its kind to be had. Missouri, one of the richest of these states, with a more diversified agriculture than any other and with the most central location, is peculiarly well suited to build such a college. The cost of an enterprise of this sort will necessarily be great; the time required for its building will be long. If Missouri is to have any part in this great progressive movement and to have an institution that is even credible, much less distinguished, she must deal more liberally with it than in the past. Our neighboring states of Iowa, Illinois and Kansas have frequently at a single session of their legislature appropriated to their colleges of agriculture more money than Missouri has given hers since it was established in 1870."

For the work of the State Board of Agriculture the following recommendations were made:

For farmers' institute work, \$12,000; state veterinary work, \$20,000; printing bulletins, \$2,500; for printing annual reports, \$10,000. The board recommended that the salary of the secretary should be increased to \$2,500 per year and appointed a legislative committee to bring the matter to the attention of the next legislature.

In the matter of good roads the board recommended the creation of the office of state highway engineer to be under the control of the board of agriculture; the adoption of state aid by the next legislature and also declared that because of the fact that necessary changes in the constitution will be required to give the necessary revenue for road improvement, the wisest thing to do is for the next legislature to call a new constitutional convention.

Watering Hogs in Winter.

To the Editor of The Homestead:

In a late issue of your paper you request articles from your subscribers giving their experience in furnishing hogs with warm drinking water in cold weather.

This is a very important thing, but one that is probably more neglected than almost anything else on the farm. For penned hogs or sows and winter pigs I

had a steam boiler with which I ran a small engine in the hog house, and close beside it I had a ten-barrel tank made of two-inch cypress wood with a close fitting lid on it. I would fill this tank about three-fourths full of water, insert the steam pipe, bring the water to a boil and then put in about six or eight bushels of ground feed and steam it to a mush. This mush will remain warm for two days or more in the coldest weather in this latitude.

For feed I give the hogs the mush in mush form, but for drink I put just enough of the warm mush in the water to warm it. The water I draw from a hundred-barrel elevated tank on the outside of the hog house, and do this several times a day.

For watering hogs that are following cattle a good plan is to use some of the various forms of tank heaters in the cattle watering trough and attach several automatic hog waterers to the sides of the cattle trough. Don't make the mistake of trying to water one or two hundred hogs with a single automatic hog waterer. This latter plan will work well in this latitude, only in soft weather the mud from the hogs' noses will clog the valves of the automatic waterers and at such times the valves must be cleaned out often. I have had no experience in colder climates.

Z. T. Postlethwaite.

Neosho county, Kan.

You ask your subscribers to give their manner of watering hogs in winter and warming the water. We feed about sixty head of cattle and 100 hogs each winter and water them all out of a 2x6-foot round tank. The water is kept warm with a tank heater. The hogs drink out of the top of the tank the same as the cattle, going up an approach of about six feet long and four feet broad. Slats are nailed on this to keep the hogs from slipping. If we turn a bunch of strange hogs into the lot the old ones soon teach the strange ones to go up the approach to drink. If there are no hogs in the lot to teach the strange ones we simply throw some coal ashes and other things on the approach and the hogs are soon drinking.

One day I brought home a wagon load of shoats. There being no others in the lot, I threw some coal ashes on the approach to the water tank and sat down to watch the result, and in less than twenty minutes every one of these pigs had been up the approach and had a drink. We have used this manner of watering hogs for the past two years and think there is nothing equal to it. I have noticed that hogs drink quite often each day in winter when they can get warm water.

F. F. Everett.

Mahaska county, Iowa.

Combination Sale at Coffeyville Kan.

The third annual sale held by the Southeast Kansas Improved Breeders' Association of Kansas, at Coffeyville, December 13th, 14th and 15th, under the able management of Mr. H. E. Bachelder, of Fredonia, Kan., secretary and sale manager, was a success. The offering of Short-horns, Herefords, Poland Chinas, Duroc Jerseys and Berkshires was a good one. Buyers were very much in evidence from different states and the bidding was lively. Cowitz 109685, Hereford cow by Sir Kenelm 68781, out of Dora 61075, brought the top price, going to Mr. C. E. Hildreth, of Altamont, Kan., the noted breeder of Hildreth Yellow Dent Corn, for \$80. In the Short-horn class, Orange Duchess by Orange Knight 166361 and Grace by Canna Hill by Orange Blossom Duke 128189, both owned by Mr. H. M. Hill, of Lafontaine, Kan., brought the top price, going respectively to Mr. D. O. Cripps, of Elk City, and Messrs. Knotts Bros., of Wayside Kan., for \$100 each. The attendance at the hog sale was an enthusiastic one and it seemed that everyone wanted to do the bidding, they knowing that the offering was a good one from start to finish. The writer viewed the offering of hogs and great credit must be given the consignors in preparing such a good bunch. Meddler's Maid, a gilt owned by Messrs. Stryker Bros., of Fredonia, Kan., by the noted champion of the world, Meddler, out of Corrector's Beauty 278964, she by old Corrector, the \$5,000 champion, brought the neat price of \$100, going to Mr. J. E. Thompson, of Fredonia, Kan. Fourteen Duroc Jerseys made an average of \$22.50. In the Berkshire class Mr. H. E. Bachelder, of Fredonia, Kan., topped the sale with three gilts by Queen's King 79013 out of Olivia 90091 they going to Mr. R. C. Flanagan, of Ochelata, Ind. Ter., for \$100.50. The sale was conducted in a very satisfactory manner, Colonels Bellows, Snyder, Burger and Sheets officiating. Below will be found a list of the most important sales:

Great Combination Hereford Sale at South Omaha, January 9th.

On January 9th, at South Omaha, Neb., will be offered one of the best lots of Hereford cattle to be sold anywhere in the West this year. It will be a chance of a lifetime for those interested in this breed of cattle to secure the very best that seven great herds can produce. There will be fifty head in all, consigned by such well-known breeders as Messrs. W. N. Rogers, of McCook, Neb.; W. W. Wheeler, of Harlan, Iowa; E. J. Elliott, of Sutherland, Iowa; E. N. & A. L. Allen, of Cambridge, Neb.; Z. T. Kinsell, of Mt. Ayr, Iowa; Emil Hoffmeyer, of Stanton, Neb., and Woods Bancroft & Heing, of Madison, Neb. Taking into consideration the men that are offering this grand lot we feel confident in encouraging anyone who is in the market for choice animals to attend this sale. Mr. W. W. Wheeler will consign five head, including the grand yearling bull, Gay Wilton 5th by Gay Wilton, the 2,500-pound son of old Anxiety Monarch, and having for his dam Imp. Lady Horace 2d, a 1,900-pound cow in her everyday clothes. This bull is the only one Mr. Wheeler ever raised that weighed over 100 pounds per month. He is a show animal in every respect and should go to some good herd. Mr. Wheeler also consigns the three-year-old bull, Prosper, by Perfection Yet by old Perfection, which he considers a great prospect for a herd header. The female offering is a good one, including the great cow, Edna, due to calve in May, also the two-year-old heifer, Bessie, a granddaughter of Lamplighter, that will calve in February. Fashion 7th is a fine two-year-old granddaughter of Improver that is a great attraction in this sale. Mr. E. J. Elliott, of Sutherland, Iowa, offers five females and three bulls which he considers a choice lot. He offers the good two-year-old bull, Allright II. E. 228070, a low-down, blocky fellow with deep, rich color, broad back and good side lines, and a bull that is bred nearly the same as the International champion bull this year. Mr. Elliott also offers a richly-bred cow by Anxiety Wilton by Anxiety 3d. Three of the cows are daughters of the great bull, Allright. Messrs. E. N. & A. L. Allen, of Cambridge, Neb., offer ten head, five yearling bulls sired by Grove Brummel, a son of Beau Brummel. These bulls are good, strong, blocky fellows and should go to good herds. They also offer

five good cows, daughters of such great bulls as Hardy, Anderson and others. Messrs. Woods, Bancroft & Heing, of Madison, Neb., consign five good cows, including the good cow, Lobelia, out of a son of Ancient Britton. Her dam was by a son of Lord Wilton. She is richly bred and has a fine cow calf at foot. They also offer the three-year-old cow, Percy, by Anselmo, a grandson of Beau Brummel, her dam by Ruppert by Gentry Britton. They also offer two daughters of Mignon, a son of Beau Brummel, and out of Gentry Britton cows. These cows are all safe in calf to Gay Donald 186476 by Beau Donald 7th by Beau Donald. The consignment of Mr. Z. T. Kinsell, of Mt. Ayr, Iowa, consists of eight good bulls and two females. The females are daughters of Advancer by March On and are safe in calf to the great sweepstakes bull, McKinley. Six of these grand bulls are sons of Advancer and one by Anxiety Elmo 3d by St. Elmo of Shadeland by Garfield, the champion bull of England, and having for his dam Henrietta by Lord Wilton. Mr. Emil Hoffmeyer, of Stanton, Neb., will offer four head of good young bulls that he considers are right in every respect, having both breeding and individuality, which will be shown sale day. In the Rogers consignment will be included some of their very best show and breeding stock. They will offer for an attraction the great cow, Queen 4th, the first-prize cow as a two-year-old at Lincoln in the Nebraska state special. She is a daughter of Anxiety Monarch and safe in calf to Beau Donald 25th, the bull that was good enough to win a championship three years in succession at Lincoln, Hutchinson and Pueblo fairs. Don't forget this cow, as she is a grand individual and the way she is bred should produce something extra good. They also offer the two-year-old heifer, Monarch's Maid 14th, a daughter of old Monarch of Shadeland 3d, the largest bull in America, weighing 3,000 pounds in show condition. A half sister to this heifer sold for \$525 and we have cause to believe she is as good as the one sold. She is safe in calf to Beau Donald 28th. Monarch's Maid, a fine two-year-old heifer by Monarch of Shadeland 3d, will be included in the sale and we can recommend her to anyone looking for a good one, and she will be safe in calf to Beau Donald 28th. To those looking for something of show-yard type we wish to say that the two-year-old heifer, Shadeland's Maid, is a hummer. She is a 1,300-pound two-year-old and one of those mellow, low-down, blocky kind that would attract the eye of any breeder. She is a daughter of Jury, dam Maggie Wilton by Anxiety Wilton, and is safe in calf to Beau Donald 28th. The bull offering is extra good. In saying this we feel confident you will agree with us on sale day. They will offer the great yearling calf, Beau of Shadeland 25th, by Beau Donald 28th, which bids fair to make as grand a bull as his sire. His dam was June of Shadeland 2d by Earl of Shadeland 12th by Garfield, champion bull of England. He is a full brother to the heifer, Shadeland's Maid 25th, which as a calf won five blue ribbons in five good shows and was a member of their undefeated show herd. This youngster is a show calf and we feel that it would be hard to write a better pedigree than will go with him. They will also offer a two-year-old son of Jury, dam Grove Maid 2d by Anxiety Monarch. This bull is an extra good, strong fellow of much substance and quality and would be quite a factor in some good herd. Taking the consignment as a whole we feel confident that as choice a bunch of cattle will not go through the sale ring this year, as every consignor is putting in nothing but the very best. Catalogs are now ready and can be had by addressing Mr. W. N. Rogers, of McCook, Neb., who will manage the sale.

WINTER VISITORS. WEEK END RATES.

Commencing November 3d, and each Saturday and Sunday thereafter until December 16th and from January 5th to March 31st THE CHICAGO, GREAT WESTERN RAILWAY will sell tickets to points in Iowa at one fare for the round trip good to return until Monday following. Rates apply to points as far north as Bristow, New Hampton and Oneida and south as far as Blockton. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Ia.

ONE WAY SETTLERS' RATES.

To points in Nebraska, eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

SPECIAL RATES.

On Saturdays and Sundays from December 16th and January 5th to March 31st the Chicago Great Western Railway will sell winter visitors week end tickets to points 150 miles distant up to and including all stations within fifty miles of St. Paul and Chicago at rate of one fare plus \$2 for the round trip. Tickets limited to seven days, with privilege of extension on payment of one-third of regular one-way rate. Short-limit tickets to nearly all stations on sale at all stations Saturdays and Sundays at one fare for the round trip. Tell your friends about it and have them come and visit you. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

LOW RATES TO THE SOUTHEAST

Commencing December 15th and on the first and third Tuesdays of each month thereafter until March, 1907, the Chicago Great Western Railway will sell one-way colonist tickets at nearly half fare to points in Alabama, Louisiana and Mississippi. For further information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HOLIDAY EXCURSION RATES.

On December 20th, 21st, 22d, 23d, 24th, 25th, 30th, 31st and January 1st, the Iowa Central will sell round trip excursion tickets at rate of one and one-third fare, limited for return to and including January 7, 1907. For particulars and folders call on agents.

LANDS AND HOMES FOR SALE

THE BEST DEAL YET

offered to the actual HOMESSEEKER is that given by The Duluth and Iron Range Railroad Company in placing on the market its agricultural lands in MEADOWLANDS SETTLEMENT, St. Louis county, Minn. The terms to actual settlers beat any monthly payment plan offered. We want settlers, not speculators. Write for map and full information to Land Commissioner D. & I. R. R. Co., 525 Wolvin Bldg., Duluth, Minn.

TEXAS LAND.

ARE YOU INTERESTED?

WE have for sale lands in the Texas Panhandle, on the line of R. R. all the way from Oklahoma to New Mexico, from 1/4 section to 10,000 acres, at prices ranging from \$5 to \$20 per acre. Why go from 10 to 40 miles from R. R. to buy lands when you can buy it at the same price along the railroad—and frequently near large towns? Stop and give this question your attention, and write to us or call and see us. Correspondence solicited. Join our next excursion for Texas.

The CANADIAN West is The Best WEST

THE testimony of tens of thousands during the past year is that the Canadian West is the best West. Year by year the agricultural returns have increased in volume and value and still the Canadian Government offers 160 acres free to every bona fide settler.

GREAT ADVANTAGES

The phenomenal increase in railway rates;—main lines and branches—has put almost every portion of the country within easy reach of churches, schools, markets, cheap fuel and every modern convenience. The ninety million bushel wheat crop of this year means a \$10,000,000 to the farmers of Western Canada, apart from the results of other grains as well as from cattle.

FIELD NOTES.

Good Percheron mares are offered for sale by Mr. Jesse S. Golder, of Scribner, Neb.

Mr. W. N. Booth, of Danbury, Iowa, offers a few well-bred Poland China boars for sale.

Chester Whites at farmers' prices are offered for sale by Mr. S. J. Philson, of Harlan, Iowa.

A few good Poland China boars are offered for sale by Messrs. Sandquist Bros., of Oakland, Neb.

One hundred choice Large Yorkshire gilts are offered for sale by Mr. F. Rabeller, of Leigh, Neb.

Messrs. Chandler Bros., of Kellerton, Iowa, have a few very choice Shropshire rams and ewes for sale.

Some good Chester White boars and sows are offered for sale by Mr. W. R. Webb, of Spencer, Iowa.

Mr. Gus A. Pederson, of Okecheydan, Iowa, is offering a splendid lot of Duroc Jersey boars for sale.

Fifteen good Poland China boars are offered for sale by Mr. E. O. Wolcott, of Gilmore City, Iowa.

Choice Hereford bulls of the richest breeding are offered for sale by Mr. Z. T. Kinsell, of Mt. Airy, Iowa.

Seven splendid young Aberdeen Angus bulls are offered for sale by Mr. Frank B. Paup, of Kirkman, Iowa.

Mr. M. L. Ayres, of Shenandoah, Iowa, has about twenty extra good Percheron stallions and mares for sale.

Some good Chester White gilts, bred or open, are offered for sale by Mr. J. M. Janssen, of Sibley, Iowa.

Six very choice Duroc Jersey boars at \$25 each are offered for sale by Mr. Z. T. Kinsell, of Mt. Airy, Iowa.

Fifteen Chester White boars and some sows and gilts are offered for sale by Mr. J. M. Janssen, of Sibley, Iowa.

Some very choice Percheron stallions and mares are offered for sale by Messrs. L. H. Humbert & Son, of Corning, Iowa.

A Duroc Jersey bred sow sale is announced to take place at Red Oak, Iowa, on February 8th by Mr. T. H. Isaac, of that place.

On February 21st Mr. J. Lefebure, of Fairfax, Iowa, will hold a public sale of Short-horn cattle and Chester White bred sows.

Messrs. Allen Bros., breeders of Chester White swine, of Russell, Iowa, announce a brood sow sale to take place on January 18th.

If you want a good Poland China boar at a reasonable price and from a reliable breeder, then write Mr. John Schmieder, of Remsen, Iowa.

Those of our readers who are wanting choice home-bred Percheron stallions should write to or go and see the Messrs. Rhea Bros., of Arlington, Neb.

One hundred choice Poland China boars are offered for sale by Dr. H. Pritchard, of Wisner, Neb. He is making special prices on these for the next thirty days.

Mr. W. J. Wendt, of Marcus, Iowa, offers some splendid Duroc Jersey boars for sale at special prices. If you have not bought a boar yet you can get a bargain of Mr. Wendt.

Mr. Grant Summers, of Malvern, Iowa, is offering about ten good Duroc Jersey boars for sale, among which are a couple of sons of the sweepstakes boar, Crimson Wonder Again.

Mr. D. H. Lewis, breeder of O. I. C. swine, of Geneseo, Ill., has a new advertisement on page 24 of this issue in which he announces a bred sow sale on February 2d, at which time he will sell fifty head.

Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, have forty choice Hereford bulls and forty bred heifers ranging in age from twelve months to two years, sired by prize winners, which they are offering for sale in their advertisement on page 25 of this issue of The Homestead.

Record number 238414: Horse heaving both ringbone and bone spavin purchased for \$10; purchaser treated him with Fleming's Spavin and Ringbone Paste, and declined \$150 for him later. Fleming's Vest-Pocket Veterinary Adviser free if you write to Messrs. Fleming Bros., 210 Union Stock Yards, Chicago.

Mr. A. C. Lenham, breeder of Poland China swine, of Battle Creek, Iowa, is offering fall and spring gilts bred to farrow in March and April to L. S. Sunshine and Onward, for sale in his advertisement which appears on page 28 of this issue. These gilts are sired by noted boars and are out of popular-bred dams. They are the kind that will make their purchasers money and will be sold very reasonable.

Mr. Grant Summers, of Malvern, Iowa, is offering ten good Duroc Jersey boars for sale. These are sired by Crimson Wonder Again, the Iowa State Fair sweepstakes boar, and by Lottic's Top Notcher, a son of the World's Fair boar, Top Notcher Again. He also has some sired by Top Notcher Again out of a Leather Stockings II. sow. Write him at once if you want a Duroc Jersey boar. He is pricing these within reach of anyone who wants a boar.

Mr. Gerald Wilcox, of McCook, Neb., wishes to announce through the columns of The Homestead that he has a choice lot of Duroc Jersey and Poland China bred sows to sell. They are the choice of this year's crop of 100 pigs and are a richly-bred lot. Most of his Duroc sows are sired by Jumbo Jim, an extra good son of Jumbo Red, the 1,030-pound hog. Others are sired by Eclipse 31683 by Iowa Prince, dam Lady Banker by Glendale. These young sows have been raised on alfalfa pasture and are in prime breeding condition. Most of the Poland China gilts are sired by Col. McCook 40457, a son of Expansion, that would be a credit to any man's herd. He is an extra large, broad-backed hog, with a bone that is hard to beat. The gilts from this hog will be bred to Chief Look, a son of King Look, this making him a half brother to Grand Look, the first-prize hog under eighteen months at Nebraska State Fair this fall. Mr. Wilcox has about 100 good sows for sale that can be bought in pairs or as many as you wish to buy. Write him in

regard to what he has and mention The Homestead.

If you want a blocky, thick-meated, red Scotch or Scotch-topped Short-horn bull of serviceable age, take advantage of the holiday rates and visit the Wildwood herd, owned by Mr. W. W. Vaughn, of Marion, Iowa.

Those who are interested in the milking Short-horn should, if looking for a herd bull, write to Mr. H. J. Hughes, of Trenton, Mo. Mr. Hughes is offering a number of rattling good youngsters, among which is the yearling son of the World's Fair champion cow, Rowena 2d.

On January 21st, at Red Oak, Iowa, will be held a combination Short-horn sale, with Mr. Jno. M. Bixler, of Corning, Iowa, as manager. Mr. Bixler writes us to say that there will be some very choice cattle in this sale, among which will be some straight Scotch. Watch for further particulars in later issues of The Homestead.

Eighteen large, growthy Chester White sows are offered for sale by Mr. F. A. Trumbauer, of Patterson, Iowa, in his advertisement which will be found on page 28 of this issue of The Homestead. These sows are of March and April farrow and will weigh from 200 to 250 pounds. They are all bred and safe in pig and will be sold at reasonable prices.

Mr. S. I. Welch, of Cherokee, Iowa, breeder of Duroc Jersey swine, writes: "I have a fine lot of gilts that are bred to a grandson of Crimson Wonder which I have just sold to Mr. A. K. DeJong, of Parker, S. D., for \$100. He is a long, massive pig, very smooth, heavy ham and bone, of fine color, of April 13th farrow and weighs in breeding condition close to 300 pounds."

Mr. S. P. Freed, breeder of Duroc Jersey swine, of Ames, Iowa, writes: "The Homestead readers have been good to me this fall taking my boars at satisfactory prices. I have a fine lot of gilts and fall yearlings being bred to Manley Orion 30925; Pride Advance, a son of Proud Advance, and Keep On, by Keep On 2d, which I intend putting in my sale February 11th. I think there are some as good gilts and sows in this offering as will go through the sale ring this winter." Mr. Freed's advertisement appears on page 30 of this issue.

Mr. S. S. Krebill, of Donnellson, Iowa, writing under recent date, says: "I am all sold out of boars. I have had to return several orders, the last boar I shipped being December 19th. My gilts are doing fine; they are of good color, lengthy, smooth coat of hair, well up on their toes, heavy bone and are of March and April farrow. They will weigh 200 pounds and over. They are all sired by a son of Tip Top Notcher 20729 and will mostly be bred for April farrow to a mature boar that I have just bought. The gilts are all out of large, matured sows."

Mr. E. J. Trumbauer, of Patterson, Iowa, breeder of Improved Chester Whites, writes: "My boars are all sold and about half of my gilts and sows. I still have some of the best of the herd left to sell. My gilts this year are exceptionally large and growthy and in the best of health and condition. I also have a few yearling and two-year-old sows to sell. Having sold my farm, all my hogs must be sold, and in order to do so soon I will name very low prices. Anyone wanting good hogs should avail themselves of this closing out sale and get the best to be had." See Mr. Trumbauer's advertisement on page 23 of this issue.

Mr. J. A. Shade, of the firm of Edmonds, Shade & Co., of Kingsley, Iowa, writes: "In our Duroc Jersey sale on February 7th we intend to offer the best bunch of brood sows that has ever been sold in northwestern Iowa. There will not be a poor sow in the entire offering and they will all be bred to prize-winning boars or sons of noted prize winners." We can testify to the above and want to add that there are few herds in the West today that can show as many first-class brood sows as will be found in this herd. Breeders will do well to mark this sale as one of the good ones of the year, and one that it will certainly pay them to attend.

Choice Scotch Collie pups, sable and white in color, three months old, from natural drivers, are offered for sale by Mr. D. W. Nickerson, of Marble Rock, Iowa, in his advertisement on page 14 of this issue of The Homestead. These puppies' sires and dams are registered, and they will be sold at a very reasonable price when their breeding is considered. Mr. Nickerson also has some Embden geese and White Holland turkeys, and Rose Comb Brown Leghorn cockerels for sale, the prices at which they can be purchased being named in the advertisement referred to.

Messrs. Bridgeford & Nesbitt, of Aledo, Ill., well-known breeders of Poland China swine, have a new advertisement on page 23 of this issue, offering fifteen head of growthy March and April boars for sale at reasonable prices. This firm have used some of the best boars the breed has known and many of our readers have been customers several years. Since the first of November Messrs. Bridgeford & Nesbitt have shipped over twenty-five head of spring boars and their customers are all well satisfied. They are not offering any more sows at private sale, as they have claimed February 7, 1907, as the date of their annual brood sow sale. If in need of a good Poland China boar, write to Messrs. Bridgeford & Nesbitt, kindly mentioning The Homestead.

A brood sow sale of Duroc Jersey swine is announced to take place on January 15th by Mr. A. L. Bergsten, of Mt. Union, Iowa, in his advertisement that will be found on page 24 of this issue of The Homestead. His offering will consist of about twenty-five extra good bred sows and gilts of unexcelled breeding. Mr. Bergsten, in sending in copy for his advertisement, writes: "My sows and gilts are all bred for my brood sow sale. Every one is in the pink of condition and are large and growthy. A number of the gilts are sired by Top Most 37433, he by Tip Top Notcher 20729. There is one litter by Indiana Boy, more than a half brother to Hanley, out of a Tip Notcher Again dam, that are extra good ones. I will offer four extra good spring yearlings and one good fall yearling. Some of the offering will be bred to Champion Paul 36043, the greatest son of Oom Paul, dam

Lady Finch by Gold Finch. Some are bred to Pink Top Notcher, a son of Tip Top Notcher, and a few to Handy Lad, he by Hanley, dam Gertrude A."

Mr. W. W. Vaughn, of Marion, Iowa, still has a few lengthy, strong-boned Chester Whites of April farrow and two yearling herd boars for sale, and is looking for orders for gilts to be shipped when safe in pig. Write him for prices. His advertisement appears on page 27.

On another page will be found the new announcement of Mr. Jos Steward, of Ames, Iowa. Mr. Steward has enjoyed a splendid boar trade through his advertisement in The Homestead, and now changes to brood sows bred. The advertisement tells the story on page 28. Mr. Steward can be relied on to deal squarely.

An eighty-acre improved farm is offered at a bargain by Mr. Chas. McGraw, of Anoka, Minn., in his advertisement that appears on page 21 of this issue. This farm is all under cultivation and is located two and one-half miles from Anoka, thirteen miles from Minneapolis, and will be sold on easy terms at the price mentioned in the advertisement.

Mr. Geo. S. Prine, of Oskaloosa, Iowa, writes: "I still have a few of those good, strong Berkshire boars that will please any pork producer as a cross on any herd. I am selling at prices that will move them. I am close to town and shipments are made promptly and correspondence is personally seen to." Mr. Prine's advertisement appears on page 25 of this issue.

Mr. Peter Hopley, of the firm of Messrs. Peter Hopley & Son, of Lewis, Iowa, sailed for Europe on December 15th and expects to return on February 1st with thirty head of Percherons, Belgians, Shires and Suffolks, and Mr. Hopley always buys the good ones. They now have a grand lot of two and three-year-old Percheron and Shire stallions on hand, and some extra good black and gray two-year-old Percherons, coming three, that are weighing from 1,900 to 1,950 and are certainly clinkers. They also have a grand lot of Shire stallions and some extra good two-year-old Suffolk fillies. They will be pleased to have any of our readers write them or come and see their horses.

Mr. A. L. Mossman, Duroc Jersey breeder of Radcliffe, Iowa, in remitting for advertising already done, writes: "I have sold about forty males in the last thirty days, shipping as many as six a day at different times. I am all cleaned up until I raise some more. I wish to thank my customers through the columns of your paper for their kind treatment. I have many letters of praise for the good male pigs I have shipped and not a complaint; not one. I have the best prospect for a great brood sow offering I ever had. The gilts weigh over 300 pounds now and are being bred to the best son of Ohio Chief, M. Iowa, and a good son of old Corcorator, the Niedlinger show and breeding hog, and A. L.'s Chief 4327, J. Wonder 42861 and another good boar of Top Notcher blood lines. Nothing but tops will go in my sale of January 29th. Col. F. F. Luther will be the auctioneer."

Messrs. P. S. & S. Barr, of Davenport, Iowa, write: "Our boar trade for choice Poland Chinas is good and we have several good vigorous fellows yet to please someone in need of such. They have good bone, are well formed, with good backs and quarters and were fed and raised for best results as breeders—plenty of clover and blue grass pasture, shorts, swill with some corn. We recently shipped boars to Messrs. J. Tasker, Wyoming, Iowa; D. Tolle, Eliza, Ill.; R. Galager, Reynolds, Ill.; E. Hiebs, Cedar Falls, Iowa; E. Rowell, Rutledge, Mo.; L. A. Wheelock, Tampico, Ill.; H. Nelson, Cordova, Ill.; B. Stevens, Orion, Ill., etc. We are also breeding a choice bunch of growthy gilts for trade this season. We can please in stock and price. We are located two miles northeast of the city, Jersey Ridge road." See Messrs. Barr's advertisement on page 23 of this issue.

Mr. T. A. Stevenson, of Shannon City, Iowa, has a few choice Chester Whites of both sexes for sale at reasonable prices. If in need of a good young boar, write him for prices. He has a few choice gilts for sale either bred or open. He writes that he has not had a dissatisfied customer this fall. If wanting Mammoth Bronze turkeys or Barred Plymouth Rock cockerels, write him for prices. Mr. Stevenson breeds the very best Mammoth Bronze turkeys and Barred Plymouth Rocks that money will buy. By the way, he is an expert poultry judge and has judged poultry for a number of years. He has a fine lot of Angus bulls, calves and yearlings, for sale cheap if taken this fall—will sell a few good heifer calves. Let him fit you out with a young herd. Do you need a choice Shire stallion? Write him for prices and mention The Homestead. His advertisement appears on page 23.

Mr. J. G. Truman, manager of Trumans' Pioneer Stud Farm, of Bushnell, Ill., writes: "I am very pleased to say that our second importation of stallions this fall arrived here in good condition last night. This importation consists of Shire and Hackney stallions, but I am advised by Mr. J. H. Truman that he has another consignment of Shires and Percherons ready to leave England as soon as we cable him to ship them. Just at this time our stables are absolutely filled. Every stall we have has a first-class imported stallion in it. To any of your readers who are anticipating purchasing a stallion this season in order to move a few of these at as early a date as possible, we will make very close prices. We have recently issued our twenty-ninth annual catalog which contains drawings from life of upwards of sixty stallions, all of which are for sale at very reasonable prices. With our superior advantages, having a resident buyer in England, we are in a position to sell Shire and Hackney stallions at considerably less money than our competitors. The proof of the pudding is in the eating of it and if any prospective buyer of either draft or coach stallions will call and inspect our horses and get our prices I feel certain that we can trade with him. Our trade this month has been better than any in the history of our twenty-nine years in the importing business and from the inquiries that are coming in I see no reason why it should not continue this way. With grade Shire fillies selling as they do in this country at from \$250 to \$300 each, I see nothing that a farmer can do that will pay him better than to raise a few grade Shires. The

American people are beginning to appreciate what the Shire horse does for them when crossed on our American-bred grade mares. Our importations will arrive from now on in January, February, March and April to supply our spring trade." See advertisement on page 27.

We wish to call the attention of our readers to the new advertisement of Mr. J. Latimer Wilson that appears on page 25 of this issue of The Homestead. Mr. Wilson has eighty of the best imported stallions and some home-bred draft stallions on which he is quoting prices in this advertisement.

The date of June 4th is named as that on which Mr. Milton E. Jones, of Williamsville, Ill., will hold a Short-horn sale. Mr. Jones, in furnishing date says: "Colonels Woods, Carey Jones and Geo. Bellows will be the auctioneers, and no better Short-horns will be sold in 1907 than those going in my sale. Many will be by Choice Goods, Lord Banff and other famous bulls."

Mr. A. R. Campbell, of Independence, Iowa, has twenty yearling Hereford bulls and one young Percheron stallion which he is offering for sale in his advertisement on page 25 of this issue of The Homestead. Mr. Campbell announces that he will make low prices on this stock and that the quality of the same is unsurpassed and that all of it is of the richest breeding. Send to him for catalog and particulars.

Messrs. C. C. Drake & Son, of LaHarpe, Ill., are offering bargains in Poland China boars and gilts in their advertisement that appears on page 24 of this issue. The offering consists of several boars of good breeding that are in good growing condition. They also have a few gilts left that are good ones. The dams of these pigs are from Chief Perfection 2d, U. S. Chief 2d, Nemo L. and other good strains and are sired by E. L.'s Black Chief by Perfection E. L. They will be priced to sell quick. Write them for further particulars and prices.

CHOICE YORKSHIRE BOARS AND SOWS.

On page 25 will be found the advertisement of Mr. F. Rabeller, of Leigh, Neb., who owns one of the best herds of Large Yorkshires in America. He has an excellent lot of boars for sale, also choice sows and gilts bred for spring farrow. If you want the very best Yorkshires write Mr. Rabeller at once.

RABELLER'S LARGE YORKSHIRES.

Mr. F. Rabeller, of Leigh, Neb., the Large Yorkshire man, writes as follows: "Kindly say to Homestead readers that I am now offering the best lot of boars and sows I have ever had in my herd. I am hooking orders every day for bred sows and gilts, and I have some extra good ones for sale. I will be pleased to hear from anyone who wants the kind of hog that wins at the International."

TWO PIANOS! BIG CASH PRIZES!

Successful Farming, of Des Moines, Iowa, have a proposition on page 8 of this issue that will be of interest to any of our readers who wish to exercise their ingenuity in counting the dots on a piano which appears in their advertisement. They propose to give to those who can count the dots correctly, or nearest correctly, the following list of prizes: Two elegant pianos, one to a lady and one to a gentleman; one \$200 cash, one \$100 cash, one \$50 cash, one \$25 cash, five \$10 cash, ten \$5 cash and twenty-five \$2. The conditions on which these prizes will be awarded are named in the advertisement to which we have referred.

BEST OF GOODS.

When the Runaway Girl sold in the dispersion sale of the Tebo Lawn Short-horns, a promising young Choice Goods bull calf went with her. Sale reports show The Runaway Girl and bull calf as selling to Messrs. Bellows Bros., of Maryville, Mo., at \$1,300. She was later sold by them at a substantial advance, they reserving an option on the bull calf at \$1,000. Much to the disappointment of the owner of The Runaway Girl and the Choice Goods calf, Messrs. Bellows Bros. when the time came refused to release the option and Best of Goods, as the calf had been named, returned to the Bellows Bros. herd, where he will stay as a future herd bull. Best of Goods is a beautiful roan, true in all his lines and undoubtedly one of the best Choice Goods bulls in America.

IMP. FASHION FAVORITE FOR SALE.

Anyone wanting a good imported bull should write or go and see Mr. J. D. McDermott, of Wlota, Iowa. He offers Imp. Fashion Favorite for sale. He is a massive roan bull, bred by Mr. James Wilson, of Huntly, Scotland. He is a good breeder and the man who buys him should first see him and his crop of calves at the McDermott farm. We also offer two extra good sons of this bull for sale. One of these is out of Imp. Augusta Bruce, one of the very best cows in the herd, and the other is out of Imp. Jilted Maid by the noted Golden Fame. He also offers a son of Imp. Craibstone for sale out of Miss Bess by Bapton Spice. Any of our Short-horn breeders who are wanting a herd bull should write Mr. McDermott at once or go and see these good bulls that he is offering for sale.

BAXTER'S CLOSING OUT SALE.

It is with regret that we announce the dispersion of the Pawnee herd of Durocs, owned by Mr. Ed A. Baxter, of Pawnee, Ill., which takes place on February 6th. Mr. Baxter has been one of the best breeders of Durocs to be found anywhere. His efforts to promote the breed everywhere have been of great benefit and in announcing this sale he wants it understood that he is not making a cull sale, but every Duroc he owns will be sold on February 6th. He has carefully considered this matter and would not disperse his herd were it not for the fact that his time is taken up with other matters and he cannot give his herd the time necessary to make it what he has so successfully done, one of the best of the breed. The herd boar, Buddy K. IV., sells at auction, absolutely without by-bid or reserve of any kind. Those who are personally acquainted with Mr. Baxter need no further assurance that this will be the case. Buddy K. IV. is one of the best breeding boars to be found anywhere. He was first in class and champion at the Illinois State Fair, 1905, and second-prize boar, 1906, in one of the strongest classes ever shown at the Illinois State Fair. His get are large and smooth, with extra good feet and heavy bone. The gilts have been prolific and been secured by the best breeders for permanent use in

their herds. The advertisement on page 28 of this issue will interest breeders of Duroc Jerseys. Further particulars will appear in future issues. If you are not on Mr. Baxter's mailing list write at once for catalog, kindly mentioning this paper.

FORSYTHE'S SHORT-HORNS.

Mr. W. A. Forsythe, of Greenwood, Mo., is offering a string of young Short-horn bulls, among which are herd headers. Several are pure Scotch and of such individual excellence that they will please the more critical buyers. The man looking for a Scotch-topped fellow from the best American-bred families will also find that Mr. Forsythe has bulls that will fill the bill. Females bred to Bapton Valentine are offered by Mr. Forsythe. Here is an opportunity for the man who wants a foundation herd. The cattle are bred right, are individually right and in such condition as to show their worth. Mr. Forsythe wants to show these cattle and prospective buyers can do no better than to go and see them. See page 29 for Mr. Forsythe's advertisement.

ELM LAWN DUROCS.

The Elm Lawn herd of Durocs, owned by Mr. Chas. Sobotka, of Calmesville, Mo., has had a great trade on boars and are sold out. Mr. Sobotka now offers bred sows and gilts. Among the sows offered is Elm Lawn Rose, a fancy yearling show sow and a producer. Mr. Sobotka says he offers her cheap, considering the way she breeds. The gilts offered by Mr. Sobotka are the get of Elm Lawn Orion and Elm Lawn Top Notcher. They are bred to these boars where the blood lines will permit. Those that cannot be bred to them are bred to Smasher II., a mature boar of great length, well hammed and put upon good sound feet and legs. Mr. Sobotka says he must part with some of his tried sows in order to put in some fresh blood to supply his old customers, otherwise he would not sell any matured sows. See page 24 for Mr. Sobotka's new advertisement.

DUROC BRED SOW SALE.

January 12, 1907, is the date set for the annual sale of Messrs. Hood & Baker, at Dunlap, Iowa. Forty bred sows will here be brought out under the auctioneer's hammer. They range in age from tried sows and yearlings to gilts. Here is your chance to get in on the ground floor of the popular strains of red hog blood. Splendid individuals carrying the blood of Orion, Advance, Reed's Banker and many other good families as well. Many of the sows will be bred to Kruger Jr., a splendid son of old Kruger, he by Can't Be Beat. Sale will be held in a comfortable pavilion and in town, so it will be found a very handy place to reach. Those who want some good sows to add to their herd should not fail to take in this sale. Catalogs will be sent upon request. When writing for sale kindly mention The Homestead. Remember the date and plan accordingly to be there.

MCNEIL BROS.' BROOD SOW SALE.

We wish to call the attention of our readers to the initial announcement of the forthcoming brood sow sale of Messrs. McNeil Bros., of Bowen, Ill., on January 17th. This firm have been among the best pushers the Duroc business has had. They have bought the best when individuality and breeding were of the high order which they have maintained in their herd. In buying Hanley they secured one of the best breeding boars sold at public auction in recent years. This year they secured Helen's Tip Top Notcher at the long price of \$1,000 and are breeding a number of their sows to this boar. He is sired by Tip Top Notcher and is out of Helen Blazes, the dam of the noted sow, Helen Blazes III., which sold in Messrs. Fagan, Browning, Hess & McCahe's brood sow sale last spring. The writer representing The Homestead is pleased to assure our readers that the offering is one of the best he has ever inspected. No one will be disappointed in it, and for uniformity of type it cannot be excelled. In future issues we will have more to say regarding this offering and would advise our readers to write early for catalogs, kindly mentioning The Homestead, as per the advertisement on page 30.

MR. N. A. LIND'S SCOTCH BULLS.

The advertisement of the Beaver Creek Short-horns, of which Mr. N. A. Lind, of Rolfe, Iowa, is owner, will be found on page 24 of this issue. Mr. Lind has now on hand twenty-three pure Scotch hells, varying in age from a few months up to two years. The owner considers that he has never raised a more uniform lot, and among the number are several that will do to head any Scotch herd. A number of these bulls are sired by Imp. Morning Star, a very low-down, compact hull and a notably good breeder. He is by the great Duthie-bred hull, Pride of the Ring. McDiarmid is another hull that has been used somewhat extensively in the Lind herd. He is got by the Cruickshank Lavender, sired by Lavender Prince out of Mysie 50th. Other bulls are Imp. Black Watch, bred by Mr. Jas. Durno, of Aberdeenshire, Scotland; Imp. Fancy's Pride, one of the best stock bulls in the United States; Golden Lad, a richly-bred Brawith Bud; Victoria Prince and Bruce Nonpareil by Victor Nonpareil. A catalog of these young bulls giving full pedigree will be furnished upon application to Mr. N. A. Lind, of Rolfe, Iowa. Please mention The Homestead when you write.

LEFEBURE'S BELGIANS.

Mr. Henry Lefebure, of Fairfax, Iowa, changes his advertisement in The Homestead this week, announcing the new importation of Belgians, including his state fair and International prize winners. Mr. Henry Lefebure is a son of the late E. Lefebure, who was the pioneer importer of Belgians into Iowa. The elder Mr. Lefebure was born in Belgium and reared in the heart of the breeding district, hence was one of the best-informed men in America on Belgian horses. The writer has known Mr. Henry Lefebure for twenty years and is aware that during all the successful career of the elder E. Lefebure, Henry was active in the business and in reality had charge. Mr. Lefebure has facilities for buying equaled by no other American breeder or importer, in that his relatives in Belgium are among the foremost breeders of that country, and during the year the choicest stallion colts are spotted and purchased for Mr. Henry Lefebure, and shipped to him at Fairfax, Iowa. Hence Mr. Lefebure is in position to supply his trade with a class of Belgian stallions that cannot be duplicated for the prices he is asking. His

FREE A Nursery Book

Fully worth \$1.00 to any tree planter. It will give you the real facts about the care of trees. Has over 100 beautiful illustrations mostly from photos. We positively carry the most complete line of nursery stock in the West; only the hardest varieties of Trees, Shrubs, Vines, Roses, Paeonies, Perennials, Seedlings and Evergreens. You should have this book. It will help you make more money. It is free. Write for it before tomorrow.

Sioux City Seed and Nursery Co.
2113 Clark St. Sioux City, Iowa

farm is but a short distance from Fairfax, Linn county, Iowa, only seven miles from Cedar Rapids.

KEELEY CURES, DES MOINES, IOWA.

It is not necessary at this time to discuss how alcoholism is acquired. The province of the Keeley Cure is to treat the afflicted. Methods of prevention of acquiring the habit are vital, but the mission of Dr. Keeley is to cure those whose appetites have already gotten the better of them. The theory of Dr. Keeley is that the liquor habit is a disease of the nerve cells. "It is a condition of cell necessity wherein the cells have become so accustomed to the influence of alcohol that they are dependent on it and will no longer perform those duties and functions properly and painlessly except when under its influence." A craving appetite demands stimulus for daily or periodic indulgence. The conditions of the habitual drunkard are so shattered that it seems impossible for him to abstain from the liquid stimulus to which he is accustomed. The restoration of the functions of the nervous system and the eradication of the desire for unnatural stimulants is the mission of the Keeley Cure. The discovery of a cure for drunkenness was made by Dr. Leslie E. Keeley and his methods and medicines are given at the Keeley Institute at 706 Fourth street, Des Moines, Iowa. All patients receive their treatment at the institute. The Keeley Cure is not only for the liquor habit, but it also successfully used in neurasthenia, morphina, opium, cocaine and tobacco addictions. It is probable that a number of the readers of The Homestead have friends who are afflicted with some of these addictions. It would be a good plan to call at the institute at 706 Fourth street, Des Moines, Iowa, and have a personal interview with those in charge. The institute is only a short walk north on Fourth street from the Savory hotel and can readily be found. All correspondence and interviews are confidential and persons calling at the institute will receive courteous treatment.

NOVINGER & SONS' SHORT-HORNS.

For the past few months the well-known firm of Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., breeders of Short-horns, have been advertising a part of their large holdings of Adair county farms for sale. Having made disposition of a part of the lands, Messrs. Novinger & Sons now direct their advertising towards their large herd of Short-horns. Few herds have a stronger foothold than has the one owned by these gentlemen. Much has been said in the past two years of the progress this firm have made in the Short-horn world and much more will have to be said in the future if the public is to keep posted as progress is made. Few breeders have from as small a beginning made as rapid strides as has Mr. Novinger in the breeding of Short-horns. Hard, persistent work, stick-to-it-iveness, coupled with the knowledge of knowing what constitutes a good animal, has won out for Mr. Novinger. His herd, or more appropriately, the herd of Messrs. Novinger & Sons, numbers upwards of 100 head, about one-half of which are Scotch and the balance good American-bred sorts topped off with good Scotch breeding. The Novinger herd has not been built on any one or two families, as Mr. Novinger is of broader gage and is always willing to recognize any family or tribe so long as it is known to be good and backed by ancestors that have made good. For this reason we shall not go into details as to the various sorts represented in the herd, but will simply say that all are good and all are reliable, whether it be among his pure Scotch sorts or among the Scotch-topped sorts. Just now Messrs. Novinger & Sons wish to make a special drive on some twenty head of young bulls, most of which are ready for service. One-half of these are pure Scotch and all but a few are by Lavender Viscount 2d, an all red son of the champion Lavender Viscount. On dam's side he traces to Imp. Butterfly 4th through 6th Cloverleaf Butterfly by Lord Lieutenant 2d. His second dam, 3d Cloverleaf Butterfly, was by Burgomaster. Then follow such sires as Loveland Chief, Liddesdale, etc. As a sire Lavender Viscount 2d is making good in Messrs. Novinger & Sons' herd. The writer does not remember of ever seeing a better bull at Messrs. Novinger & Sons' than he saw there last week when inspecting the herd. The calf referred to was dropped last April and was got by Lavender Viscount 2d and out of Sweet Lavender. Sweet Lavender was bred by Messrs. Novinger & Sons and is a show calf and a producer of show stuff. She is a straight Lavender got by Golden Crest bred by Mr. James Black, of Barthol Chapel, Scotland, and was out of Imp. Lavender Thyme 2d by Prince of Fashion. Then follow such sires as Gondolier, Lord of the Isles, Lord Landsdowne, Count Blickerstaffe 2d and other noted bulls. A better pedigree could not be written and this youngster comes by his individual excellence through inheritance. He is a furry-coated red roan, built plenty close to the ground, is thick from end to end, with well-sprung ribs, good loin and a feeder's head. The man looking for herd bull material should stop here. But this is not the only good bull to be seen at Messrs. Novinger & Sons', as there are several, among which is a Lancaster got by the herd bull, Lavender Viscount 2d and out of a daughter of Golden Crown; second dam by Sir Charming 2d; third dam by Commander, and fourth dam Imp. Mary Ann of Lancaster 7th by Royal

Lancaster. This youngster was calved in March, is a red and a straight-lined fellow and exceptionally free from holes. A Victoria was also of such merit as to attract attention. A good strong youngster of the Imp. Eliza tribe will please many. Among those not by Messrs. Novinger & Sons' herd hull is a son of Hampton's Choice, a half brother to the Bellows Bros. great herd hull, Hampton's Best. The dam of this youngster is the Butterfly cow, 4th Cloverleaf Butterfly, got by Imp. Burgomaster, bred by Cruickshank; second dam Cloverleaf Butterfly by Imp. Lowland Chief, bred by Cruickshank; third dam Butterfly of Hazelridge 2d by Imp. Burgomaster, bred by Cruickshank; fourth dam Butterfly of Hazelridge by Imp. Liddesdale, bred by Cruickshank. Certainly the pedigree crank can be satisfied here and with a good, useful bull that will be a year old in January. An all-red fellow got by Scotland's Crown, Messrs. J. J. Littrell & Son's great herd hull, will also be found a bull worthy of attention if one wants thickness, depth of body, two good ends, a middle and a coat of hair. He belongs to the Rose Violet tribe, the oldest of all the Cruickshank tribes. These are but a few of the hulls Messrs. Novinger & Sons are offering and are pricing worth the money. They ask us to extend to all our readers an invitation to write them if hunting Short-horns, or, better still, come and see the herd. Their new advertisement will be found on this page. When writing them kindly mention "this paper."

PINE RIDGE STOCK FARM PERCHERON AND FRENCH DRAFT HORSES.

Mr. L. M. Hartley, of Salem, Iowa, is one of the oldest breeders of American-bred Percheron and French draft stallions and mares in this country. He has in all probability the largest and best equipped stallion barn in America, that cost him \$20,000 to build. It has been his aim to produce a class of American-bred draft stallions and mares that could not be surpassed by the best imported ones; that he has succeeded in this ambitious and laudable aim can be verified by a visit to his 2,000-acre farm three miles south of Salem, Henry county, Iowa, on the Mt. Pleasant & Keokuk branch of the C. B. & Q. railway. Perhaps one of the greatest Percheron stallions that has ever stood in eastern Iowa was that phenomenal old stallion, Sampson 27338. The last colts by this famous sire are now yearlings; hence this will be the last opportunity to get colts sired by this phenomenal stallion whose reputation is second to none. During the short course in agriculture held at Mt. Pleasant last week, where more than 300 of Henry county's best farmers were entered in the short course, conducted by Prof. C. F. Curtiss, Wayne Dinsmore, Holden and Bliss, of the Iowa Agricultural College, Mr. Hartley supplied six of his famous Pine Ridge stallions for the judging school. Certainly the short course people are to be congratulated on such a rare aggregation of such high-class Percheron stallions as subjects for this training school. Mr. Hartley has 150 head of stallions and mares now for sale at his farm and at the branch barn located at Moose Jaw, Saskatchewan, Can. The branch barn is in charge of Mr. E. F. Maxey. The writer priced Mr. Hartley's brood mares safe in foal and found that he is willing to sell many of his best mares, showing to be in foal, at the very low price of \$500 each. We know of no other place where mares of this class can be secured at these prices, but as they are raised out of doors on a large farm and have not cost their owner any extravagant feed bills, he is content to take the prices named. Our readers in search of high-class draft stallions and mares of the above breeds do well to correspond with Mr. Hartley.

SOUTHWESTERN NEBRASKA DUROC BRED SOW CIRCUIT.

We wish to make mention in this issue of the Duroc Jersey bred sow circuit to be held in southwestern Nebraska the last week in February. This circuit begins at Mr. Wm. Sanstead's, near Wilcox, Neb., on February 25th, who will offer a choice bunch of sows bred to such boars as Munger's Ideal by Ideal Perfection, first-prize pig at Wisconsin State Fair in 1905; second at Minnesota, and first at three interstate fairs. There will also be some good gilts in this sale sired by him and bred to a son of Red Chief. On February 26th Messrs. M. A. Sellers & Son, of Huntley, Neb., will offer forty head selected from their herd and bred to three good boars. Most of the yearling and aged sows in this sale will be bred to Sellers' Duroc, a son of Cole's Duroc, that is an all round good hog. They are also using a son of Ohio Chief that is one of the best Ohio Chief pigs we have seen this year. Some of the gilts will be bred to a son of Dandy Top Notcher by Tip Top Notcher. The third day will be taken by Messrs. S. J. Tillman & Son, of Ragan, Neb., who will offer a bunch of sows that as a whole would be hard to duplicate. They are very growthy, broad-backed sows with plenty of bone and as good blood lines as is known to the breed. The majority of these sows will be bred to Jumbo's Ideal, a son of Jumbo's Perfection, that bids fair to make as good a hog as his sire. Messrs. Tillman recently purchased a fine young boar by Nebraska Wonder, he by Crimmon Wonder, that is an attractive fellow and ought to make a cracker-jack. Mr. Geo. Karchner, of Wilcox, Neb., will sell on February 28th, and has a very promising bunch of pigs to offer on that date. He was lucky enough to secure the first-prize boar pig at the Kansas State Fair in 1905, which ought to be a great attraction for his coming sale. He is also using a grandson of Kan't Be Beat. On March 1st, Mr. C. C. Wassen, of Wilcox, Neb., will sell forty head, the tops of his last fall and spring crop of pigs. They are growthy, good-boned sows and a bunch that ought to prove good ones. They will be bred to such boars as Jumbo's Wonder, a full brother to Jumbo's Ideal, and Cole's Duroc II, by Cole's Duroc. The last day of the circuit will be taken by Messrs. A. A. & W. G. Karchner, of Wilcox, Neb., who have an extra good lot of sows. They raise their hogs on large alfalfa pastures, which generally assures good results for the purchaser. Their herd is headed by Lord Gold Finch, a hog that has a show yard record and has proven a great sire. There will be several of the best sows bred to him. There will also be several good sows bred to Nebraska Wonder, a son of Crimmon Wonder, that has produced some of the best stuff ever raised on this farm. Some of the gilts

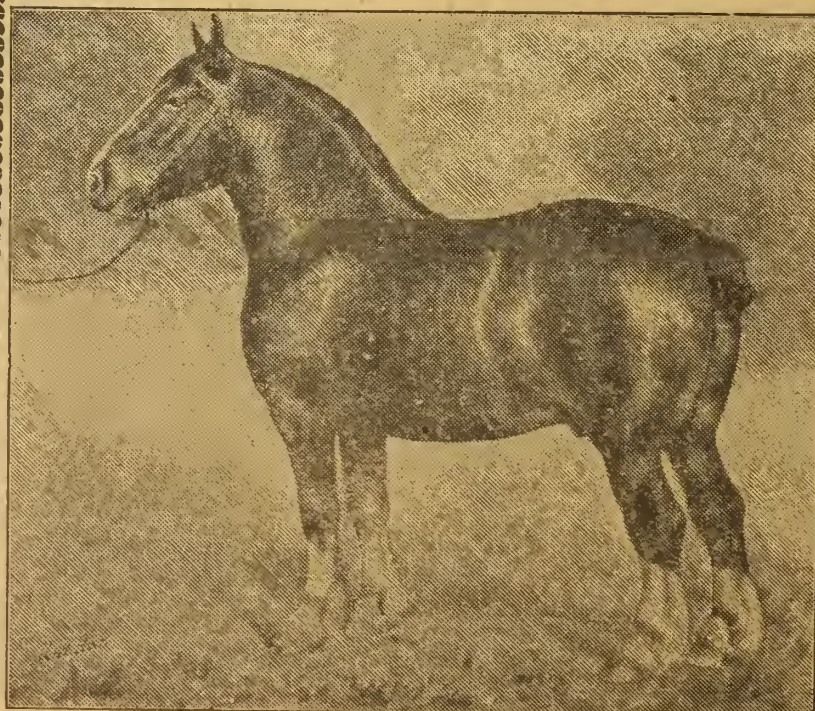

will be bred to a son of Morrison's Beil Top. This we consider a week of hog sales that you cannot afford to miss. They are all within a few miles of each other and the whole circuit can be attended at very little expense. Come out and see what the boys can raise in this part of the state.

FAIRCHILD & STEVENSON'S DUROC JERSEY SALE.

The opening sale of the new year will be held at the farm of Messrs. Fairchild & Stevenson, at Onawa, Iowa, on January 11, 1907. This is the home of the noted boar, Orion's Profit 23243, the sire of the Minnesota first-prize and sweepstakes boar, Dale, that swept everything before him in the northern state the last fall. He now heads the herd of that veteran breeder, Mr. Wm. Malcolm, of Bigelow, Minn., and he showed him at the fairs this fall. As this is the first public sale of Messrs. Fairchild & Stevenson, they are very desirous of making a good one and have therefore selected the best they have for this occasion. About fifteen sows that will be sold are bred to Orion's Profit, and several of his gilts will also be sold. Those who are wanting prospective winners should buy a sow bred to Orion's Profit. A greater part of the offering will be sired by Advance Lad 28771, a son of old Advance, and out of Lucy D. II., the dam of the noted boars, Proud Advance, Reed's Banker and Advancer, the latter being the first-prize aged boar at the Iowa State Fair this fall. Advance Lady, a good yearling sow sired by him, will be included in the sale. There will be two choice gilts sired by him that should not be overlooked. These are Rickey Ann and Ruth Advance, the latter being out of Paulette IV., one of the best brood sows in the herd. Rose Orion is a two-year-old sow, a full sister to the Minnesota sweepstakes boar, Dale, and she will be bred to Prince Tolstoy. Daisy Orion, a daughter of Orion's Profit, dam Lucy Long, by old Long John, will also be sold and she will be bred to Prince Tolstoy. Paulette II., a sow bred by Mr. H. F. Hoffman, will be sold, and she is bred to Orion's Profit. Another good brood sow is Lucy Long by Long John, and she will also be bred to Orion's Profit. They are offering a choice lot of gilts in their first annual sale which are very uniform in both size and color, and there will be some good bargains in their sale. A word in conclusion about the boars used in the herd. Orion's Profit we have mentioned above. Happy Medium, a son of the noted Iowa State Fair winning boar, Junior Jim, and one of his best sons, will be bred to many of the sows. He is owned jointly by Messrs. Manley & Co., of Lyons, Neb., and Messrs. Fairchild & Stevenson. Advance Lad, the sire of many of the sows in the sale, will also be bred to a few, and all in all it is an offering that deserves the attention of our best breeders and farmers. Our best breeders should come out and buy a sow bred to Orion's Profit, and he in the swim another year. Write for catalog at once and kindly mention The Homestead.

SPECIAL OFFER FOR THE HOLIDAYS.

On December 20, 21, 22, 23, 24, 25, 29, 30, 31, and January 1st The Chicago Great Western Railway will sell special round trip tickets to points in Arkansas, Colorado, Illinois, Indiana, Indian Territory, Iowa, Kansas, Louisiana, Michigan, Minnesota, Missouri, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Tennessee, Texas, Wisconsin and Wyoming at rate of one regular fare plus one-third; to points in Illinois, Indiana, Kentucky, Michigan, Ohio, New York, Ontario, Pennsylvania, and West Virginia at rate of one regular fare plus one-half, these being on sale only on December 20, 21, and 22. Tickets to points west of Chicago

NAILSTONE RED LYNCH (23528)

This is one of the good kind found in the stud of Messrs. Watson, Woods Bros. & Kelly, of Lincoln, Neb. This firm now have on hand sixty Percheron, Shire, Belgian and Oldenburg coach stallions. Each horse has been picked in his native land by an expert who knew the country, knew the people and was a judge of good horses. These horses were imported early in the fall so that they are acclimated now and in a fine condition to go out, though not fat. Mr. Watson of this firm will land January 16th with fifty more.

TOO LATE TO CLASSIFY.

PINE RIDGE STOCK FARM

Has the biggest and best barn in the United States and it contains the BIGGEST and BEST lot of

Percheron and French Draft Horses.

The last chance to obtain a colt by HANSON 27238, as his last colts are now yearlings. Over 150 head of horses showing more bone, size and quality than any similar number in America. TAVERNIER P. 35719 and F. D. 12610 now at head of the stud. Prices below competition.

Barn at Moose Jaw, Sask., Can., in charge of E. F. Maxey.

L. M. HARTLEY, SALEM, IOWA.

.....9 CHOICE YEARLING HEREFORD BULLS 9..... FOR SALE.

I HAVE for sale the choicest lot of yearling Hereford bulls that I have ever had. They are sired mostly by Beau Donald 48th 121465 and out of cows of the richest Hereford breeding known to the breed, such as Anxiety, Lord Wilton, The Grove 3d, and others of like breeding. A visit to my farm, two miles west of Mechanicsville, Iowa, will prove that the bulls I am offering at from \$100 to \$125 are the equal of those usually sold at twice this sum. I have no females to spare at this time. Have been breeding Herefords seventeen years and have fifty breeding cows in the herd. For particulars, address.

LIVE STOCK AUCTIONEERS.

The Jones National School of Auctioneering and Oratory

IS the original school, and has had five times as many students as all other auction schools in the world combined. The instructors are practical auctioneers of national reputation. Their reputations have been made by a careful study of the auction work and by conducting all classes of sales throughout the United States and Canada. A special instructor is employed in each department. Students conduct sales every day. The school does not advertise to instruct students in work we do not understand ourselves. When spending your time and money to secure an education the school should be considered, not the price. The eighth term opens January 2, 1907, and following this term the school will practically be open all the year round, with the possible exception of a short summer vacation, and there will be classes opening at short intervals, enabling those who desire to attend to course, with an opportunity to graduate in four weeks if proficient. Write for free catalog, list of graduates, and other information, mentioning this paper, and come when you are ready.

Jones National School of Auctioneering and Oratory, Phone West 1228, 231 Ashland Boulevard, CHICAGO, ILLINOIS.

ABERDEEN ANGUS CATTLE.

HORSES.

HIS MAJESTY KING EDWARD VII. and LORD ROTHSCHILD'S Exhibit of Stallions were purchased by us at the International, Chicago, 1906.

ROBERT BURGESS & SON,

Prizes won in this year, demonstrating to the public the SUPERIOR QUALITY of our STUD.

Champion Percheron stallion at the Kansas State Fair, champion Belgian stallion at the Kansas State Fair, champion Shire stallion at the Illinois State Fair, champion Shire stallion at the American Royal, Kansas City, Mo., champion American-bred Percheron stallion at the American Royal, first best five Percheron stallions at the Kansas State Fair, first best five Belgian stallions at the Kansas State Fair, first best five Shire stallions at the Illinois State Fair, second best five Belgian stallions at the Illinois State Fair, first best five Shire stallions at the American Royal, Kansas City, second best five Percheron stallions at the American Royal, Kansas City, first, third and fifth Shire stallion four years old and over, first Shire stallion three years old, first Shire stallion two years old, first Shire stallion one year old, champion Shire stallion any age, gold medal best imported Shire stallion any age, best group five Shire stallions any age, fifth Belgian stallion four years old and over, first Belgian stallion three years old, fifth Belgian stallion two years old, second Percheron stallion one year old, second Percheron two animals from same dam bred by exhibitor, third Hackney stallion four years old and over, third Hackney stallion three years old.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man) whose influence is obtained by a large commission, paid to him by the seller in placing the stallion. The long-time notes from three to five years have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500, which has to be paid to this influential neighbor or neighbors.

Good American Bred Stallions, \$800 to \$1,000. First-class Imported Stallions, \$1,200 to \$1,600. Choicest Stallions a Little Higher.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than any one. Come to the barns and get the most reasonable terms that can be offered.

WENONA, ILLINOIS.

WICHITA, KANSAS.

Breeders' Sale--200 Horses 200

BLOOMINGTON, ILL., IN COLISEUM, Jan. 9, 10, 11, 1907.

Wed. and Thurs., Jan. 9, 10, Will sell 140 Reg. Percherons, French Draft, Shires, Clydesdale horses, mares, stallions. Friday, Jan. 11, Will sell 60 Reg. Trotters, Grade-Draft, Coach, All-Purpose and Saddle horses, stallions, mares and geldings.

These horses are consigned by the very oldest breeders in the state and out of the very best families and show herds that represent over 2,000 premiums to their credit. We don't claim to have all the prize winners of France, England or Scotland, but we do claim to sell you horses that were good enough to win at St. Louis, Springfield and other fairs in 1904-5-6. This will be one of the largest sales of pure-bred horses ever held in the state. These are the wide-as-a-wagon kind and a number of them will weigh over 2,000 pounds. We have some with fast marks and several good match teams and a number of gentleman drivers.

CONSIGNORS—Wm. Crownover, Hudson, Iowa; A. J. Dodson, Normal, Ill.; A. M. Storm & Son, New Lenox, Ill.; John C. Baker, Manbattan, Ill.; D. Augustin, Carlock, Ill.; Hurt & Reid, Arrowsmith, Ill.; Ed Hodgson, El Paso, Ill.; Ed Moots, Normal, Ill.; Barron & Raboin, Ashkum, Ill.; Geo. D. Enyart, Onward, Ind.; S. H. Johnson, Minier, Ill.; Downs Bros., Clinton, Ill.; Tisley Bros., Lockport, Ill.; Wm. Ritter, Arrowsmith, Ill.; Walter Allen, Dunlap, Ill.; W. F. McTaggart, Pana, Ill.; Bloomington Horse Commission Co., Bloomington, Ill.; Elvin & Campbell, Bloomington, Ill.; M. G. Murray, Holter, Ill.; Frank McClure, Gibson, Ill.

COLS. R. L. HARRIMAN, JOHN D. SNYDER,
D. L. BROWN, AUCTIONEERS.

C. W. HURT, MGR., ARROWSMITH, ILL.

Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English Shire, Belgian and Hackney stallions. Mr. Watson is in Europe constantly buying. 50 head more will arrive soon. This firm are careful in their selections, buying only the best stallions and selling them at a very small profit. We give our customers the lowest possible price, the very best of stallions and a guarantee that you know is absolutely good and backed up by a reliable firm. Write for pictures.

Watson, Woods Bros. & Kelly Co.,

LINCOLN HOTEL
BUILDING,

Lincoln, Neb.

S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25 Percheron stallions, among which are prize winners in France, coming threes and fours, weighing 1,900 pounds, all dark colors. 25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coaches you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

Percheron Stallions and Mares For Sale

I AM the breeder of Glades, second prize winner at the St. Louis World's Fair, the largest two-year-old mare in the world. My three-year-old stallions weigh 1,850 to 1,900 lbs. I also offer my herd stallion, a jet black, 2360 lbs.

NICHOLAS STAMM,

Letts, Iowa

Percheron Stallions For Sale.

JESSE S. GOLDER, Scribner, Neb.

IMPORTED Shire, Belgian and Percheron stallions, \$1,000. Home bred draft stallions, \$250 to \$900. Hart Bros., Osceola, Iowa.

TAYLOR & JONES,

IMPORTERS AND BREEDERS OF

PERCHERON, SHIRE, HACKNEY AND BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

TAYLOR & JONES,

WILLIAMSVILLE, BOX 68, ILLINOIS.

Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pumped with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest to Omaha, eight miles east of Fremont.

JACKS.

FOR SALE.

GOOD, large, young, lively, heavy bone Kentucky Mammoth Jacks at reasonable prices. These Jacks have been carefully selected and are right in every respect. Located eight miles west of Cedar Rapids, Ia. on Chicago & Milwaukee, also Chicago & Northwestern railroads.

John Henry, Fairfax, Iowa, at the Fair Grounds.

When Writing to Advertisers Please Mention This Paper

HORSES.

FRANK IAMs

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Manma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 SAVED AT IAMs \$1,000

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eyeopener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.

THE Lafayette Stock Farm

Lafayette, Ind.

Largest importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International surprised the hundreds of thousands of visitors that attended. We can and do sell our stallions as low as they can be sold at any place in America.

TRUMANS' PIONEER STUD FARM
BUSHNELL, ILLINOIS.

OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best of the old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our farms at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANNs BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

M. L. AYERS - SHENANDOAH, IOWA.

GREAT COMBINATION SALE OF

HEREFORD CATTLE

To Be Sold in Steam Heated Sale Pavilion,

SOUTH OMAHA, NEB., JANUARY 9, 1907

50 Head of Choice Breeding Stock **50**
From Seven Good Herds.

Consigned by such well known breeders as:

W. N. Rogers, McCook, Neb.; W. W. Wheeler, Harlan, Iowa;
E. J. Elliott, Sutherland, Iowa; E. N. & A. L. Allen, Cambridge,
Neb.; Z. T. Kinsell, Mt. Airy, Iowa; Emil Hoffmeyer, Stanton, Neb.;
Woods, Bancroft & Heing, Madison, Neb.

In this sale will be offered the best lot of Herefords to be entered in a public sale this year. The breeding and individuality of every head will be good enough to make them fit companions for any herd in the country. There are show bulls in this offering with as choice blood lines as is known to the breed. The females are a choice lot and all safe in calf to noted bulls of show yard fame.

Catalogs and other information cheerfully furnished by

W. N. ROGERS, MGR.

Aucts. **McCook, Neb.**

FAIRCHILD & STEVENSON'S DUROC-JERSEY SALE

ONAWA, IOWA, JANUARY 11, 1907.

50 Head 17 Fall Yearling and Matured Brood Sows--Rest Gilts, 50 Head
The home of ORION'S PROFIT, the sire of Dale, the Minnesota sweepstakes boar. ORION'S PROFIT will be bred to 15 sows in the sale, and a few of his daughters will be included in the sale. A few choice gilts sired by PRINCE TOLSTOY will also be offered and these will be bred to HAPPY MEDIUM, a son of the noted boar, Junior Jim. The greater part of the offering will be sired by ADVANCE LAD, a full brother to the great Proud Advance. Two granddaughters of old Orion will be sold. Get our catalog. It contains some of the most up-to-date breeding. Address.

FAIRCHILD & STEVENSON, ONAWA, IOWA.
Col. L. L. Luther, Auct.
